

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

Poor Law Board, Whitehall,
2 June 1866.

MAY IT PLEASE YOUR MAJESTY,

We, the Poor Law Board, beg leave to present to Your Majesty the following Report of our proceedings during the past year.

We desire to submit, in the first instance, the following statements showing the condition of pauperism during that period.

The sum of 6,264,961*l.* was expended for the relief of the poor during the year which ended on the 25th of March 1865, being 158,422*l.* less than the sum expended during the preceding year. Expenditure for Relief during the Year ended at Lady-day 1865.

The following Table shows the comparison of the expenditure of the years 1863-64 and 1864-65 :—

Years ended Lady-day.	Expended for Relief of the Poor in England and Wales.	Decrease in 1865, as compared with 1864.	Decrease per Cent.	Rate per Head on Population.	Decreased Rate per Head.
	£	£		s. d.	s. d.
1864	6,423,383 }	158,422	2·5 }	6 2½ }	0 2½
1865	6,264,961 }			6 0 }	

Note.—The Summary of the Poor Rate Return inserted in the Appendix (pp. 10 *et seq.*) sets forth the expenditure, the total of which is shown in the above Table, more in detail. This expenditure comprises, “in-maintenance,” column (a); “out-relief,” column (b); “maintenance of lunatics in asylums or licensed houses,” column (c); “workhouse loan repaid, and interest thereon,” column (d); “salaries and rations of officers,” column (e); “other expenses of or immediately connected with relief,” column (f). The “other expenses” comprehend the cost incurred for emigration, for extra medical relief and fees, and for the burial of paupers, &c.

The rate per cent. of the decrease and increase in the expenditure for relief, as regards each union county respectively in England and Wales, is as follows :—

UNION COUNTIES which exhibit decreased Expenditure :—

Decrease per Cent.

Lancaster . . . 19·4	Buckingham . . . 2·8	Yorkshire, W. Riding 0·7

1864 .	20,663,000*	6,423,383	6 2½	
1865 .	20,881,000*	6,264,961	6 0	
Average of the 31 years (1835 to 1865)			6 0	

Note.—The net annual value of rateable property in 1841 was 62,540,030*l.*; in 1847 it was 67,320,587*l.*; in 1850 it was 67,700,163*l.*; and in 1856 it was 71,840,271*l.*

* See Registrar General's Quarterly Returns.

The preceding statements, taken from the Annual Poor Rate Returns, have reference to the year ending at Lady-day in each case, and comprise the expenditure for all purposes connected with the relief of the poor in England and Wales.

The following statements show the amount expended for in-maintenance and out-door relief only, in Unions and Parishes under Boards of Guardians, and afford the means of comparing the expenditure under that head for the half years ending respectively on the 25th of March 1864 and 1865, as well as those ending on the 29th of September of the same years :—

Comparative Expenditure for Relief only during the Half Years ended at Lady-day and Michaelmas 1865.

Number of Unions.	Half Years ended Lady-day. (Population 19,886,104.)	Expended for In-Maintenance and Out-Relief.		
		In-Maintenance.	Out-Relief.	Total.
655 {	1864	£ 559,893	£ 1,691,594	£ 2,251,487
	1865	589,492	1,630,366	2,219,858
Increase	29,599	—	31,629
Decrease	—	61,228	or 1·4 decrease per Cent.

Number of Unions.	Half Years ended Michaelmas. (Population 19,886,104.)	Expended for In-Maintenance and Out-Relief.		
		In-Maintenance.	Out-Relief.	Total.
655 {	1864	£ 511,332	£ 1,592,623	£ 2,103,955
	1865	541,736	1,574,480	2,116,216
Increase	30,404	—	12,261
Decrease	—	18,143	or 0·6 increase per Cent.

The amounts expended for in-maintenance and out-door relief to irremovable paupers during the half-years ended at Lady-day and Michaelmas 1865 are shown in respect of each union-county (so far as the returns enable the sums to be discriminated) at pp. 166 *et seq.* and 176 *et seq.* of the Appendix.

Irremovable Paupers.

The unions making separate returns of this class of expenditure now contain about *seventeen twentieths* of the entire population. The figures in the following Table have been abstracted from the Appendix to this and preceding annual reports.

Parochial Year.	Population.	IRREMOVABLE PAUPERS.			Cost of In-maintenance and Out-door Relief to all Classes (inclusive of Irremovable Paupers).	Ratio per Cent. of (a) to (b).
		In-main-tenance.	Out-door Relief.	Total.		
		£	£	(a) £	(b) £	
1855 - -	15,723,869	133,415	680,328	703,643	8,531,021	30·77

Decrease	1,110	19,706	20,816 or 12·2 per Cent.

Estimate
of the
Pauperism

The persons in receipt of relief in certain parishes incorporated under Gilbert's Act, or in single parishes still governed by the

statute 43d Elizabeth, (the population of such parishes being about 180,000,) are not included in the summaries given in the preceding page, no returns having been received from them.

We have, therefore, made an estimate of the number of paupers in the places not included in the above summaries; and for the purpose of showing the average number *at one time* during each year, we have taken the mean of the numbers in receipt of relief on the 1st of July and the 1st of January respectively.

The result of this estimate for each year from 1849 (being the first year for which it can be given) to 1865 appears in the following Table, which may be taken as exhibiting the pauperism of England and Wales.

Years ended at Lady-day.	Population of England and Wales.	The Mean Number of Paupers of all Classes (including Children) at one time in receipt of Relief in England and Wales.			Ratio per Cent. of Paupers relieved on the Population.	The Mean Number of Adult Able-bodied Paupers (exclusive of Vagrants) at one time in receipt of Relief in England and Wales.			Ratio per Cent. of Adult Able-bodied Paupers in receipt of Relief to the Number of Paupers of all Classes relieved.	Average Price of Wheat per Quarter.
		In-door.	Out-door.	Total.		In-door.	Out-door.	Total.

* The Population for 1851 and 1861 is that given in the Census; that for the other years is estimated.

Comparing the last day of the last week of each quarter of 1864 and 1865 respectively, the following are the results as regards pauperism in the Metropolis:—

	Number of Paupers relieved (exclusive of Lunatics in Asylums and Vagrants).			
	Lady-day Quarter.	Midsummer Quarter.	Michaelmas Quarter.	Christmas Quarter.
1864 . .	100,824	88,527	89,933	99,115
1865 . .	105,988	90,722	91,022	103,192
Difference	5,164 or 5.1 per Cent. Increase.	2,195 or 2.5 per Cent. Increase.	1,089 or 1.2 per Cent. Increase.	4,077 or 4.1 per Cent. Increase.

Arranging the Metropolitan Unions into five districts, as shown in the Table at pp. 272-3, Appendix, the numbers, as regards the several districts, will stand thus:—

LAST DAY in the LAST WEEK of the QUARTER.

		Lady-day.	Difference.	Mid-summer.	Difference.	Michael-mas.	Difference.	Christ-mas.	Difference.
WEST DISTRICT	1864	13,930	2'40	11,301	1'03	11,831	0'60	13,473	1'20
	1865	14,365	per Cent. Increase.	11,417	per Cent. Increase.	11,810	per Cent. Decrease.	13,633	per Cent. Increase.
NORTH DISTRICT	1864	17,979	4'90	16,109	0'53	16,793	1'04	18,388	4'92
	1865	18,800	per Cent. Increase.	16,028	per Cent. Decrease.	16,418	per Cent. Decrease.	19,341	per Cent. Increase.
CENTRAL DISTRICT	1864	17,497	1'97	15,448	3'13	15,451	1'70	16,821	4'36
	1865	17,841	per Cent. Increase.	15,777	per Cent. Increase.	15,718	per Cent. Increase.	17,638	per Cent. Increase.
EAST DISTRICT	1864	19,115	9'28	17,178	4'28	17,080	2'43	18,735	6'60
	1865	20,208	per Cent. Increase.	17,917	per Cent. Increase.	17,488	per Cent. Increase.	19,588	per Cent. Increase.
SOUTH DISTRICT	1864	20,208	5'67	22,406	3'88	22,726	2'30	31,780	3'25
	1865	34,133	per Cent. Increase.	29,838	per Cent. Increase.	29,888	per Cent. Increase.	32,792	per Cent. Increase.

Insane Paupers,
1st January
1865.

We have caused the lists of lunatics, idiots, and other persons of unsound mind, chargeable to the poor rates on the 1st January 1865, to be tabulated.

It appears from these returns that in 662* Unions and single Parishes under Boards of Guardians, there were 38,487 insane paupers, of whom 28,466 were lunatics and 10,021 idiots. The number of paupers, inclusive of the insane, was on the same day 974,772.†

In regard to the sexes of the insane paupers, it will be seen that 16,826 were males, and 21,661 females.

Insane Paupers.	Males.	Females.	Total.
Lunatics - -	12,259	16,207	28,466
Idiots - -	4,567	5,454	10,021
Total - -	16,826	21,661	38,487

These paupers were maintained in the following establishments; viz.—

20,910 in County or Borough Lunatic Asylums.

1,264 in Registered Hospitals, or in Licensed Houses.

9,756 in Union or Parish Workhouses.

1,041 in Lodgings, or Boarded out.

5,516 resided with their Relatives.

The number of Insane Paupers in each Union-County is set forth, with other particulars, in the Appendix at pp. 274 *et seq.*

Expenditure
for relief.

It will be observed, on referring to the Table in p. 7., that the principal decrease in the rate of expenditure during the year

* Inclusive of eight Gilbert's Incorporations.

† Exclusive of the paupers in seven of the Gilbert's Incorporations, from which the Poor Law Board do not receive this information; the number of insane paupers in these places was 111.

1864-5 has been in the two counties of Lancaster and Derby, the seat of the cotton manufacture. In Lancashire the decrease has been at the rate of 19·4 per cent. But notwithstanding such decrease, the total expenditure in that county has still very much exceeded its former and ordinary amount. In the year ended at Lady-day 1862, the total expenditure for relief in the county was 468,430*l.*; in 1864, 856,048*l.*; in 1865, 689,707*l.* It is probable that the repayment of the loans raised to provide for the relief of the poor during the crisis of the distress in the cotton trade may for some time prevent the expenditure in that county from returning to its usual level. It is satisfactory, however, to state that the administration of relief appears to have resumed its ordinary course, and that our assent is seldom now required to deviations from the provisions contained in the Out-door Relief Regulations Order.

In Derbyshire the decrease has been at the rate of 18·7 per cent., and it has occurred principally in the Glossop Union, where the expenditure has now been reduced from 17,482*l.* in the year 1863-4 to 5,745*l.* in the year 1864-5. The relief in the county of Derby in the year ending at Lady-day 1861-2 was 53,758*l.*; in 1864-5, 57,203*l.*

The highest rate of increase in the expenditure, namely, 10·7 per cent., has occurred in the county of Rutland, which contains two Unions only, but there was a decrease in the previous year as compared with the year 1863 of 8·5 per cent., and the relief in the last year does not much exceed its usual amount. Such oscillations in the amount of the expenditure are probably owing to temporary and accidental causes. We regret, however, to observe that in some counties there has been a continued rate of increase in the expenditure. Thus in the county of Durham there was in the year ending at Lady-day 1863 an increase of 5·3, in 1864 of 4·3, and in 1865 of 5·1 per cent. In Middlesex (Metropolitan) there was in 1863-4 an increase of 1, and in 1864-5 of 3·6 per cent. Though the increase in the expenditure in these and in the other counties included in the Table in p. 8 has not been very considerable, we still think that, in the generally prosperous state both of trade and of agriculture, such increase is not satisfactory, and it may well deserve the attention of the Guardians of the several Unions to ascertain in what items it has occurred, and whether, while due provision is made for the relief of the destitute, a diminution in the expenditure might not be effected.

We have continued during the past year to issue orders for the advance of further instalments to the Unions in the Manufacturing Districts under the provisions of the Public Works (Manufacturing Districts) Act. We refer for the particulars of these operations to the Report of Mr. Rawlinson in the Appendix, p. 42 *et seq.*

By an Act passed in the last Session of Parliament, the 28 & 29 Vict. c. 34, the provisions of the Metropolitan Houseless Poor

Public
Works
(Manufacturing
Districts) Act.

Metropo-
litan House-
less Poor.

Act of the previous year have been made perpetual. We insert in the Appendix, pp. 30 *et seq.*, copies of the circular letters which we have issued on the subject of this Act, dated 30th August 1865, and November 1865. We also insert in the Appendix, p. 305, a statement of the Unions and Parishes in respect of which we have certified that adequate accommodation for the houseless poor has been provided by the Guardians.

It will be seen that of the thirty-nine Unions and Parishes included in the Metropolitan District, thirty-three have already provided adequate accommodation for the casual poor, and measures are in progress in the remaining six Unions or Parishes for rendering the accommodation for this class sufficient and satisfactory.

Cost of
Relief to
the House-
less Poor.

We have received from the Guardians of several of the Unions and Parishes statements of the sums expended by them in carrying these arrangements into effect; and under the provisions of the 27 & 28 Vict. c. 116. s. 4, and the 28 Vict. c. 34. s. 3, we have notified to the Guardians our allowance of such of these sums, as appeared to us to be expended in temporarily providing and maintaining such wards or other places in order that the amounts might be reimbursed by the Metropolitan Board of Works.

When the whole of the arrangements are completed we shall be enabled to state the particulars of the amounts so expended, and also the amounts which on the certificate of the auditor may have been repaid by the Metropolitan Board of Works to the several Unions and Parishes for the cost of the actual relief of destitute wayfarers, wanderers, and foundlings, under the provisions of the 27 & 28 Vict. c. 116. s. 1.

Wayfarers,
&c. relieved
in one night
in 1864, 1865,
and 1866.

The question of the relief of the wayfarers and the houseless poor having attracted much public attention, and proper facilities for obtaining such relief having been greatly extended in the Metropolis, the effect of these measures has necessarily been to increase very considerably the number of applications from this class of persons for relief, as is shown by the following figures:—

Number of vagrants relieved during the week ended the—						Average
						per Night.
5th May	1864	-	-	-	4,282	612
"	1865	-	-	-	7,745	1,106
"	1866	-	-	-	8,421	1,203

It is not, however, unsatisfactory to us to observe that this increase has taken place, for it enables us to state that there need not and should not now be a houseless poor person in the streets of London.

Police in-
spection
of Casual
Wards.

The Act of the 28 Vict. c. 34. s. 2. required that the Poor Law Board should cause the wards and other places of reception to be officially inspected, and that the results of such inspection should be reported to the Poor Law Board. In carrying this provision of the Act into effect we thought, having regard to the character of some of the persons relieved in these wards, that such inspection would most effectually and satisfactorily be made by officers connected with the Metropolitan Police. We there-

fore communicated with Sir Richard Mayne on the subject, who readily undertook to have the inspection conducted by the Superintendents and Inspectors of Police at the nearest station to each ward. The required inspection has accordingly taken place; and the result has been reported to the Board from time to time in a form provided for the purpose. The reports, with some few exceptions, have been satisfactory; and in those cases in which any defects appeared to exist in the arrangements or management of the wards, we have brought the matter under the consideration of the Guardians with a view to their remedy.

The number of vagrants received nightly into each of the several wards appears from these returns to vary considerably; but the total number in the thirty-nine Unions and Parishes comprised in the Metropolitan District averages from 1,000 to 1,100 persons nightly, besides those who may have been sent to licensed lodging houses. The total accommodation provided is for 2,136 persons, which therefore appears ample for the intended purpose. We believe that the objects of the Metropolitan Houseless Poor Acts have been fully secured, and that at a cost trifling in amount, when extended over the whole Metropolis, a great improvement has been made in the relief of this class of cases.

We think it desirable that the dietary for the inmates of the vagrant wards, and the general arrangements for their relief, should be of the same character in all the wards; and we have therefore issued a general order prescribing a uniform dietary for them, and have sanctioned tasks of work of a similar character to be performed in return for the relief afforded in all the wards.

We have continued to give much attention to the important question of medical relief to the sick poor. We annex in the Appendix, pp. 23, 24, a circular letter addressed by us on the 12th of April 1865 to the Boards of Guardians, urging upon their consideration the resolution of the Committee of the House of Commons on the subject of providing cod-liver oil, quinine, and other expensive medicines. We did not think it advisable to issue any positive regulation on the subject, but the course which we have taken of bringing the question under the notice of the Guardians has had a satisfactory result; and in numerous cases arrangements in conformity with the recommendations contained in the circular letter have been made by the Guardians, and have received our sanction, especially with reference to the supply of cod-liver oil at the expense of the ratepayers.

The state of the workhouse infirmaries and sick wards, particularly in the Metropolis, has also engaged our serious attention; and we have thought it advisable to obtain reports from Mr. Farnall, C.B., and Dr. Edward Smith, F.R.S., two of our inspectors, as to the existing accommodation and management of the sick wards and infirmaries attached to the Metropolitan workhouses. On the receipt of their reports, the measures which may be necessary to improve the administration of this

house In-
firmaries.

important branch of relief in the Metropolis will receive our careful consideration.

Nursing in
Sick Wards.

With the view of promoting a better system of nursing in the hospitals and sick wards of the workhouses throughout the country we issued a circular letter, dated 5th May 1865, Appendix, p. 24, pointing out the expediency of providing a sufficient number of competent paid nurses, and we have the satisfaction of stating that the suggestions made in that letter have led to the appointment of additional nurses in many workhouses. We also think it right to mention that in the parish of Liverpool, through the munificent assistance of a gentleman of that town, Mr. W. Rathbone, jun., who has placed at the disposal of the select vestry a sum of 1,000*l.* a year for three years, arrangements have been made for introducing into one of the hospitals of the very large workhouse of the parish a system of nursing by trained nurses. We have received from Mr. Corbett, the inspector of the district, and we insert in the Appendix, pp. 62 *et seq.*, copies of reports lately made by the master of the workhouse and the medical officers to the Workhouse Committee on the subject. These reports show that much benefit has already been gained from the measure, both in the actual nursing of the sick and the general state of the hospital. We shall watch with much interest the further results of this experiment. In the Chorlton Union, where fever has prevailed to a serious extent during the past year, great difficulty has been found in providing nurses for the workhouse hospitals, but it has been overcome by the arrangement thus described in a letter from the clerk :—

“ Owing to the difficulty in obtaining competent nurses for the workhouse hospitals, the Guardians have accepted an offer made by the Mother Superior of All Saints’ Home, Margaret Street, Cavendish Square, London, and have appointed two of the sisters of that establishment to be superintendent nurses without salary, but with suitable board and apartments in the workhouse, the Guardians paying the travelling expenses from and to London. The sisters appointed are named Elizabeth and Helen. Both have had very considerable experience in hospital matters, and although they have been acting only about a week, the Guardians find a very marked change has taken place in the hospitals.”

We have reason to believe that further experience has confirmed the favourable opinion entertained by the Guardians as to the result of these appointments ; and we desire to record our sense of the charitable assistance thus afforded in the hospitals of the Chorlton Workhouse by the sisters of the All Saints’ Home, and to acknowledge the great benefit derived from the gratuitous services of those who have undertaken this work,—a work not only of arduous labour, but of considerable risk, since we regret to state that several of the nurses employed under them have been attacked by the fever, and some have died of it. The delicate state of the health of one of the sisters originally sent obliged her to leave the workhouse, but her place was immediately supplied by another sister from the same institution.

We insert in the Appendix, pp. 308 *et seq.*, the usual list of the orders issued by us during the year 1865 for the erection of new workhouses, or for the enlargement and improvement of existing workhouses, according to plans to which our approval has been given. New Work-houses.

We also insert in the Appendix, p. 306, a statement of the names and particulars of the schools which we have certified during the past year, under the authority of 25 and 26 Vict., c. 43, as fitted for the reception of such children or persons as may be sent to them by the Guardians of any Union or Parish under the provisions of the Act. The statement is in continuation of that contained in our report of the previous year, p. 325. Certified Schools.

The usual statement as to the number of poor persons who have emigrated to the British Colonies at the cost of the poor rate, and of the sums authorized to be expended for the purpose during the year 1865, is inserted in the Appendix, p. 307. The total number of emigrants was only 20. Emigration.

A statement will be found in the Appendix, pp. 282 *et seq.*, showing the daily average number of children attending Workhouse Schools in England and Wales, as well as the number attending District Schools, during the half year ended at Lady-day 1865; and also the amount of money paid from the Parliamentary grant, in respect of the salaries of the schoolmasters and schoolmistresses, for the year ended at the same period. The following is a summary of this statement:— Education of pauper children.

Average daily number of children attending *Workhouse* schools and *separate Union or Parochial* Schools during the half-year ended at Lady-day 1865:—

Boys.—

Under 10 years of age . .	8,395	
Above 10 years of age . .	7,925

B

Vaccination. A summary of the returns received from the several Unions and Parishes in England and Wales of the number of persons vaccinated by the public vaccinators during the year ended at Michaelmas last is given in the Appendix, pp. 317 *et seq.* This summary shows the number of persons vaccinated during the year to have been 588,361, being an increase upon the number vaccinated during the previous year of 51,149. The summary also shows that the number of cases in which the vaccination has been successful is 578,583, which is an increase of 49,104 upon the number successfully vaccinated last year. The births during the year in the several Unions were 742,680, being an increase of 3,444 upon the preceding year.

Audit Districts. During the past year the office of Auditor for the West Sussex district has become vacant by the death of the late auditor, and in pursuance of the course which, as stated in our last Report, we have thought it advisable to take in such cases, we have annexed the several Unions comprised in this district to the adjoining East Sussex and Surrey audit district.

Isle of Wight. Our attention was drawn in the early part of last year to a difficulty which had occurred in the administration of the laws for the relief of the poor in the Isle of Wight.

This island, which contains 30 parishes and places, has been governed for the purposes of the Poor Laws by a corporation of Guardians elected under a Local Act (16 Geo. 3., c. 43), and entitled "The Guardians of the Poor within the Isle of Wight."

The Act authorized the Directors and Guardians to assess upon the several Parishes such sums as they might deem necessary for the relief of the poor; but at the same time it provided that those sums should not exceed the average amount raised yearly for the relief of the poor from Easter 1765 to Easter 1770.

Under the limit imposed by that section the total sum raised in any one year could not exceed 5,160*l.* 7*s.* 1*½d.*, and although a general Act (36 Geo. 3. c. 10.), applicable to this and other local incorporations, enabled the Guardians to raise a sum beyond such limit, the enactment only took effect whenever the average price of wheat at the corn market in Mark Lane, London, should exceed the average price of wheat at the same market during the years 1765-70.

Under this condition, two reasons rendered the provision for extending the amount to be raised for the relief of the poor wholly inoperative.

In the first place it has become impossible to ascertain what was the price of wheat in Mark Lane in the years 1765 to 1770, inasmuch as no returns of such prices are in existence, the record having been destroyed by fire. And secondly, so far as can be judged from the price of wheat in the Windsor market during those years, the price of wheat was lower in the year ending at Lady-day 1865 than in the years referred to.

The expenditure of the island, so far from being confined within the limit specified in the Local Act, had increased from

5,160*l.* 7*s.* 1½*d.*, to about 13,000*l.*; and if the provisions of such Act had been duly observed, the difficulty which has now occurred would have occurred much sooner.

The only mode which we could suggest for extricating the Guardians from the embarrassment in which they were involved was the dissolution of the old corporation, and the reconstruction of the Union under the provisions of the Poor Law Amendment Act.

This was accordingly recommended to the Directors and Guardians in a conference held with them by Mr. Lumley, assistant secretary to the Poor Law Board, and Mr. Hawley, the inspector of the district; and after considerable discussion and consideration, a resolution for its adoption was passed by a large majority of the Directors and Guardians. On receiving the consent in writing of more than two-thirds of that body, we proceeded under the 32d section of 4 & 5 Will. 4. c. 76. to dissolve the corporation and reconstruct the Union. The particulars of the new Union are inserted in the Appendix, p. 306.

In conformity with our order Guardians were elected by all the Parishes in the island except one of a very small extent; and they proceeded to appoint the requisite officers and to conduct the administration of relief in pursuance of the regulations of the Poor Law Board, and in accordance with the general law. The legality of these measures was, however, called in question by a ratepayer in the island, on whose behalf a motion was made to remove the orders of the Board into the Court of Queen's Bench for the purpose of being quashed. The grounds alleged for this proceeding were—first, that the island was united for the purpose of settlement; secondly, that the Poor Law Board had not obtained the proper consent of the Guardians to the dissolution of the incorporation. The case came on for hearing on the 29th of January last, when the Court held the orders of the Poor Law Board to be valid, and the rule for the certiorari was discharged.

We have issued further orders adding several places, formerly extra-parochial, to Unions, the names of which appear in the statement in the Appendix, p. 49.

A very important alteration was effected in the law relating to the relief of the poor in the last Session of Parliament by the passing of the Union Chargeability Act, 28 & 29 Vict. c. 70.

The Poor Law Amendment Act, 4 & 5 Will. 4. c. 76, which established the system of Union Management, made no immediate and compulsory alteration in the incidence of relief. It empowered the Guardians to agree, subject to the consent of the Poor Law Commissioners, that all the Parishes of the Union should be considered as one Parish for the purposes of settlement and also of rating when the several Parishes of the Union are situate within the same county; but it expressly provided, that in

the absence of such an agreement, each Parish should be separately chargeable with the cost of the relief of its own poor, and that the general expenses of the Union should be apportioned among the Parishes according to the amount paid by each Parish in such relief.

In order to give validity to an agreement for Union settlement, or Union rating, the consent of *all* the Guardians of the Union was requisite, so that the permissive power already referred to remained practically inoperative, and each Parish continued to bear the burthen of the poor who were settled in it, or could not be removed elsewhere.

The Poor Law Commissioners, in their Report on the further amendment of the Poor Law, in December 1839 regretted that no steps had been taken for carrying into effect the provision relating to Union settlement and Union rating, by which a great improvement and simplification of management would be effected, and much fraud and litigation produced by contested settlement and partial and unequal rating would be prevented.

In 1845 Sir James Graham brought in a Bill to empower the Poor Law Commissioners, without the consent of the Guardians, to declare any Union to be as one Parish for the purpose of settlement, but this Bill was afterwards abandoned.

In 1846 the Act (9 & 10 Vict. c. 66.) was passed which modified the law of settlement by rendering persons irremovable from the Parish where they had resided five years without receiving relief.

The charge of maintaining this class was, in the first instance, cast upon the Parish where they had so resided; but the increased burthen thus thrown upon certain Parishes gave rise to so much dissatisfaction that by the 10 & 11 Vict. c. 110. the charge was shortly afterwards transferred from the Parish to the Common Fund of the Union. Even this alteration did not entirely remedy the grievance, since the newly imposed charge was still distributed over the several Parishes of the Union, not in proportion to their ability, but to their previous burthens. The injustice was finally removed by the Act of 24 & 25 Vict. c. 55., which provided that the distribution of the Common Fund should in future be made, not according to the expenditure, but according to the rateable value of the property of each Parish.

The same Act cast upon the Common Fund the relief of lunatic poor; and the amount of the whole of the relief thus rendered chargeable upon the Common Fund gradually increased to nearly 35 per cent. of the whole amount. These successive changes having thus prepared the way for a more complete measure, the time appeared to have arrived when the arrangement contemplated and rendered permissive by the framers of the Poor Law Amendment Act, of making the area of administration and of expenditure the same, might be carried into entire effect.

A Bill was, therefore, introduced into the House of Commons by the President of the Poor Law Board "to provide for the

"better distribution of the charge for the relief of the poor in "unions," and though it met with serious opposition it was ultimately passed by considerable majorities through both Houses of Parliament, and received the Royal Assent on the 29th of June 1865. Under the provisions of this Act some Parishes which from peculiar circumstances had escaped the burthen of the relief of the poor, and extra-parochial places which had hitherto been exempted from it, will incur some additional pecuniary liability, but there can be little doubt that all places comprised in one Union, and having such mutual interests as their vicinity to each other must create, may properly be required to bear in common the relief of those who become destitute within its limits; and we trust that whilst it will lead to an improved and uniform management of the poor, it will also be found no less beneficial to the labouring class and the owners and occupiers of property. We transmitted a copy of the Act shortly after it was passed to each Board of Guardians in a circular letter, of which a copy is given in the Appendix; and we have since issued a further circular, Appendix, pp. 25 *et seq.*, explanatory of the several provisions of the Act. The modifications required by the Act in the general order of accounts have been considered, and we shall shortly issue a new order of accounts with the requisite amendments.

We have also to notice that the Act which exempts stock in trade from assessment to the poor rate, and which has been continued by a long series of Acts, was further continued by the 28 & 29 Vict. c. 119. until the 1st of October next, and the end of the next Session of Parliament.

Exemption
of stock in
trade from
rating.

We have reason to believe that the proceedings of the Assessment Committees in the revision of the Valuation Lists during the past year have been efficiently conducted; the Reports which we have received on the subject, pursuant to the provisions of 25 & 26 Vict. cap. 103. sec. 12. being generally satisfactory. We have the pleasure to state that there are very few Unions in which the Valuation Lists have not been finally settled. It is desirable that in those Unions no further delay should take place in completing them, as the Union Chargeability Act has now come into operation, and its provisions cannot be duly carried into effect, until the basis on which the expenditure of the Union should be apportioned among the several Parishes has been correctly ascertained and settled. We trust, therefore, that every exertion will be made by the Guardians to complete the Valuation Lists, where it has not already been done.

Union
Assessment
and Charge-
ability Acts.

An Act was passed in the last Session of Parliament (28 & 29 Vict. c. 105.) to continue the powers of the Poor Law Board for a limited time. The Bill, as introduced into the House of Commons, contained various provisions for the amendment of the Poor Law. Owing, however, to the advanced period of the

Further
legislation.

Session it was found impracticable to proceed with the clauses relating to the amendment of the law. They were, therefore, withdrawn, and the Act, as passed, is confined to the continuance of the Poor Law Board until the 23rd day of July 1866, and to the end of the then next Session of Parliament. Further legislation will be required both for putting the Poor Law Board on a more permanent footing and for effecting the necessary amendments in the law.

All which we humbly present to Your Majesty.

C. P. VILLIERS,

APPENDIX.

No. 1.

SUPPLY OF COD LIVER OIL AND EXPENSIVE MEDICINES.—CIRCULAR
LETTER from the POOR LAW BOARD to BOARDS OF GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
12th April 1865.*

SIR,

I AM directed by the Poor Law Board to state that they are desirous of drawing the attention of the Guardians to the question of the supply of medicines for the sick poor.

The Board transmitted to the Guardians a copy of the Report of the Committee of the House of Commons on Poor Relief shortly after it was printed, with the view of informing them of the opinions and recommendations of the Committee on the several points to which their inquiries had been directed.

The Board think it right, however, now to bring more particularly under the notice of the Guardians the following resolution of the Committee relating to medical relief, viz.—

“ That there are no sufficient grounds for materially interfering with
“ the present system of medical relief, which was made the
“ subject of special and lengthened inquiries by Select Com-
“ mittees of this House in the years 1844 and 1854.”

“ That the recommendations of those Committees were for the most
“ part carried out by the orders of the Poor Law Board, and
“ the system of medical relief appears to be administered with
“ general advantage. Your Committee however recommend
“ that in future cod liver oil, quinine, and other expensive
“ medicines shall be provided at the expense of the Guardians,
“ subject to the orders and regulations of the Poor Law Board.

The Board have repeatedly considered the recommendation of the Committee relative to the supply of cod liver oil, quinine, and other expensive medicines, with the view of determining what measures should be taken by them to carry it into effect.

It does not appear to the Board that they can, with advantage, issue any general and positive regulation on the subject; and they are of opinion that much difficulty and embarrassment might arise from a compulsory interference with the arrangements for medical relief which are in force under the existing contracts. They request the Guardians, however, to be good enough to consider whether an alteration in those arrangements as regards the supply of the medicines referred to cannot be made whenever a new appointment of a medical officer may become necessary; or, with the consent of the present medical officers, during the continuance of their existing contracts.

With regard to the mode in which the proposed object can most conveniently be effected the Board are of opinion,—

1. That it may be advisable to provide a store of cod liver oil at the workhouse, or at some other convenient places of deposit in the union, and to supply it to the sick poor on the prescription of the medical

officers, through the relieving officers, in the same way as wine, or other extras recommended by the medical officers in the way of nourishment, are now supplied.

2. That quinine and other expensive medicines may be supplied,—

Either by an order of the medical officer on a chemist, the cost of the medicines so ordered being paid for by the Guardians to such chemist as goods or provisions supplied in relief ;

Or, by the medical officers themselves, who may send in an account quarterly to the Guardians of the cost of the medicines in question which they may have supplied to their pauper patients.

The former plan may probably be convenient in the town unions ; the latter in the country unions.

Cod liver oil and any other medicines intended to be so supplied should be specified and excepted from the provisions of the medical contract, which require generally that medical officers should themselves provide the requisite medicines and medical appliances for their pauper patients.

I am, Sir, &c.

ENFIELD,

Secretary.

To

The Clerk to the Guardians.

No. 2.

NURSES IN THE SICK WARDS OF WORKHOUSES.—CIRCULAR LETTER from the POOR LAW BOARD to BOARDS OF GUARDIANS.

Poor Law Board, Whitehall, S.W.,

5th May 1865.

SIR,

THE POOR LAW BOARD deem it advisable to direct the attention of the Guardians to the state of their infirmary or sick wards, in regard to the nurses and attendants upon the sick.

The general consolidated order, where it is in force, and the general regulations which regulate the government of the workhouses in places where that order is not in force, provide for the appointment of a nurse as a paid officer of the workhouse. They also provide for the appointment of such assistants to the nurse, to be likewise paid for their services, as the Guardians may deem necessary for the efficient performance of the duties of the office.

The orders have prescribed the following as those duties :—

Art. 213. The following shall be the duties of a nurse for the workhouse :—

No. 1. To attend upon the sick in the sick and lying-in wards, and to administer to them all medicines and medical applications, according to the directions of the medical officer.

No. 2. To inform the medical officer of any defects which may be observed in the arrangements of the sick or lying-in ward.

No. 3. To take care that a light is kept at night in the sick ward.

It is obvious that these duties require, in any workhouse where there are many sick patients, great care and attention on the part of the nurse. The office is one of very serious responsibility and labour, and requires to be filled by a person of experience in the treatment of the sick, of great respectability of character, and of diligent and decorous habits. Such person cannot discharge the duties of the office singly, but must have the assistance of others of both sexes ; and there is scarcely less need of the same qualities in the persons who are to be the assistants than of those required for the chief officer.

Hence it is necessary that the nurses should be adequately remunerated, and that they should be appointed after a strict investigation of their qualifications for the office. But the Board consider it of the highest importance that the assistants to the nurse should also be paid officers. By appointing paid assistants the guardians will have an opportunity of selecting persons whose qualifications for the office can be properly ascertained, and they will also be able to hold such officers responsible for negligence or misconduct, as in the case of the superior officers of the workhouse.

Where pauper inmates are directed to act as assistant nurses there is no stimulus to exertion, no test of capacity, and no responsibility for negligence.

The Board therefore recommend that the Guardians will, as far as possible, discontinue the practice of appointing pauper inmates of the workhouse to act as assistant nurses in the infirmary or sick ward.

It is alleged that there may be some difficulty in finding an adequate supply of competent persons for these offices in the workhouses. Upon this point the Board have no definite information; but this will be readily tested if the Boards of Guardians are prepared to make offers of fair and remunerative wages or salaries to those who will be willing to engage.

The Board have to make one further observation, that where the arrangements of the workhouse will permit, it is very desirable that special accommodation should be provided for the nurse and the paid assistants, so that they may be always ready to attend upon the patients, and be removed as much as possible from the distraction which the proceedings in a large workhouse are calculated to produce.

The details of these arrangements will doubtless vary in many of the Unions and Parishes, and the Board will be ready to entertain any communication which the Guardians may make to them upon the subject; but they cannot avoid expressing their earnest hope that it will obtain the immediate attention of the Guardians.

I am, &c.

ENFIELD,
Secretary.

To

The Clerk to the Guardians of the

No. 3.

UNION CHARGEABILITY ACT, 1865.—CIRCULAR LETTER from the
POOR LAW BOARD to BOARDS OF GUARDIANS.

Poor Law Board, Whitehall, S.W.,

4th July 1865.

SIR,

I AM directed by the Poor Law Board to transmit to the Guardians a copy of the Act "to provide for the better distribution of the charge for the relief of the poor in unions," (28 and 29 Vict., c. 79,) which has just received the Royal Assent.

The important change effected by this Act will not come into operation until the 25th of March next, and the Board will reserve for a future occasion the observations which they may deem it advisable to make upon its provisions, but they think it right to call attention to one clause which takes effect immediately.

By the 7 & 8 Vict., c. 101, § 59, the approval of the Poor Law Board is required to the charging by the Guardians of the costs and expenses incurred by them under that section to the common fund of the Union, or to any Parish or Parishes comprised therein. The interposition of

this Board in regard to the expenses of prosecutions is now removed, and it is enacted by section 9 of the 28 and 29 Vict. c. 79, that the costs and expenses lawfully incurred in and about the prosecution of any person, for which the Guardians may be liable, or which they undertake to pay under the 7 & 8 Vict., c. 101, § 59, shall in all cases be charged to the common fund.

I am, &c.

W. G. LUMLEY,
Assistant Secretary.

To
The Clerk to the Guardians.

No. 4.

UNION CHARGEABILITY ACT, 1865.—AN ACT to provide for the better DISTRIBUTION of the CHARGE for the RELIEF of the POOR in UNIONS [28 & 29 Vict. c. 79., passed 29th June 1865.]

WHEREAS it is expedient to make provision for the better distribution of the charge for the relief of the poor in Unions than is by law now established: Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. From and after the twenty-fifth day of March one thousand eight hundred and sixty-six, so much of the twenty-sixth section of the fourth and fifth William the Fourth, chapter seventy-six, as requires that each of the Parishes in a Union formed under the authority of that Act shall be separately chargeable with and liable to defray the expense of its own poor, whether relieved in or out of the workhouse of such Union, shall be repealed; and all the cost of the relief to the poor, and the expenses of the burial of the dead body of any poor person, under the direction of the Guardians or any of their officers duly authorized, in such Union, thenceforth incurred, and all charges thenceforth incurred by the Guardians of such Union in respect of vaccination and registration fees and expenses, shall be charged upon the common fund thereof.

2. When any pauper relieved in any such Union shall be settled in any Parish situated in another Union or subject to a Board of Guardians, and shall not be exempt from removal by reason of any provision of the law, the Guardians of the Union to which such pauper shall be chargeable may obtain an order of removal addressed to the Guardians of the Union or Parish, or the overseers of the Parish, as the case may require, in which such pauper shall be settled, and the Guardians of such last-mentioned Union or Parish shall receive such pauper in like manner and subject to the like incidents and consequences as in the case of orders of removals heretofore obtained by overseers, with such modifications as may be necessary to meet the circumstances of the chargeability to the Union instead of the Parish.

3. The Guardians obtaining such Order may defend the same, and the Guardians upon whom it shall be made may appeal against the same, in like manner and with the like incidents and consequences as in the case of orders obtained or appealed against by overseers.

Provided that every appeal now pending may be continued and determined as though this Act had not been passed.

4. Every notice, statement, demand, or other document required to be given by any such Guardians in respect of any order of removal shall be deemed to be sufficiently authenticated if signed by their clerk

in their name, and shall be deemed to be duly served upon the Guardians to whom it shall be addressed if it be delivered to their clerk personally, or be left at his office, or be sent through the post addressed to him at such office.

5. For better enabling the Guardians to obtain such orders of removal, or to appeal against the same, they may order the overseers of the poor, or any officer or other person having the custody of any books, papers, documents, or writings of or belonging to any Parish in their Union, to produce the same, upon reasonable notice to the Board of Guardians, or to their clerk or other person appointed by them, and shall allow copies or extracts to be taken therefrom for the use of such Guardians, without fee or reward.

6. Where the Guardians of any Union or Parish shall be satisfied that any pauper is settled within and removeable to their Union or Parish, and shall consent under their common seal to receive such pauper without an order of removal, the Guardians seeking to remove such pauper may do so without any such order.

7. Any pauper removed under an order of removal obtained by the Guardians of any such Union, returning to and becoming chargeable to such last-mentioned Union again within the period of twelve months from such removal, without the consent of the Guardians thereof, shall be deemed to be an idle and disorderly person, within the meaning of the statute Fifth George the Fourth, chapter eighty-three, and be liable to be convicted and punished as such.

8. From and after the twenty-fifth day of March one thousand eight hundred and sixty-six, the period of one year shall be substituted for that of three years specified in the first section of the statute twenty-fourth and twenty-fifth of Victoria, chapter fifty-five.

9. The costs and expenses lawfully incurred in and about the prosecution of any person for which the Guardians of the Union may be liable, or which they undertake to pay, under the fifty-ninth section of the seventh and eighth Victoria, chapter one hundred and one, shall in all cases be charged to the common fund.

10. For the purposes of the burial of any poor person dying in the workhouse of any Union, such workhouse shall be considered as situated in the Parish in the Union where such poor person resided last, previously to his removal to the workhouse.

11. The Poor Law Board shall, as soon as convenient, make all such orders as may be requisite to render the provisions of this Act applicable to the proceedings and accounts of the Guardians of Unions and of overseers of Parishes comprised therein.

12. The Guardians shall distribute the charges upon the common fund during and at the close of every half year in the proportions according to which the orders for the contributions to the common fund were made upon the several parishes comprised in such Unions at the commencement of such half year, notwithstanding the change which may be made in the valuation list of any Parish during such period.

13. Except as herein provided, no alteration shall be made in respect of the settlement of poor persons in Parishes.

14. If in any Union or Incorporation for the relief of the Poor, where the cost thereof is not borne by a common fund, or where the common fund is not calculated upon an equal basis throughout the Union or Incorporation, the body having under the constitution of such Union or Incorporation the management of such relief shall be desirous of adopting the provisions of this Act, such body may, on a resolution to that effect of a majority at two successive meetings,

by writing under the hand of the presiding chairman of the second of such meetings, apply to the Poor Law Board to be included in this Act ; and, upon the consent of that Board being given under its seal to such application, and subject to such terms and conditions as that Board may deem requisite, such Union or Incorporation shall be so included from such time as the said Board shall declare ; and such consent so signified shall be evidence that such application was in all respects duly made according to the provisions above mentioned.

15. When this Act has been adopted by any such Union or Incorporation as aforesaid, and such adoption has been legally brought into operation in such Union or Incorporation, the body having the management of the relief of the poor therein shall from time to time make calls in advance for money for the relief of such poor upon the overseers of the several Parishes therein respectively, on the basis of an equal pound rate on the annual value of the property in each Parish rateable to the relief of the poor according to the law in force for the time being, and shall have the same powers of enforcing such calls as they now possess under the provisions of such Local Act for enforcing calls or rates for the relief of the poor ; and such overseers shall have the same powers for making, levying, and enforcing rates to meet and pay such calls as they now possess, either under the provisions of such Local Act or the general law relating to the making, levying, and enforcing rates for the relief of the poor.

16. The words herein used shall be interpreted in the manner prescribed by the statute of the Fourth and Fifth Years of William the Fourth, chapter seventy-six, and the subsequent Acts amending or explaining the same, and the provisions in such Acts which apply to poor persons rendered chargeable upon the common fund by reason of their having become irremovable through the operation of the statutes in that behalf shall apply to all the poor in the Union hereby rendered chargeable upon the common fund.

17. This Act may be cited as "The Union Chargeability Act, 1865."

No. 5.

UNION CHARGEABILITY ACT, 1865 : REMOVAL of the POOR.—CIRCULAR LETTER from the POOR LAW BOARD to BOARDS of GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
6th April 1866.*

SIR,

I AM directed by the Poor Law Board to communicate again with the Guardians on the subject of that part of the Union Chargeability Act of 1865 which relates to the removal of paupers.

That Act having put an end to Parochial Chargeability in the Union has transferred the power of obtaining orders of removal to the Board of Guardians. This power may in some few instances be properly exercised for the benefit of the pauper removed, and in others for that of the ratepayers of the Union ; but the Board think that any general and indiscriminate exercise of the power on the part of the Guardians is calculated to cause suffering, expense, and other inconvenience, without ensuring any corresponding benefit. They strongly recommend to Boards of Guardians the exercise, as far as practicable, of a spirit of mutual forbearance in regard to the removal of paupers who may be removable.

They deem it advisable to recal to the attention of the Guardians a consideration of the limits which have been imposed upon their power in this matter by the Legislature.

No person who has resided for one whole year in the Union, whether in one or in several parts of it, without interruption and without relief, can be removed from it. Periods of relief do not operate as an interruption of the residence, but are only not to be calculated as part of the time of residence.

Moreover, periods of residence, under certain specific circumstances, both in and out of the Union, are prevented from being computed in the calculation of the time of residence, or from operating as an interruption of the residence.

No widow residing with her husband at the time of his death can be removed within the first year of her widowhood.

Deserted wives also, after a residence of one year from the time of their desertion, without relief, are exempt from removal.

Children cannot be removed from their parents or some other relatives with whom they may be residing, and orphans derive from their parents the exemption which the latter had acquired at their death.

Lastly, no person whose chargeability arises in respect of relief made necessary by sickness or accident which will not produce permanent disability can be lawfully removed.

When all these large classes have been excluded the number of removable paupers will probably be far from considerable. This number, again, will be further reduced by excluding those who, by reason of the trivial cost of their relief or from other causes, may not, in the opinion of the Guardians, be fit subjects of an order of removal.

The Board, therefore, do not think it can be necessary that the Guardians should forthwith provide any additional officers or assistants, or set on foot an elaborate arrangement for dealing with this subject as one requiring extensive operations.

They recommend the Guardians to appoint from themselves a small committee, to whom shall be referred the subject of the removability of the poor persons in receipt of relief from the Union. The committee may by a few inquiries instituted through the Relieving Officers or through members of the Board of Guardians readily obtain the requisite information to enable them to report upon the subject from time to time, so as to ascertain and distinguish the classes of irremovable and removable poor, and in the case of the latter to point out when they recommend that orders of removal should be taken out, or that application should be made for the removal without an Order in the manner provided for by the 6th section of the recent Act.

It will rest with the Board of Guardians to adopt these recommendations or not as they shall consider most expedient, and if they determine upon the removal of any pauper they must direct their clerk to take the requisite steps in the matter.

If, as the Board anticipate, there will be few occasions for the exercise of this power, the labour of that officer will be insignificant; but if there should be a considerable number of removals, and consequently a large increase of the demands upon his time and labour, it will become proper that either his salary should be increased, or additional assistance should be given to him.

Upon this point, however, nothing can be decided until there has been some reasonable amount of experience as to the working of the new law.

I am, &c.

W. G. LUMLEY,
Assistant Secretary.

To
The Clerk of the Guardians.

No. 6.

METROPOLITAN HOUSELESS POOR ACTS, 1865.—CIRCULAR LETTER
from the POOR LAW BOARD to BOARDS of GUARDIANS.*Poor Law Board, Whitehall, S.W.,
30th August 1865.*

SIR,

I AM directed by the Poor Law Board to communicate again with the Guardians on the subject of the Metropolitan Houseless Poor Act, 1864, the provisions of which have been made perpetual by an Act of the last Session of Parliament, 28 & 29 Vict. c. 34.

The Board remind the Guardians that by the first Act, which was passed on the 29th of July 1864 (27 & 28 Vict. c. 116.), provision was made for distributing the charge for the relief of certain poor persons in the Metropolis over the whole of the Metropolis for the period of six months only, viz., from Michaelmas of last year to Lady-day in the present year. By the Act of last Session the provision has been made perpetual.

The Board in their letters of the 4th August and the 26th October in last year made various remarks and suggestions with reference to the practical working of the first Act, and desire to direct the attention of the Guardians to those letters on the present occasion.

But as some slight alterations of the first Act have been made in the latter, it has appeared to the Board to be convenient that they should address another communication to the Guardians, in which the combined provisions of the Acts may be set out in detail.

The Guardians of every Union or Parish situated wholly or partly within the district to which the Metropolis Local Management Act applies may, subject to the Orders and Regulations of the Poor Law Board, make out a separate account of the money daily expended by them in the relief of destitute wayfarers, wanderers, foundlings, and other destitute persons during certain hours. The first Act prescribed those hours as from 8 o'clock at night to 8 o'clock in the morning. But the 5th clause of the 28 & 29 Vict. c. 34. provides for admission during the hours between 6 o'clock in the evening and 8 o'clock in the morning in the months between October and March inclusive; and during the hours between 8 o'clock in the evening and 8 o'clock in the morning in the months between April and September inclusive.

The account above referred to may be submitted by the Guardians to the Auditor at the usual times of audit, so that it will be a half-yearly account.

The Auditor is required duly to examine this account, and to certify, under his hand, the amount which he shall find to have been legally expended in and about such relief.

The third clause of the Act of 1864 declares to what relief this account shall extend, and enacts that it shall include food and articles of necessity supplied by the Guardians, or by their Relieving or other Officer, or by any Metropolitan Police Constable authorized by them in such behalf, and also the cost of lodging or shelter hired or temporarily provided for any such poor person, but not money given to him.

The same statute, in section 5., provides that where no adequate accommodation exists the Guardians shall provide within their respective Unions or Parishes such wards or other places of reception for destitute wayfarers and foundlings as the Poor Law Board, having regard to the number of persons likely to require relief therein, shall direct.

In default of making such provision, and until the same has been made, the Guardians will not be entitled to any reimbursement under the Acts.

Where the Guardians shall have provided proper wards or other places of reception for the class of poor to which the Acts apply, and the same shall have been approved of by the Poor Law Board, the Guardians, by section 4. of the first Act, may include, as part of the expense incurred by them in the relief of those poor persons, such sum in respect of each pauper, or according to section 3. of the 28 & 29 Vict. c. 34., such sum or sums in gross, as the Poor Law Board shall from time to time allow for the costs and expense of temporarily providing and maintaining such wards or other places.

This allowance is in addition to the sum which has been certified by the Auditor to have been expended by the Guardians in relief. The Board have, however, thought it right to request the Auditor to certify as to the expenditure by the Guardians of the sums which they claim to be reimbursed under this last section.

When the Poor Law Board have certified that proper wards or places of reception have been provided, the Guardians may make application in writing to the Metropolitan Board of Works for reimbursement of the amount so certified by the Auditor, and may include the sum so allowed by the Poor Law Board.

By section 2. of the Act of 1864, the Metropolitan Board of Works are required forthwith to pay to the Guardians making the application the amount so ascertained to be due to them, and the Guardians are required to apply the sum received in aid of the poor rate of their Parish, or the Common Fund of their Union, as the case may be, and to account for the same accordingly.

In this manner means are provided for ensuring due attention to the relief of the houseless poor, who require relief during the night, without imposing upon the Guardians of any Union or Parish an unequal or unfair portion of the charge, the whole of which is now cast upon the rateable property of the Metropolis according to its annual value.

The Legislature have not been satisfied with requiring the wards to be certified as sufficient, but by section 2. of the 28 & 29 Vict. c. 34. the Poor Law Board are required to cause the wards and other places of reception to be periodically inspected between certain hours specified in the Act. The results of such inspections are to be reported to the Poor Law Board, who may at any time revoke and renew the certificates granted under the first Act.

These provisions extend to the cases of persons who apply for relief, and are relieved under the circumstances described in these statutes.

It is necessary to advert to another clause in the 28 & 29 Vict. c. 34., which has been enacted to facilitate the removal of the destitute poor from the streets of the Metropolis, and to procure for them the requisite relief.

By section 4. it is enacted, that any Constable of the Metropolitan Police, or of the Police of the City of London, may personally conduct any such destitute person as above described, not having committed or being charged with any offence punishable by law within the knowledge of such Constable, to any wards or other places of reception approved of by the Poor Law Board under these Acts, and every such poor person shall, if there be room in such wards or other places of reception, be temporarily relieved therein.

The Board acknowledge, with satisfaction, the good spirit in which the different Boards of Guardians in the Metropolis have received these new proposals, and the promptitude with which they have generally been carried into execution.

The Board have not yet deemed it requisite to issue any rules or regulations to the Guardians with reference to this measure, though they have collected information as to the differences in the treatment and the dietaries which prevail among the Parishes and Unions, and may find it necessary hereafter to consider how far those differences may be wholly, or to a considerable extent, removed.

I am, &c.

W. G. LUMLEY,
Assistant Secretary.

No. 7.

METROPOLITAN HOUSELESS POOR ACT, 1865.—AN ACT to make the METROPOLITAN HOUSELESS POOR ACT perpetual [28 Vict. c. 34, passed 2d June 1865].

WHEREAS it is expedient that the provisions of "The Metropolitan Houseless Poor Act, 1864," should be made perpetual: Be it therefore enacted by the Queen's most excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. That the provisions of the said Act shall be extended to the expenditure for relief of destitute wayfarers, wanderers, and foundlings, or other destitute persons, in the several Unions and Parishes referred to in the said Act, relieved and to be relieved from and after Lady-day one thousand eight hundred and sixty-five; and the sixth section of the said Act is hereby repealed.

2. The Poor Law Board shall from time to time cause the wards and other places of reception provided according to the said Act to be inspected not less than once in every four months between the hours of six o'clock in the evening and eight in the morning in the months between October and March inclusive, and between the hours of eight o'clock in the evening and eight in the morning in the months between April and September inclusive; and the results of such inspections shall be reported to the Poor Law Board, who may at any time revoke and renew the certificates granted or to be granted under the first section of that Act.

3. The said Board may allow for the costs and expenses referred to in the fourth section of that Act, when they shall see fit to do so, a sum or several sums in gross instead of a sum in respect of each pauper as therein provided.

4. Any constable of the Metropolitan Police or of the Police of the City of London may personally conduct any destitute wayfarer, wanderer, or foundling, or other destitute person, not having committed or being charged with any offence punishable by law, within the knowledge of such constable, to any wards or other places of reception approved of by the Poor Law Board under the said Act or this Act; and every such wayfarer, wanderer, or foundling shall, if there be room in such wards or other places of reception, be temporarily relieved therein.

5. The wards or places of reception provided under the said Act shall be open for the admission of destitute wayfarers, wanderers, and

foundlings, or other destitute persons, who shall apply to be admitted during the hours between six o'clock in the evening and eight in the morning in the months between October and March inclusive, and during the hours between eight o'clock in the evening and eight o'clock in the morning in the months between April and September inclusive, and the Guardians shall be entitled to be reimbursed for all relief administered in conformity with the Provisions of that Act during those hours respectively.

6. This Act may be cited for all purposes as "The Metropolitan Houseless Poor Act, 1865."

No. 8.

METROPOLITAN HOUSELESS POOR.—CIRCULAR from the POOR LAW BOARD to BOARDS of GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
27th January 1866.*

SIR,

I AM directed by the Poor Law Board to state to you, for the information of the Guardians, that, pursuant to the provisions of 28 Vict. c. 34. s. 2., the Board have made arrangements with the Commissioner of Metropolitan Police for the inspection, by the officers of police, of the wards and other places of reception provided under that Act for the Metropolitan Houseless Poor.

The Board request that the police officers authorized to undertake this duty may be allowed the requisite facilities for inspecting the wards, and obtaining such information as may enable them to make their reports on the subject to the Poor Law Board, as required by the Act referred to.

I am, &c.

The Clerk to

The Board of Guardians.

ENFIELD,

Secretary.

No. 9.

METROPOLITAN HOUSELESS POOR ACTS, 1864-65.—CIRCULAR LETTER from the POOR LAW BOARD to BOARDS of GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
31st January 1866.*

SIR,

I AM directed by the Poor Law Board to transmit to you, for the information of the Guardians, the enclosed copy of a communication which the Board have addressed to the Auditors of the Unions and Parishes within the District to which the Metropolis Local Management Act applies, respecting the mode of certifying the cost of relief, &c. under the Houseless Poor Acts, 1864-65.

The following appear to be the steps which it will be desirable for the Guardians to adopt. When the accounts of the Union or Parish have been submitted to the auditor for examination, a statement of the expenditure which the Guardians seek to have allowed by this Board, under section 4. of the Act of 1864, and section 3. of the Act of 1865, should, with as little delay as possible, be forwarded to this office. The statement should be in the form suggested by the Board's Circular Letter of November 1865, and should be verified by the auditor previous to its transmission to the Board.

So soon as the Board have notified to the Guardians the sum allowed to them, the auditor should be requested to give a certificate in the form now prepared.

The certificate, it will be observed, is framed to include the cost of relief to the houseless poor given by the Guardians, as well as the sum allowed by this Board. To enable the auditor to give this certificate, it will therefore be necessary that the Board's letter of allowance should be produced to him.

When the certificate has been given, the Guardians will be in a position to apply to the Metropolitan Board of Works for reimbursement of the sum to which they will be entitled. The certificate of the auditor, as well as the Board's letter of allowance, should accompany the application which the Guardians may make to the Metropolitan Board of Works for this purpose.

The Board trust that the course now recommended to be followed will facilitate the carrying of the above-mentioned Acts into effect, and prevent unnecessary delay in making application to the Metropolitan Board of Works for reimbursement.

To
Clerk to the Guardians.

I am, &c.
ENFIELD,
Secretary.

No. 10.

COLLECTOR of the GUARDIANS.—CIRCULAR accompanying GENERAL ORDER from the POOR LAW BOARD to BOARDS of GUARDIANS.

*Poor Law Board, Whitehall, London,
7th October 1865.*

SIR,

I AM directed by the Poor Law Board to state that they have been frequently applied to on the subject of the inconveniences experienced by Boards of Guardians in many Unions in regard to the collection of monies payable to them, by reason of the want of a proper officer for such purpose. The Board, moreover, anticipate that after the complete establishment of Union Chargeability, the demands for such an officer will increase.

The Board have, therefore, issued a General Order empowering the Guardians to make such an appointment wherever they may find it necessary to do so; and I am directed to transmit a copy of the Order accordingly.

The Guardians will find the name of their Union in the Schedule (A.)

To
The Clerk to the Guardians.

I am, &c.
ENFIELD,
Secretary.

No. 11.

COLLECTOR of THE GUARDIANS.—GENERAL ORDER.

To the Guardians of the Poor of the several Unions, Parishes, and Places named in the Schedules hereunto annexed:—

To the Clerk or Clerks to the Justices of the Petty Sessions held for the division or divisions in which the said Unions, Parishes, and Places are situate:—

And to all others whom it may concern.

Whereas it is oftentimes expedient that Guardians of the Poor should appoint an officer to collect and receive monies from time to time due and payable to them or on their account.

Now therefore, We, the Poor Law Board, acting under the authority of the statutes in that behalf made and provided, hereby order and direct the Guardians of the Poor of the several Unions, Parishes, and Places named in the Schedules (B.) and (C.) hereunto annexed, as and when they shall see occasion to do so, to appoint a fit and proper person to collect the monies due and payable to such Guardians, to be termed collector of the Guardians.

And We further order, with respect to such appointment, as follows; that is to say :—

Mode of Appointment.

Article 1. Every officer to be appointed under this Order shall be appointed by a majority of the Guardians present at a meeting of the Board, and voting on the question of such appointment.

Every such appointment shall, as soon as the same has been made, be reported to the Poor Law Board by the clerk to the Guardians.

Article 2. Previous to an appointment to the aforesaid office being made under this order, a notice that the question of making such appointment will be brought before the Board of Guardians shall be given and entered on their minutes at one of the two ordinary meetings of the said Board next preceding the meeting at which the appointment is made, or an advertisement, giving notice of the consideration of such appointment, shall be inserted in some public newspaper, by the direction of the Guardians, at least seven days before the day on which such appointment is made : Provided that no such notice or advertisement shall be necessary for the appointment of a temporary substitute.

Qualification.

Article 3. Every person who shall be appointed to the office of collector under this order shall agree to give one month's notice previous to resigning the office, or to forfeit one month's amount of salary, to be deducted as liquidated damages from the amount of salary due at the time of such resignation.

Duties of the Officer.

Article 4. The duties of the collector shall be—

No. 1. To collect, under the directions of the Guardians, all sums of money from time to time due and payable to them other than such as under their orders or otherwise shall be payable to their Treasurer.

No. 2. To serve the orders of contributions upon the overseers when required by the Guardians to do so.

No. 3. To assist the clerk to the Guardians in filling up receipts, keeping books, and making returns which relate to any matter concerning the monies payable to the Guardians which he may have collected or may have been required to collect.

No. 4. To produce to the Guardians or their clerk respectively, whenever required by them or him, the account books in his custody by virtue of his office as such collector, and to balance the same, and to furnish them with a true list of all defaulters in the payment of monies due to them, and under their directions to attend the proceedings against such defaulters.

No. 5. To keep punctually a book according to the Form set forth in the Schedule (A.) No. 1. hereunto annexed, and to duly enter therein all sums received and all sums paid by him, and to give in respect of all monies received by him a receipt in the Form in the said Schedule (A.) No. 2.

No. 6. To pay all sums received by him to the Treasurer of the said Guardians monthly, or at any shorter period if required by them to do so ; and whenever the same shall amount to 50*l.* or upwards, to pay the same to the said Treasurer as soon as practicable after the receipt thereof.

No. 7. To submit to the Guardians at their ordinary meeting an account of the payments and disbursements made by him on their behalf, with proper vouchers where the same can be obtained, once a month, or at a shorter interval if he find it necessary to do so.

No. 8. To attend every meeting of the Guardians when required by them to do so, and every meeting of the Finance Committee, if there be one, and to obey all lawful orders and directions of such Guardians and Committee relating to his office.

No. 9. To attend the Auditor at the audit of the accounts of the Guardians, and to obey all the regulations contained in the orders of accounts issued to the Unions and Parishes named in the said Schedules (B.) and (C.) hereunto annexed, which relate to the attendance and accounting of officers at the Audit.

Remuneration of the Officer.

Article 5. The Board of Guardians shall pay to the officer appointed to the office of collector under this order such salary, either by a fixed sum or by a poundage, as the Poor Law Board shall from time to time direct or approve ; and shall also repay the amount expended or disbursed by him on their behalf according to the account rendered by him, so far as it shall be found to have been duly and properly incurred.

Article 6. The salary of such officer shall be payable from the day on which he commences the performance of his duties up to the day on which he shall cease to hold such office, and no longer, and shall be paid by quarterly payments at the several quarters ending at the usual feast days in the year, namely, Lady day, Midsummer day, Michaelmas day, and Christmas day, with a proportionate sum to be paid to his executors or administrators in case he shall die while holding such office ; and in the case of a payment by poundage, the same shall be calculated by the said Guardians at such several quarters upon the amount which the said Guardians shall ascertain to have been collected by such collector in the quarter then last ended, and the same shall be paid by the said Guardians at such times accordingly.

Article 7. It shall be competent for the Guardians to defer, in whole or in part, the payment of the salary of such collector, until his accounts shall have been audited and allowed by the auditor, after which audit and allowance the sum due up to the date of his accounts so audited shall forthwith be paid.

Article 8. No such collector who may be suspended, and who shall upon such suspension resign, or be removed by the Poor Law Board, shall be entitled to any salary from the date of such suspension ; and no such officer who shall be temporarily suspended from his office, by reason of his services not being required, shall be entitled to any salary pending such temporary suspension.

Security.

Article 9. The person appointed to such office shall give a bond in such penal sum as the said Guardians shall think fit, in the names of

himself and two sufficient sureties, not being officers of the same Union or Parish as that for which he shall be appointed, conditioned for the due and faithful performance of the duties of the office ; and every such collector shall give immediate notice to the said Guardians of the death, insolvency, or bankruptcy of either of such sureties, and shall, when required by the said Guardians, produce a certificate signed by two householders, that his sureties are alive, and believed by them to be solvent, and shall supply a fresh surety in the place of any such surety who may die, or become bankrupt or insolvent : Provided that the Guardians may, if they think fit, take the security of any society or company expressly authorized by statute to guarantee or secure the faithful discharge of the duties of any Poor Law officer.

Article 10. The Auditor shall, in the statement required by the general orders of the Poor Law Commissioners and the Poor Law Board in that behalf, to be transmitted to them of the securities of the officers of the said Unions or Parishes, include the name of the collector for the time being appointed under this order, together with the particulars in the said general orders required, and shall report thereon to the Board of Guardians, in like manner as therein set forth with reference to the securities of other officers.

Continuance in Office and Suspension of Officer.—Supply of Vacancy.

Article 11. Every collector shall hold the said office until he shall die, or resign, or be removed by the Poor Law Board, or be proved to be insane by evidence which such Board shall deem sufficient, unless the Guardians shall deem it advisable to discontinue the office, and shall inform the said Board accordingly ; and upon such death, resignation, removal, or insanity of any such officer, the said Guardians shall give notice thereof to the Poor Law Board, and proceed to appoint some person in his place, according to the provisions of this order ; and in every case of a resignation, the clerk of the said Guardians shall transmit to the Poor Law Board a statement of the cause of such resignation, so far as it may be known to them.

Article 12. The said Guardians may, at their discretion, suspend from the discharge of his duties any such collector, and shall, in case of every such suspension, forthwith report the same, together with the cause thereof to the Poor Law Board, for their decision thereon, and if the Poor Law Board remove such suspension, he shall forthwith resume the performance of his duties.

Article 13. If any such collector be at any time prevented by sickness or accident, or other sufficient reason, from the performance of his duties, the Guardians may appoint a fit person to act as his temporary substitute, and may pay such person a reasonable compensation for his services ; and every such appointment, with a statement of the circumstances which have led to it, shall be reported to the Poor Law Board as soon as the same shall have been made, by the clerk to the Guardians.

Article 14. The word "Parish" in this Order shall mean every place which maintains its own poor separately, or for which a separate poor rate is made.

Article 15. The word "Overseer" shall be taken to include any person acting or legally bound to act in the discharge of any of the duties usually performed by Overseers, so far as they are referred to herein.

No. 12.

PUBLIC WORKS (MANUFACTURING DISTRICTS) ACTS, 1863-64.—REPORT of ROBERT RAWLINSON, Esquire, C.B., Government Engineer, to The Right Honourable CHARLES PELHAM VILLIERS, M.P., President of the Poor Law Board.

*Office of Public Works,
St. Peter's Square, Manchester,
12th January 1866.*

SIR,

During the last nine months of 1865, the progress of works in course of execution under these Acts has been somewhat retarded, owing to a scarcity of skilled labour, the resumption of work in cotton mills, and the difficulty of obtaining a sufficient supply of stone, bricks, paving sets, and other materials.

The following facts may be instructively repeated with respect to these works ; namely, that in every instance some form of necessary and useful work has been devised by the Local authorities, and not by a Government engineer. Ample security for the amount advanced has been given ; and in the rate of progress each local authority has been unfettered. The result is, general satisfaction. The variety of works undertaken and successfully executed may be gathered from tables, Nos. 1 and 2, accompanying this report, and from the details as under narrated. Plans and estimates have been examined, and reported upon, as they have from time to time been submitted, and without any unnecessary delay.

At Adlington, Brindle, and Euxton, in Chorley Union, works of road-making have been finished ; at Cuerden, land drainage for Townley Parker, Esq. ; at Darcy Lever and at Denton, street-paving and road-forming ; at Handforth and Offerton, in the Stockport Union, road-forming ; at Horwich, Little Lever, and West Houghton, in the Bolton Union, street-paving and road-forming ; at Skerton and Poulton, in the Lancaster Union, waterworks ; at Reddish and at Romiley, road-forming ; and at Tintwistle, water-supply.

At Glossop, Lord Edward Howard found work of the most appropriate kind on his estates for about 400 labourers during the worst period of the distress, in breaking up some 69 acres, and in draining about 1,000 acres of land, as also in forming new embankments and other works for waterworks reservoirs. In the Manchester district many streets have been sewered, formed, and paved. About 12 miles of large water-pipes have been provided and laid; a large storage reservoir is nearly completed; and in a cemetery of 40 statute acres roads have been laid out and formed, and the chapels are nearly finished. In Oldham, besides several miles of streets having been sewered, formed, and paved, 35 mills have been drained. The Alexandra (public) Park of 72 statute acres was opened 28th August 1865. At Preston and at Salford, in addition to other works, cattle markets have been constructed. These are also examples of works executed.

The amount of money devoted to the purposes of these Acts was 1,500,000*l.* (Act 1863) and 350,000*l.* (Act 1864); total 1,850,000*l.*

Upon the expiration of the borrowing powers conferred by these Acts (1st January 1865), the sum of 1,846,082*l.* had been appropriated by the local authorities in 155 separate loans.

Table I. annexed to this Report shows that out of this sum of 1,846,082*l.* appropriated a sum of 1,251,449*l.* had been advanced, up to the 30th December last, in 331 instalments, each of which instalments has been authorized by your special order.

The residue to be advanced, as the works progress, if the whole of the sums are taken up, is 594,633*l.*

I have received information that the following loans and balances of loans will not be taken up, viz.—

	£
Brindle (Chorley Union)	600
Glossop	7,500
Horwich (Bolton Union)	2,330
Lancaster	800
Little Lever (Bolton Union)	7,000
Macclesfield Union	470
Rusholme	6,530
	3,000
Total	£28,230

Deducting this sum of 28,230*l.* from the residue above mentioned will reduce the amount remaining to be advanced to 566,403*l.*; and although it is possible that other renunciations may occur, yet I think it probable that the whole or very nearly the whole sum named will be required for the completion of works now in course of execution.

Table II. annexed to this Report shows quantities and costs of works executed to the 30th December last, and the total amount of money expended upon them up to that date. This table furnishes satisfactory evidence of the beneficial operation of these Acts.

Main sewerage and drainage works as at first devised are nearly completed. Up to the date of this report, 515,833 lineal yards, or 293 miles, have been satisfactorily laid, and are in working order. The local authorities are now engaged completing house-drainage. In order to stimulate progress in this respect, the following notice was issued

last summer from this office, to all local authorities engaged in the execution of sewerage works under the provisions of these Acts.

“ Local authorities and their surveyors are recommended to make
“ as rapid progress with the drainage of houses and wet middens as is
“ compatible with the efficient and economical execution of the works,
“ in order that the main sewers constructed under the provisions of
“ these Acts may be, to the fullest possible extent, beneficial to the
“ public health.”

The total area of paving and other surface works of street and highway improvements completed at the close of the past year measure 1,913,685 superficial yards, or about 395 acres, the total length of these streets and highways being 286,326 lineal yards, or about 162 miles.

Of waterworks, several are already completed.

Of public parks, that at Oldham, the Alexandra Park, was opened during the past year, and affords much gratification and sanitary benefit to the inhabitants of that borough. The public park at Bolton will probably be opened during the present year.

Of the public cemeteries, that at Macclesfield is now ready for consecration, and those in Manchester and in Dukinfield are rapidly progressing towards completion.

No work has been executed under the provisions of the Public Works Acts which was not desirable as a work of permanent utility and sanitary improvement, altogether independent of the circumstances which, during the existence of the cotton famine, gave rise to the special Acts of Parliament, and during the dearth of employment in this district their beneficial operation was even more signal than I was able to convey to you by report.

It has been observed, that while up to the time of the passing of the Public Works Act the district had been disturbed by suggestions of large and imperial measures of emigration, as also by other less peaceful occurrences, subsequently to its coming into operation no other measure has been suggested as necessary or expedient, nor has disturbance or tumult troubled the peace and order of the district. The numbers of distressed factory operatives which I reported to you as being engaged upon these works, large as they were, did not convey a just idea of the total number who passed through a course of training fitting them for other outdoor labour. For example, in the case of Manchester cemetery works, the largest number reported as being engaged upon these works was 130, but up to the end of last March there had been not less than 453 factory operatives so employed during varying intervals, of whom only 28 had been engaged upon more than one occasion.

From the difficulty of obtaining accurate information, the numbers from time to time returned as being “out of work” were much exaggerated, and the numbers engaged upon the public works much more nearly represented the entire number of really able-bodied men out of employment capable of useful and practicable labour than was at the time supposed.

I am informed, on the authority of Poor Law Officers in the district, that the prevention of pauperism by means of the Public Works was at least to the extent of three times the number of men employed upon them.

These works relieved the district of direct imposture to an extent which cannot be calculated. When useful work could be tendered in place of relief, all men who would not attempt work were struck off the

relief lists, and were disposed of, so far as any requirement for charity was concerned.

It is not pleasant to give such an example of the working of the Act, but it is much the best to know and to understand the truth. If makeshift works had been devised on which to place every applicant for relief at a low rate of pay the result would have been disgraceful failure. The good and honest would have taken no interest in test labour, and the example of the idle and worthless would have influenced the whole mass of labour. The works devised were, however, *bonâ fide* works, and the men were, to a considerable degree, self-selected, and were consequently earnest and honest workers.

No form of labour on a large scale to be executed by untrained men alone has ever been found to be economical, whether used as a test for relief or as a punishment. During the Irish famine this was proved to be the case in that country; similar results have been developed in other countries, under other circumstances. Large masses of men, such as were thrown out of employment in Lancashire during the cotton famine, cannot be organized into efficient workers on a grand scale, as the evil influences of the worst men appear to leaven the mass, and idleness will then inevitably prevail. The gangs of labourers attempted to be organized in Lancashire before the introduction of the Public Works Act, as at Stockport, at Preston, and at some other places, proved utter failures. However little the men were paid, the work performed represented much less. Idleness soon verged into mischief, and mischief soon became actual riot.

Under the Public Works Act, as previously stated, all the men were, in a degree, volunteers; they were divided into small gangs directed by skilled men, and every possible encouragement was offered to honest industry. So soon as any gang of men wished it, they were placed on "piece work," and every encouragement was given to induce self-reliance and independent action. Sewer trenching and earthenware sewer pipe laying required manipulative skill, but more care; the trenches had to be "timbered," to preserve the deep sides upright and in place; the bottom had to be formed truly in line and in gradient, so as to receive the sewer pipes, and these required to be laid so as to prevent breaking or crushing. Before three months had passed over, some of the cotton operatives, at their own solicitation, commenced this form of work, and they very speedily became, to all intents and purposes, "skilled workmen." Many of these men selected themselves into gangs, and contracted for trenching and sewerage street after street, to the satisfaction of themselves, and to the entire satisfaction of their employers. The men chose to become responsible agents, and this induced interest in their work as also earnestness and care.

Sewer work, where the excavations are deep, is necessarily attended with some degree of danger to the men engaged in the work, and to house and building property on both sides of the sewer trench. It is greatly to the credit of the local surveyors and foremen, as also to the men themselves, that so few accidents have taken place. This is another instance showing the value of self-induced thought and care, arising from a feeling of personal responsibility.

The following analysis of the expenditure in the more important towns and districts indicates some of the benefits which have been conferred upon these localities, as well as the skill and ability with which the several surveyors have designed and executed the works committed to their charge.

This extract from Table II. shows that in a total expenditure of 545,304*l.* 12*s.* 9½*d.* only 1,744*l.* 10*s.* 6*d.* has been paid under the head of "compensation," while not less than 226,884*l.* 3*s.* 5½*d.* has been paid for labour. The sum of 216,158*l.* 18*s.* 1*d.* expended in materials includes local labour to the extent of 50 per cent. at the least. Up to the end of the year 1865 the quantity of stone (squared paving sets, &c.) used in the execution of the works amounted to 508,441 tons, exclusive of a considerable weight of rough unsquared stone used for street foundations. The whole of this stone (squared paving sets, &c.), with the exception of small quantities imported from Wales and Scotland, has been quarried, squared, and dressed by working men resident in the district.

The several works have been, from time to time, inspected under my superintendence by R. Arthur Arnold, Esquire, Resident Government Inspector, with one clerk, at a total cost for such inspections, up to the close of the past year, of less than one sixth per cent. upon the amount devoted to the purposes of these Acts.

574 inspections of the works have been made, and 375 reports, written, preliminary to advances of instalments, which reports have been regularly transmitted to the Poor Law Board.

The local surveyors have given unvarying attention to the requirements of this office in making monthly returns of work and labour, and have also furnished the materials necessary to the preparation of Table II. of this Report.

The amount and variety of the works executed in the distressed cotton district show that during the rapid growth of these towns works necessary to health, comfort, and trade, such as main-sewering, street-forming, paving, channelling, house-draining, river-cleansing, and other works of a like character, had not been executed as rapidly as they were required; several reasons may be offered to account for this apparent neglect. Local Improvements Acts were generally defective in not providing easy means to carry out such improvements; and, consequently, newly formed streets were utterly neglected. Large cotton mills, and other buildings connected with the trade of the district, were from time to time constructed, to be surrounded by new streets set out without plan or level, in which houses were built without control or order, the natural surface of the ground being, in many instances, left to form the road. As such streets and roads were carted over they became broken and rutted in wet weather to an extent which

rendered them, as stated in my first reports, impassable to wheeled vehicles. It was not uncommon to have waggons broken down and stuck fast in the mud, the load having to be removed at great cost before the broken and imbedded waggon could be hauled out again; and I have seen a load of coals deposited at the end of a long street because it was impossible to cart them to the house where they were required. These coals had, consequently, to be carried by hand, causing excessive additional labour and great inconvenience to the inhabitants. As respects trade, railway companies had found it necessary to give notice that they could neither fetch goods from nor deliver them to some of the mills and warehouses in consequence of the mud on these neglected streets and roads.

As there was no main sewerage in such streets, house draining was, for the most part, impossible; foul water, and other refuse, consequently added to the evil. Where there was a natural fall, slops and fluid refuse from houses on the higher ground flowed down and over the surface of adjoining yards at a lower level, causing anger amongst neighbours, and sometimes litigation. It was distressing to see a cottage floor newly washed, but surrounded, and only approachable, by roads of the filthiest possible character. These clean floors generally belonged to recent occupiers, older residents having given in to the state of dirt in which they were imbedded. This general filth tended, in time, to produce apathy, and occasionally dissipation and despair. Consumption prevailed in excess, and when any form of epidemic disease set in, the poor's rates had to bear the cost of the sickness; and if the head of the family died, such family (widows and children) frequently had to be removed to the union workhouse, to become, for the most part, paupers for life. This round of sanitary neglect, producing filth, misery, drunkenness, disease, pauperism, and sometimes crime, is as consequent and certain as any other form of cause and effect.

The state of things faintly described not only existed in the distressed cotton district at the commencement of the recent cotton famine, but also existed, and now exists, more or less, in such towns as Newcastle-upon-Tyne, Gateshead, Sheffield, Leeds, Birmingham, Brighton, the suburbs of London, and in many lesser towns and places throughout Great Britain. Any owner of land is at liberty to lay out a new street. Speculating builders, or individuals, run up houses upon such streets, whilst the local authorities either do not possess the necessary legal powers to compel systematic sewerage, draining, road-forming, and paving; or, they neglect to enforce such powers, in deference to obstructive ratepayers and objecting speculators.

The Public Works (Manufacturing District) Act, 1863, offered legal powers specially designed to meet the requirements of towns and districts. The care, skill, and special knowledge with which this Act was prepared have been proved by its general working. Private property has been frequently interfered with by notices under the Act, but the results are so self-evident in clean streets and good roads, where formerly all was mud, and the terms of repayment are made so easy, as to have converted, what formerly was opposition, into acquiescence, and even into approbation. Additional public and private improvements have been taken up in the several towns and districts, and will be further taken up, to such an extent as to make the amount of the loan sanctioned by Parliament form only an item in the ultimate total expenditure for public and private sanitary purposes which the

Public Works Acts have initiated. The advantages of well-formed streets and properly drained houses are now so self-evident in Lancashire, as giving an additional money and rent value to mill, warehouse, and cottage property, that owners of land and houses follow the examples afforded, and, as a first necessity, sewer, form, pave, and channel new streets as they are set out for building purposes.

One of the most injurious forms of nuisance, discomfort, and disease, namely, the cottage midden or cesspit, has not been materially affected. I have previously drawn attention to these cesspits in former reports, but as very little has been done to abate this form of nuisance, and as discredit may be brought on the works executed if they are allowed to remain, at the risk of repetition I again bring the question of intercepting sewers and proper house-drainage under notice, as main sewers will be of little avail if masses of putrid refuse remain beneath rooms which are inhabited, and soaking through walls and subsoils, to the destruction of health. These middensteads and cesspits are crowded in amongst and behind cottage houses, where the refuse ferments, and gives off gases of decomposition. Vast numbers of cottages are also of faulty construction; placed back to back, with no means of through ventilation provided; they are also crowded in courts and alleys, narrow passages, and confined yards, where external means of ventilation is difficult, and where sunlight, in numerous cases, is impossible. The objections to abolishing cottage cesspits are, "the first cost," "want of water," and the present foul state of the several streams and rivers, which would, by such cesspit and soil-pan drainage, be rendered still more foul and abominable.

Wholesale draining into rivers causes a terrible nuisance. This, however, is by the utter waste of sewage and total neglect of the true principles of town sewerage. Sewage must be taken to land for agricultural uses, and rivers must be purified, if only for manufacturing purposes. At present, many streams, in the manufacturing districts of Great Britain, during dry weather, are so discoloured and fouled as to become noxious and unfitted for any washing operations, manufacturing or domestic. Such streams, during the continuance of dry weather, are practically destroyed.

River purification can only be accomplished by an efficiently constituted River Conservancy Board, having jurisdiction over an entire river area, and armed with powers to compel the collecting of cesspool, soil-pan, water-closet, and waste water into intercepting sewers, and conveying such fluid refuse to land for agricultural uses. Isolated action will not avail for this form of work. Salford cannot purify the river Irwell by any separate intercepting sewers without Manchester joins at the same time; and not only should Manchester and Salford join in constructing main intercepting sewers for the purification of the several streams and rivers, as the Black Brook, the Irk, the Medlock, and the Irwell, but all towns and villages situate above, as also all mills, dyeworks, bleachworks, printworks, and other manufactories, should be required to cease pouring contaminated water down such streams. Foul water of every kind can be rendered comparatively innocuous by precipitation, by chemical treatment, or by filtration, and if it is compulsory so to purify refuse water before discharging it back into a stream, all the persons below must experience the benefit of such operation. The several streams in Lancashire are now rapidly being destroyed, even for purposes of trade, because it is not the special business of any constituted local body to conserve or see to

the prevention of such pollution for the benefit of the whole community.

A considerable amount of fever has prevailed throughout the country during autumn and winter, not only in many Lancashire towns, but, as set forth in the Registrar General's weekly returns, in most of the large towns, and in many of the villages throughout England. Main sewers, house drains, water supply, street-forming, and paving form only parts of an efficient sanitary system; there must be an immediate and entire removal of cesspit matter from the vicinity of dwelling houses; as, also, proper house accommodation, room ventilation, and an increasing cleansing by scavengers.

In many towns and villages there are seats of disease in damp, undrained, badly constructed, and overcrowded houses, where more parish money is regularly paid in relief, year after year, than would cover the rent of such properties. A remedy for this state of things is required, and must sooner or later be provided on a scale of sufficient magnitude to overtake the evil. Private benevolence cannot accomplish this task; the evil is of national magnitude, and will have to be met by some form of aid and of national control.

The public works in Lancashire are being gradually and rapidly brought to a close. They have afforded useful work to several thousands of earnest, sober, striving men. Many of these men have learned new occupations, and whilst doing so, by labouring in the open air, have found that they rapidly improved in health and gained bodily strength. Some have gone back to their former occupations, some have moved into other parts of the county to find work as skilled out-of-door labourers, and others, though remaining in the district, prefer to follow their new form of occupation, rather than return to the cotton mill, even when larger wages have been offered.

The local authorities, as per agreement, have regularly paid the stipulated interest for the money advanced by Government; and, in due course of time, the entire amount of borrowed capital will be returned into the national Exchequer, leaving Lancashire richer by the full money value of all the works undertaken, under the powers of the Public Works Acts, 1863-64, and executed in the time of her deep distress.

I have, &c.
ROBERT RAWLINSON.

To
The Right Hon. C. P. Villiers, M.P.,
 &c. &c. &c.

VAGRANCY : POPLAR UNION.—CIRCULAR from the POOR LAW BOARD
to BOARDS of GUARDIANS.

Poor Law Board, Whitehall, S.W.,

20th January 1866.

SIR,

I AM directed by the Poor Law Board to transmit to you, for the information of the Guardians, the annexed Copy of a Letter from the Clerk of the Poplar Union, relative to the employment of Police Constables as Assistant Relieving Officers for Vagrants in that Union. The Board, in their Minute of 23d December 1863, on the subject of the relief of the Houseless Poor in the Metropolis, stated that in several parts of the Country arrangements had been made with the Police to undertake the duties of Assistant Relieving Officers for Vagrants, and had been attended with benefit. They also, in their Circular Letter of 13th January 1864, recommended the Guardians in the Metropolitan District to secure the valuable services of the Police Force, which the Commissioner of Metropolitan Police was willing to render available for the purpose. The result of the adoption of this system in the Poplar Union confirms the opinion of the Board as to its expediency.

I am, &c.

W. G. LUMLEY,
Assistant Secretary,

*The Clerk to
The Board of Guardians.*

VAGRANCY : POPLAR UNION, HIGH STREET, POPLAR.

Weekly Meeting, Tuesday, 4th January 1866, 2 P.M.

SIR,

As the Police have now been appointed Assistant Relieving Officers for upwards of one month, I am sure you will be pleased to receive a return of the number of Vagrants admitted before the employment of the Police and afterwards. I have therefore prepared a return of those persons for the months of November and December last. The Police arrangements commenced on the 1st of December last.

It is certain we have got rid of a great many of the idle young men and lads whom we used to have, as the Police are well acquainted with those who are constantly loitering about the streets, and such persons will not apply to the Police.

One instance was communicated to me by Inspector Bear of a lad whom he knew as living with his parents in Poplar, who used occasionally to present himself at the ward late at night; but on his so doing while the Police were acting he was taken to his father's home by a constable; and now, finding the ward not allowed to him, has not been since seen idling about; so far no harm has happened to that boy. I have no doubt many similar cases could be found.

I feel sure that if the whole of the metropolitan unions could be induced to employ the Police, they would be well satisfied with the result, and the whole subject would be better managed.

Your, &c.

*H. B. Farnall, Esq., C.B.,
Poor Law Inspector.*

JAS. R. COLLINS,
Clerk.

POPLAR UNION.

RETURN of HOUSELESS POOR admitted during the Month of November 1865, before the Police were employed as Assistant Relieving Officers, and during the Month of December 1865, after they were so employed.

1865.	Number admitted.			Ages of Men.		Occupation as given.		Whether regular Wayfarers or not.	Number of Cases of tearing up Clothing.
	Men.	Women.	Children.	Under 25.	Above 25.	Labourers.	Others.		
November	1,251	431	136	515	736	1,180	71	Three-fourths not.	28 convicted.
December	470	84	20	148	328	440	36	Yes.	One.

N.B.—It will be seen from the above Table that there is a Decrease of Houseless Poor relieved in the Month of December as compared with the Number relieved in the preceding Month of 1,241 persons, or 68·1 per cent.

H. B. F.

No. 14.

ACCOUNTS : CIRCULAR LETTER from the POOR LAW BOARD to BOARDS of GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
12th March 1866.*

SIR,

I AM directed by the Poor Law Board to state that they have revised the General Order of Accounts, and have made various alterations in it.

They hoped to have been able to issue the amended Order so as to enable the Guardians to adopt the new forms at Lady-day next.

They find, however, that the time required for printing will be such as to prevent them from completing and issuing it so as to be available for the Guardians at that date.

They have, therefore, to recommend the Guardians to continue for a short time longer to use the present forms, adapting them where necessary to the alteration of the law, whereby parochial chargeability in the Union will be abolished.

I am, &c.

To

ENFIELD,

The Clerk to the Guardians.

Secretary.

No. 15.

ELECTION of GUARDIANS : QUALIFICATION of OCCUPIERS of SMALL TENEMENTS to VOTE.—CIRCULAR LETTER from the POOR LAW BOARD to the BOARD of GUARDIANS.

*Poor Law Board, Whitehall, S.W.,
2d April 1866.*

SIR,

I AM directed by the Poor Law Board to state, that from inquiries which have been made of them they are induced to believe that some misunderstanding exists as to the purport of a late decision of the Court of Queen's Bench in reference to the qualification of the occupiers of small tenements to vote in the election of Guardians.

They, therefore, desire to state, that an application was made in Michaelmas Term last to that Court for a quo warranto information against a person named Hampton for exercising the office of Guardian in the West Bromwich Union. Several questions were raised, among

others, whether occupiers of small tenements in the parish of West Bromwich, the owners of which had compounded for the Poor Rates, were entitled to vote in the election of Guardians.

It appeared that there is a local Act termed the "West Bromwich Rate Act," 13 & 14 Vict. c. iv., whereby, after enacting,—

That the owners of every tenement within the parish of West Bromwich, not exceeding 7*l*. Rateable Value, according to 6 & 7 W. 4. c. 96., shall and may be rated and assessed, and shall pay the poor rate, highway rates, &c. instead of the occupiers thereof, it is provided, that notwithstanding the rating of or payment by any such owner under this Act, such rating and payment shall not in any manner affect or prejudice the right of any occupier to the enjoyment of any franchise or privilege, whether municipal or parochial, to which he might be or become entitled within the said parish in case such owner or occupier, or either of them, shall have paid the full amount payable in respect of the property for which such occupier claims to exercise such franchise or privilege.

The Court decided that under the terms of this proviso the occupiers of the small tenements whose landlords were assessed and paid the rates were entitled to vote as ratepayers in the election of the Guardians for the parish. They gave no decision as to the effect of the statute 13 & 14 Vict. c. 99., the general "Small Tenements Rating Act," as no question arose upon it.

The case is reported in 13 Law Times Report (n.s.) p. 431 by the name of *Reg. v. Hampton and others*.

I am, &c.

W. G. LUMLEY,
Assistant Secretary.

To

The Clerk to the Guardians.

No. 16.

TRAINING NURSES FOR WORKHOUSE HOSPITALS:

REPORT from the MASTER of the LIVERPOOL WORKHOUSE.

Thursday, 10th May 1866.

Pursuant to the resolution of the Workhouse Committee, directing reports from myself and the senior medical officers of the workhouse on the system of nursing the sick by trained nurses upon the plan sanctioned by the select vestry a year ago, I have the honour to submit the following report:—

The main feature in the new system of nursing consists in the superseding of pauper nurses and appointing in their places competent trained nurses from the Nightingale School,—these latter to have the assistance of "probationary nurses," or, in other words, women of intelligence and of good character desirous of entering upon the duties of nursing the sick as a profession. A third class was also created, designated "assistants." These were selected from the old pauper nurses, and it was decided that they should be paid, clothed, and receive rations equal in quality and quantity to those issued to the officers of the workhouse. The nurses, probationers, and assistants were placed under the control of a "Lady Superintendent," who was empowered to employ them in the manner to her seeming best for the proper care of the sick.

It being desirable that the nursing staff should be relieved, as far as practicable, from every duty save that of attending to the sick, officers were appointed to perform all outside duties, such as the drawing of food, clothing, and other duties not actually within the province of a nurse.

The staff, as a whole, consisted of the following :

Lady Superintendent	-	-	1
Trained nurses, Nightingale School	-	-	12
Probationer nurses	-	-	18
Assistants (ex-paupers)	-	-	37
Scourers do.	-	-	15
Cooks do.	-	-	6
House Steward	-	-	1
Female Storekeeper	-	-	1
Housekeeper in charge in kitchen	-	-	1
			<hr/>
			92
			<hr/>

With this staff the new system was inaugurated on the 1st June 1865.

The male hospital being completely cut off from the other wards of the workhouse, was selected as that in which the new system could be most fairly tried. The number in the hospital on the above date was—

Male medical cases	-	-	167
Male surgical cases	-	-	173
Infirm and bed-ridden cases	-	-	182
			<hr/>
			522
			<hr/>

The 522 patients were placed in charge of the staff already mentioned, numbering 92 officers in all.

It is here proper that I should state that the staff displaced by the new staff consisted of three superintendent nurses, to whom the sum of 48*l.* yearly was paid in the aggregate. These three officers, with the aid of pauper women, all of whom exceeded the age of sixty years, as required by the regulations, were entrusted with the duties of nursing the patients transferred to the newly-organised staff. The Committee will therefore be prepared to hear that the change was immediately followed by the most marked improvement in every respect. The most casual observer could not avoid perceiving it. This applies not only to the state of the wards, the care of the sick, but is particularly observable in the demeanour of the patients, upon whom the humanising influences of a body of women of character, devotedly discharging their duties, has produced evident fruits.

The question has often been asked whether the “new system” is likely to succeed. The “old system” meant nothing more than this, that old ignorant and unreliable pauper women, many of whom were of doubtful character, were entrusted with the discharge without pay of responsible duties. These have been displaced, and active intelligent reliable women, trained and skilled as nurses, with good characters and pay, have been appointed to supersede them. It would be a great discredit if these latter did not discharge their duties incomparably better than the former could do. That they do so I am happy to be in a position to testify.

In the opening paragraph of this report it is stated that “assistant nurses” were appointed and placed upon pay from the ranks of the paupers. This I was always opposed to. Their employment has resulted in complete failure, as the following figures will prove. The total number appointed to this date is 141; of these 67 have been dismissed through drunkenness and other misconduct, and 16 have resigned, while it is positively true that there is not one of the whole

number to whom I could entrust the duties of serving out wine or other stimulants, or in fact any duty requiring the exercise of integrity.

As was anticipated, great difficulty is experienced in procuring suitable persons as probationer nurses. Up to this date I have engaged in all 40. Of these, 21 have resigned and 8 have been dismissed, while of those remaining the majority are of recent appointment, proving that so far as the past year goes the work of training nurses has not been successful. There is no doubt that the difficulty in keeping up a staff of nurses will prove no small barrier to the extension of the system.

With a view to enable the Committee to estimate the value of the system, I have prepared a series of returns, which I beg to submit; the object in view being to show, if possible, whether—

- 1st. The improved system of nursing has diminished the per-centage of deaths.
- 2d. Whether it has increased the per-centage of cures.
- 3d. Whether it has checked the ingress and egress of patients known as schemers.

These returns exhibit the state of the hospitals, male and female, for the last ten months, as compared with its state in the corresponding period of the past year; and it is a singular fact that the per-centage of deaths as well as the per centage of discharges are unfavourable to the new system.

These facts warrant the belief that the short space of ten months does not afford a fair trial to the project under consideration.

That the sick have been well cared for I can testify, yet, so far as figures lead one to conclude, the results would not seem to realize the expectations formed.

In conclusion, I am bound in duty to bear testimony to the assiduity and zeal with which Miss Jones, the Lady Superintendent, entered upon the duty of organising the new system, and the manner in which she continues to devote herself to the task. The experience of the past year renders it certain that the Poor Law as now existing offers no impediments to the successful working out of the most complete scheme for the efficient nursing of the sick in the manner advocated by the best friends of hospital nursing.

(Signed) GEO. CARR.

COMPARATIVE RETURNS of MALE HOSPITAL for 10 Months ended 29th March 1866,
and for some period of the previous Year.

5 Abercromby Square, Liverpool,

10th May 1866.

SIR,

HAVING been requested to report on the system of nursing by an entirely paid staff adopted in the male department of the Liverpool workhouse hospital during the past year, I beg to state,—

1st. That having no official connection with the surgical or infirm wards, my remarks will apply solely to the male medical wards.

2d. That in the medical wards of a general hospital the cases vary so much in nature and degree from year to year as to render it impossible to give a reliable statistical comparison of the value of a paid as distinguished from an unpaid staff of nurses. I am, therefore, necessarily compelled to report in general terms in the nursing of the last ten months in the male medical wards, premising that what I say in approbation of the new system and the new staff of nurses, must not be construed as an unfavourable reflection on the whole of the previous staff. The paid superintending nurses of departments, and a few of the unpaid pauper nurses, deserved great credit for their conduct, though their qualifications for the service were decidedly inferior to those of the trained "Nightingale Staff." With regard to the latter, I can cordially bear testimony to their ability and to their unwearied and uniformly kind attention to the patients under their charge. As to their nursing in its specific sense, I may state my belief that in every case my directions and those of the house surgeons have been rigidly carried out. The medicines, stimulants, &c. &c. have been carefully administered, and the other numerous but less agreeable duties have been faithfully and efficiently attended to. Under their charge I have perceived a marked improvement in the demeanour of the patients; in fact the discipline of the wards is completely changed. There has been no disorder or irregularity, but a sense of comfort, order, and quiet pervades the whole department. I believe further that every patient leaving the wards has been more or less morally elevated during his location there.

The impression I have formed of the value of paid nursing, after no little experience of the character and results of pauper nursing, may be inferred from my earnest desire to see the system introduced into all the parochial hospitals of the kingdom.

I am convinced that my testimony to the order and cleanliness of the hospital and of the patients, to the improved conduct of the latter, to the regularity and precision with which the prescribed remedies have been administered, and to the gentle and kind attention paid to the sick and the dying, will afford no less gratification to the Workhouse Committee and the inhabitants of Liverpool than to myself, who, during this season of probation, have had the pleasure of daily witnessing such admirable results.

I cannot close my report without referring to the Lady Superintendent, Miss Jones. She has occupied a most difficult and arduous post, but by indefatigable exertion she has nobly fulfilled her mission; and I may assert, without fear of contradiction, that her ability, devotion, and self-denial are beyond all praise.

I am, &c.

ROBERT GEE, M.D., M.R.C.P.,
*Physician to the Liverpool Workhouse
Hospitals, &c. &c.*

*The Chairman of the
Workhouse Committee.*

EXTRACTS from REPORT on the Success of the TRAINED NURSES introduced into the WARDS of the MALE HOSPITAL of the LIVERPOOL WORKHOUSE.

In regarding the success of any system, two points claim especial attention, namely, the cure of disease, and the relief of sickness.

Since my connection with the hospital last August, we have had somewhat approaching a hundred operations, many of them of a serious and dangerous character, requiring not only prompt assistance at the time, but most persevering attention night and day for a long time after. Almost all these operations have been in the male hospital, and I have no hesitation in saying that what success has attended them has been greatly owing to the most efficient assistance rendered by the trained nurses; and from my experience of the assistance received from the pauper nurses in the few cases of operation performed in the female hospital, I should feel great diffidence in undertaking on that side such operations as I have had on the other side; indeed on one or two occasions the pauper nurses ran away, and when induced to assist were so nervous and frightened as to be of little service.

Without any wish to speak harshly of the unpaid nurses employed on the female side of the hospital (who, I believe, strive to do their best, more especially since a feeling of emulation has been set up by the introduction of the paid trained nurses,) I am compelled to state my conviction that on that side my directions are not carried out with that necessary promptitude and skill that they are on the other side, and that in all I do there I feel as if I were working with blunted instruments. There is no want of inclination, but simply a want of ability, that integrity of disposition, promptitude of action, tact in manipulation, gentleness of demeanour, and kindly consideration necessary to make a nurse, are not found or to be found in the inmates of a workhouse, and no amount of education can work out of them what never was in them.

Persons of one class as a rule favour their own class, and there is a far better chance of double dealers being detected when under the observation and care of a trained nurse than when under the care of one of themselves. That such is the case my own experience testifies.

As far, therefore, as my experience extends of the system of trained nurses, whether regarding the saving of life, the restoration of health, or the relief of suffering, it has been an undoubted success.

(Signed) J. H. BARNES.

POOR RATE RETURN.—REMARKS on the Annual Poor Rate Return, Year ended Lady-day 1865. [No. 442. (D.) Session 1865.]

Series of Returns.

The present Return is the *fifty-eighth* annual publication of the Poor Rate Returns.

Extent of the Return.

This Return is, in respect of the number of places which it represents, the most complete of the Statistics of pauperism; for in it the sums levied and expended as Poor Rates throughout the whole of England and Wales are exhibited; excepting only some small Parishes,

which are stated by the overseers either to have "No poor," or to make no levy "yet."

The net annual value of property assessed to the Poor's Rate has been returned in respect of four parochial years. "The Gross Estimated Rental" is also returned for the last of these years.

YEARS.	Poor Rate Valuations.*		Amount of Poor Rates levied.	Rate in the £ of Levy on		Expended for Relief to the Poor.	Rate in the £ for Relief on

1855-56	86,077,676	71,840,271	8,201,348	1 10'9	2 3'4	6,004,244	1 4'7	1 8'1

* The details of these Valuations will be found in the following papers, printed by order of the House of Commons, viz., No. 235 "Real Property," 1842; No. 735 "Poor Rates, &c.," 1846; No. 539 "Poor Rate Assessment," 1852; No. 63 "Population, &c. of Parishes," 1858; and No. 251 "Population, Inhabited Houses, &c.," 1859. The "Gross Estimated Rental," and the "Rateable Value" for each Parish is given with respect to the Parochial year 1856 in No. 401 "Poor Rates, &c." Session 1861.

The Returns, in a contracted shape, are exhibited in the next Table, for the last three years, with the rate per head, on the estimated population, of the amount levied as Poor's Rate, and of the amount expended in relief:—

Years ended at Lady-day.	RECEIPTS.			EXPENDITURE.			RATE per HEAD.	
	From Poor Rates.	Receipts in Aid.	TOTAL.	Relief to the Poor only.	All other Purposes.	TOTAL.	Levy.	Relief to the Poor.
	£	£	£	£	£	£	s. d.	s. d.
1863	9,174,976	337,679	9,512,655	6,527,036	2,798,035	9,325,071	8 4	6 4½
1864	9,448,319	426,250	9,874,569	6,423,381	3,257,099	9,680,480	9 1½	6 2½
1865	9,392,191	376,951	9,769,142	6,264,966	3,527,193	9,792,159	9 0	6 0

The greater part of the expenditure, described in the last Table as for "All other Purposes," consists of payments which have no connexion whatever with relief to the poor. This part of the Poor Rate Expenditure, which is foreign to the object originally contemplated in the enactment of the rate, has greatly increased since the passing of the Poor Law Amendment Act in 1834, in consequence of the imposition of new and the augmentation of old charges. The next Table exhibits, separately, all the charges referred to, so far as the returns permit. The heaviest item is the disbursement in respect of the "County, Hundred, or Borough Rate, or Police Rate." The payments made by the Overseers to Highway Boards are shown as separate items for the first time in the Return of the present year.

Large proportion of expenditure for purposes unconnected with relief.

Table of Expenses unconnected with Relief.

Years ended at Lady-day.	POOR RATE EXPENDITURE FOR PURPOSES UNCONNECTED WITH RELIEF.

Considerably more than *one third* of the whole Poor Rates now levied are expended for purposes unconnected with relief to the poor. Besides the charges here shown, there are some others paid out of the Rate,

but which are not discriminated, such as the expenses incurred for sanitary purposes, and the cost of providing new burial grounds.

The principal heads of expenditure, which constitute "Relief to the Poor," are shown in the next Table, together with the average price of wheat for the three years.

Principal Charges which constitute Relief to the Poor.

Years ended at Lady-day.	EXPENDED FOR RELIEF TO THE POOR.							Average Price of Wheat per Imperial Quarter.
	(a) In-Maintenance.	(b) Out-Relief.	(c) Maintenance of Lunatics in Asylums or Licensed Houses.	(d) Workhouse Loan Repaid, and Interest thereon. Medical
Relief.

The column in the Return, which succeeds that of "Total Expenditure," contains the expense of *Medical Relief* only; this consists of salaries to the Medical Officers; extra Medical Fees paid to them under the General Consolidated Order; also, the cost (if any) of medical and surgical appliances, and drugs. The sums in this column are not additional to those given in Column 4. § A, of the Return; because, the various items of Medical Relief are included in sub-columns (e) or (f), as forming a portion of the "Relief to the Poor:" the "Medical Relief" is printed separately, as indicating an important and special subject of Poor Law administration.

The sums expended under this head during the last three years were as follows :

For 1862-63	-	-	-	£ 248,286
1863-64	-	-	-	253,204
1864-65	-	-	-	259,833

School
Districts.

Twenty-six Unions and single Parishes, chiefly Metropolitan, are combined into School Districts; the contributions which each Union makes to the treasurer of its district are included in the other items of relief, and, as such, entered in the proper columns of the Poor Rate Return; this, then, like the Medical Relief, does not represent any additional expenditure, having been heretofore properly included in the amounts printed opposite to the respective Unions concerned.

The sums contributed to the School Districts; and, the sums expended by each district during the parochial year 1864-65, are contained in the subjoined Table :—

YEAR ENDED AT LADY-DAY 1865.

School District Number.	SCHOOL DISTRICTS.	RECEIPTS.			EXPENDITURE.				
		Con- tributions paid to the District School.	Other Receipts.	TOTAL.	Mainte- nance of Children at District School.	School Loan and Interest repaid.	Salaries and Rations of Officers and other common charges.	Other Expenses.	TOTAL.

Notes.—(a) The year 1834 was the last parochial year prior to the passing of the Poor Law Amendment Act.

(b) The Population of 1841, 1851, and 1861 is the actual Population according to the Census taken in those years.

(c) The net Annual Value of Rateable Property for England and Wales in 1841 was £62,440,000; in 1847 £67,399,687; in 1850 £67,700,168, and in 1856 £71,810,270. The gross estimated Rental was, for the first time, returned in the last-mentioned year; it amounted to £65,077,476.

No. 24.

IN-MAINTENANCE AND OUT-DOOR RELIEF.—REMARKS on the Returns of In and Out-door Relief, Half Year ended Lady-day 1865. [No. 507. (c. 1.) Session 1864.]

THE Returns of In-maintenance and Out-door Relief, printed at pp. 16-59,* have been received from 655 Unions and single Parishes under Boards of Guardians; but two of that number, namely, Shrewsbury, and Montgomery and Pool, give the cost of In-maintenance only. Number of Unions returned.

The amount expended in the 655 Unions and Parishes during the half year was, for—

In-maintenance.	Out-door Relief.	Total.
£ 589,492	£ 1,630,366	£ 2,219,858

The population of the places referred to was 19,886,104, according to the Census of 1861; the entire population of England and Wales being 20,066,224.

The sum expended for Irremovable Paupers can be shown for 613 Unions and single Parishes only; as the other places keep no separate account of their disbursements in respect of this class of poor. Irremovable Paupers.

The 613 Unions and Parishes contain about 17-20ths of the entire population of the Kingdom; the sum expended in them for relief during the half year was, in respect of—

	In-Maintenance.	Out-Door Relief.	TOTAL.
	£	£	£
Irremovable Paupers -	126,402	575,257	701,659
Other Paupers - -	309,763	926,651	1,236,414
TOTAL -	436,165	1,501,908	1,938,073

The cost of relief to the Irremovable Paupers was 36·2 per cent. on the cost of relief to both classes during the half year; but during the half year ended at Lady-day 1864, the ratio was 36·1 per cent.; so that the proportion has risen by 0·1 per cent., comparing the former period with the latter.

The following Table is a comparative statement of the expenditure for the half years ended at Lady-day 1864 and 1865, in 655 Unions and single Parishes. Expenditure, Lady-day half years 1864 and 1865.

Half Years ended at Lady-day	Cost of			Decrease, as compared with 1864.	Decrease per Cent.
	In-Maintenance.	Out-door Relief.	TOTAL.		
	£	£	£	£	
1864 -	559,893	1,691,594	2,251,487	—	—
1865 -	589,492	1,630,366	2,219,858	31,629	1·4

State of Em-
ployment.

The extent of employment among the labouring population during the periods under consideration is, to a certain extent, indicated by the official Tables of the declared value of the imports and exports of the United Kingdom.

The amounts for the half years ended at 31st March, were, in—

		Total Declared Value of	
		Imports.	Exports.*
		£	£
1864	-	128,571,000	78,861,000
1865	-	121,791,000	72,667,000

Comparative Expen-
diture in
Divisions.

Comparing the expenditure for In-maintenance and Out-door Relief of the Lady-day half year, 1865, with that of 1864, it will be found there was a decrease of 31,629*l.*, or 1·4 per cent.; and it will be seen by the next Table, that there was a decrease of expense in six Divisions out of the eleven into which the Kingdom is apportioned.

* NOTE.—No Monthly Account is kept of the Export of Foreign and Colonial Produce.

DIVISIONS.	Number of Unions, &c.	Expended for IN-MAINTENANCE and OUT-DOOR RELIEF, during the Half Year ended at Lady-day		Difference between the Lady-day Half Years 1865 and 1864.		Difference per Cent.

Poor Law Board, }
30th September 1865. }

FREDERICK PURDY,
Principal of the Statistical Department.

No. 25.

REMARKS ON THE INDUSTRIAL STATISTICS OF 1861.

The INDUSTRIAL STATISTICS of 1861.

Industrial
Statistics.

The publication of the Occupations Census of 1861 has rendered it necessary to effect a change both in the form and the matter of the "Industrial Statistics," which, since 1857, has formed part of the series of papers periodically laid before Parliament by the Poor Law Board under the title of "Poor Rates and Pauperism."

New classification of the
Occupations of the People.

An explanation of the classes under which the occupations of the people in 1851 were arranged has prefaced the previous numbers of this series, and therefore need not be repeated. The classification of 1861 differs in several important particulars from that previously employed by the Commissioners of the Census. The new system can be best explained in the words of its author,* premising that, in Dr. Farr's Report on the "Classification of Producers," the lowest groups, termed "Sub-Orders," are marked with a small Arabic numeral (2); that, these Sub-Orders are gathered up into "Orders," marked by a larger numeral (2); and, that the Orders are collected into "Classes," marked by a Roman figure (II.)

CLASSIFICATION OF PRODUCERS.

I.—PROFESSIONAL CLASS.

(Orders 1, 2, 3). *Andricl.*

" This great class includes those persons who are rendering direct service to mankind, and satisfying their intellectual, moral, and devotional wants.

" The three first Orders consist of civil servants, national or local; the army and navy; the learned professions, with their immediate subordinates; literary and scientific men, as well as artists in the widest sense.

" The first Order (1; 1) includes the members of the Government, and the civil service; (2) the police and other local officers; and (3) the East India and Colonial Service.

" The army (2; 1) and navy (2; 2) are in the service of the Government; and are intimately connected with it in all states. And the clergy in the Established Church, as well as the lawyers in the courts of justice, are in official subordination to the Sovereign; but the great majority of the members of these professions are neither nominated nor paid by the Crown. Like the medical, the literary, and the scientific professions, which were at one time included in the Church, and were supported by its livings, the clergy and lawyers assert their independence, and are, therefore, made separate sub-orders. So are authors, artists, musicians, actors, teachers, and scientific men. Nearly all the members of the class are paid directly for their services; and these services have no intermediary, being rarely fixed in any commodity. The pay varies in each Order, and it is either proportional to the time (salary, wages, pay), the job (fees), or the quality and quantity of work done (piecework)."

ORDER 1. *Persons engaged in the General or Local Government of the Country.*

" 2. *Persons engaged in the Defence of the Country.*

" 3. *Persons engaged in the Learned Professions or engaged in Literature, Art, and Science (with their immediate Subordinates).*

II.—DOMESTIC CLASS.

(Orders 4 and 5.) *Oikici.*

" The persons in this Class are all employed, if they are employed at all, in houses. Some supply simply service, others with it supply board and lodging (Order 5.) They are paid wages (servants), or they are paid for the board and lodging and

* See Dr. Farr's account of the "New Classification of the People according to their Employment."—Census of England and Wales, 1861, Vol. III., pp. 225 *et seq.*

attendance which they supply. The publicans and beersellers are so much associated and so often confounded with hotel and innkeepers that they are retained in the same Order; although the Order dealing in 'drinks' may claim them. The wife and grown-up children (Order 4.) perform at home for the bulk of the population the same duties as the persons in Order 5.; but they are not paid directly in money for their services, as they form a part of the natural family; consequently they are distinguished in a separate Order. The very young children properly belong to the non-productive class, and they may there constitute a section; scholars and other children are learning the elements of their future occupations; but until that occupation is determined they remain in the same Order as their mothers."

ORDER 4. *Persons engaged in the Domestic Offices or Duties of Wives, Mothers, Mistresses of Families, Children, Relatives* (not otherwise returned).

„ 5. *Persons engaged in entertaining and performing Personal Offices for Man.*

III.—COMMERCIAL CLASS.

(Orders 6. and 7.) *Agorici.*

"The merchant buys any article like tea abroad, transports it to England, and there sells it. He performs the like operation at home. But as a merchant he effects no change in any of the commodities in which he deals. He buys and sells, and is paid for his services by a varying but rated profit on the goods.

"The carrying order convey commodities, passengers, and messages by land or water, from one place to another. They also warehouse goods. They are paid for their services in fares, freight, and charges, which bear some proportion to the weight, bulk, and other properties of the goods. They are all in Order 7, and are closely related to the Order preceding; hence the two Orders (6-7.) together may be called the Commercial Class."

ORDER 6. *Persons who buy or sell, keep or lend, Money, Houses, or Goods of various Kinds.*

„ 7. *Persons engaged in the Conveyance of Men, Animals, Goods, and Messages.*

IV.—AGRICULTURAL CLASS.

(Orders 8. and 9.) *Georgici.*

"We now come to a great class which is employed in producing grain, fruit, grass, animals, and other products from the soil. They may be called Growers; for their products grow and are obtained from the living kingdoms of nature. The heads of the Class are paid, not directly for their services, but indirectly in the price of the products which they sell in the market or elsewhere. Thus the price of a quarter of wheat includes the pay of the services of all the persons employed in its production as well as the cost of the tools and machines, including the land, by means of which it is produced and brought to market. Agricultural servants and labourers are paid in wages which the farmers advance. The persons engaged in gardens or woods are in separate Sub-orders.

"The men in Order 9. are employed in catching, training, or dealing in living animals of various kinds. They are the representatives of the hunters of the early stages of civilization, and may be considered an appendage to the previous pastoral and agricultural class, so forming Class IV., which thus includes hunting tribes, the pastoral clans, and the agricultural people of the world."

ORDER 8. *Persons possessing or working the Land, and engaged in growing Grain, Fruits, Grasses, Animals, and other Products.*

„ 9. *Persons engaged about Animals.*

V.—INDUSTRIAL CLASS.

(Orders 10, 11, 12, 13, 14, and 15.) *Technici.*

"This is the Class of makers or artisans. They deal in matter that is either no longer living, or that never lived. They alter the form, texture, or composition of the materials in which they work, so as to produce a great variety of goods, instruments, and machines. Their pay and profits are charged in the price of commodities; the wages of the workmen being advanced by their masters.

"This Class is grouped according to the materials, distinguishing those derived from the three kingdoms of nature.

"The first Order (10.) of the Class includes artisans, making products of various materials, derived from the three kingdoms, such as coaches, ships, workshops, factories, houses, and their furniture or other contents.

"Then follow the persons engaged in the textile fabrics (Order 11.) Wool, silk, cotton, flax, and hemp are durable and divisible; their manufacture admits of the sub-division of labour and the application of machinery. The workers in these materials are the essentially manufacturing class. In a Sub-order (4.) are the artisans who convert the manufactured fabrics, and some other matters, into dress.

"Human food, drinks, and stimulants, derived from the animal and vegetable kingdoms, occupy a distinct Order (12.), sub-divided into three Sub-orders.

"Then follow (13.) the persons chiefly or exclusively working and dealing in other animal substances than food (14.), those working and dealing in vegetable substances, and (15.), those working and dealing chiefly in minerals and metals. The first Sub-order of the latter Order (15.) includes the mining population of every kind; the other thirteen Sub-orders include the chief workers in the metals and minerals, beginning with coal, and ending with steel."

ORDER 10. *Persons engaged in Art and Mechanic Productions, in which Matters of various Kinds are employed in combination.*

- " 11. *Persons working and dealing in the Textile Fabrics, and in Dress.*
- " 12. *Persons working and dealing in Food and Drinks.*
- " 13. *Persons working and dealing in Animal Substances.*
- " 14. *Persons working and dealing in Vegetable Substances.*
- " 15. *Persons working and dealing in Minerals.*

VI.—INDEFINITE AND NON-PRODUCTIVE CLASS.

(Orders 16, 17, and 18.)

"The last Class includes the numbers returned in a vague way, so as to scarcely admit of classification among either the professional, the domestic, the commercial, the agricultural, or the industrial classes.

"It embraces the totally distinct Orders of general labourers (16.), persons of property returned as of no occupation (17.), and persons supported by the community (18.) Many of the persons in Orders 16. and 17. properly belong to the other classes.

ORDER 16. *Labourers and others—Branch of Labour undefined.*

- " 17. *Persons of Rank or Property not returned under any Office or Occupation.*
- " 18. *Persons supported by the Community, and of no specified Occupation.*
Other Persons of no stated Occupation or Condition.

The relation of the new to the old classification is briefly exhibited by the following Synoptical Table:—

OCCUPATIONS OF THE PEOPLE.

CLASSIFICATION.		1861.	1851.
1.—PROFESSIONAL CLASS.	{	ORDERS I. & II. Are nearly identical with	CLASS I. Persons engaged in the general or local GOVERNMENT of the Country.
			CLASS II. Persons engaged in the DEFENCE of the Country.
	{	ORDER III. Comprises - - -	CLASS III. Persons in the LEARNED PROFESSIONS (with their immediate SUBORDINATES), either filling Public Offices, or in private Practice.
			CLASS IV. Persons engaged in LITERATURE, the FINE ARTS, and the SCIENCES.
2.—DOMESTIC CLASS.	{	ORDER IV. Is identical with - - -	CLASS V. Persons engaged in the DOMESTIC OFFICES, or DUTIES of WIVES, MOTHERS, Mistresses of Families, CHILDREN, RELATIVES.
		ORDER V. Excluding persons providing Dress, this Order corresponds generally with - - -	CLASS VI. Persons engaged in ENTERTAINING, CLOTHING, and performing PERSONAL OFFICES for Men.
	[See Order XII.]		
3.—COMMERCIAL CLASS.	{	ORDER VI. Is nearly identical with - - -	CLASS VII. Persons who BUY or SELL, LEASE, LET, or LEND, Money, Houses, or Goods of VARIOUS KINDS.
		ORDER VII. Is nearly identical with - - -	CLASS VIII. Persons engaged in the CONVEYANCE of Men, Animals, Goods, and Messages.

4.—AGRICULTURAL CLASS.	ORDER VIII. Is nearly identical with	- - CLASS IX. Persons possessing or working the LAND, and engaged in growing GRAIN, FRUITS, GRASSES, ANIMALS, and other Products.
	ORDER IX. Is nearly identical with	- - CLASS X. Persons engaged about ANIMALS.
	ORDER X. Persons engaged in the manufacture of Surgical and Musical Instruments, in Furniture, and in Tools and Machines returned in various Classes in 1851, are now placed in this Order. The other occupations of Order X. correspond generally with	- - CLASS XI. Persons engaged in ART and MECHANIC Productions, in which Matters of various Kinds are employed IN COMBINATION.
5.—INDUSTRIAL CLASS.	ORDER XI. This is a new Order, comprising persons engaged in Textile Manufactures and in Dress, formerly returned in	CLASS VI. See Classification of 1851, against Order V. CLASS XII. Persons working and dealing in ANIMAL MATTERS. CLASS XIII. Persons working and dealing in Matters derived from the VEGETABLE KINGDOM.
	ORDER XII. Consisting of three Sub-orders. 1. Persons engaged in providing Animal Food. 2. Vegetable Food. 3. Drinks and Stimulants, returned in	CLASS XII. See Classification of 1851, against Order XI. CLASS XIII. See Classification of 1851, against Order XI.
	ORDER XIII. Comprises persons working and dealing in Animal Substances, returned in	CLASS XII. See Classification of 1851, against Order XI.
	ORDER XIV. Comprises persons working and dealing in Vegetable Substances, returned in	CLASS XIII. See Classification of 1851, against Order XI.
	ORDER XV. A new Sub-order is introduced for Miners. Persons engaged in the construction of Iron Tools and Machines, returned in 1851 with Class XIV. have been transferred to Order X. of 1851; otherwise it nearly includes all the occupations of	CLASS XIV. Persons working and dealing in MINERALS.
	ORDER XVI. Nearly identical with	CLASS XV. Labourers and others—Branch of Labour undefined.
	ORDER XVII. Nearly identical with	CLASS XVI. Persons of RANK or PROPERTY not returned under any Office or Occupation.
6.—INDEFINITE AND NON-PRODUCTIVE CLASS.	ORDER XVIII. Nearly identical with	CLASS XVII. Persons supported by the community, and of NO SPECIFIED OCCUPATION.

In considering the occupations of the people in connexion with pauperism, the first class has been rejected, because, although it participates in the general welfare of the country, it experiences the vicissitudes of trade less directly than the others; and the last class, because it is indefinite, and therefore but little adapted to form any useful term of comparison within the field of pauper statistics. The ratio per cent. of persons aged 20 years and upwards ascribable to each of the six classes of occupations for all the Unions has, in the present instance, been computed for every Union by the Commissioners of the Census. The ratios of the *four* selected classes are printed opposite to the respective Unions in the following pages; at the same time, the special designation of the chief industries pursued in the various Unions according to the Census of 1851, has been retained in the place it originally filled in these Returns.

The absolute as well as the proportional numbers of the adult population under the six industrial classes are shown in the subjoined table for each Division and for each Union-County, as published in the third volume of the Census of England and Wales.

DIVISIONS AND UNION-COUNTIES.	PERSONS aged 20 Years and upwards.						To every 100 Persons aged 20 Years and upwards, of ALL OCCUPATIONS, the PROPORTIONAL NUMBER of EACH CLASS.

No. 28.

REMARKS on the Returns of In and Out-door Relief, Half Year ended Michaelmas 1865. [*No. 442 (c.) Sess. 1865.*]Number of
Unions re-
turned.

THE Returns of In-maintenance and Out-door Relief, printed at pp. 16-59*, have been received from 655 Unions and single Parishes under Boards of Guardians; but two of that number, namely, Shrewsbury, and Montgomery and Pool, give the cost of In-maintenance only.

The amount expended in the 655 Unions and Parishes during the half year was, for—

In-maintenance.	Out-door Relief.	Total.
£ 541,736	£ 1,574,480	£ 2,116,216

The population of the places referred to was 19,886,104, according to the Census of 1861; the entire population of England and Wales being 20,066,224.

Irremovable
Paupers.

The sum expended for irremovable paupers can be shown for 613 Unions and Single Parishes only, as the other places keep no separate account of their disbursements in respect of this class of poor.

The 613 Unions and Parishes contain about 17-20ths of the entire population of the Kingdom; the sum expended in them for relief during the half-year was, in respect of—

	In-maintenance.	Out-door Relief.	TOTAL.
	£	£	£
Irremovable Paupers -	118,964	544,761	663,725
Other Paupers - -	276,546	895,537	1,172,083
TOTAL -	395,510	1,440,298	1,835,808

The cost of relief to the Irremovable Paupers was 36·2 per cent. of the cost of relief to both classes in these Unions during the half-year; but during the half-year ended at Michaelmas 1864, the ratio was 34·9 per cent.; so that the proportion has augmented by 1·3 per cent. comparing the former period with the latter.

Expendi-
ture, Mi-
chaelmas
half years
1864 and
1865.

The following Table is a comparative statement of the Expenditure for the half years ended at Michaelmas 1864 and 1865 in 655 Unions and Single Parishes.

Half Years ended at Michaelmas	Cost of			Increase, as compared with 1864.	Increase per cent.
	In-Mainte- nance.	Out-door Relief.	TOTAL.		
	£	£	£	£	
1864 -	511,332	1,592,623	2,103,955	—	—
1865 -	541,736	1,574,480	2,116,216	12,261	0·6

* See Parliamentary Paper.

The average price of wheat, during the same half years, was in—

Prices of
Wheat.

	s.	d.	
1864 - - -	40	11½	per imperial quarter.
1865 - - -	41	10½	" "

The average contract prices of certain articles of food, supplied to the Guardians of the Poor of Lambeth, Birmingham, and Bury St. Edmunds, during the same periods, are exhibited in the next Tables :—

Of other
Provisions.

Half Years ended at Michaelmas	BREAD, per 4lbs. Loaf.			FLOUR, per Sack of 280 lbs.			POTATOES, per Ton.			MUTTON and BEEF, per Stone of 14 lbs.

	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
1864	0 9½	0 10	1 0	0 5	0 5½	0 5½	2 0	2 2½	3 4	0 4½	0 5	0 4½
1865	0 10½	1 0	1 0½	0 5½	0 5½	0 5½	2 1	2 2½	3 2	0 3½	0 4	0 4

* Bread made in the Lambeth Workhouse at an estimated cost of 5½d. per 4lb. loaf.

The extent of employment among the labouring population, during the periods under consideration, is, to a certain extent, indicated by the official Tables of the declared value of the imports and exports of the United Kingdom.

State of Em
ployment.

The amounts for the half years ended at 30th September were, in—

Half Years ended at 30th September	Total Declared Value of	
	IMPORTS.	EXPORTS.†
	£	£
1864 - -	148,243,000	86,737,000
1865 - -	129,406,000	84,082,000

† Note.—No Monthly Account is kept of the Export of Foreign and Colonial Produce.

Comparing the expenditure for In-maintenance and Out-door Relief of the Michaelmas half year 1865 with that of 1864, it will be found there was an increase of 12,261l., or 0.6 per cent.; and it will be seen, by the next Table, that there was a decrease of expense in two districts out of the eleven into which the kingdom is apportioned.

Comparative Expen-
diture in
Divisions.

No. 81.

REMARKS ON THE RETURNS OF PAUPERISM.—SUMMARY of Returns of the Number of Paupers relieved on the 1st July 1865. [No. 442 (B.) Session 1865.]

THE present publication contains the Tabulated Returns of 655 Unions and Single Parishes under Boards of Guardians; but in respect of two places, namely, the Incorporation of Shrewsbury and that of Montgomery and Pool, the Returns are limited to the number of *In-door* paupers relieved.

Pauperism,
1st July.

The aggregate population of the 655 places by the Census of 1861 is 19,886,104; and the total number of paupers on the 1st July 1865 is,

<u>In-door.</u>	<u>Out-door.</u>	<u>Total.</u>
121,700 -	769,591 -	891,291

This gives the proportion of paupers as 1 in 22, or 4·5 per cent. on the actual population.

Comparison
of 1st July
1865 and
1864.

Comparing the numbers returned on the 1st July 1865 with those at the same date in 1864, the figures stand thus:—

DATE.	Number of Unions, &c.	In-door Paupers.	Out-door Paupers.	TOTAL.
1st July - { 1864	655	120,086	791,791	911,877
{ 1865	655	121,700	769,591	891,291

First Table.

The first table exhibits the number of males, females, and children, and the number of vagrants, the latter being returned without distinction of sex, relieved in-door and out-door.

TABLE I.

PAUPERS, 1st July 1865.	Total Number.	Whereof were	
		In-door.	Out-door.
Males - - -	181,554	35,916	145,638
Females - - -	391,459	39,205	352,254
Children under 16 - -	314,345	43,715	270,630
Vagrants - - -	3,811	2,864	947
GRAND TOTALS -	891,169	121,700	769,469

Second
Table.

The second table exhibits the number of able-bodied, not able-bodied, insane, and vagrants relieved in-door and out-door.

TABLE II.

PAUPERS, 1st July 1865.	Total Number.	Whereof were	
		In-door.	Out-door.
Able-bodied - - -	373,165	29,815	343,350
Not able-bodied - - -	475,687	78,734	396,953
Insane - - -	38,506	10,287	28,219
Vagrants - - -	3,811	2,864	947
GRAND TOTALS - -	891,169	121,700	769,469

The third table exhibits the able-bodied, not able-bodied, and insane paupers, classed as males, females, and children under 16; the vagrants not being returned in this manner are excluded; children relieved with "able-bodied" parents are classed as *able-bodied*; but children relieved without their parents, or relieved with parents who are "not able-bodied," are classed as *not able-bodied*. Third Table.

TABLE III.

PAUPERS, 1st July 1865.	ADULTS.		Children under 16.
	Males.	Females.	
Able-bodied - - -	32,311	107,316	233,538
Not able-bodied - - -	132,824	262,811	80,052
Insane - - - -	16,419	21,332	755
Vagrants - - - -	Not stated.		
TOTALS - - -	181,554	391,459	314,345

The fourth Table exhibits the number of Paupers, distinguishing the able-bodied, not able-bodied, insane, and vagrants, for each division of the kingdom. Fourth Table.

TABLE IV.

DIVISIONS.	Population 1861.	Total Number of Paupers Relieved on 1st July 1865.	Whereof were			
			Able-bodied.	Not Able-bodied.	Insane.	Vagrants.

1st January 1859, arises from the circumstance of those persons chargeable to the Poor Rates and maintained fully returned for the first time.

as compared with July 1858, that many unions included in their statements of the number of paupers relieved pauper lunatics in asylums and licensed houses, paupers receiving medical relief only, and non-resident paupers, the 1st January (or July), and therefore entered in the in-door and out-door totals on that day; also those non-accounts of the unions to which it was chargeable.

according to the actual enumeration of 1861.

of the Eleventh Annual Report, where the particulars are given in reference to twenty-one periods commencing January 1849.

No. 39.

**WEEKLY RETURNS OF PAUPERISM FOR THE YEAR
ENDING JANUARY 1866, AND FOR THE CORRE-
SPONDING WEEKS OF THE PREVIOUS YEAR.**
[No. 507. (A. X.), Session 1864, and No. 442. (A. to A. IX.),
Session 1865.]

**MEMORANDUM as to the ARRANGEMENT of the WEEKLY RETURNS
of PAUPERISM.**

THE Returns of the Number of Paupers relieved on the *last day* of each Week do not include the "Lunatic Paupers in Asylums and Licensed Houses," nor the number of "Vagrants" relieved. These classes form only a small portion of the entire pauperism of the country. According to the latest Returns (1st January 1864), the number contained in the two classes was 2·2 per cent. of the total pauperism.

The Pauper Lunatics in Asylums are not generally subject to variations in number to the same degree as the other classes of Paupers, and the number of Vagrants relieved by the Unions throughout the country has become too small to need a return so frequently as once a week. These considerations led to the exclusion of the two classes.

There are at present 14,886* parishes, inclusive of the Scilly Islands, in England and Wales maintaining or liable to maintain their own poor: returns of pauperism are received weekly in respect of 14,681 of that number; 205 parishes, incorporated under Gilbert's Act, or still under the provisions of the 43d Elizabeth, make no return of the number of paupers which they relieve.

The Returns are arranged under eleven divisions. The Union-counties which fall under each are shown in the following view:—

I. THE METROPOLIS. 1.*Middlesex (part of). 2.*Surrey (part of). 3.*Kent (part of).	IV. EASTERN. 14. Essex. 15. Suffolk. 16. Norfolk.	VII. NORTH MIDLAND. 28. Leicester. 29. Rutland. 30. Lincoln. 31. Nottingham. 32. Derby.
II. SOUTH EASTERN. 2.*Surrey (part of). 3.*Kent (part of). 4. Sussex. 5. Southampton. 6. Berks.	V. SOUTH WESTERN. 17. Wilts. 18. Dorset. 19. Devon. 20. Cornwall. 21. Somerset.	VIII. NORTH WESTERN. 33. Chester. 34. Lancaster.
III. SOUTH MIDLAND. 1.*Middlesex (part of). 7. Hertford. 8. Buckingham. 9. Oxford. 10. Northampton. 11. Huntingdon. 12. Bedford. 13. Cambridge.	VI. WEST MIDLAND. 22. Gloucester. 23. Hereford. 24. Salop. 25. Stafford. 26. Worcester. 27. Warwick.	IX. YORK. 35. West Riding. 36. East Riding. 37. North Riding. X. NORTHERN. 38. Durham. 39. Northumberland. 40. Cumberland. 41. Westmorland. XI. WELSH. 42. Monmouth. 43. South Wales. 44. North Wales.

* Many places not heretofore liable to maintain their own poor are becoming parishes under the operation of the Extra-parochial Places Act; to what extent this will ultimately increase the number of parishes in England and Wales cannot, at present, be stated.

The following is a Tabular Statement of the Number of Unions and Parishes ; and the Area and Population ascribable to each Division ; but so far only as represented by the Weekly Returns.

DIVISIONS.	Number of Unions, &c.	Number of Parishes.	Area in Statute Acres.	Population in 1861.

The numbers in the last Table represent *complete* divisions, as it was impossible, from the manner in which the census of occupations is compiled, to make the same adjustment in respect of the unreturned parishes as that effected for the first Table.

Poor Law Board, Whitehall, }
25th April 1865. }

FREDERICK PURDY,
Principal of the Statistical Department.

QUARTERLY STATEMENT AS TO PAUPERISM.—LADY-DAY 1865.

(Paupers in Lunatic Asylums and Vagrants not included.)

The Return now published completes this portion of the Series for the parochial year 1864-65. The four following Tables are given in continuation of those prefixed to the monthly publication for December last.

The Tables are—

- 1st. ENGLAND and WALES; the pauperism in the consecutive weeks of the quarter.
 - 2d. ————— the comparative pauperism of the quarter.
 - 3d. NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS; the comparative pauperism of the quarter.
 - 4th. THE METROPOLIS; the comparative pauperism of the quarter.
1. In the 1st Table each week is compared with the one immediately preceding it. The last week of the parochial year is higher than the last week of the Christmas quarter by 31,499 paupers.

TABLE I.—ENGLAND and WALES.—Consecutive Statement.

PERIODS.	Number of Paupers on the Last Day of each Week.	Difference between the Proximate Weeks.	
		Incr.	Decr.
1864:			
DECEMBER:			
Fourth week - -	928,404	—	—
1865:			
JANUARY:			
First week - -	927,122	—	1,282
Second week - -	932,622	5,500	—
Third week - -	938,465	5,843	—
Fourth week - -	943,880	5,415	—
Fifth week - -	951,787	7,907	—
FEBRUARY:			
First week - -	967,177	15,390	—
Second week - -	976,791	9,614	—
Third week - -	981,170	4,379	—
Fourth week - -	988,161	6,991	—
MARCH:			
First week - -	985,201	—	2,960
Second week - -	970,064	—	15,137
Third week - -	963,050	—	7,014
Fourth week - -	959,903	—	3,147

2. The next Table exhibits the comparative pauperism of 1863, 1864, and 1865.

The paupers in receipt of relief on the last day of the last week of March were—

In 1863	-	-	-	-	1,062,913
„ 1864	-	-	-	-	981,551
„ 1865	-	-	-	-	959,697

The paupers in 1865, as compared with those in 1864, have decreased 21,854, or 2·23 per cent.; but compared with 1863 the decrease was 103,216 or 9·71 per cent.

TABLE II.—ENGLAND AND WALES.—Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c), compared with each of the two preceding years.			
	1862-63.	1863-64.	1864-65.	Last Year but One. (a)		Last Year. (b)	
	(a)	(b)	(c)	Incr.	Decr.	Incr.	Decr.
DECEMBER :							
Fourth week -	1,106,556	960,506	928,198	—	—	—	—
JANUARY :							
First week -	1,098,598	961,346	926,917	—	15·63	—	3·58
Second week -	1,096,157	979,618	932,422	—	14·94	—	4·82
Third week -	1,099,440	999,819	938,259	—	14·66	—	6·16
Fourth week -	1,102,144	1,004,568	943,666	—	14·38	—	6·06
Fifth week -	1,098,161	999,201	951,566	—	13·35	—	4·77
FEBRUARY :							
First week -	1,094,774	999,134	966,955	—	11·68	—	3·22
Second week -	1,089,863	1,001,510	976,582	—	10·39	—	2·49
Third week -	1,085,411	1,006,945	980,960	—	9·62	—	2·58
Fourth week -	1,080,179	1,008,480	987,950	—	8·54	—	2·04
MARCH :							
First week -	1,072,963	1,006,248	984,998	—	8·20	—	2·11
Second week -	1,066,073	997,343	969,868	—	9·02	—	2·75
Third week -	1,065,879	991,537	962,853	—	9·67	—	2·89
Fourth week -	1,062,913	981,551	959,697	—	9·71	—	2·23

* * * The Numbers given for 1864 and 1865 respectively, differ slightly from the Totals entered in the Returns for January, February, and March; this arises from the circumstance of Bramley being excluded from Table II., as that place was not in the Returns for 1863.

3. The third Table comprises the three divisions of England and Wales in which the principal manufactures are carried on. Taking the returns of paupers relieved on the last day of the last week of March, the numbers were—

In 1863	-	-	-	-	-	378,778
" 1864	-	-	-	-	-	289,645
" 1865	-	-	-	-	-	259,675

The decrease in 1865, compared with 1864, was 29,970 or 10·35 per cent.; but in comparison with 1863 the decrease was 119,103, or 31·44 per cent.

TABLE III.—NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS.—

MARCH :							
First week -	380,241	301,400	269,401	—	29·15	—	10·62
Second week -	377,007	296,153	263,071	—	30·22	—	11·17
Third week -	378,634	292,936	260,621	—	31·17	—	11·03
Fourth week -	378,778	289,645	259,675	—	31·44	—	10·35

4. According to the last returns for the month of March in the three years last past the numbers in the metropolis were—

In 1863	-	-	-	-	98,362
„ 1864	-	-	-	-	100,824
„ 1865	-	-	-	-	105,988

In 1865 the increase in the paupers, as compared with those in 1864, was 5,164 or 5·12 per cent.; but on a comparison with 1863, the increase was 7,626, or 7·75 per cent.

QUARTERLY STATEMENT AS TO PAUPERISM.—MIDSUMMER 1865.

(Paupers in Lunatic Asylums and Vagrants not included.)

The present Return completes the Monthly Series for the Quarter ended at Midsummer 1865. The four following Tables are given in continuation of those prefixed to the monthly publication for March last.

The Tables are—

1st. ENGLAND and WALES ; the pauperism in the consecutive weeks of the quarter.

2d. ————— the comparative pauperism of the quarter.

3d. NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS ; the comparative pauperism of the quarter.

4th. THE METROPOLIS ; the comparative pauperism of the quarter.

1. In the first Table, each week, compared with its predecessor, shows a decrease in the number of paupers : 959,903 were the numbers relieved in the last week of March (Lady-day) ; but in the fourth week of June (Midsummer) they had fallen to 853,073, which is a decrease of 106,830, or 11·13 per cent. less at Midsummer than Lady-day.

TABLE I.—ENGLAND AND WALES.—Consecutive Statement.

PERIODS.	Number of Paupers on the Last Day of each Week.	Difference between the Proximate Weeks.	
		Incr.	Decr.
1865 :			
MARCH :			
Fourth week - -	959,903	—	—
APRIL :			
First week - -	941,596	—	18,307
Second week - -	932,328	—	9,268
Third week - -	920,595	—	11,733
Fourth week - -	910,623	—	9,972
Fifth week - -	903,475	—	7,148
MAY :			
First week - -	896,165	—	7,310
Second week - -	890,554	—	5,611
Third week - -	886,177	—	4,377
Fourth week - -	878,794	—	7,383
JUNE :			
First week - -	868,998	—	9,796
Second week - -	861,791	—	7,207
Third week - -	857,161	—	4,630
Fourth week - -	853,073	—	4,088

2. The next Table exhibits the comparative pauperism during the Midsummer quarter of 1863, 1864, and 1865.

The paupers in receipt of relief on the last day of the last week of June were—

In 1863	-	-	-	-	970,801
„ 1864	-	-	-	-	874,724
„ 1865	-	-	-	-	853,073

The paupers in 1865, as compared with those in 1864, have decreased 21,651 or 2·48 per cent. ; but compared with 1863 the decrease is 117,728, or 12·13 per cent.

TABLE II.—ENGLAND AND WALES.—Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c), compared with each of the Two preceding Years.			
	1863.	1864.	1865.	Last Year but One.		Last Year.

Third week -	974,513	876,708	857,161	—	12·04	—	2·23
Fourth week -	970,801	874,724	853,073	—	12·13	—	2·48

3. The third Table comprises the three divisions of England and Wales in which the principal manufactures are carried on. Taking the returns of paupers relieved on the last day of the last week of June, the numbers were—

In 1863.	--	--	--	--	320,061
" 1864	-	-	-	-	237,186
" 1865	-	-	-	-	217,276

The decrease in 1865, compared with 1864, was 19,910 or 8·39 per cent.; but in comparison with 1863 the decrease was 102,785, or 32·11 per cent.

TABLE III.—NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS.—
Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c) compared with each of the Two preceding Years.

Third week -	333,066	246,441	234,045	—	29·73	—	5·03
Fourth week -	331,065	244,186	230,006	—	30·53	—	5·81
JUNE:							
First week -	328,254	241,948	226,056	—	31·13	—	6·57
Second week -	326,805	239,848	222,547	—	31·90	—	7·21
Third week -	323,057	238,258	219,818	—	31·96	—	7·74
Fourth week -	320,061	237,186	217,276	—	32·11	—	8·39

4. According to the last returns for the month of June in the three years last past, the numbers in the Metropolis were—

In 1863	-	-	-	-	88,811
„ 1864	-	-	-	-	88,527
„ 1865	-	-	-	-	90,722

In 1865 the increase in the paupers, as compared with those in 1864, was 2,195 or 2·48 per cent. ; but on a comparison with 1863, the increase was 1,911, or 2·15 per cent.

QUARTERLY STATEMENT AS TO PAUPERISM.—MICHAELMAS 1865.

(Paupers in Lunatic Asylums and Vagrants not included.)

The present Return completes the Monthly Series for the quarter ended at Michaelmas 1865. The four following Tables are given in continuation of those prefixed to the monthly publication for June last.

The Tables are—

1st. ENGLAND and WALES; the pauperism in the consecutive weeks
of the quarter.

2d. ————— the comparative pauperism of the quarter.

3d. NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS; the comparative pauperism of the quarter.

4th. THE METROPOLIS; the comparative pauperism of the quarter.

1. In the first Table each week is compared with the one immediately preceding it: 853,073 were the numbers relieved in the last week of June (Midsummer); but in the fourth week of September (Michaelmas) the numbers were 835,005, which is a decrease of 18,068, or 2·12 per cent. less at Michaelmas than Midsummer.

TABLE I.—ENGLAND AND WALES.—Consecutive Statement.

PERIODS.		Number of Paupers on the Last Day of each Week.	Difference between the Proximate Weeks.	
1865:			Incr.	Decr.
JUNE:				
Fourth week	- -	853,073	—	—
JULY:				
First week	- -	846,082	—	6,991
Second week	- -	842,469	—	3,613
Third week	- -	841,567	—	902
Fourth week	- -	840,131	—	1,436
Fifth week	- -	837,991	—	2,140
AUGUST:				
First week	- -	836,580	—	1,411
Second week	- -	834,758	—	1,822
Third week	- -	833,758	—	1,000
Fourth week	- -	833,042	—	716
SEPTEMBER:				
First week	- -	832,293	—	749
Second week	- -	832,443	150	—
Third week	- -	832,705	262	—
Fourth week	- -	835,005	2,305	—

2. The next Table exhibits the comparative pauperism during the Michaelmas quarter of 1863, 1864, and 1865.

The paupers in receipt of relief on the last day of the last week of September were—

In 1863	-	-	-	-	931,966
„ 1864	-	-	-	-	864,730
„ 1865	-	-	-	-	835,005

The paupers in 1865, as compared with those in 1864, have decreased 29,725, or 3·44 per cent.; but compared with 1863, the decrease was 96,961, or 10·40 per cent.

TABLE II.—ENGLAND AND WALES.—Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c), compared with each of the Two preceding Years.			
	1863.	1864.	1865.	Last Year but One. (a)		Last Year. (b)	
JUNE:	(a)	(b)	(c)	Incr.	Decr.	Incr.	Decr.
Fourth week -	970,801	874,724	853,073	—	—	—	—
JULY:							
First week -	955,728	867,827	846,082	—	11·47	—	2·51
Second week -	946,677	863,916	842,469	—	11·01	—	2·48
Third week -	939,958	859,676	841,567	—	10·47	—	2·11
Fourth week -	941,005	857,029	840,131	—	10·72	—	1·97
Fifth week -	939,959	855,565	837,991	—	10·85	—	2·05
AUGUST:							
First week -	938,237	852,788	836,580	—	10·83	—	1·90
Second week -	935,697	850,544	834,758	—	10·79	—	1·86
Third week -	933,752	849,787	833,758	—	10·71	—	1·89
Fourth week -	933,247	849,437	833,042	—	10·74	—	1·93
SEPTEMBER:							
First week -	931,008	851,318	832,293	—	10·60	—	2·23
Second week -	930,666	853,041	832,443	—	10·55	—	2·41
Third week -	931,078	857,644	832,705	—	10·57	—	2·91
Fourth week -	931,966	864,730	835,005	—	10·40	—	3·44

3. The third Table comprises the three divisions of England and Wales in which the principal manufactures are carried on. Taking the returns of paupers relieved on the last day of the last week of September, the numbers were—

In 1863	-	-	-	-	292,464
„ 1864	-	-	-	-	231,919
„ 1865	-	-	-	-	206,076

The decrease in 1865, compared with 1864, was 25,843, or 11·14 per cent.; but in comparison with 1863 there was a decrease of 86,388, or 29·54 per cent.

TABLE III.—NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS.—
Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c), compared with each of the Two preceding Years.

SEPTEMBER :							
First week -	296,090	223,761	205,954	—	30·44	—	7·96
Second week -	295,497	224,779	206,399	—	30·19	—	8·22
Third week -	294,286	226,943	205,994	—	30·00	—	9·23
Fourth week -	292,464	231,919	206,076	—	29·54	—	11·14

4. According to the last returns for the month of September in the three years last past, the number of paupers in the Metropolis was—

In 1863	-	-	-	-	-	90,161
„ 1864	-	-	-	-	-	89,933
„ 1865	-	-	-	-	-	91,022

In 1865 the increase in the paupers, as compared with those in 1864, was 1,089, or 1·21 per cent. ; and on a comparison with 1863, there was an increase of 861, or 0·95 per cent.

QUARTERLY STATEMENT AS TO PAUPERISM, CHRISTMAS 1865.

(Paupers in Lunatic Asylums and Vagrants not included.)

The Return now published completes this portion of the Series for the year 1865. The four following Tables are given in continuation of those prefixed to the monthly publication for September last.

The Tables are—

1st. ENGLAND and WALES ; the pauperism in the consecutive weeks of the quarter.

2d. ————— the comparative pauperism of the quarter.

3d. NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS ; the comparative pauperism of the quarter.

4th. THE METROPOLIS ; the comparative pauperism of the quarter.

1. In the first Table, each week is compared with the one immediately preceding it. The last week of the year is higher than the last week of the Michaelmas quarter by 47,020 paupers.

TABLE I.—ENGLAND AND WALES.—Consecutive Statement.

P E R I O D S.	Number of Paupers on the Last Day of each Week.	Difference between the Proximate Weeks.	
		Incr.	Decr.
1865 :			
SEPTEMBER :			
Fourth week - -	835,005	—	—
OCTOBER :			
First week - -	828,767	—	6,238
Second week - -	826,403	—	2,364
Third week - -	832,183	5,780	—
Fourth week - -	837,390	5,207	—
Fifth week - -	842,706	5,316	—
NOVEMBER :			
First week - -	848,086	5,380	—
Second week - -	854,214	6,128	—
Third week - -	858,603	4,389	—
Fourth week - -	864,622	6,019	—
DECEMBER :			
First week - -	869,856	5,234	—
Second week - -	874,490	4,634	—
Third week - -	878,096	3,606	—
Fourth week - -	882,025	3,929	—

2. The next Table exhibits the comparative pauperism during the Christmas quarters of 1863, 1864, and 1865.

The paupers in receipt of relief on the last day of the last week of December were—

In 1863	-	-	-	-	-	960,705
„ 1864	-	-	-	-	-	928,404
„ 1865	-	-	-	-	-	882,025

The paupers in 1865, as compared with those in 1864, have decreased 46,379, or 5·00 per cent.; but compared with 1863 the decrease was 78,680, or 8·19 per cent.

TABLE II.—ENGLAND AND WALES.—Comparative Statement.

PERIODS.	Paupers in Receipt of Relief on the Last Day of each Week.			Difference per Cent. in the Numbers in Column (c), compared with each of the Two preceding Years.			
	1863.	1864.	1865.	Last Year but One.		Last Year.	
				(a)		(b)	
SEPTEMBER :	(a)	(b)	(c)	Incr.	Decr.	Incr.	Decr.

OCTOBER :							
First week -	921,263	866,039	828,767	—	10·04	—	4·30
Second week -	919,088	870,402	826,403	—	10·08	—	5·06
Third week -	921,184	878,429	832,183	—	9·66	—	5·26
Fourth week -	921,310	883,943	837,390	—	9·11	—	5·27
Fifth week -	922,863	891,674	842,706	—	8·69	—	5·49
NOVEMBER :							
First week -	926,961	899,546	848,086	—	8·51	—	5·72
Second week -	932,616	906,059	854,214	—	8·41	—	5·72
Third week -	937,388	909,400	858,603	—	8·40	—	5·59
Fourth week -	940,887	913,085	864,622	—	8·11	—	5·31
DECEMBER :							
First week -	944,146	915,700	869,856	—	7·87	—	5·01
Second week -	950,377	918,629	874,490	—	7·98	—	4·80
Third week -	956,370	921,731	878,096	—	8·18	—	4·73
Fourth week -	960,705	928,404	882,025	—	8·19	—	5·00

3. The third Table comprises the three divisions of England and Wales, in which the principal manufactures are carried on. Taking the returns of paupers relieved on the last day of the last week of December, the numbers were—

In 1863	-	-	-	-	-	290,544
„ 1864	-	-	-	-	-	259,662
„ 1865	-	-	-	-	-	214,102

The decrease in 1865, compared with 1864, was 45,560, or 17·55 per cent.; but in comparison with 1863 the decrease was 76,442, or 26·31 per cent.

TABLE III.—NORTH MIDLAND, NORTH WESTERN, and YORK DIVISIONS—Comparative Statement.

DECEMBER :							
First week -	283,058	259,291	211,621	—	25·24	—	18·38
Second week -	285,806	258,959	212,424	—	25·68	—	17·97
Third week -	288,220	258,264	213,123	—	26·06	—	17·48
Fourth week -	290,544	259,662	214,102	—	26·31	—	17·55

4. According to the last returns for the month of December in the three years last past, the number of Paupers in the Metropolis was —

In 1863	-	-	-	-	-	96,230
„ 1864	-	-	-	-	-	99,125
„ 1865	-	-	-	-	-	103,192

In 1865 the increase in the paupers, as compared with those in 1864, was 4,067 or 4·10 per cent. ; but on a comparison with 1863, the increase was 6,962, or 7·23 per cent.

No. 41.

REMARKS ON THE RETURN OF INSANE PAUPERS, CHARGEABLE ON THE
1st JANUARY 1865. (No. 507. (E.) Sess. 1864.)Source of
Information.

1. The Statistics of Pauper Insanity contained in this paper have been compiled from the lists of "Lunatics, Idiots, and other Persons of Unsound Mind" who were chargeable to the Poor Rates on the 1st January 1865. These lists are made out annually by the Clerks to the Guardians, and transmitted to the Poor Law Board, in compliance with the 16 & 17 Vict. c. 97. s. 64., and in the form prescribed by Schedule D. of that Statute.

Places re-
turned.

2. Returns have been received from 662* Unions and Single Parishes under Boards of Guardians; the Population of these places, according to the Census of 1861, is 19,962,641. The number of Insane Paupers chargeable to the Poor Rates in those places on that day is shown below :—

Number of Paupers on 1st January 1865.	Whereof were Insane Paupers.	Namely :—	
		Lunatics.	Idiots.
974,772†	38,487	28,466	10,021

Thus 4.0 per cent. of the pauperism on the 1st January last is ascribable to Insanity; the Lunatics being 2.9 per cent., and the Idiots 1.1 per cent.

Proportion
of the Sexes.

3. In regard to the sexes, 16,826 were Males, and 21,661 Females :—

INSANE.	MALES.	FEMALES.	TOTAL.
Lunatics - -	12,259	16,207	28,466
Idiots - -	4,567	5,454	10,021
TOTAL -	16,826	21,661	38,487

Insane
Paupers,
1st January
1865.

4. In the next Statement the number of Lunatic and Idiot Paupers are shown for each Division of England and Wales, with the total number of Paupers of all classes relieved on the same day.

* Inclusive of *Eight* Gilbert's Incorporations.

† Exclusive of the paupers in Seven of the Gilbert's Incorporations, from which the Poor Law Board do not receive this information. The number of *Insane* paupers, however, in these places was, on 1st January last, 111, of whom 82 were returned as "Lunatics," and 29 as "Idiots."

ENGLAND AND WALES (so far as returned) -	974,772 *	38,487	{ Lunatics - Idiots -	12,259 4,567	16,207 5,454	28,466 10,021

* See note as to paupers in the Gilbert's Incorporations on previous page.

5. The 38,487 Insane Paupers were maintained in the following Residences of the Insane establishments, or were lodged with strangers, or resided with their relatives; namely—

20,910 in County or Borough Lunatic Asylums.

1,264 in Registered Hospitals, or in Licensed Houses.

9,756 in Union or Parish Workhouses.

1,041 in Lodgings, or Boarded Out.

5,516 Residing with Relatives.

The "Industrial Statistics" have not been printed in this paper in respect of the separate Unions, but they will be found in detail in Return (B.) or (C.) of this series.

Poor Law Board, }
2d November 1865. }

FREDERICK PURDY,
Principal of the Statistical Department.

DIETARIES

FOR THE

INMATES OF WORKHOUSES.

REPORT

OF

DR. EDWARD SMITH, F.R.S., MEDICAL OFFICER OF THE
POOR LAW BOARD, AND POOR LAW INSPECTOR.

*To the Right Hon. C. P. Villiers, M.P., President of the
Poor Law Board.*

SIR,

IN the year 1863 I visited various parts of every county in England, under instructions from the Privy Council, and ascertained in a very precise manner the dietaries then in use by different sections of the working classes, and particularly by agricultural labourers and their families. The nutritive values of the foods used were calculated, and the results were published in the Sixth Report of the Medical Officer of the Privy Council. The great area over which the inquiry extended, the large number of persons included in it, and the precise scientific method pursued, both in collecting the facts and estimating their value, have afforded more accurate and extended opportunities than heretofore of ascertaining the quantity and kind of food which the people obtain at their own homes, and of judging as to the kind and quantity which the same classes require when fed in public institutions.

But before the knowledge thus gained could be applied to workhouse dietaries, it was needful to ascertain the details of the dietaries already in use, the effect of them upon the paupers, and the means at the command of the master and other workhouse officials for the selection, preparation, and distribution of food. This could not be satisfactorily obtained without a special

Introductory observations.

Introductory observations continued.

inquiry. The Poor Law Board has not taken the initiative in the preparation of workhouse dietaries by the utterance of a prescribed form of dietary for the whole of the Unions of the Kingdom, or for any groups of them, by which alone the cost and effect could have been inferred; neither have they hitherto issued any information with a view to this end other than certain sample dietaries which they found in use upwards of 30 years ago. In the plan which has been pursued the Guardians of the several Unions, with the aid of their Medical Officers, have prepared such schemes as seem to them fitting, and have forwarded them for the sanction of the Poor Law Board, but notwithstanding the latter act, the responsibility has in truth rested upon the Medical Officers of the Unions. Hence, with a subject which, although practical, is at the same time highly technical and abstruse, it follows that the decisions of the Guardians and Medical Officers would vary with the views of these gentlemen, and would be peculiar to each locality.

In order to obtain this information, I have procured returns of the dietaries in actual use in all the workhouses in my district, and have had them abstracted and analysed, and placed in the appendix to this report. I have also during my inspection of the workhouses particularly noticed the state of health of the different classes of inmates, and have ascertained by personal inquiry the opinions of both the inmates and the officials as to the sufficiency and fitness of the dietaries and the kinds of food which are objected to or preferred, particularly by the aged and the children. The course pursued by the guardians in purchasing the food, and the methods and apparatus employed by the masters and matrons of the workhouses in preparing and distributing the food, have also been carefully observed.

In the report which I have now the honor to present to you, I have felt myself compelled to limit my observations to the workhouses in my own district; and further, as my district comprehends but very few large towns, and is almost exclusively an agricultural one, I have thought it right to prepare tables of dietary suited to the wants of persons inhabiting agricultural localities, and have reserved to a later opportunity the considerations of such as are the most fitted for large towns and cities. Certain portions of the report will, however, be found equally adapted to any locality under the administration of the Poor Law Board.

Knowing the interest which you take in this question, and the desire which you have practically evinced to aid the administration of the Poor Laws by the application of medical knowledge, I venture to hope that under your presidency the dietaries of workhouses may be rendered less unequal in character and more adapted to the nourishment of the poor.

I have the honor to be

Your most obedient servant,

EDWARD SMITH.

REPORT.

THE following report consists essentially of two parts, in the first of which I have referred to the existing dietaries, whilst in the second I have considered the subject in a wider sense, and have added a statement of the dietaries which I submit for the consideration and adoption of the various local authorities.

The following is the order in which the various subjects are discussed :—

Order of
subjects
discussed.

PART I.

EXISTING ARRANGEMENTS.

The details of the dietaries in actual use.

Quantity and kind of food supplied.

Adults.

Children.

Composition (and consequent nutritive value) of certain foods.

The effect of the dietaries.

The method practised in the obtainment, cooking, and distribution of foods.

PART II.

THE PROPER DIETARIES IN WORKHOUSES.

Preliminary considerations.

The conditions under which the inmates should be placed to enable them to make the best use of the food supplied.

Agreeable and usual food.

Cooking of food.

Rapid distribution of food.

Selection of the most economical kinds, quantities, and parts of foods.

Vegetable food.

Animal food.

Special requirements of each class of inmate.

Children and youths.

Able-bodied adults.

Aged and infirm.

Lying-in and suckling women

The sick.

Vagrants.

The ordinary food of the labouring classes in Cambridgeshire, Lincolnshire, Nottinghamshire, and Yorkshire.
Construction of dietaries.

PART I.
DIETARIES
IN USE.

PART I.

THE DIETARIES IN ACTUAL USE.

Quantity and Kind of Food supplied.

There is great diversity in the dietaries in actual use in my district, when considered in reference to the arrangement of foods which constitute the meals, the quantity of the several foods supplied, and the composition of the compound foods, as gruel, porridge, soup, and pie.

Adults.

I.—*Adults.*

Composition of foods.

The Combination of Foods at Meals.

Of 65 workhouses, the returns of the dietaries of which have been forwarded to me, I find that there are 7 different arrangements of the breakfast, 44 of the dinner, and 29 of the supper.

Breakfast.

Breakfast.—Porridge and bread or milk and bread are supplied daily in about two-thirds, and gruel and bread daily in about one-third of the workhouses to able-bodied adults; whilst tea, with bread and butter, is given daily to the aged and infirm in five-sixths of the workhouses. Hence these three combinations of food comprehend nearly all the kinds of food which are supplied at this meal; but there are a few exceptions, which will be found in the following table:—

FOOD SUPPLIED AT BREAKFAST IN 65 WORKHOUSES.

Food.	Able-bodied.		Aged and Infirm.
	To Men.	To Women.	To Men & Women.
Porridge or milk and bread, daily - - - -	42 Workhouses.	40 Workhouses.	3 Workhouses.
The same with tea on 1 day	1 „	1 „	— „
Gruel and bread - daily	20 „	20 „	3 „
Tea and bread - daily	— „	2 „	4 „
Coffee and bread - daily	1 „	1 „	3 „
Tea, bread and butter daily	— „	— „	52 „
The same with porridge and bread - - 1 day	1 „	1 „	— „

In a few places the food which is usually given is occasionally supplanted by others, as, for example, gruel or cocon is supplied instead of porridge.

PART I.
DINING
IN USE.
—
Adults.
Combina-
tion of
foods.
Dinner.

Dinner.—There is no workhouse in which the same dinner is provided on every day of the week, yet there is but little general agreement as to the selection of food on different days. The largest number of workhouses in which the same rotation of foods occurs is 10, and in them meat and vegetables are provided thrice, soup or broth and bread thrice, and pudding once in each week. Five others give meat and vegetables twice, meat pie twice, soup or broth twice, and pudding once in each week. Four supply meat and vegetables twice, soup or broth and bread twice, and pudding twice weekly. Three give meat and vegetables thrice, soup or broth and bread thrice, and pudding once weekly. In five other cases of two workhouses each the same rotation of foods is provided.

Meat and vegetables are given twice weekly in 26, and thrice weekly in 39 workhouses. Soup, or broth and bread are supplied one day weekly in five workhouses; on two days in 34 workhouses; on three days in 25 workhouses; and on five days weekly in one workhouse. Pudding of some kind constitutes the dinner on one day weekly in 39 workhouses; on two days in 24 workhouses; and on three days in two workhouses. Hence in the great majority of these institutions a meat and potato dinner is provided twice or thrice weekly, soup or broth (often containing meat) two or three days weekly, and pudding one or two days weekly. There are also other combinations of foods supplied in a minority of the workhouses, such as meat pie, meat hash or stew, and bread and cheese, which deserve attention and are recorded in the following table:—

FOODS SUPPLIED AT DINNER IN 65 WORKHOUSES.

No. of days weekly.	Food supplied.	No. of Workhouses.
2	Meat and Vegetables - - - -	26
3	Do. - - - -	39
1	Meatpie - - - -	7
2	Do. - - - -	9
1	Hash or Stew - - - -	7
3	Do. - - - -	1
1	Soup or Broth - - - -	5
2	Do. - - - -	34
3	Do. - - - -	25
4	Do. - - - -	1

**PART I.
DIETARIES

Adults.

**Composi-
tion of
foods.**

No. of days weekly.	Food supplied.	No. of Workhouse.
1	Bread and Cheese alone - - -	5
1	Do. do. with other foods -	3
2	Do. do. - - -	1
1	Pudding or Rice Milk - - -	39
2	Do. do. - - -	24
3	Do. do. - - -	2

The same rotation of foods is provided for the aged and infirm as for the able-bodied in all the workhouses except two, and there the aged and infirm have meat and vegetables on one extra day.

Supper.

Supper.—In about one-third of the workhouses the same food is supplied at supper on each day of the week. Milk or porridge and bread are given daily in 22 workhouses to men, in 19 to women, and in one to the aged and infirm. Gruel and bread are given daily in two workhouses to able-bodied men and women; cheese and bread the same, and also in one workhouse to the aged and infirm; tea and bread are given daily in two workhouses to able-bodied men, in six to able-bodied women, and in three to the aged and infirm; and tea, bread, and butter are given in 53 workhouses to aged men, and in 54 to aged women.

Hence in a majority of the workhouses a variety of food is provided at the supper for the able-bodied, but there is little uniformity in the rotation adopted. The chief foods are milk or porridge, gruel, cheese, tea, broth, and bread. Additional foods are given on certain days, as for example, 1st. With milk or porridge and bread on other days in 16 workhouses to able-bodied men, in 15 to able-bodied women, and in three to aged and infirm. 2nd. With gruel and bread on other days in 10 workhouses to the able-bodied, and in one to the aged and infirm. 3rd. With cheese and bread on other days in 24 workhouses to the able-bodied, and in eight to the aged. 4th. With tea and bread and butter in other days in three workhouses to able-bodied men, and in two to able-bodied women. 5th. With broth and bread on other days in 25 workhouses to the able-bodied, and in nine to the aged and infirm.

It has thus been shown that milk in some quantity is given at supper to the able-bodied in about one-half of the workhouses, gruel in about one-fifth, cheese in about two-fifths, and broth in two-fifths, whilst in five-sixths the aged and infirm have tea.

In reference to two foods which are not in general use, viz., cheese and broth, it may be added that bread and cheese alone constitute the supper for the able-bodied on three days of the week in five workhouses, and in three for the aged and infirm, whilst bread and broth alone are given on three days of the week in 18 workhouses to the able-bodied, and in seven to the aged and infirm.

The following table exhibit these and other details on the rotation of foods at supper.

Quantity of the several Foods given at a Meal.

Breakfast.—The quantity of bread supplied at breakfast varies from 5 oz. to 8 oz. for men, and from 4 oz. to 6 oz. for women. **Breakfast.**

In 38 workhouses the quantity allowed to men is 7 oz., in one 8 oz., and one 5 oz., whilst in more than two-fifths of these institutions the quantity is 6 oz., and in a few aged and infirm men have 1 oz. less than able-bodied men. With only one exception women are allowed less bread than men, and the diminution is 1 oz., or from one-fifth to one-eighth of the quantity allowed to men. It may be worthy of remark that the extremes in the allowance of bread occur both in the same county, viz., Yorkshire; but the one (Easingwold)

**PART I.
DIETARIES
IN USE.**

Adults.

**Quantity of
food.**

supplying 8 oz. is an agricultural, and the other (Hunslet), supplying 4 oz., is a manufacturing district.

The quantity of "porridge," "gruel," or "boiled milk" allowed varies from 1 to 2 pints for men, and from 1 to 1½ pint for women. In only five workhouses are 2 pints, and in only four is 1 pint allowed; so that in nine-tenths of all the workhouses the allowance is 1½ pint for men. When men are allowed 2 pints, women obtain 1½ pint; and when 1 pint, the same is allowed to women; but, with three exceptions, in all other places the same quantity is given to both men and women. The extremes are found chiefly in Lincolnshire and Nottinghamshire; so that in Lincoln 6 oz. of bread and 1 pint of porridge constitute the breakfast of the male adult, whilst at Nottingham, only a few miles distant, the quantity of bread is 16 per cent., and of porridge 100 per cent. greater.

Dinner.

Dinner.—The quantity of cooked meat, free from bone, which is supplied at dinner to male adults, varies from 4 oz. to 6 oz., and in five-sixths of the workhouses the quantity is 5 oz. The lowest occurs but once (Sheffield), whilst the highest is found in 10 workhouses, and those chiefly in Yorkshire.

In 14 workhouses, or two-ninths of the whole, women have 1 oz. less meat than men, and the reduction varies from one-sixth to one-fifth. In all other places the two sexes receive the same quantity of meat. In only two workhouses is the quantity of meat supplied to the aged and infirm less than that supplied to the able-bodied, and there the diminution is to the extent of 1 oz.

The quantity of potato and fresh vegetables supplied to male adults at one meal varies from 7 oz. to 20 oz. The former quantity is given with a portion of bread, but 8 oz. without bread are given in two workhouses. The latter quantity (20 oz.) is supplied in but one workhouse, but 16 oz. are given in 32, or one-half of the whole number of workhouses. In 13 workhouses, or one-fifth of the whole, there is a diminished quantity given to women, so that 20 oz. become 16 oz., 16 oz. become 12 oz., 14 oz. 12 oz., 12 oz. 10 oz., and 10 oz. 8 oz. With only two exceptions, the aged and infirm receive the same as the able-bodied, and of those one gives a greater and the other a less supply to the aged.

Hence, in by far the majority of workhouses the quantity of meat given to adult males at one meal, both to the able-bodied and the aged, is 5 oz., and in a large majority the women in both classes receive 1 oz. less than the male able-bodied.

In numerous instances provision is made for the substitution of "other vegetables" for potato, and of bread and rice for both. No very accurate compensation in nutritive value is attempted in this substitution. "Other vegetables" are substituted for potato in equal quantities, although the latter is about twice as nutritious as the former. Boiled rice is substituted for both in equal quantities. Bread substitutes potatoes in the different proportions of 4 oz. for 8 oz., 5 oz. for 8 oz., 3 oz. for 10 oz., 4 oz. for 10 oz., 5 oz. for 12 oz., 5 oz. for 16 oz., 6 oz. for 16 oz., 7 oz. for 16 oz., and 6 oz. for 20 oz.;

whereas bread is more nutritive than potato to the extent of $2\frac{1}{2}$ times in regard to carbon, and six times in regard to nitrogen. Boiled peas in some instances are substituted for boiled rice in equal quantities, although peas are more than thrice as rich as rice in nitrogen.

PART I.
DIETARIES
IN USE.
Adults.
Quantity of
food.
Dinner.

Bread is given on meat days *in addition* to potato in one-seventh of the workhouses, and although in a majority of such cases the quantity of vegetables supplied is less than 1 lb., in others it amounts to that weight. The quantity of bread varies from 2 oz. to 4 oz.

Soup is given to male adults in quantities varying from 1 to 2 pints. One pint is given in only three, and two pints in only four workhouses, and whilst $1\frac{1}{4}$ pint is given in another workhouse, $1\frac{1}{2}$ pint is the quantity allowed in seven-eighths of the whole. Two pints are given even to women at Nottingham, but in the other workhouses which supply 2 pints to the men, $1\frac{1}{2}$ pint are given the women. When $1\frac{1}{2}$ pint are given to men, the same quantity is given to women except in 10 instances, and in no instance is less than 1 pint given to women. The aged and infirm have the same quantity as the able-bodied.

Bread is in all cases given with the soup, and the quantity varies from 3 oz. to 8 oz. for male adults. As this is a very important diversity, it will be well to indicate the precise quantities which are given in the different workhouses. They are 3 oz. in eight, 4 oz. in 15, 5 oz. in one, 6 oz. in 19, 7 oz. in 12, and 8 oz. in six workhouses. There is not therefore any quantity which is even generally adopted. In 38 workhouses, that is to say, in a majority of them, the women receive 1 oz. or 2 oz. less bread than the men, and the proportionate reduction varies from one-seventh to one-fourth. The aged and infirm have the same quantity as the able-bodied. In one workhouse 1 lb. of potato is given without bread, and in another 2 oz. of bread and 1 lb. of potato are given with the soup.

Meat pie or meat pudding is given to male adults, in quantities varying so widely as 12 oz. and $2\frac{1}{2}$ oz., with intermediate quantities of 14 oz., 16 oz., 20 oz., and 22 oz. When 12 oz. are given to men, the same quantity is given to women; but there is a reduction to women of 2 oz. in all instances except the highest, when the quantity is reduced from 24 oz. to 20 oz. The aged and infirm have usually the same quantity as the able-bodied. No bread or other food is given to supply any defect when the smaller quantities of pie are given, except in one instance, when with 14 oz. of pie there are also 2 oz. of bread. Meat hash, or stewed meat with vegetables, are given in a few workhouses.

Suet-pudding is supplied to male adults in quantities varying from 8 oz. to 20 oz., but 14 oz. is the ration in a majority, viz., 34 of the workhouses; and 16 oz. are given in 18 workhouses. In one-third of the whole the quantities are 8 oz., 10 oz., 12 oz., 15 oz., and 20 oz. In five-sixths of the workhouses women receive a less quantity than men, the deduction varying from 2 oz. to 4 oz.,

**PART I.
DIETARIES
IN USE.**

Adults.

**Quantity of
food.**

or proportionally from one-eighth to one-fourth; but in several of those supplying the largest quantity the women receive the same as the men. In three instances bread is given with the pudding, in quantities of 2 oz. and 4 oz.; and in two instances potatoes, and in one instance cheese, are supplied with the pudding. In some a savoury dip or gravy is given with it; but in a majority of workhouses it is eaten with salt only.

Yeast dumplings and rice and other puddings are given regularly, or in substitution of suet-puddings in a majority of the workhouses. The quantity varies from 16 oz. to 20 oz.

Rice-milk is supplied in a very few workhouses in quantities of 1 or $1\frac{1}{2}$ pint. Boiled rice and treacle are also sometimes given.

Cheese is supplied to male and female adults in quantities varying from 1 oz. to $2\frac{1}{2}$ oz., but usually in 2 oz. rations.

Supper.

Supper.—The quantity of bread allowed to able-bodied males at supper, varies from 6 oz. to 8 oz. The medium amount of 7 oz. is given in 36 workhouses, or four-sevenths of the whole, whilst the maximum quantity is allowed in only two. Hence, in nearly all workhouses the quantity allowed is either 7 oz. or 6 oz., and in a majority of them, the former. With only three exceptions, the quantity allowed to women is 1 oz. less than the above, and it varies therefore from 5 oz. to 7 oz.; but in a majority of instances it is 6 oz. The aged and infirm have the same quantity as the able-bodied.

Porridge is supplied to males in quantities varying from 1 to 2 pints. In only two sets of four workhouses each are the two extremes found, and in a large majority the quantity allowed is $1\frac{1}{2}$ pint. Women receive $1\frac{1}{2}$ pint when the men receive 2 pints; and in five other workhouses they receive 1 or $1\frac{1}{2}$ pint when the men receive $1\frac{1}{2}$ pint. When the quantity allowed is 1 pint, no deduction is made to women. In some cases an express provision is made that porridge may be substituted by gruel.

Gruel is supplied to males in quantities varying from $1\frac{1}{2}$ to 2 pints, and to females in quantities varying from 1 to $1\frac{1}{2}$ pint.

Boiled milk is given in quantities of $\frac{1}{2}$, $\frac{2}{3}$, 1, and $1\frac{1}{2}$ pint, and sometimes it is supplanted by gruel.

Tea or coffee is given to both sexes in quantities of 1 pint. The quantity of sugar and butter allowed with tea, whether at supper alone or at breakfast and supper, varies considerably. The quantity of butter allowed per week varies from $1\frac{1}{2}$ oz. to 5 oz., and of sugar, from $3\frac{1}{2}$ oz. to 12 oz.; and it is the same for both sexes. In some workhouses, instead of allowing a separate quantity of butter, the inmates are supplied with "bread and butter;" and in others, instead of allowing sugar, the tea is served when sweetened. It is exceedingly remarkable that in supplying a combination of food so universally used as bread and butter and tea, so great a diversity in the quantity supplied as $\frac{1}{4}$ oz., $\frac{1}{2}$ oz., and $\frac{3}{4}$ oz. of butter, and $\frac{1}{4}$ oz., 1 oz. and upwards of sugar for one meal, could now exist. In only one instance, however (Caistor), is the quantity of butter allowed only $\frac{1}{4}$ oz. at a meal; and that workhouse is also singular in not supplying sugar with the tea.

The quantity of broth which is allowed varies from 1 to 2 pints for men, and from 1 to 1½ pint for women. The extremes are, however, found in but three workhouses, one of which supplies 2 pints, and two supply 1 pint; whilst the medium quantity of 1½ pint is given in 24 workhouses.

PART I.
DIETARIES
IN USE.
Supper.

A diminished allowance to women is found in only four instances. Hence, speaking generally, 1½ pint is the quantity allowed at supper to both sexes.

II.—Children.

All inmates under 16 years of age are classified under this head, and are usually subdivided into four classes, according to age, viz., under 2 years, from 2 to 5 years, from 5 to 9 years, and from 9 to 16 years.

Children.

Æt. 9 to 16 years.

These almost universally receive the same diet as women; but in a very few workhouses slight variations occur, and a little distinction is drawn between that of boys and girls. The rule, however, is so generally observed, that I need not further enter into the question.

Æt. 9 to 16.

Æt. under 2 years.

The dietary of this class is left to the direction of the guardians, or the discretion of the surgeon, with only six exceptions, and they may be referred to in illustration of the diversity of workhouse dietaries. Thus, on the same page is the dietary of Sleaford and Spalding. That of Sleaford gives 3 oz. of bread and 1 pint of milk night and morning, for breakfast and supper, and at dinner 1½ oz. of meat, 3 oz. of bread, and 1 pint of broth; whilst at Spalding the milk is reduced to ½ pint, and the dinner to 2 oz. of bread and ½ pint of broth on four days, and to 1 oz. of rice to be made into a pudding on three days of the week. At Bourne the dinner consists of 1½ oz. of meat and 4 oz. of vegetables thrice, 4 oz. of suet-pudding twice, and 3 oz. of bread and ½ pint of broth twice weekly. At Malton, 5 oz. of bread are allowed daily to an infant under 6 months old; 8 oz. of bread and 1 pint of milk to one between 6 and 12 months of age; and 6 oz. of bread, 1 pint of milk, and 3 oz. of pudding to one between 1 and 2 years of age. At Sculcoates two dinners weekly consist of 2 oz. of meat and 4 oz. of vegetables; two others of 3 oz. of bread and ½ pint of soup, and on three other days respectively of 8 oz. of suet-pudding, 8 oz. of meat-pie, and 3 oz. of bread with ½ pint of rice-milk.

Æt. under 2.

Æt. 5 to 9 and 2 to 5 years.

Hence the analysis is virtually reduced to a consideration of the two classes aged from 5 to 9 and from 2 to 5 years; and although the tables show that diversity in detail is almost infinite, the following general principles have been commonly adopted as a guide,

Æt. 5 to 9.
Æt. 2 to 5.

**PART I.
DIETARIES
IN USE.**

**Children.
Æt. 5 to 9
and 2 to 5.**

1. Whatever may be the rotation and the composition of meals in use for a child æt. 5 to 9 years, the same is adopted for children æt. from 2 to 5 years; and the difference is in the amount of food supplied. A few exceptions occur, as in the dietary at Malton, in which meat is given to a child above, but not to one below 5 years of age.

**Points of
difference.**

2. The difference between the dietary of both of these classes, and that of boys and girls between 9 and 16 years, is in quantity and quality:

Quantity.

First, *in quantity*; so that if 6 oz. of bread be given to the latter, 5 oz. and 4 oz. will represent the supply to the former; and if 5 oz. of meat be given to the eldest, the others receive 4 oz. and 3 oz. $1\frac{1}{2}$ pint of soup, porridge, or gruel, is reduced to $\frac{3}{4}$ pint, and 12 oz. of vegetables or pudding are reduced to 10 oz. and 8 oz.

Quality.

Second, *in quality*; so that milk is more generally given to the younger. The number of pudding days is also increased, and rice-milk or rice puddings partly supplant suet pudding.

There is not, however, any general guiding principle, but, on the other hand, there is much diversity of views upon the question of meat. In some dietaries the meat days are increased in number, in others the soup days, and in others the meat pie or hash days, with a corresponding diminution of some other food. In others the meat days remain the same, the soup days are rendered fewer and the pudding days increased, or the meat days are rendered fewer and the soup and pudding days increased.

There seems also to be much difference of opinion as to the necessity for varied diet, since in some there are only two series of days—meat days and pudding days; whilst in others, as at Northallerton, there are six different kinds of dinner in seven days, viz.: two days of meat and potatoes, one of bread and broth, one of bread and meat and potato-hash, one of bread and peasoup, one of suet pudding, and one of rice-milk; or, as at Helmsley, there are five different dinners in seven days, two of which consist entirely of vegetable food, viz., bread and potatoes, and bread and rice.

Such are the chief points of agreement and difference; and I now proceed to show of what the meals consist.

Breakfast.

Breakfast.—Bread is given to children between 5 and 9 years of age in quantities varying from 4 oz. to 5 oz. The former quantity is, however, given in less than one-fifth, and the latter in four-fifths of the workhouses; whilst in two the *juste milieu* is established by the precise quantity of $4\frac{1}{2}$ oz.

For children æt. 2 to 5 years, the quantity varies from 3 oz. to 5 oz.; 3 oz. are given in nearly one-fifth, 4 oz. in four-fifths, $4\frac{1}{2}$ oz. in one, and 5 oz. in two workhouses. The difference between 3 oz. and 5 oz. at this period of life is of the greatest moment.

Of fluid foods, coffee is given in one workhouse, and gruel in 4; whilst in about two-fifths each, porridge and milk (so called) are

given respectively. The quantity which is given to a child *æt.* 5 to 9 years is $\frac{1}{2}$ pint, $\frac{3}{4}$ pint, and 1 pint, in somewhat equal numbers, viz., $\frac{1}{2}$ pint in 18, $\frac{3}{4}$ pint in 13, and 1 pint in 21 workhouses.

Children below 5 years of age do not receive less than $\frac{1}{2}$ pint, and whilst in a large majority of workhouses that is the quantity allowed, in some it is $\frac{3}{4}$ pint, and in others 1 pint, as found in the dietary of older children.

But, however great and important is this diversity in different localities, the evil is further increased by the very varying quality of foods which receive the same designation. This is shown chiefly in the quantity of milk which is given in porridge and milk.

Dinner.—Meat with vegetables is supplied from two to four times weekly to children *æt.* 5 to 9 years in the different workhouses. The smaller number occurs in less than one-third, and the larger in only one-fifteenth; but the medium of thrice a week is found in about two-fifths of the whole. The diminution in the quantity of meat supplied, when compared with that given to children *æt.* 9 to 16, varies from $\frac{1}{2}$ oz. to 2 oz. The extremes are met with in an equal number of workhouses (about 17), whilst the diminution to $1\frac{1}{2}$ oz. is found in about one-fifth, and to 1 oz. in somewhat more than half of the whole. Hence the actual quantity of meat given to this class varies so greatly as from 2 oz. to 5 oz., and the medium quantity is from $3\frac{1}{2}$ oz. to 4 oz. at a meal.

With extremely few exceptions the number of meat days is the same for the children from 2 to 5 years of age. The quantity is, however, diminished to the extent of 3 oz. in two places, to 2 oz. in one place, and to $1\frac{1}{2}$ oz. in four places. The most frequent variation is a loss of 1 oz. and of $\frac{1}{2}$ oz., and this occurs in nearly one-third and nearly one-fourth respectively of the whole number. In about one-twelfth of the whole the same quantity is given to both classes, and these are not uniform in the actual quantity given, but vary from 2 oz. to 4 oz. at a meal. In one workhouse, as has been already mentioned, no meat is given at this period of life. The quantity of vegetables supplied varies from 4 oz. to 12 oz. for children above 5 years, and from 3 oz. to 10 oz. for those below 5 years of age. The quantities of 4 oz., 5 oz., 6 oz., 10 oz., 11 oz., and 12 oz. for the former, and of 3 oz., 4 oz., 6 oz., 9 oz., and 10 oz. for the latter, are met with in from one to six workhouses each; whilst the medium quantity of 8 oz. is given to the former in five-ninths, and to the latter in more than five-sevenths of the whole. In the large majority of workhouses no diminution is made to the younger class; but in others the diminution varies from 1 oz. to 4 oz.

Soup is not given in all workhouses, and where it is supplied it constitutes one dinner weekly in about one-fifth, three dinners weekly in about one-eighth, and two dinners weekly in more than five-eighths of the whole. The quantity which is given to children *æt.* 5 to 9 years varies from $\frac{1}{2}$ pint to $1\frac{1}{2}$ pint, and that to children below 5 years of age from $\frac{1}{2}$ pint to 1 pint. In nearly three-fourths of the workhouses which supply soup the quantity is 1 pint to the elder classes, whilst in reference to the younger

Children.
Aet. 5 to 9.
Aet. 8 to 15.
Dinner.

there is a somewhat equal number in which the quantity given is $\frac{1}{2}$ pint, $\frac{3}{4}$ pint, and 1 pint—the last, however, being the most numerous. In very numerous instances the two classes receive the same quantity; but in a majority there is a diminution of $\frac{1}{4}$ or $\frac{1}{2}$ pint in the supply to the younger. Bread is almost invariably given in addition to the soup.

Cheese and bread are given to children for dinner in a very few workhouses, but the number is too small to merit attention.

Puddings, chiefly comprising suet puddings and rice puddings, are given in every workhouse, on from one to four days weekly. In about one-third of the workhouses the frequency is two days; in one-fifth 3 days; and in one-sixth 1 day. The quantity allowed to the elder of these two classes varies from 6 oz. to 16 oz., and to the younger from 6 oz. to 12 oz. There is, however, a great preponderance of numbers in favour of 10 oz. for the elder, and 8 oz. for the younger, the proportions being more than half of the whole. In a very few cases a little bread is given with the pudding.

A third mode of supplying meat is that of meat-and-potato pie, or meat-and-potato hash (Irish stew), or simply stewed or hashed meat, and is used in a small minority (about one-fifth) of the workhouses. In five of these it is given twice, and in eight once a week, and in no instance does it supplant either soup or meat and vegetables. The usual quantity is 10 oz. and 12 oz. to the elder, and 8 oz. to the younger, and it varies from 10 oz. to 16 oz. for the former, and from 8 oz. to 14 oz. for the latter.

Supper.

Supper.—Porridge or milk is given in more than five-sixths of the workhouses, either daily, or on four, five, or six days weekly. The quantity varies from $\frac{1}{2}$ pint to 1 pint for both classes, but the larger quantity is much more frequently given to the elder than to the younger. The allowance of $\frac{1}{2}$ pint is made to the elder in nearly one-third, and to the younger in much more than one-half; whilst in one-third the larger quantity is given to the elder, and in only one-seventh to the younger. Hence, the elder almost universally receive $\frac{1}{2}$ pint, $\frac{3}{4}$ pint, or 1 pint at supper; whilst the quantity is limited as universally to $\frac{1}{2}$ pint for the younger.

Bread is always given with this food, and the quantity is almost universally the same as that given with the breakfast.

Gruel and bread are given daily in a very few workhouses, and with less frequency in a very few others.

Cheese and bread are never given alone daily, but they constitute the whole or part of the supper, on from one to five days a week, in about one-tenth of the workhouses. The quantity of cheese allowed is usually 1 oz. to the elder, and $\frac{3}{4}$ oz. to the younger; but in no case are the quantities so high as 3 oz. and 2 oz. respectively.

Broth and bread are given in about one-tenth of the workhouses, on from one to three days weekly. The quantity is nearly the same as that of milk and bread.

Such is a short statement of the existing dietaries provided for the able-bodied, aged and infirm, and children. It shows that the quantity of food supplied to the same class varies 50 and

even 100 per cent., and that there is an almost inconceivable want of uniformity in the rotation of the foods which constitute the meals in the different workhouses. PART I.
DIETARIES
IN USE.

COMPOSITION OF FOODS.

I do not purpose to describe the composition of all the foods which will be found mentioned in the appendix, but only those which are in general use. Composition of foods.

Soup.

The principal elements in the preparation of soup are meat and peas. Soup.

In many workhouses no meat is given, in some the meat after being cocked is removed from the soup, and in others the meat is allowed to remain in the soup. The quantity of meat which is found in each pint, or which is used to make each pint, is most various, viz., $\frac{3}{8}$ oz., $\frac{1}{2}$ oz., 1 oz., $1\frac{1}{3}$ oz., $1\frac{1}{2}$ oz., 2 oz., $2\frac{1}{4}$ oz., 3 oz., $3\frac{1}{2}$ oz., and 4 oz. In a few workhouses bones are constantly added to the meat. The kind of meat selected also differs much, as, for example, beef, ox-heads, shins, sheep's heads, sheep's pluck, and other offal, and consequently the value of the meat in the preparation of soup varies also.

The quantity of peas allowed in each pint of soup varies as follows: $\frac{1}{16}$ oz., $\frac{1}{8}$ oz., 1 oz., $1\frac{1}{16}$ oz., $1\frac{1}{4}$ oz., $1\frac{1}{2}$ oz., $1\frac{3}{4}$ oz., 2 oz., $2\frac{1}{2}$ oz., $2\frac{3}{4}$ oz., 3 oz., $3\frac{1}{2}$ oz., 4 oz., and $4\frac{1}{4}$ oz.

Oatmeal or flour are generally added to the other ingredients, in quantities varying from $\frac{3}{8}$ oz. to 2 oz. per pint.

Meat Pie.

The chief ingredients in meat pie are meat, potato, and flour. Meat Pie.
The quantity of meat which is given in each lb. of pie is $1\frac{1}{2}$ oz., 2 oz., $2\frac{1}{2}$ oz., $2\frac{3}{4}$ oz., 3 oz., $3\frac{1}{2}$ oz., 4 oz., $4\frac{1}{2}$ oz., and $4\frac{3}{4}$ oz.

The quantity of potato in each pound varies from $5\frac{1}{2}$ oz. to 9 oz., and of flour from 3 oz. to 7 oz.

Suet Pudding.

The two principal ingredients are suet and flour. The suet allowed in each lb. of pudding is $\frac{1}{16}$ oz., $\frac{1}{8}$ oz., $\frac{1}{4}$ oz., 1 oz., $1\frac{1}{2}$ oz., 2 oz., $2\frac{1}{4}$ oz., $2\frac{1}{2}$ oz., and 4 oz., in different workhouses, so that in some places the suet pudding is little more than flour and water, and the term a delusion; whilst in others, if the quantity which is stated be really added, the pudding must be so fat as to be sickly and repulsive. Suet Pudding.

The quantity of flour which is used varies from 8 oz. upwards in each lb. of pudding, and hence the consistence of the pudding and its nutritive value must vary greatly.

**PART I.
DISTRIBUTION
IN USE.**

Composition
of
foods.
Meat-hash.

Meat-hash or Stew.

The quantity of meat which is allowed to each lb. or pint varies from $1\frac{3}{4}$ oz. to 4 oz., and that of potato from 4 oz. to 12 oz. In some workhouses the hash is made without potatoes, and the only vegetables employed are onions. Hence in some it is thin, and consists very largely of water, while in others it is thick and good Irish stew.

Rice Milk.

Rice milk.

Rice milk is not unfrequently made without any milk ! and when milk is used the quantity is $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{3}$, $\frac{2}{3}$, $\frac{1}{2}$, and 1 pint in each pint of the food. The quantity of rice varies from $\frac{1}{2}$ oz. to 3 oz. in each pint, and that of flour from $\frac{1}{4}$ oz. to $1\frac{1}{2}$ oz. Spice is very rarely used, and treacle or sugar is given in only a few instances.

Rice Pudding.

Rice pudding.

The quantity of milk which is used in the preparation of 1 lb. of pudding varies from $\frac{1}{4}$ pint to 1 pint, and that of rice from $1\frac{1}{4}$ oz. to 8 oz. In some workhouses sugar is added, and the quantity varies from $\frac{1}{2}$ oz. to 2 oz. per lb. In a few spice, and in one or two suet, are also given. Hence this pudding is prepared of every degree of consistence, and varies very much in flavour and nutritive value.

Porridge.

Porridge.

Porridge is prepared with oatmeal, milk, and water, and sometimes flour is also added.

The quantity of oatmeal in each pint varies from $\frac{1}{2}$ oz. to $2\frac{1}{2}$ oz., that of flour from $\frac{1}{4}$ oz. to 2 oz., and that of milk from $\frac{1}{2}$ to $\frac{3}{4}$ pint. Hence the term "milk porridge" indicates a food of very varying quality.

Gruel.

Gruel.

Gruel is usually prepared from oatmeal and water, but in some workhouses new milk or skim-milk is added, and is quite equal in value and flavour to "milk porridge." Where milk is given the quantity varies from $\frac{1}{2}$ pint to $\frac{1}{4}$ pint. The quantity of oatmeal which is used in the preparation of one pint of gruel varies from $\frac{3}{4}$ oz. to 4 oz., but is usually $1\frac{1}{2}$ oz. A small quantity of flour is sometimes used in addition to the oatmeal.

Degree of
diversity.

A glance at the foregoing statement will suffice to prove that there is every possible diversity in the composition and consequent nutritive values of foods having the same designation in different workhouses, and that it is scarcely possible to find two workhouses in which the composition is the same. This is a most serious evil, since no idea can be formed of the value of the food from the name, and in many a good name is given to a very poor food.

The Effect of the Dietaries.

PART I.
DIETARIES
IN USE.
—
Effect of.

The general effect of the dietaries in use is upon the whole to maintain a fair degree of health and strength; but they do not gratify the taste or meet with the cordial approbation of the inmates. The aspect of the inmates is not commonly that of robust health, neither is there usually any marked accumulation of flesh; but the aspect is not generally unhealthy, and the appetite, spirits, and general strength are fair. It must also be borne in mind in applying this test, that for the most part the inmates have been reduced in general health prior to their admission; that a large majority of them are aged, with the powers of life declining, and with the capability of masticating food lessened; and I feel warranted in stating that the general health and spirits of a large portion of the aged inmates of both sexes are equal to those of the same class of the general community at the same period of life.

General
statement.

The effect upon the children is certainly less satisfactory. Whilst in some of the workhouses the aspect of the children is healthy, in nearly all there is a proportion, and, I think, too large a proportion, whose state of health and strength is not equal to that of children in the general community. Here, also, in applying the test, it must be borne in mind that many of the children have been deserted and taken to the workhouse after having suffered from privation of food and comforts; many are orphans whose parents have died of consumption; and not a few are the illegitimate offspring of women of weak minds and bodies. Hence we have a selected class of some of the most unfortunate of children, and only after some years, if at all, could we reasonably expect to find the full restorative effects of the dietary provided for them. Yet, after making due allowance, I am of opinion that further improvement is desirable and possible.

On children.

The dietary for lying-in and suckling women has not been fixed by the Poor Law Board, but has been left to the discretion of the medical officers and the traditions of each workhouse. Hence the plan pursued is most various and full of anomalies, and the effect upon the health and strength is not at all uniform. Thus in some workhouses the lying-in woman is placed upon a dietary of fluid food for from three to seven days, and then is allowed the ordinary diet of the workhouse. Her infant is not allowed food other than her own milk. In others, after the preliminary low diet, the woman is placed for a period varying from two to four weeks upon a diet of meat daily, with or without some extras—as sugar, butter, or tea, or perhaps beer—and then she subsides into the ordinary diet of the house. No separate food is allowed for the child. In others the child is allowed sweetened food of bread and water, or half a pint of milk thickened and sweetened, night and morning; and in some workhouses a third meal of milk-pudding is given in the middle of the day, and, as the child does not eat this, the whole, or part of it, is eaten by the mother in addition to her own allowance of food. In others still the infant from the day of its birth is allowed the full diet of a child aged from 2 to 5

On lying-in
women.

DIETARIES
IN USE.**

**Effect of,
on lying-in
women.**

years, containing milk, gruel, and bread, night and morning, and 3 oz. of meat with vegetables on some, and pudding, soup, and broth on other days for dinner; and this must necessarily be almost entirely left at the disposal of the mother, and is not, in fact, intended to be food for the child. Hence the diversity in the amount of food obtained by lying-in women is very remarkable; and the feeble gait, and pale, spiritless aspect are proof that the quantity of food allowed is as deficient for some as the healthful condition of others shows that it is abundant, and (as it would be easy to prove) even excessive.

On Infants.

The state of the infant in reference to nourishment is also very varied. The mothers are not a robust class of persons, have not been recently well fed, and are not in a healthy state of mind and spirits, and hence it usually occurs that the milk which they furnish is deficient in quantity, or quality, or both. When no food is allowed to the infant, or when the food is only bread, sugar and water, the child is small, pale, and ill nourished; but when sufficient *milk food* is supplied twice or thrice a day, it is far more healthy. When an infant receives the diet of a child of much greater age it is also unfavourably placed, for nearly all the food is unsuited to its wants, and in the midst of apparent abundance it is ill nourished.

On the sick.

The dietaries of the sick are necessarily very varied in their effect, but as they are modified and adapted to each individual case by the medical officer, I need not refer further to them here.

The discretion which is vested in the surgeon to temporarily add to the dietaries of all classes, when such addition is needed, is most valuable, and it is, I have no doubt, in general wisely exercised, but the surgeon is not always really so free in practice as in theory to exercise his judgment and authority; and as medical officers, like other men, must vary much in the interest which they take in their duties, and the consideration which they give to each case, imperfections will exist. In some workhouses the list of extras added is lengthy and varied; in others it is almost restricted to three articles, as beer, gin, and tobacco; and in others it scarcely exists at all.

**Foods liked
or disliked**

The degree in which the food supplied is liked or disliked by the inmates is of great importance to its due action, as I shall subsequently show in greater detail, for when it is really disliked it is not eaten, but is thrown into the waste-tub, and its value is entirely lost, whilst at the same time the inmate goes without his meal, or eats only one part of it—as, for example, the bread when given with soup—and is ill nourished.

**Waste of
food.**

Dinner.

Of the different foods supplied for dinner, meat and potatoes, meat-and-potato pie, and Irish-stew are the most generally liked. Pea-soup is less *generally* disliked by the adults and the aged than I had expected to find, whilst a large proportion of boys and girls dislike it and leave it, and on soup days have bread only for dinner. Suet pudding is not universally disliked by any class, but when it is given twice or thrice a week, many of the inmates, and particularly the girls, do not eat it. The relish for it depends

much upon the suet being in proper proportion to the flour, the proper consistence of the pudding, and the absence or supply of a savoury sauce with it. When the suet pudding is not liked, and bread is not given with it, the children go without any dinner. Rice pudding and rice-milk are not very generally liked; nay, they are often entirely rejected even by the children on account of their insipidity and the rapidity with which the sense of satisfaction after the meal passes away. A bread-and-cheese dinner is sometimes liked.

PART I.
DIETARIES
IN USE.

Effect of
foods liked
or disliked.

At the breakfast and supper, bread and milk, or bread and gruel containing a portion of milk, are generally liked; but tea and bread and butter are much preferred by the aged at one or both of those meals. Broth, or bread and cheese, is not generally liked as a whole meal.

Breakfast
and supper.

The Methods practised in the Obtainment, Cooking and Distribution of the Food.

The course pursued in the purchase of food is to obtain tenders and to buy by contract. Hence there is a tendency in the guardians to purchase the articles at a low price—and, therefore, although not avowedly so, articles of inferior quality—and in the contractor to reduce the quality of his goods below that of the samples upon which the contract was made.

Foods obtained by
tenders
leads to
adulteration and inferior
quality.

To add water to the milk, rye or barley-meal, to the wheaten flour and oatmeal, dirt to the sugar and the oatmeal, and mutton and low-priced fats to the butter, are ordinary tricks in trade, and with the testing knowledge found in a workhouse may readily pass unnoticed. I have frequently detected rye-meal in the bread and oatmeal, and sharps in so-called seconds flour. The kind of flour which is called thirds, and is in use in some workhouses, consists largely of sharps and rye-meal, both of which are in nutritive value and digestibility very inferior to the farina of wheat. The oatmeal has felt heavier in the hand than it ought to have done, or contained a large quantity of husk; and the peas were of a quality so inferior, that not only was the whole sample small (offering therefore a larger proportion of indigestible husk to the nutritive kernel than is profitable), but about every fourth pea was imperfect. The tea is commonly a congou of inferior quality, with large leaves, stalks, and an earthy flavour. The cheese is usually skim-milk cheese, and is sometimes too new or too hard to be easily digested; but the quality varies much, and in some workhouses is excellent.

The joints of meat which are contracted for vary much in the different workhouses. In some they are only the sticking-pieces, briskets, and legs and shins of beef; in others, the round and the ribs are added; in others the fore-quarter of the beast is taken together, and when mutton is given to the inmates the whole side of the sheep is bought. In some, sheep's heads and plucks are alone purchased wherewith to make soup; in others, beasts' heads are used for the same purpose in greater or less proportion.

Meat.

The value of these different parts of the same animal varies much, both in respect of flavour and nutriment, but the relative quantity is

**PART I.
DINING-ROOMS
IN USE.
Procuring
food.**

left much to the discretion of the butcher. The quality of the meat supplied is generally good, and in some workhouses is excellent; but in workhouses, as in all public institutions, meat of inferior quality is likely to be substituted in the absence of constant watchfulness on the part of the officers.

Bread.

Bread is contracted for in some workhouses, and is supplied in loaves of defined size, at defined periods after baking, and in defined quantities. Generally, however, the flour is bought by contract, and is baked into bread in the workhouses, or the dough is made in the workhouse and sent out to a bakehouse to be baked, and a certain allowance ($\frac{1}{4}$ lb. in 4 lbs.) is made for loss of weight. A finer flour than that used for making bread is sometimes contracted for wherewith to make puddings and for the use of the officers. On the whole the bread is good, properly baked, and wholesome. In many workhouses the bread for out-door relief is also baked in the workhouse, and thus wholesome food of the cheapest and best kind is prepared for the out-door paupers under the inspection of the Poor Law officers.

Cooking.

The cooking of the food is a very simple process, and consists of boiling almost exclusively. Two or more coppers are provided in which the food is boiled. These, in many workhouses, are heated by fire, but in not a few an excellent arrangement of steam boiling is found, in which the steam is passed into the food to be cooked, or, better still, circulates around the copper. In a majority of cases a "steam head" carries away the steam which is generated in the boiler, but in a few the steam is allowed to escape into the kitchen to the injury of property and the annoyance of the officers and inmates. When bones are employed in making soup they are usually boiled in the *open copper* over night; but I have seen a digester used in one or two workhouses. The peas and other vegetables are heated with water as slowly as the arrangement of the fire and boiler will permit, and for a lengthened period; and afterwards the liquor from the boiled meat is added and the soup is prepared. When meat is given in the soup it is cut into small portions, which are added to the whole mess, and divided as fairly as may be, when the portion of each inmate is taken out; but as a fair division rarely occurs by this mode, and as the inmates wish to see the pieces of meat, there are workhouses in which the proper weight of cooked meat is placed in each portion separately, and the hot soup added to it.

**Meat is
boiled.**

**Cook not
paid.**

It is most rarely that there is a paid cook in the workhouse, but not unfrequently an inmate aids the matron and as a reward receives some extra allowance of food, and there are also several women who perform other offices in the kitchen and scullery. The whole skill and care exercised in cooking is practically due to the matrons alone; and although so few of them have had any special training for this duty, I have found it on the whole very fairly performed.

**Mode of
heating.**

When the copper is heated directly by fire, it is almost impossible to boil meat without hardening it too much; but it is not difficult to regulate the heat properly when the copper is heated by steam. The preparation of the suet puddings requires much care

so that they may be of the proper consistence ; and the boiling of yeast dumplings so that they shall not be sodden demands the closest attention.

PART I.
DISTANCES
IN USE.

Cookery.
Salted meat

The meat is almost universally salted in pickle, except on one day of the week. In a few workhouses fresh meat is cooked twice a week ; and in two or three thrice or four times a week ; but all the meat that is not required for cooking on the day on which it is received into the workhouse is put into the pickling-tub, and remains there until it is required for use. This is due to the facts that meat is supplied only once a week in many country towns ; that if kept out of pickle in hot weather it is apt to become tainted ; that to pickle it saves trouble ; and that a little salt improves the flavour of boiled meat. The practice is, however, detrimental to the quality of the meat, and therefore to the nourishment of the inmates, as I shall subsequently show, and cannot be economical, and it is certainly carried much further than is necessary.

In scarcely any workhouse is provision made for baking or roasting meat, except on the very limited scale required for the food of the officers and some of the sick. This is owing to the facts that to boil meat requires less attention and less apparatus than to roast it ; that it loses weight less in boiling than in roasting ; that salt meat is not adapted for roasting ; and, above all, that boiled meat supplies the liquor from which the soup is made. There are, however, a very few workhouses where a roast meat dinner is provided for the inmates once a week ; and one of the smallest workhouses in my district (Pickering), is honorably distinguished by supplying roasted meat thrice a week. Whenever roast meat is given it is fresh, and the kind selected is usually mutton.

Meat not
baked or
roasted.

The distribution of food is almost universally effected under the immediate inspection of the master and matron. The soup, tea and other liquid foods are put into vessels of known capacity, and the pudding, meat, bread, butter, and solid foods are weighed to each person. Relays of inmates are provided with trays to carry the food to the dining-rooms and to the sick-rooms. The process is effected with varying degrees of rapidity ; but the plan is so fairly arranged generally, that, notwithstanding the exposure of the food to the cool air, it is for the most part still warm (sometimes hot) when the inmates eat it. The soup and fluid food in many of the workhouses is hot enough, and as the potatoes are served in their skins they retain the heat pretty well ; but the meat becomes lukewarm.

Distribu-
tion of food.

The distribution of the food to each person is thus in many workhouses fairly made ; but as already mentioned, the meat in the soup is not always equally distributed, and when the meat, and particularly mutton, is cut up, there cannot be a fair distribution of the fat with the lean. It is also usually served in a fitting condition, and the only really uncertain food in this respect is yeast dumplings, which become sodden if allowed to remain long uneaten. In both of these respects there is much difference in different workhouses, according to their size, and the care and intelligence employed ; but other things being equal, the arrangements

**PART I.
DIETARIES
IN USE.**

**Distribu-
tion of food.
Utensils.**

in a small workhouse are better adapted to distribute the food whilst yet hot, than those of a large one.

The table utensils are almost always tin pannikins for every kind of fluid food, and, although I have often found them dark coloured and requiring tinning, they have always been clean. In a large majority of the workhouses pottery plates are used for dinner, but in a few tin plates or wooden trenchers are used either for the whole inmates or for those who are able to take their food in the dining-room. The former, however clean they may be, soon lose their covering of tin, and look repulsive and dirty; and, moreover, the metal more rapidly abstracts heat from the food (and thereby cools it) than is the case with pottery plates. Wooden trenchers are very antiquated, require much labour in scouring to keep them clean, and keep up a daily distinction of inferiority between the table of the inmates of a workhouse and that of the poor living around them. Knives and forks are supplied, and the spoons are either of metal or wood.

PART II.

**PART II.
THE
PROPER
DIETARIES.**

THE PROPER DIETARIES IN WORKHOUSES.

Preliminary Considerations.

**Preliminary
considera-
tions.**

On proceeding to consider the subject of workhouse dietaries generally, I would premise a fundamental guiding principle—one of rigid utilitarianism—viz., that the inmates of workhouses should be fed in a manner the most consistent with economy and the maintenance of growth, health, and strength. It has always been desired that the arrangements of a workhouse should not be such as would entice able-bodied men to abandon employment and their own homes in order to enter the workhouse, and so far as the well-conducted portion of the community is concerned it has effected its object; but there are ill-conducted persons who are indisposed to earn their own living, and also honest and laborious men who at certain periods are unable to earn their living, to whom any place of shelter with warmth and food would offer inducements to them to enter, and between whom and the principle laid down there is a degree of antagonism.

There can be no doubt, however, that the object for which workhouses have been established is more fully attained now than it has been at any former period. Able-bodied people are now scarcely at all found in them during the greater part of the year (only in winter when labour for the working classes is deficient is there any considerable number of this class), and so much is this the case that the officers can scarcely find enough inmates to keep the house and linen clean. At present those who enjoy the advantages of these institutions are almost solely such as may fittingly receive them, viz., the aged and infirm, the destitute sick, and children. Workhouses are now asylums and infirmaries, and not places where work is necessarily exacted in return for food, clothing,

and shelter; and so generally is this appreciated, that the very term "workhouse" has fallen into disuse, and the word "union" has been familiarly substituted for it. This has resulted probably from the general prosperity of the country in recent years, by which labour, and a fair remuneration for it, have been more uniformly obtained, and the improved moral tone and greater thrift of the population generally; and although some of these causes cannot be permanent, there is some reason to hope that workhouses will not be again filled with the class of persons whom it is desirable to exclude.

PART II.
THE
PROPER
(DIETARIES.
—
Preliminary
considera-
tions.

Whilst, therefore, there is now as strong a necessity as formerly for laying down the principle of rigid economy in the dietaries, as in the general management of workhouses, there is much less reason than heretofore to fear that the comforts which such institutions, when managed under the control of the State, must necessarily afford will be abused.

I have already limited the extent to which economy in the dietary may be carried by the physical requirements of the persons to be fed, since humanity as imperatively requires that the health and strength of those whom the State thus undertakes to protect shall be maintained to a fair standard, as that a sense of justice and propriety demands that nothing superfluous shall be provided, and that nothing shall be wasted. It is not, therefore, simply a duty to find that amount of food which has the cheapest market value, and that quantity which will just sustain life, but that kind of food which will yield the largest amount of nourishment at the least cost; those conditions which will enable the food to be the most perfectly digested, and the body to obtain the greatest possible amount of nourishment from it, and that amount which shall maintain growth, health, and strength.

In these respects, whilst the aim is to promote economy, errors are committed which produce waste of food. Such are the selection of foods of inferior quality, or of inferior digestibility; placing the persons to be fed under conditions which do not enable them to extract the largest possible amount of nutriment from the food, but allow much nutritive matter to pass out of the body unused; and offering foods so distasteful that they are not eaten, but are thrown into the waste-tub. Regarding economy in this light, it may be approved equally by justice and by humanity—by utilitarians and by humanitarians.

I purpose now, before stating the dietaries, which should, in my judgment, be generally in use in workhouses, to premise certain observations of this class, with a view to enable guardians and others to understand the grounds upon which the dietaries will be based, and, as it is hoped, to obtain their general concurrence. I shall, therefore, consider in their order, 1st, the conditions in which the inmates should be placed to make the best use of the food supplied; 2nd, the selection of the most economical foods and parts of foods; and 3rd, the special requirements of each class of inmates.

**PART II.
THE
PROPER
DIETARIES.**

Requisite
conditions
for the
perfect use
of food.

*The Conditions in which the Inmates should be placed to enable them to make the best Use of the Food supplied.**

The idea which I desire to convey by the phrase "the best use of food" is the most perfect digestion of food and the appropriation of it to the sustentation of the body, by which the least possible portion passes out of the body undigested and wasted. When this is effected, food completely fulfils the purpose for which it was eaten.

It should be generally known that the power of the body to obtain nourishment from food varies very much, quite apart from the nutritive properties of the food itself, and also that the various causes which modify the health and vigour of the body act chiefly by modifying this power to take and convert food to its use. Whatever influences, in general terms, improve the general tone of health, increase this power, and *vice versa*, and many of them are well known to almost every member of the community.

Employment.

Employ-
ment.

The most readily recognised influence is that of exertion, since it is well known to quicken the appetite and digestion, and every other vital action. Employment in the open air, as in the garden and field, is most useful, and should be found systematically for all, even for boys and aged men, where practicable. Stone-breaking for the purpose in hand, is nearly as valuable, but is inferior in other respects. Such in-door employments as oakum-picking and mat-making, requiring less exertion and being accompanied by dust, are less to be desired, but they are almost the only available occupations in large towns, habitually, and in the country during wet and cold weather. Pumping and grinding of corn are wholly or partially in-door occupations, and are injurious only when too laborious and too long continued. Chopping firewood is a good and profitable employment.

The plan of allowing the inmates to saunter about their day-rooms, or small yards enclosed by high walls without any occupation, and to pass their days in a state of listlessness of mind and body, is even in this point of view most unfitting. Every inmate, according to his measure of health and strength, should have almost constant occupation, and when that fails, he should be permitted and directed to take exercise by walking in or outside the workhouse grounds.

Cheerfulness.

Cheerful-
ness.

The state of the spirits is also of some importance, since with a state of depression the appetite and all vital functions languish. There is no reason why children and the destitute aged should not enjoy life even in a workhouse; and it is quite fitting that by mental instruction, reading, and religious exercises, by reasonable permission to take exercise in the garden, field, and neighbourhood,

* The remarks which follow under this head might also with equal force be urged on other grounds than those of dietary.

or in the workhouse yards (which should be kept fairly smooth and dry, and enlivened by grass-plots or flower-beds), in addition to some regular occupation, they should enjoy a sense of resignation, and a state even of cheerfulness. None have seemed to me so cheerful as those who have been induced to take interest in the management of the workhouse by being engaged in the care of the sick, or of vagrants, or of discharging various other duties of trust and usefulness. Mopishness, which is engendered by confinement within high walls, and without regular occupation, and neglect or harshness on the part of the officials, is to be deprecated. Many of the existing workhouses are admirably situated in reference to the surrounding country, and the guardians have a sufficient quantity of land to enable them to fulfil every requirement.

PART II.
THE
PROPER
DIETARIES.

Requisite
conditions
for perfect
use of food.
Cheerful-
ness.

Warmth.

A suitable amount of clothing and firing is of great importance to all, and especially to the young and the old, in order to enable them to sustain vital action, for although cold weather may excite the appetite and promote digestion, continued coldness of the body tends to exhaustion, and in children retards growth. In this respect I think there is need of improvement in many workhouses, and that in reference to both the day and the night.

Agreeable and usual Food.

There can be little doubt that likes and dislikes for food have great influence over its action. It is not denied that repulsive food lessens or takes away the appetite, and according to its repulsiveness it is eaten or left. It is, therefore, an obvious error to give soup or any other kind of food, probably good enough in itself, to one who positively repels it, since it will not be allowed to nourish him, and will be carried away to waste. Everyone has tastes which must in some degree be gratified, or the appetite will fail, and on so small a matter apparently as the admixture of dried herbs with soup, of spice with rice-milk, and of dip with suet-pudding, will depend the capability of taking these foods regularly. It is true wisdom to provide such foods as are not disagreeable, and to prepare them in an agreeable manner. Even the inmates of a workhouse may properly claim this amount of consideration; and, indeed, it is only that which we give to the lower animals under our care.

Agreeable
food.

For the same reason a certain variation in diet is really necessary—such an one as the ordinary experience of mankind has induced those to provide who are free to select their own food,—and that not simply to please the palate, but—more important still—to maintain the relish for and the capability to eat the food.

So with regard to unusual food. It is possible to provide food which may be highly nutritive in itself and acceptable to some, whilst to others not accustomed to its use it would be unsavoury and repulsive. Indian corn is an apt illustration of this since it is more nutritive than wheat, and is eaten by the inhabitants of a

Usual food.

**PART II.
THE
PROPER
DIETARIES.**

**Requisite
conditions
for perfect
use of food.**

**Unusual
food.**

large part of both the old and the new worlds, but its flavour is repulsive to the inhabitants of these islands, and except as the result of dire necessity it would not be accepted by them. It was largely introduced into Ireland after the late famine, and rendered the greatest service to the starving inhabitants; but even so recently as 1863, when I visited it under the direction of the Privy Council, it was extremely disliked there, and was tolerated only by reason of the extreme poverty of the people. Peas and beans in like manner have a flavour which prevents their daily use here, whilst in Italy beans (of good quality, however,) are eaten freely.

It is possible for a person by the use of such foods to lose much of his dislike to them; but this only occurs after the lapse of some time. Many, however, never lose the distaste for them.

The foregoing has reference chiefly to the appetite for, and the taking of food, but there is great reason to believe that the digestion or assimilation of a distasteful food is not as perfect as that of an agreeable food, and that if it pass the palate an unusually large portion of it will remain in and then pass out of the bowel unused. Hence it is sound economy to give agreeable, ordinary, and varied food.

Cooking.

**Cooking,
object of.**

The object in cooking is not to change the composition of the food, but to make it more agreeable to the taste, and to aid the process of mastication and digestion by rendering the food soft, and its parts capable of being easily separated. The first is the higher department of the art, and upon it much skill may be exercised, yet a very moderate amount of knowledge would enable any one to employ the herbs and condiments in common use so as to add to the flavour of the food. There is great deficiency in practice in this respect. There are, also, two errors which are often committed, one by which meat, for example, is over roasted and its valuable juices dried out; the other by which it is boiled too fast and the fibre rendered harder than before. Whatever may be the kind of food and the mode of cooking, the operation should end when the food has been sufficiently softened, and before any material part of its flavour has been drawn out of it.

**Roasting
meat.**

In roasting meat the fire should be hot at first, and the meat placed so near to it for a few minutes that the outside may be quickly hardened, and the juices not allowed to escape, and afterwards it should be cooked slowly. When meat is baked this graduation of the heat cannot be effected, and a larger proportion of the juices and flavours of the meat escapes and is lost. This chiefly accounts for the inferior flavour of baked and the superior flavour of roasted meat. When meat is properly roasted there is but little nutriment lost, except water and a portion of fat which has been melted, and is recovered as dripping; and hence, although the weight is reduced by one-fourth or one-third, the nutritive value of the lesser quantity with the dripping is scarcely less than that of a larger quantity.

In boiling meat the process must be varied according to the object sought. If it be desired to make soup or broth from it, and to make it good, it will be needful to cook the meat slowly from the beginning, and thus extract as much of the juices as possible; but if the making of soup be a secondary matter, and the aim is to render the meat itself as nutritious as possible, the meat should be plunged for a few minutes into boiling water, so as to quickly harden the outside fibre, and then the heat should be lessened, and the meat be slowly cooked. It is not possible to have good soup and perfect meat at the same time.

PART II.
THE
PROPER
DIETARIES.

Cooking.
Boiling
meat.

But boiled meat differs materially from roasted meat in that, by the extraction of a portion of its juices, it has lost salts which are necessary, and other material which is useful to the body; and the reduced quantity after cooking is not equal in nutritive value to the original quantity. This defect is, however, easily remedied, for the lost material is found in the broth, and if both be eaten together the original nutritive value of the meat is regained. When, however, the meat is eaten on one day and the broth on another, the body does not obtain the required quantity of the salts, and, in order to proper nourishment it must obtain them on the meat days from other food. The importance of this is not generally understood; neither is it readily believed that salts weighing only a few grains can have much value; but those few grains of salts are as essential to nutrition as the ounces or pounds of flesh in which they are naturally found. The loss of weight by boiling is somewhat less than that by roasting meat, and usually about $3\frac{1}{2}$ oz. of roasted meat are equal in nutritive value to 4 oz. of boiled meat with broth added.

Difference
in value of
roasted and
boiled meat.

Salting, although used for the preservation of the meat, is a part of cookery, and requires consideration here. The effect of salt is to extract a portion of the juices (with the salts and other substances) from the meat, and the pickle soon assumes both the flavour and colour of the meat pickled. Hence its value is lessened, and, unlike the result of boiling meat, the salts and albumen are irrecoverably lost. No folly then can be greater than that which requires meat to be salted which could have been kept fit for use without salt. In this manner there is much waste of food in most of our workhouses, and a proportionate injury inflicted upon their inmates. But further, salted food when given regularly has been proved to be injurious to nutrition, so that not only does the salted meat lack important parts of food, but the salt which is thus introduced within the system tends further to impoverish the body.

Effect of
salting
meat.

This evil is not restricted to the meat. The liquor in which it is boiled must be made into broth or soup, and although much of the salt is extracted from the meat by the boiling, it is collected and eaten in the soup.

Meat
liquor.

The use of a small portion of salt adds somewhat to the flavour of beef and pork, without materially lessening the value of the flesh; but the rule should be universally laid down that meat shall be

**PART II.
THE
PROPER
DINETARIES.**

Cooking.

Meat to be
given when
fresh,

generally given when fresh, and shall not be generally salted except under special circumstances. Meat can be obtained in country places only once a week, and as in hot weather it cannot be kept fresh for a whole week, a certain portion must be salted, but even under these circumstances if a larder be provided which is cool and has a free current of air passing through it, if the meat be of good quality and placed in the larder *when quite fresh*, more than half of the week's supply may under almost all circumstances be eaten when fresh. In towns the meat may be obtained, if properly agreed upon in the contract, more frequently than once a week, and there is no excuse for wasting it by pickle.

and
sometimes
roasted.

Hence on grounds of economy and variety of flavour, it is desirable that in every workhouse, and at all seasons of the year, the meat should be sometimes roasted and at others boiled; the relative frequency depending upon the frequency with which the liquor is to be used for soup or broth and the convenience for roasting. There is no reason why at least one roast weekly should not be given (and Sunday would probably be a proper day for it), but the aim should be to give it twice weekly. When bread is baked in the workhouse (as is usually the case) the oven is quite adapted to the baking of meat, and the process would not be attended with more trouble than occurs with boiling; and when this is not the case, sufficient meat for the use of a small or moderate-sized workhouse may be roasted in the small ovens and at the fire. There would not, however, in any case be more difficulty in providing proper means for roasting or baking than for boiling meat.

Meat in
soup.

When cooking meat in soup, it is desirable that it be cooked slowly and not rendered hard; but at the same time it should not be cooked so long as to fall to pieces and be imperceptible by the inmates. Hence it should not be added to the soup at the commencement of the process. When cooked in pies it will necessarily be rendered tender if the meat be of good quality, and the moisture of the pie duly maintained.

Bones.

All the bones, even those in roasted meat, at the command of the cook should be made into soup. They should be broken or sawn into very small portions, and boiled in an open vessel, or, better, in a closed digester, for at least twelve hours.

Bread.

Bread should be well baked, and yet have but little dried crust. If there is much moisture in the inside of the loaf the digestibility of the bread will be lessened and the bread will soon become ropy or mouldy. All preparations of boiled flour should also be well cooked.

Potatoes.

Potatoes should be sometimes roasted, and at others boiled. Roasted potatoes have lost much more in weight than boiled potatoes, but the loss has been almost exclusively of water, and the lesser weight of the roasted is equal in nutriment to the greater weight of the boiled potato. When, however, the skin has been dried and thickened, there has been a certain amount of food lost.

Roasted potatoes have a flavour which differs from that of boiled, and they retain the heat longer and can be handled more freely than boiled potatoes.

PART II.
THE
PROPER
DIETARIES.

Peas should be so cooked that they may become quite soft, but not so that the whole shall be broken down. There is a wish on the part of many of the inmates of workhouses to be able to recognise in the food the materials of which it is composed, and if this can be effected and yet the materials be perfectly cooked, it is desirable to gratify the wish. Great care should be taken, however, that the peas are sufficiently cooked, for any hard portions will be indigestible.

Cooking.
Potatoes.
Peas.

Milk should not be boiled, but simply made hot. Tea should not be boiled, but placed in boiling water, and the water kept quite hot for about ten or fifteen minutes. Carbonate of soda should be added to the water (and particularly if the water is hard). The tea should either be thrown loose into the boiling water, and the whole occasionally stirred, or it should be enclosed in very coarse muslin or strainering, with plenty of space allowed in the bag and be well moved about, and at the end of the operation the bag should be well squeezed. As the quantity of tea allowed is small, a better infusion will be obtained if the leaves are thrown in loosely than if enclosed in a bag, and after they have been stirred round they will for the most part fall to the bottom of the vessel, and not inconvenience the distribution of the tea. The sugar should not be boiled in the tea, as it loses a part of its sweetening properties when kept at a boiling temperature, but added after the boiling has ceased.

Rapid Distribution.

It is of great importance to nutrition that the food be served and eaten whilst hot. The heat of the food stimulates the mouth and stomach, so that improved relish for and digestion of food occurs. Further, heat is essential to the body, and it is *cheaper* to supply a part of it from without in this manner than to produce it within by the chemical changes of digestion. In this sense heat is a kind of food. Lukewarm food not only lacks these advantages, but some kinds, as soup containing fat, become positively repulsive, and are left to be wasted.

Distribu-
tion of food.

In order to provide hot food, it is needful that it be prepared hot, that the distribution of food be rapidly effected, and that reasonable means be taken to prevent rapid cooling.

The first may be, and indeed usually is effected without difficulty. The second, or the rapid distribution of food, is attended with some difficulty, since the dining-room, and particularly the sick wards, are distant from the kitchen, and the weighing of food for a large number of persons necessarily consumes much time. The kind of precaution to prevent the food from becoming cool is even yet more difficult. The food is usually cut up and weighed in a large and comparatively cold room; the dining-room is cold,

and the doors are necessarily open, and a considerable time must elapse between the first and last acts of distribution of the food. It is served on open plates which allow the action of the cold air on every side, or in tin pannikins, which rapidly radiate and lose heat. Moreover, the whole supply of food is placed upon the table before any of the inmates are admitted to the dining-room.

The degree of difficulty in supplying hot food varies necessarily with the season of the year, the size of the workhouse, and the excellence of the arrangements; but, upon the whole, further improvement is needed and may be readily effected. To this end it is necessary—

1. That the master and matron should be well impressed with the great importance of supplying hot food.
2. Sufficient help in the distribution should be obtained, and the carrying parties be well arranged.
3. A rapid carver should be selected. In some workhouses the master is neither young nor active, and he might with advantage delegate a part of this duty to another, who shall perform it in his presence.
4. It is worthy of consideration whether fluid foods, as soup and tea, could not be carried into the dining-room in several large quantities and distributed upon the table. This is under consideration in several workhouses, and will, I trust, ultimately be found practicable. It would give the table a more homely character, and allow the food to be served when quite hot.
5. Pottery should universally supplant tin plates and pannikins. Wooden trenchers, which are still in use in many workhouses, are in this sense preferable to either, but they are objectionable in other ways and should now be disused. Pottery plates are commonly used, and in one or two workhouses pot-mugs have been substituted for tin pannikins, and the fears in reference to breakage have not been realized. The habit of eating food from tin pannikins in ordinary life has long passed away, and, in order to lessen that sense of degradation which it is not desirable that aged inmates should feel, as well as to prevent the cooling of the food, it is to be hoped that pot-basins or mugs will ere long be in general use.
6. The trays upon which the portions of food are carried to the dining-room and the sick wards should be covered. This would be most easily effected by having thin wooden covers to fit the tray, and cover the whole contents, and the additional weight would be small.
7. There is probably no sufficient reason why the inmates should not be assembled in their places before the food is placed upon the table, since the distribution of the food might be made without inconvenience or confusion. The extra diets (which are only a very small minority) might be brought in separately.

2. Selection of the most economical Kinds, Qualities, and Parts of Food.

**PART II.
THE
PROPER
DIETARIES.**
—
The most
economical
foods.

This is, perhaps, the most important part of the subject, since it affords grounds for the construction of workhouse dietaries of equal force to the scientific and the practical man.

The principle which must guide us is to seek to obtain the largest amount of nourishment at the least cost, and it therefore claims all the knowledge and intelligence of those who apply it in practice.

It is not, however, as simple as it may at first sight appear. It is not simply the least cost of food, for foods which are cheap are for the most part inferior in real value to those which are dearer. Neither is it simply cheapness combined with nutritive elements, for the nutritive elements vary greatly in digestibility, and the more digestible are cheaper at a greater cost than the less digestible at a less cost. Moreover, as has been shown, nutritive foods may be distasteful, and even repulsive, to the persons to whom they are offered, and then they are rejected by the appetite, or less perfectly digested, and some of the nutritive material does not nourish, but is wasted.

It is, therefore, a combination of four qualities, viz., low monetary value, high nutritive material, acceptability to the appetite, and digestibility. It is not simply how much material it offers at a given price, but how much nourishment the body can obtain from it at that price.

Qualities
required.

There must, therefore, be a reference to these four qualities in the account which I shall give of each separate food, viz. :—

1. The market value of the food.
2. The nutritive elements, as determined by chemical analysis, contained in the food.
3. A knowledge of the kind of food in ordinary use amongst the classes to be fed by these dietaries.
4. A knowledge of the working of the human system by experiment or otherwise of the degree in which different kinds of food are digested.

In reference to the second, there are two modes in which the nutritive elements are stated ; one showing how much of some well-known elements of food—as fat, sugar and starch—they contain ; the other stating the final elements into which all these are resolved by the acts of digestion and assimilation. The former is the more popular one, and is, perhaps, sufficient when we wish merely to compare foods with each other in a general manner ; but the latter is the more useful, since fat and sugar, and all other foods, are resolved into their final elements by the acts of digestion and assimilation, and leave the body in those forms.

Nutritive
Elements.

Modes of
calculation.

Accepting the latter as the plan to be pursued in calculating the nutritive elements in food, I remark that these elements are arranged chemically into two classes, viz., certain salts, as those of potash, soda, and iron, which—however their combinations may change—must still remain and leave the body as salts of potash,

PART II.
THE
PROPER
DIETARIES.
—
Economical
foods.
Nutritive
elements.
Salts.

soda, iron, &c.; and four substances which are contained in and are evolved from the decomposition of the food, viz., carbon, nitrogen, oxygen, and hydrogen, and which, with the exception of nitrogen, for the most part leave the body as gases or vapours.

The salts are in small quantities, but are widely distributed in foods, and although small in quantity, are quite essential to nutrition, whilst the other four elements form the great bulk of foods, and of the body which is nourished by foods.

Practically speaking, but little calculation need be made of the salts in food, provided a mixed animal and vegetable diet is given; for whilst it is not known with great nicety how much of these salts is needful to nutrition, it has been proved that in a mixed dietary they are sufficiently abundant.

Oxygen and
hydrogen.

Of the other elements, the oxygen and hydrogen are chiefly found combined as water, and as we can supply water from without in any required quantity, we need not take into account the water which is combined with food. There are, however, certain foods in which the hydrogen is found in greater quantity than could be united with the oxygen to form water, and which, consequently, is free, and can take a part in those chemical actions by which food nourishes the body. This must be taken into account, and it is chiefly found in fats.

Carbon and
nitrogen.

Hence, practically, there are but two substances which we are required to estimate in order to learn the absolute and relative nutritive values of food—the carbon and the nitrogen; and we can also include the free hydrogen, since in its property of producing heat it is equal to $2\frac{1}{2}$ times its weight of carbon, and may, therefore, be reckoned under the head of carbon. The distinctive character of these two substances is, that carbon, which is used in large quantities, gives heat to the body; whilst nitrogen, which is consumed in small quantities, is an essential part of all kinds of flesh. These supply the two great wants of the body, viz., to keep it warm and to maintain its structure. It is needful only to add further that there are foods—as fat, oil, sugar, and starch—which do not contain any nitrogen, and which, therefore, cannot be used to produce flesh. These are called *carbonaceous* foods, and also *heat-giving* foods, because their duty is to give heat to the body. There are not any foods which are destitute of carbon, and consist of nitrogen only, but there are many foods—as lean flesh, eggs, and milk, which contain nitrogen, and are thence called *nitrogenous*, and their duty is to *build up the structures* of, as well as to supply heat to, the body.

Modes of
calculation.

In calculating the quantity of these two elements in foods, we may adopt one of two courses, viz., *first*, to state the quantity of the substance containing nitrogen, and the quantity containing no nitrogen; and this plan is still used by many eminent men. Or, *second*, to ascertain the quantity of nitrogen itself in the substance containing nitrogen, and the quantity of carbon in all substances, whether containing nitrogen or not, and then at once to take the weight of nitrogen and carbon in a given food. The latter is the more simple, since the carbon in the nitrogenous food must also be

calculated, and the sole object in determining the amount of nitrogenous food is to know how much nitrogen it affords. The former also leaves the calculation incomplete. Both, however, when fully calculated, necessarily yield the same results.

There are many who, notwithstanding this chemical knowledge, doubt the facts, and the inferences deduced from them, and would take as the test of the value of a food the complicated and ultimate one of its effect in maintaining the health. A given quantity of food, they say, has been shown to be sufficient to maintain health and strength, and they do not believe in carbon and nitrogen or any such chemical details. Their mode they call experience, and the other mode theory; whereas the former is blind, and the latter enlightened experience. Such persons are familiar with different qualities of food in feeding animals. They know that oats are more sustaining food than grass, and beans than oats. Also that turnips and cabbage are inferior in fattening properties to oil-cake, and barley-meal. All that they further need is to know the reason for this, viz., the difference in their chemical elements; but they admit and act upon the fact which they have seen and known, and reject the explanation which they do not know. It must be evident that if in a gross manner they can determine the different values of foods in producing certain effects, it is the department of special science to furnish the explanation, and to state the values with greater exactness.

In reference to the third requirement, or the knowledge of the foods in ordinary use in different parts of the country, I will here refer only to my report on the dietary of low-fed populations, which is published in the sixth report of the medical officer of the Privy Council, in which report will be found the actual dietaries in use in every county in England and in Wales, Scotland, and Ireland. The subject will be again considered further on.

The fourth, or a knowledge of the digestibility of different kinds of foods, must be derived not from the well-known observations upon a man who had an artificial opening into his stomach, through which food could be introduced and withdrawn—since those only showed the rapidity of the process—but from such as show what proportion of a given food passes off by the bowel unused, and therefore what proportion is applied to the nourishment of the body, and what is cast out as useless. This inquiry is still incomplete, but in general terms it may be stated that a larger proportion of animal than of vegetable food is digested, and of vegetable food a vastly larger proportion of the farina than of the skin or husk. In reference to the latter, it may be further added that the outer part of the husk of grain—as wheat, oats, and barley, and of seeds, as peas—is altogether indigestible, and is found in the excrements in the state in which it was introduced into the body. This husk, as, indeed, sawdust also, contains a larger proportion of nitrogen than the farina of wheat, and therefore has erroneously been stated to be highly nutritive, and is a good illustration of the fact that the value of different foods cannot be taken upon their chemical qualities alone.

PART II.
THE
PROPER
DIETARIES.

I now proceed to discuss the qualities of different foods, and shall consider, firstly, vegetable; and, secondly, animal foods.

Qualities of
foods.

Vegetable
foods.

1st—*Vegetable Foods.*

Nearly all vegetable foods contain three principal elements, viz., starch and oil (carbonaceous), nitrogen, and salts, and their relative values depend upon the amount of these several substances. Grain and seeds of all kinds are far more nutritive than roots and leaves, but they cannot be used as food exclusively, since the latter contain juices which tend to prevent cutaneous diseases and scurvy.

• *Wheaten Flour.*

Wheaten
flour,
why now
in more
general use
than formerly.

Of all grains wheat is the most useful and economical for work-house dietaries. In this respect great changes have occurred during the present century by the reduction in the price of wheat in relation to that of other grains, and by the practical disuse of grains which under other circumstances were much cheaper than wheat.

Barley, rye, and oats, were the grains in universal use amongst labourers at the end of the last and the early part of the present century, but now the use of wheaten flour is as universal. In certain parts of Scotland and South Wales, and in the south of England, barley is still used by a small proportion of the people; but it is usually mixed with a proportion of wheaten flour. Rye is still grown in Yorkshire and the northern counties in the same field with wheat, or the two grains are mixed and grown together, and called *maslin* and made into bread. It is also used in certain parts of the south-west of England when mixed with wheaten flour, and in many other parts it is added to adulterate brown wheaten bread, or to keep it moist. Oats are still used as food for man in certain parts of Scotland, in the Peak of Derbyshire, and in the north of England. Sometimes the oatmeal is mixed with wheaten flour in making bread, but more commonly it is used alone, and made into thin cakes.

The reasons for this change are sound. Barley and rye, although even now cheaper—and they were relatively much more so at the period referred to—are inferior in nutritive quality, and contain a much larger amount of indigestible matter than wheat. Formerly the difference in cost was far greater than the difference in nutritive value, and then they were cheaper foods; now the difference of cost is so little, whilst that in nutriment remains as before, that they would probably be even dearer than wheat. Oatmeal was also of less monetary value than wheat, and was the cheaper food. It was also said, as indeed it is still affirmed by some chemists, that it was more nutritious than wheat, and on that ground it was again accounted the cheaper food. For some years past, however, the cost of oatmeal has been greater than that of wheaten flour, and the supposed increased nutritive value of the former has been found to be chiefly in the indigestible husk; and hence there are now two good reasons why oatmeal has become dearer than wheat flour.

There are also other reasons for this change which are of a secondary, but yet important character. The flavour of wheaten flour is softer and more agreeable than that of other grains, and is liked by children, women, and men, alike. Bread made from wheaten flour may be agreeably eaten without butter, cheese, or other savoury food, whilst bread made from the other grains can scarcely be eaten alone by young children, and is repelled by women, and even by men. The amount of refuse and indigestible matter is less in wheat than in the other grains, and hence wheaten flour is more readily digested by the old and the sick, and by all whose powers of digestion are feeble. For the same reason it does not act injuriously upon the bowels, whilst all other grains tend to cause purging in young children and females, and in the sick and feeble, and thus carry food from the bowels, which, if allowed to remain, would have been digested and used to the nourishment of the system. Its use thus prevents disease and waste.

PART II.
THE
PROPER
DIETARIES.

Qualities of
foods.
Vegetable
foods.
Wheaten
flour.

Hence there are very good grounds for the use of wheaten flour as the chief vegetable food in our workhouses, and there are equally good grounds for the selection of the quality known as "seconds."

Seconds
flour.

When wheat is ground, the whole may be made into flour, or by passing it over "silks" of various kinds, the bran, the coarse and fine pollards, and the sharps, may be removed, and only the farina of the wheat remain. The former is called brown or batch-flour, or wheat-meal, and the latter fine biscuit flour, and between these qualities are others known as "thirds" or "seconds," according to the quantity of "sharps" remaining in the flour. The bran, pollards, and sharps, are all derived from the husk of the wheat; but it is the bran and part of the pollards only which have been proved to be indigestible, whilst there is reason to believe that the sharps are more or less perfectly digested and aid nutrition.

Different
qualities of
flour.

There has been as great a change in the habits of the people in our day in reference to the use of the so-called qualities of flour, as in reference to the use of other grains than wheat. Brown flour was sold at a lower price than the other qualities of flour until the last few years, the difference being at least twopence per stone between brown and seconds, and fourpence per stone between brown and fine flour; and brown flour was very generally used as a matter of economy. Now the price of brown flour is as high as that of households, and even of fine flour; nay, in certain large towns it is regarded by the bakers as a luxury for the rich, and a fancy price is charged for the bread. The labouring classes have almost universally discarded it, and there seems a tendency to carry this so far as to exclude all but fine flour.

Change in
the habits
of the
people.

The explanation of this is similar to that already given in reference to other grains. Experience has shown that the bran is a kind of husk which does not nourish, and that as brown bread is less agreeable to the palate than white bread, butter, cheese, or other savoury food must be eaten with it. Moreover, brown bread is very apt to produce diarrhoea in children and feeble

Bran.

PART II.
THE
PROPER
DIETARIES.

Qualities of
foods.

Vegetable
foods.

Bran.

persons, and thus become an expensive and probably an injurious food. However agreeable, therefore, brown flour may be in change with white, and however valuable its laxative quality may be to those who eat more food than is required, or who need the daily use of an aperient, the universal experience of the poor has proved that it is not so desirable as white flour for their use. Hence, when its price was less than that of white flour, it is doubtful whether there was economy in its use; but now that it is not less, but probably greater, it is manifest that to use it in workhouses would be to waste funds.

Finest flour.

There is some doubt as to the true economical value of the other kinds of flour. If the quantity of bread which can be made from a given weight of flour be taken as our guide, the finest flours must have the preference, because the fine quality of wheat from which they are always made, the admixture of southern wheat and the exclusion of all but the farina of the wheat, enable them to absorb and retain much water, and thus to increase in weight greatly. This quality, in addition to the very agreeable flavour of fine flour, now induces the wives of working men to prefer it even at the higher price which must be paid for it. On the other hand, the sharps which are found in seconds and thirds flour are richer in nitrogen than the farina, and have therefore in one direction an advantage in nutrition. This, conjoined with the lower price paid for those varieties of flour, render the seconds a more economical food than the finest flour. There is more difficulty in arriving at the true value of "thirds," on account of the large but uncertain quantity of sharps present in it; and it is a quality which is open to much adulteration. On the whole I feel assured that the experience of the poor in this matter is based upon a good foundation, and that in our workhouses, as in the houses of the poor, the most economical quality of flour is good seconds.

Thirds flour.

Review.

On a review of this subject I arrive at the conclusion that wheaten seconds flour should be universally adopted for the food of paupers, whether in or out-door, and considering its high nutritive value with its present low price, it is true economy to allow it to form a very important part of out-door relief, and of workhouse dietary. The admixture of rye should only be allowed in the districts where it is still a part of the labourer's ordinary food, and care should be taken that the price of the mixture of rye and wheat should be regulated accordingly.

Adultera-
tion.

The adulteration of flour, against which precautions should be taken are as follows: 1st, too large an admixture of sharps whereby seconds is rendered thirds. The colour of the flour and of the bread is the ready test, but to render it perfect much experience is necessary. When a small quantity of flour has been well mixed with cold water and strained through very fine muslin, the sharps are left upon the strainer, and may be detected by the eye or by the aid of a good magnifier. The sharps may be distinguished from the farina in a dry state by the aid of the microscope. 2nd, the addition of rye or barley. The colour is also used here as the test,

but probably the best test to those who are well acquainted with the flavour of rye is the taste, and by it this adulteration may be detected in flour of even moderately good colour. 3rd, the addition of sweepings, dust, and other mineral substances. This is detected by dissolving and straining a portion of the flour in the manner just mentioned, and the use of the magnifier. 4th, the most usual one, is the admixture of inferior wheat, or wheat which is not sound, and then the quality of the bread and pudding is the only test.

When oatmeal is mixed with husks, dirt, and very fine sand, the washing test should be used. When this occurs to any considerable extent, the weight on the hand is a good guide to further inquiry. When mixed with barley and rye the detection by the flavour is difficult.

In all these cases the use of the microscope is the readiest course, since the different forms of the starch cell indicate the kind of grain, and the chrystalline characters would point out mineral dust and sand. The knowledge required for its use might be readily obtained from or by the medical officer.

Bread.

There is some difference of opinion as to the economy of baking or of buying bread in the different workhouses. Fourteen pounds of fair seconds flour should produce $19\frac{1}{2}$ lbs. of bread, and it is, therefore, very easy to ascertain whether the additional $4\frac{1}{2}$ lbs. of bread will not more than pay for yeast and firing. It cannot be doubted, I think, that it is more economical to bake the bread than to buy it, and particularly in the smaller workhouses where the labour employed is that of the inmates themselves, and is not specially paid for; and when it is considered how large is the quantity of bread which is consumed during the year, the economy will be seen to be very considerable. There are also other advantages, viz., 1st, when the bread is baked for out-door relief, also, the saving is further increased; 2nd, the effect of the addition of alum and other substances commonly made by bakers with a view to enable the flour to absorb a larger quantity of water, and to give the bread a whiter colour, is avoided; 3rd, the quality may be maintained at a more uniform standard.

When, however, the bread is bought, there are three circumstances which should be noticed in addition to the weight of the bread, viz., 1st, to ascertain if alum has been used. The taste is a ready test if sufficiently cultivated; but the most certain way is to apply the test for alum; 2nd, to notice the degree in which it is baked. As the bread is sold by weight it is the interest of the baker to add as much water as possible to the flour, and to leave as much as possible in the bread; 3rd, to have it delivered on the day after it has been baked. Bread dries rapidly during the day on which it is baked, and it is to the interest of the baker to have it weighed as soon as possible after it has left the oven.

But both on the ground of economy, and to supply the paupers with the cheapest and best food, I strongly urge that the bread

be baked in the workhouse, both for the use of the inmates and for out-door relief.

Qualities of
foods.
Vegetable
foods.
Maize.

Indian Corn.

It is scarcely needful to refer to Indian corn or maize, since it is not the ordinary food of any labourers in England, and as it would not be acceptable to them its use could not be enforced with propriety. It is, however, a highly nutritive substance—more so even than wheat. But its use, even if allowed, would not be convenient, since it cannot be made into loaves, but must be baked daily in thin cakes, or eaten as stirabout, or hasty-pudding, with milk, or sugar, or butter, or some kind of sauce. Hence, with wheaten flour at its present price, and with the great convenience of making flour into loaves, there is no probability of maize, although the cheaper food, being introduced into workhouse dietaries.

Peas.

Peas.

Of all other kinds of dried seeds peas must occupy the first place. They are, indeed, far higher than wheaten flour or oatmeal in nutritive elements, and when perfectly cooked are scarcely inferior in digestibility; but their continued use as a large part of the dietary could not be borne by men without leading to disease, and particularly to skin disease. The same fact has been commonly observed when beans have been given to horses as their ordinary daily food. Their flavour, however, necessarily limits their use, for it is harsh and peculiar, and experience has shown that no people, whatever their poverty, are willing to eat them constantly. Hence they are fitter to be adjuncts to a dietary rather than an important part of it, and with wheaten flour abundant and cheap, this is the less to be regretted. They are more readily eaten in the winter than in the summer season, and may then be used twice a week with advantage; but in the hot season their flavour is more repulsive, and the necessity for their use less. At present their sole use in workhouses is in the preparation of soup, but in the winter season they could be prepared alone as vegetables with meat, and particularly after they had been boiled in bacon or pork liquor, and when bacon or pork is supplied.

Pea-shells.

As the shell is indigestible and causes loss of other food by producing relaxation of the bowels, only *split* peas should be purchased, and, indeed, this should be made an essential condition in sanctioning their use. Whole peas at a lower price are dearer food than split peas at a higher price. It is possible in home cookery to sieve out the shells after the farina has been dissolved, but when meat has been added, and when the cooking is less carefully performed, as in a workhouse, this cannot be effected.

Best kind of
peas to be
preferred.

The flavour of peas being always somewhat repulsive, and yet varying much with the quality of the sample, it may fairly be expected that the best peas, whether white, grey, or split, shall be procured, and not the lowest quality, which the lowest tender would probably bring.

The beans of the continent of Europe, with the millet and pulse of Asia and Africa, are of nearly equal value as nutrients with peas, and some are far more agreeable to the palate, but whilst they are cheap and familiarly known in the several localities referred to, they are dear and unknown here, and cannot, I think, compete with peas in workhouse dietaries, and in a country where both bread and potatoes are good and attainable.

PART II.
THE
PROPER
DIETARIES.
—
Qualities of
foods.
Vegetable
foods.
Beans.

Pearl and Scotch Barley are agreeable and valuable foods. They are, however, dearer and of less nutritive value than peas, and are not likely to supplant them; but their use in change with peas would be very agreeable to the inmates of workhouses. Whenever, moreover, milk is given in porridge, or used in rice-pudding, Scotch barley might be added in change of bread or rice with advantage.

Barley.

Rice is inferior to all the foregoing in nutritive value, and at the price which is charged for it in this country it is dearer than any of them. It is, moreover, insipid in flavour, and is rejected as a frequent article of diet, unless spice or sapid food be given with it. There is much more difference in the flavour and price of different kinds of rice than in their nutritive value, and for workhouse dietaries the lower priced and slightly coloured rice should be selected. In the absence of fresh vegetables rice might occasionally be eaten with meat, but the use of bread or peas would be more economical.

Rice.

Sago, tapioca, and arrowroot are used exclusively for the sick. As they are composed almost entirely of starch there is reason to believe that they are imperfectly digested and assimilated when cooked with water only. When used they should be cooked with milk or beef tea; but in nutritive value, even for young children, they are far inferior to wheaten flour, and incomparably less economical. Their use should be kept within the narrowest limits.

Sago, &c.

Fresh Vegetables.

Of all kinds of fresh vegetables none can compare in general utility with the potato. The flavour is agreeable, and by repeated use it never disgusts; it is readily cooked, and can be obtained in good condition nearly all the year round; it is the most nutritive of its class, and it can be eaten without injury by persons of all ages. The cost has increased of late years, whilst that of wheaten flour has been reduced, and at the present time, when its cost and nutriment are considered together, it is more than twice as dear as bread. When, however, it is grown on the workhouse land, and with the labour of the inmates, its cost is very small, and it may then be strictly an economical food.

Fresh
vegetables.
Potato,

It has already been stated that fresh vegetables in some form are necessary to good nutrition, and consequently, if the potato were dearer than other food, it would be false economy to withhold it when it could be obtained; but at the season of the year when it is scarce, and not good, it would be economical to supplant it in

its true
value.

PART II.
THE
PROPER
DIETARIES.

Qualities of
foods.
Vegetable
foods.

chief part by bread, and in other part by other vegetables. When potato is bought, as in towns, its use might and should, on grounds of economy, at all seasons be restricted within narrower limits than at present, and the deficiency made good by bread; for in no case is it needful to give 1 lb. or even $\frac{3}{4}$ lb. of potato daily. The present plan of giving a large quantity of potato in workhouse and other dietaries was established thirty years ago, before the occurrence of the potato disease, when the cost of potato was scarcely half of the present price, and when flour was one-fourth higher in price than at present.

Advantages
of garden
land.

The chief advantages of having land to the extent of several acres under cultivation in connexion with a country workhouse are firstly, that it affords both healthful and profitable occupation for the inmates, and is a good industrial training for boys; secondly, that it may yield an abundant supply of various kinds of garden vegetables for the use of the inmates. Many workhouses grow their whole supply of potato on their own land, in addition to a certain quantity of green vegetables, but some, on grounds of apparent economy, use a large portion of their land for the growth of grain, which is either sold or ground for use, whilst their crop of vegetables is insignificant. This I think false economy, and it would be much better that all the land should be devoted to the growth of potato and green vegetables, so that an abundant supply of both may be afforded at all seasons of the year. The more abundant use of carrots, turnips, cabbage, greens, &c., would give great pleasure to the inmates, and greatly improve their health, and they should be given in their season *sometimes in addition to* and in *lieu of a part* of the potato, as well as in *lieu of* the whole potato when that vegetable is not good. I have found leeks and potherbs so deficient as to excite complaint on the part of the inmates, whilst the land was devoted to the growth of oats. In none have I seen so large a growth of green vegetables as would supplant an important part of the potato in the dietary.

The necessity of an abundant supply of fresh vegetables is especially urgent in workhouses on account of the frequency with which boiled meat, broth, and soup are given, since they add flavour to the meat (which being boiled loses much of its own flavour), and the meat liquor, and do much to correct the evil tendency of the salt which is so largely contained in the salted meat and broth.

Tea.

Tea.—Tea and coffee differ from other foods in offering scarcely any nutriment, but by their stimulating property they promote the digestion and transformation of food. They are, therefore, very useful to the old and the feeble, provided there be also a sufficient amount of food taken. In the selection of tea a sample which contains much stalk should be avoided, and one consisting of moderately sized leaves preferred. The value of teas in the market depends chiefly upon their flavour, but the value of all pure teas, in reference to their action, is much the same, and, therefore, for a workhouse dietary the lower priced congou should be preferred, provided it be pure and free from stalks. Coffee should be bought

in the berry, and ground as it may be required for use. The admixture of one-fifth part of good chicory is quite proper. There are certain differences in the action of tea and coffee, by which the former is more fitted for the afternoon meal and the latter for breakfast.

PART II.
THE
PROPER
DIETARIES.
Qualities of
foods.

Cocoa.—Cocoa, in addition to the property which belongs to tea and coffee, contains also an appreciable amount of nutriment, since it is composed of half of its weight of fat or oil. Moreover, it is less exciting, and causes less irritation of the stomach than tea, and for many persons, and particularly for the sick, it is to be preferred. Regarded as a food, however, it is doubtless a very dear one; and in order to increase its value in nutrition it should be prepared with milk. Prepared cocoa should be used in preference to the cocoa nibs, and a smaller quantity will be necessary when milk is used.

2nd.—Animal Food.

Flesh.—It is necessary to divide all kinds of flesh into two parts—viz, the lean and the fat, since the nutritive qualities of the two substances differ greatly, and the value of the meat depends in great part upon their relative properties. The lean contains nitrogen, and therefore by its nutritive properties repairs the structures of the body, or, as the case may be, promotes growth; whilst fat is burnt within the body, and produces heat, or is mixed with the fluid of the body as oil, or is laid up in different parts as fat.

Animal
food.
Flesh.

The fat and lean respectively are in their nature and properties the same in all kinds of flesh, and, speaking generally, the comparison in a nutritive point of view between the flesh of different animals is simply between the relative quantities of fat and lean. There are other differences, however, which have a certain value, as, for example, flavour, strength, and digestibility.

Fat and
lean

All kinds of flesh vary according to the breeding and feeding of the animal. The quality of meat is determined by its flavour and tenderness. The flavour depends upon the feeding, since with plenty of good food the blood and juices of the flesh become more abundant, and the peculiar substance upon which the flavour depends, viz, ozmazome, is also more abundant. The tenderness depends chiefly upon age, but is also increased by good feeding. These two qualities have the further advantage of exciting the appetite and the relish for food, at the same time that they render the food more digestible. Hence they have much value; but, on the other hand, meat which contains a less quantity of blood and juices and which is less tender, contains a larger proportion of solid nutritive matter, and if digested would be more nutritious. In these respects the well-fed Southdown mutton, and the flesh of the hardy Welsh and Scotch mountain sheep, offer a good contrast.

Quality.

But in selecting meat for the inmates of a workhouse, it is true economy to obtain that of well-fed animals on the ground of flavour, but particularly of digestibility, since a larger proportion of it will be masticated by the old people and be converted into nourishment by

Proper
selection.

PART II.
THE
PROPER
DIETARIES.
Qualities of
foods.
Animal
foods.

all. The parts of an animal to be selected should not be the choice ones, since the demand for those by the rich gives them a value far higher than the nutriment which they can afford will warrant. Neither should they be altogether the most inferior, since such contain an undue proportion of bone or of fat, or being loose and tough in texture are not easily masticated or digested. The aim should be to obtain the leaner joints of well-fed animals (yet having a moderate proportion of fat), and such as are solid in texture.

Joints.

Some difference of opinion may reasonably exist as to the propriety of buying the joints with or without bone. It is economical to have bones to aid in the preparation of soup. If the butcher take the bones out he charges an increased price for the meat, whilst if he be allowed to send meat with bone, he naturally prefers to send those parts which contain the most bone, and even, as I have seen, to add additional bones. The only check is the efficiency and attention of the master, and as those qualities are not universally found, the wiser course is probably to select the joints to be supplied, to have them without bone, and to buy a certain quantity of bones at a proper price separately. It is necessary to add that the nutritive value of a joint varies with the amount of bone which it contains, and that it is calculated upon the flesh only.

Offal.

The "offal" of animals is also variously regarded in its fitness for workhouse dietaries. There can be no doubt that at the price usually paid for it it is the cheapest part of the animal in relation to nutriment, but yet it is not in general well adapted to this purpose. The head can only be used in making soup, and whilst ox-heads are particularly fitted for this purpose, sheep's heads are deficient in flavour and colour, so that they do not give taste or character to the soup, neither can the flesh be readily recognized in it. When, however, sheep's heads or pigs' heads are used for this purpose, it is well to make broth, and not soup, to thicken it very slightly only, to flavour it well with parsley, pepper, and salt, and to cut the meat into comparatively large portions, so that it may be recognized, and to give a good supply of bread with it. Liver and lungs (called lights) add little to broth or soup during cooking, and are therefore quite unfitted for the purpose, and if used should be fried, and some kind of fat or bacon should be fried with them. Pigs' fry, and, indeed, the fry of sheep and oxen, including the liver and lungs, kidneys and heart, when free from disease, and properly prepared, is an agreeable and nutritive dish and is probably the most economical kind of flesh which could be supplied. When it is used, care should be taken to remove all the glands from the lungs, and to cut the liver into thin slices and fry it well.

Beef

Beef has several advantages over every other kind of flesh :

- 1st. It is regarded as the strongest kind of flesh, and this due in part to the large amount of ozmazome which it contains, and by which beef-tea is rendered so much superior to mutton broth. This is no doubt both a popular and a

correct view, and the ozmazome, if not directly converted into nutriment, aids indirectly by stimulating the appetite and other vital actions. In this respect the better the flavour the better the food. The idea of "strength" also involves the following:

PART II.
THE
PROPER
DIETARIES.
Qualities of
foods.
Animal
foods.
Flesh.

- 2nd. It offers a large proportion of lean to fat, so that in a given weight there is a larger quantity of nitrogen than is found in some other kinds of flesh. There are also many joints which are almost entirely lean, and are therefore particularly fitted for the purpose in hand.
- 3rd. The relative price of beef and other kind of flesh, considered in relation to the nourishment afforded by it, renders beef the most economical. In addition to these advantages it is equal to any other and superior to some kinds of flesh in digestibility.

The parts to be selected are the round, thick flank, brisket, and sticking-piece on the one hand, and legs, shins, and heads of beef on the other; and I have placed them in their true order of value. The round is fine, solid meat, with much flavour, and with only one bone; the thick-flank is looser in texture, without bone, and yet of good flavour; the brisket contains a large proportion of fat and bone; and the sticking-piece is lean and loose, less agreeable in flavour and less digestible.

The legs and shins and heads of beef should always be bought apart, since they contain from 30 to 50 per cent. of bone, whilst the bone in even the brisket and sticking-piece does not or should not exceed 10 per cent. Of the four parts just mentioned the two first should form half of the weekly supply. The three latter, and particularly the last, should be used exclusively as soup meat.

Mutton has a more delicate flavour, and is said to be more digestible than beef, and hence it is specially fitted for the use of the sick. The broth which is obtained when the meat has been boiled in water has also a delicate flavour, and is also much used by the sick. It is inferior to beef in nutritive value, because it contains a large proportion of fat; but this relation differs much—the proportion of fat being the least in Scotch and Welsh mutton, and the greatest in Leicestershire mutton. The kind which is supplied depends much upon that which is fed in the neighbourhood, but as fat mutton is not so saleable as moderately lean mutton, the butcher is apt to send the former in preference to the latter.

The best joint both in nutriment and economy is undoubtedly the leg, on account of the thickness of the solid flesh, and the small proportion of fat and bone, although its price is higher than that of any other part. The next is the shoulder and neck, the former being inferior to the leg in the looseness of its texture, and the latter in the larger proportion of fat and bone. The neck is the least economical part, even at the lower price paid for it, and should be used in workhouses only when broth is needed.

It is to be regretted that mutton is not more largely supplied to the inmates of workhouses, since it offers a most agreeable

should be
more gene-
rally used.

**PART II.
THE
PROPER
DIETARIES.**

**Qualities of
foods.**

**Animal
foods.**

Pork.

change of meat both when hot and cold. When the practice is more general of providing roasted meat, it will no doubt be preferred to beef.

Pork is the flesh in ordinary use amongst labourers in certain counties, and there it is used also in workhouses, but otherwise the inmates obtain it only when a pig is killed which had been fed upon the premises. When the whole pig is used as pork it contains a larger proportion of fat to the lean than is found even in mutton, and hence it occupies a lower position in the scale of nutrition. When the lean parts are cut from the fat the proportion of bone to meat is very large. It is also less digestible than either mutton or beef, probably because it is less easily masticated; but its flavour is agreeable, and as a change of food it is not undesirable. When fresh it should be roasted, but when it has been pickled it must be boiled, and in these respects it resembles beef.

Joints of.

The most economical joint when the whole pig is used is the leg, and for the reasons assigned when speaking of mutton, but it is probably the least masticable and digestible part. This may be used either fresh and roasted, or salted and boiled. The loin and neck are far less economical, but they are fuller of flavour, and are especially adapted for roasting. The shoulder-piece and belly parts should almost always be pickled and boiled, and, next to the leg, are economical at the price charged for them. I have already spoken of the head and fry.

Bacon.

Bacon being the fat part of the pig which is left after the lean flesh has been cut away, is necessarily low in nutritive value, but this deficiency is greater or less as the ham and the shoulder have been also removed. Its use is, however, very general in almost every part of the kingdom, and is due to its agreeable flavour and the convenience of having dried flesh in the house. In workhouses, however, its use is most properly very restricted, and is almost entirely confined to that which has been fed and prepared in the house.

Whilst, therefore, in ordinary life it is a most agreeable food, and in many parts of the country is almost the only kind of flesh which is obtained, its general use in workhouses cannot be commended.

Bones.

The nutritive value of bones has been greatly understated, in consequence of a misapprehension which has long existed as to the results of two Commissions of Inquiry which were instituted in France and Belgium. It was then proved that animals cannot live upon cooked bones alone; but it was not shown, as has been inferred, that bones are not valuable as a part of a dietary. When reporting to the Privy Council upon the dietary of the Lancashire operatives, I had special analyses made of the nutritive material which was extracted from bones, and the result showed that bones were equal in nutriment to about one-third of their weight of flesh in carbon, and one-seventh in nitrogen, and at the relative prices of bones and flesh the use of the former rendered the dietary more economical.

Hence, when fresh bones can be purchased at 1*d.* to 1½*d.* per lb., and sold again after cooking at ½*d.* per lb., their use is much to be commended, and a certain proportion should be obtained weekly. They can be used only in the preparation of soup or hash, and can be cooked only by boiling.

PART II.
THE
PROPER
DIETARIES,
—
Qualities of
foods.
Animal
foods.
Fish.

Fish.—Fish is not used extensively by the labouring classes in any part of my district, and its nutritive value is far below that of meat. As a change of food, when fresh herrings are plentiful and cheap, they may be used occasionally instead of meat with advantage, and permission to the master might be accorded for that purpose. At the price at which fresh herrings are frequently sold, more nutriment is supplied by them in proportion to cost than by any other food, but as the flavour is not universally liked, as fish is not easily digestible by many, and as in some cases it is apt to induce diarrhœa, its general consumption in my district is not to be commended.

Milk.—Milk contains within itself all the elements of nutrition which are needful to sustain life, and as they are arranged in due proportion and together constitute a most digestible combination, it is probably the most important food which has been placed at the service of man. Its use to the exclusion of every other food in infancy is familiar to us, but even in adult life there are many communities—as the peasants occupying the higher mountains of Sweden, the Tyrol, and Switzerland, who live almost exclusively upon it.

Its counterpart is meat, and as meat is readily obtainable in the country, the use of milk may be limited as an exclusive food to infancy; but after that period it should still form a portion of every dietary.

There is a closer resemblance in nutritive qualities between new milk, skim milk, and butter-milk than is ordinarily understood. Skimmed milk differs from new milk in having lost the butter (about ½ oz. in each pint); and, as butter is a fat, it may be readily replaced by another fat, as suet, when the skimmed milk is boiled or made into a pudding. Skimmed milk is, however, cheaper than new milk, since the price of the butter which has been removed being greater than that of other fats, it more than covers the cost of any fat which may be used to supply its place. Butter-milk differs from skimmed milk only in being older and having had a part of its sugar* transformed into acid. In nutritive qualities the two are practically the same; and instead of butter-milk being so greatly inferior to skimmed milk as is commonly understood, there are conditions in which it is the better food, as, for example, on the one hand in Devonshire, where all the butter is extracted from the skimmed milk by the aid of heat; and in Wales and other places, where, on the other hand, small lumps of butter are left in the butter-milk after the churning.

Except in a few localities, where new milk is plentiful and cheap, it is not economical to buy it for a workhouse; but skimmed milk

* There is about ½ oz. of sugar in each pint of new milk.

**PART II.
THE
PROPER
DIETARIES.**

**Qualities of
foods.**

**Animal
foods.
Milk.**

should be purchased universally, and suet added in its preparation in the proportion of $\frac{1}{4}$ oz. to each pint. Butter-milk has the two great disadvantages as a part of a dietary, viz., that its supply cannot be regular, and, from the amount of acid which it contains, it curdles when boiled. It may, however, be drank cold, and be a most useful and grateful addition to a dietary in warm weather. Every workhouse should obtain a supply in the summer season, and give it in addition to the usual dietary, or in substitution of the gruel to such as prefer it.

**Supply
deficient.**

There can be no doubt that the deficient supply of milk in some of its forms is one of the most prominent evils in the present system of Poor Law dietaries.

Whey.

It may be well to add a word in reference to whey, although it could not be included as an essential part of a dietary. It has lost both the butter and the cheese of the milk, and is therefore very far inferior to any other form of milk; but even in its poorest state it retains all the salts of the milk, which, together with acid, are of very great value in nutrition, and are excellent preventatives of scurvy. There are, however, many places where an appreciable quantity of butter is left in the whey, so that with the thrifty habits of Welshmen, it is common in farm-houses to prepare an inferior kind of butter for domestic use from it.

**Farmers un-
willing to
sell skim
milk and
butter-milk.**

It is to be regretted that for various personal reasons farmers in many dairy districts are unwilling to sell either skimmed milk or butter-milk; but prefer the readier plan of feeding hounds and pigs with it. If its great value in nutriment, although little value in money, were well understood, it is probable that the guardians, who in country unions are chiefly farmers, would be willing to make an arrangement, at least occasionally, to confer the great advantage now sought upon the poor who are placed under their supervision.

There are, however, districts where milk is not attainable even by the farmers themselves, and there the poor must suffer want.

**Adultera-
tions.**

The adulterations of milk at the present time are chiefly with water; and this may be determined by means of a hydrometer, which shows at a glance the specific gravity of the fluid. If we take skimmed milk as the form of milk most frequently used in workhouses, Dr. Hassall found that when pure its specific gravity is about 1031; when 10 per cent. of water is added it is 1027; with 20 per cent., 1025; with 30 per cent., 1021; and with 50 per cent., 1016. As there is some variation in the quality of milk according to the cow, the food, and the period of the day when the cow was milked, it is not possible to apply this rule with great exactness; but when 10 per cent. of water has been added, the test should show the adulteration.

New milk is lessened in value by the removal of a portion of the cream and by the addition of water. The former is determined by the aid of an instrument called a galactometer. The latter is

more difficult, since the specific gravity of cream being lighter than that of milk, the more cream in the milk the lower the specific gravity.

The colour and the flavour of both new and skimmed milk are, however, good and ready guides of quality by one who is competent to judge.

Cheese.—Cheese is both an important food and an important part of the dietary in some counties in England and Wales.

The essential element, and that which constitutes its bulk, is the casein, or cheese of the milk; and it is, therefore, the richest of all the foods in nitrogen; but, in addition, it always contains some butter from the milk and some salts from the whey which remain in it. The amount of salts is necessarily small; but that of butter depends upon whether it has been made from new or skimmed milk, and when made from new and rich milk it contains much butter and less cheese in a given weight. At the best it is therefore a food which cannot alone sustain life and strength, and when it is poor in fat and rich in nitrogen, it is not only called poor cheese, and is sold at a low price, but it is almost entirely a food of one element only.

The digestibility of cheese varies with its quality and age as well as with the power of digestion of those who eat it. When it contains much fat it is more digestible, and therefore new milk cheese is more digestible than skimmed-milk cheese. When new it is tough, and is masticated with much difficulty; and when old it is often decayed and rancid, and is liable to cause indigestion. Hence, neither poor cheese, nor cheese which is very new or very old, is an economical food; neither is very good cheese economical at the high price which is paid for it; but that kind is economical which is made really good, which contains a moderate quantity of butter, and is neither new nor old. It is false economy which provides at any price poor, hard, tough, and rancid cheese, since cheese is itself difficult of digestion and tends to produce indigestion, although it is exceedingly rich in one of the principal elements of nutrition. It cannot enter largely into a workhouse dietary except in those unions where it is largely used by labourers out of the workhouse; but in the latter case it may fairly be used as freely within as without the workhouse. There is, however, a property about cheese which has been known in all ages, and is quoted as a familiar truth by Shakespeare, viz., that it promotes the digestion of other food, which renders it a useful addition to every dietary supplying bread or flour largely; but in such case it should be given in very small quantities, as for example, $\frac{1}{2}$ oz. at a time, and withheld from those on whom it acts injuriously upon the stomach.

Eggs.—Eggs do not and cannot enter into the ordinary diet of the inmates of a workhouse, but are restricted to the sick dietaries. They are inferior to milk and meat, with which they are allied in nutritive elements, since they consist chiefly of one element only (albumen); but they also possess some oil in the yolk, and various valuable salts. When milk is dear and eggs are cheap, the latter become one of the most economical articles of food. They

are easily digested, provided they are cooked in puddings, or lightly boiled and eaten with bread or other mixed foods; but when they are hard-boiled, and eaten without due mastication, they are digested with much difficulty. The eggs of seagulls are large, cheap, and economical when readily obtained.

Butter.—Butter is now allowed as a food to the aged and the sick in nearly all workhouses. It is the dearest form in which fat can be given, when its price is compared with its nutritive qualities; but as its consistence enables it to be readily spread upon bread without being rapidly absorbed, and its flavour is more agreeable than that of any other fat, it is necessary to allow its use. It is for the reasons given particularly liable to adulteration, and chiefly by the addition of water, salt, and lower priced fats. There must always be a certain proportion of water mixed up with it, but it should not exceed $\frac{1}{2}$ oz. in the pound, whereas it frequently amounts in fresh butter to $1\frac{1}{2}$ oz. This is ascertained by cutting up a pound of butter into very small portions, and heating it in a slow oven until its temperature is as high, or a little higher, than that of boiling water (212°), and occasionally stirring it; the greater part of the water will thus be driven off, and if care have been taken to prevent waste, the difference in weight will show whether any excess of water has been present.

Salt butter.

Salt is added to fresh butter, and much more to salt butter, in quantities varying from $\frac{1}{4}$ oz. to 2 oz. in the pound. It is detected, and the quantity ascertained, by washing the butter well and working it up thoroughly in different quantities of water, until the greater part of the salt has been extracted. If the water containing the salt be placed in a slow oven, it will evaporate and leave the salt, which may be weighed; and if the butter which is left be heated as above mentioned, the loss of weight from the original quantity will show the amount both of salt and water which it contained. These tests are sufficiently perfect, in a practical point of view, and may be readily and should be from time to time applied.

Adultera-
tion.

The mixture of other fats—as inferior qualities of butter, lard, and mutton fat—can be determined only by the flavour, and therefore the test is very imperfect. The importance of these adulterations is very evident in an economical point of view, for water and salt may be reckoned as without value, and mutton fat at only 4d. to 5d. per lb.; whilst they will be charged as salt butter at 10d. to 1s. per lb.

The proper course is to select the best quality of salt butter in the firkin, since it will contain less water, and probably less of inferior fats than other kinds, and as the difference in price is still considerable between it and fresh butter, it is much the more economical. As a matter of economy it is to be desired that lard and cold fat mutton should be supplied instead of butter to such of the inmates as prefer them, but as they could not be substituted at all times, there would be a difficulty in making them an integral part of a workhouse dietary.

Suet.—Suet is largely used, and is a most valuable form of fat.

Mutton suet is cheaper than beef suet, and is therefore the kind which is commonly contracted for; but in its flavour, and its power to render flour pudding light, is far inferior to beef suet. Whenever it is practicable, beef suet should be obtained for suet pudding, and particularly when sauce is not provided with the pudding. In point of nutriment there is no material difference, and therefore at the price charged for them mutton suet is much the more economical of the two. Suet should be used much more generally than at present in making rice and other such puddings, and, if beef suet be used, in making gruel and porridge also.

PART II.
THE
PROPER
DIETARIES.
Qualities of
Foods.
Animal
foods.
Suet.

Dripping.—Dripping is the cheapest and best of all kinds of fat, except mutton fat; but it is rarely used in workhouses. When, however, meat shall be more frequently cooked by roasting, or when it is desirable to skim off some portions of the fat from the meat liquor (which, however, in the interest of the inmates must be very rare), it will be more generally obtainable, and could be advantageously used in exchange with suet in puddings and with butter on bread.

3. *Special Requirements of each Class of Inmates.*

There are several classes of inmates in workhouses, each of which has special wants, and for whom a special dietary is needed. They are—1. Children of various ages; 2. Able-bodied adults; 3. Aged and infirm; 4. Sick; 5. Lying-in women; 6. Vagrants.

1.—*Children and Youths.*

It is a matter both of public policy and of local advantage, that children should be so fed that whilst they shall not acquire tastes which cannot be gratified in after life, they shall grow up strong and healthy, and be able to serve their employers and gain a living. If they should be of feeble health and imperfectly developed, they may procreate children of inferior health, and both they and theirs are likely to come to the workhouse to be maintained at the public expense. Moreover, so far as quality of mind (as indicated by intelligence and enterprise) is associated with defective bodily power (and this in the poor is far more general than has been recognized), they will also continue to occupy an inferior position even amongst their fellows, be inferior workmen and citizens, and be less influenced by the educational efforts which the State and private organizations are so widely making. An abundant supply of food to the young is essential to their health, strength, and growth, and is consistent with the soundest economy. Its measure can scarcely be less than the sense of want felt by the child, and as children differ much in their desire for food, it would be well if the supply of the good and cheap bread of our time could be almost unlimited except to the few who are manifestly wasteful.

An infant under 6 to 12 months of age has its power of digestion limited, so that it cannot digest flour, arrowroot, or other foods containing starch; but can digest fat, which is the strongest form of the same kind of food. Nature has provided milk alone for this period of life, and no other food whatever can efficiently supply the wants of

the child. The mess of water, bread and sugar, or the more refined and expensive preparation of arrowroot and water, which are often supplied in workhouses, are quite insufficient to maintain health. The mother's milk, when good and abundant, is all that is needed; and when otherwise, or in its absence, cow's new milk, with its fat (carbon), cheese (nitrogen), and salts, is required in quantity equal to that which a mother usually supplies, viz, 2 to 3 pints daily.

From 9 to 12 months of age, and during childhood, the power to digest bread and similar foods exists, and rice-pudding, bread-pudding, and oatmeal porridge, or other foods made with milk, are proper, as are also soups, broth and bread, and fresh vegetables.

It may be questioned at what age it becomes needful to give meat, and whether under 5 years it may be altogether dispensed with. The answer depends upon the amount of milk and fat which are supplied in a dietary without meat. If two pints of milk be given with pudding, bread, vegetables and butter (or other fat) in sufficient quantity, it is probable that meat is not necessary; but when, as in workhouses, but a little skimmed milk is given—perhaps only $\frac{1}{2}$ pint daily—and no fat is added to the porridge or rice-pudding, it is certain that some portions of meat should be supplied.

At a later period of childhood milk is still necessary, and meat must be added; but the quantity of the latter at a meal should not be large. Whenever the quantity of milk is deficient, that of meat should be increased, and, in addition, plenty of fresh vegetables and butter-milk or whey are required to provide the quantity of salts which is needful to enable the body to be nourished by the other food.

At what period the diet of a youth should correspond in quantity and quality with that of a man is open to question, and may vary from 12 to 15 years, but it can never be at so early an age as 9 years—the period at which the adult dietaries commence in some workhouses. During the whole of this period of youth an abundant supply of bread should be given, in addition to moderate portions of milk and meat. Bread is then well digested, and the large quantity of both nitrogenous and carbonaceous food which it supplies is demanded by the rapid growth in weight and size of body which should then occur, and which is limited to that period of life.

It is not, perhaps, well appreciated that up to adult life each period is devoted to a particular part of growth, and if from any cause the growth does not then occur, the evil is irremediable. Hence the great responsibility of those who have the power to withhold or to supply food in childhood and youth.

2.—*Able-bodied Adults.*

Able-bodied
adults.

If the term "able-bodied" were well defined, there would be no difficulty in dealing with this class; but in practice it is found that many are included who labour under some defect of body or weakness of mind, or are pregnant and await their confinement; so

that if there be six able-bodied men or women in a workhouse not more than two probably are capable of performing a day's work. There can be no doubt that for truly able-bodied men and women the principle which has guided the administration of the Poor Law from the beginning is the correct one, and that the dietary should deter rather than entice them. The aim in such cases should be not to injure their health and strength, but to provide them with the plainest food, and with simply enough of it. Bread is the type of the food required, and it should be supplemented with cheese, and such hot foods as are really necessary. In this respect the system actually in operation in many of our workhouses is, I think, most erroneous.

PART II.
THE
PROPER
DIETARIES.

Requirements of
inmates.
Able-bodied
adults.

There is an assumption that an "able-bodied" inmate requires more food, and much of it of a better quality than the next class to which I shall refer—the aged and infirm; and if the able-bodied were at the same time required to perform a hard day's work there might be much truth in it, but when little or no work is exacted they do not require more food, and being well and healthy, they can more readily digest plain and rough food. I therefore affirm that such persons do not need so good a diet as is required by the infirm, and if they require more food, it is only of the plain and less expensive kind. When the able-bodied obtain not only more bread, but more meat than others, an error is committed, and misapprehension of their wants exists. For such persons bread in large quantities, with cheese, gruel, and soup, is all that should be afforded; and for the limited period during which they remain, or should remain in the workhouse, their wants will be sufficiently supplied. Some further indulgence may be extended to women.

Such persons as pregnant women, imbeciles, lunatics, and others labouring under some defect which renders them unable to perform a full day's labour, must for the purpose of dietary be treated in an exceptional manner.

3.—*Aged and Infirm.*

This class is not so well defined as might be supposed, since it includes persons of great disparity in age, vital powers, and physical wants. The only principle, however, which can be adopted is the following, viz., that since the appetite and digestion being impaired, the power to maintain heat of body lessened, the body having ceased to grow, and exertion being reduced to a small amount, the food supplied should be moderate in quantity, very digestible, sapid in flavour, and administered when hot; and as these persons are for the most part fit objects of charity, comforts may be properly added.

Aged and
Infirm.

Hence meat, soups, broth, and hash made from meat, with potatoes and other cooked vegetables, should be sufficiently supplied; whilst bread and cheese should be more restricted in quantity. Puddings, in which milk is largely used, and the luxuries of tea, butter, and sugar, should be permitted.

**PART II.
THE
PROPER
DIETARIES.**

Requirements of
inmates.

Aged and
infirm.

The period when tea should be allowed has been fixed arbitrarily at an advanced age, and I question whether it might not be anticipated with propriety and commence at 55 or 60 years of age for those who are infirm and likely to remain permanent inmates. The use of tea is to promote the digestion of other foods, and is therefore required nearly as much at these ages as at 70 years of age; and if it be given without regard to mere utility, I think that a permanently infirm person is as much entitled to such comforts as one more advanced in life. It is, however, questionable whether it is wise to give it twice a day, and particularly to men who have been accustomed to a milk breakfast through the greater part of their lives. If the use of tea were to be extended to those less advanced in life, than at present prevails, it should be given in the afternoon only, and the breakfast should consist of more nutritive food.

The dietary of lunatics, imbeciles, and idiots should be placed under this head, for, in accordance with universal opinion, the wants of the system in these demand an abundant supply of food, and particularly of milk and meat.

4. *Lying-in and Suckling Women.*

Lying-in
and suck-
ling women.

The wants of women awaiting their confinement are chiefly those of the aged and infirm.

After confinement it is the practice to give only fluid food for a period varying from three to seven days, but the views of the medical profession upon this matter have recently changed, and it is probable that in ordinary cases low diet should not be extended beyond the second or third day. When the duties of suckling have commenced, there can be no doubt that much food is required, so that the mother shall not be impoverished whilst she affords a supply of good milk to the child. The absence of this amount lessens the supply and lowers the quality of the milk, and thus the evil is carried from the mother to the child, and, if not corrected, must reduce the mother and render the child puny and unhealthy. No special arrangement of food is required, but none is more suitable than that which she has to supply, viz., milk, on account of its nutritive and easily digestible character. To this should be added the usual food of the aged and infirm.

There is much difference of opinion as to the necessity for beer in such cases, with a view to increase the quantity of milk; but when good food is given in proper quantity, and is duly digested, the body requires no further stimulant.

5. *The Sick.*

The sick.

It is not possible to indicate the wants of the sick otherwise than in general terms, since they vary with each case, and the medical officer alone can direct their supply. It is, however, more convenient to have a general arrangement of such dietaries, so that the foods may be kept ready prepared, and to make additions of special foods as may be necessary, rather than leave the greater part of them to the discretion and convenience of the matron. Such

an one would be the low, medium, and high diets, each being in its turn subdivided.

PART II.
THE
PROPER
DIETARIES.

Requirements of
inmates.
Vagrants.

6. *Vagrants.*

It is very difficult to indicate the wants of vagrants, since that class is for the most part composed of beggars who obtain an uncertain, yet often a very abundant, supply of food away from the workhouse. But there are others whose wants are undoubtedly urgent. The only principle consistent with public policy upon which the dietary can be framed is that of giving no more food than at the time will satisfy the cravings of hunger and prevent disease, committing to the master or relieving officer the power to add to it in exceptional cases. Hence, bread alone, or with a little cheese, broth, or gruel, is all that the night's wants require; but when the weather is cold, and particularly when rainy, and the clothes of the vagrant are wet, some hot food should certainly be given. There is, however, no necessity to give more than a pint of such fluid, neither is it required to give milk in ordinary cases.

The wants of the body require that food should be given both at night and in the morning, and when task work is provided, the whole or part of the morning's supply of food should be given before it is commenced. To give food at night only, if only enough for one meal, is to tempt the vagrant to steal, so as to obtain his breakfast, and to require him to perform three or four hours' work before taking his breakfast is little less than cruelty.

Difference of the Two Sexes.

It now remains to form an estimate of the relative wants of the two sexes, and the present one is not, I think, satisfactory. When we consider the case of the hard-working labourer and his wife, we may reasonably infer that the former, by exertion, and particularly by labour in the open air, requires much more food than the latter when engaged in her household duties, and in such instances a diminution of one-quarter, or even of one-third, might be proper for the woman. But such does not hold good when both are engaged in quiet in-door occupation, or when they are inmates of a workhouse performing little or no work. In such cases, the only ground for difference in the quantity of food to be given is that of weight of body (apart, however, from the weight of the bones), and if the food given to the man be only the quantity which he needs, the deduction for the woman should not exceed one-fifth or one-sixth.

The two
sexes.

4. *The ordinary Food of the Labouring Classes.*

Before proceeding to the construction of workhouse dietaries, it will be convenient to show the kind and quality of food which is used by the labouring classes in my district, and for this purpose my report to the Privy Council on "the Dietary of Low-fed Populations," will afford sufficient information.

Food of the
labouring
classes in
Cambridge-
shire, Lin-
colnshire,
Notting-
hamshire,
and York-
shire.

It is usually necessary for this purpose to divide the population into town and country, since in reference to London and a few of the larger towns, the conditions of life are quite different from those in country hamlets, and a different selection of food for the two localities would be necessary. In my district,

PART II.
THE
PROPER
DIETARIES.

Food of the
labouring
classes in
Cambridge-
shire, Lin-
colnshire,
Notting-
hamshire,
and York-
shire.

however, there are but four towns of considerable magnitude, viz., Nottingham, Sheffield, Leeds, and Hull, and in two of them at least a large portion of the inmates belong to country populations. The workhouses at Leeds and Sheffield offer somewhat exceptional conditions, inasmuch as the inmates belong in great part to the town population, and require a town rather than a country dietary.

Among country populations, bread, either bought or home-made, rice, potatoes, and sugar, are consumed universally. Oatmeal is eaten in Lincolnshire, Notts, and Yorkshire; and maslin in certain parts of Yorkshire only. Treacle is consumed by about one-half of the cases; butter by nearly all; dripping by a large majority; suet by about one-half; bacon by about one-half; meat by nearly all; fish by very few; new milk by about one-third; skimmed milk by about one-half; butter-milk by a few in Lincolnshire, Notts, and Yorkshire; cheese by about one-half, as Cambridgeshire, Lincolnshire, and Notts, but scarcely by any in Yorkshire; eggs by three-fourths in Yorkshire, one quarter in Cambridge, and one-half in Notts and Lincolnshire; tea universally, and coffee by all in Notts; one-half in Lincolnshire and Cambridgeshire, and two-thirds in Yorkshire.

Thus Yorkshire and Notts occupy the highest place on this list, whilst Lincolnshire and Cambridgeshire are at the foot. Of special foods, rye (or maslin) is used only in Yorkshire; fish is very rarely used except upon the sea-coast; milk is rarely obtained in Lincolnshire and Cambridge; and cheese is not used universally anywhere, and the least frequently in Yorkshire.

The following table shows the average quantities per adult of the different classes of food consumed weekly in the houses of the labouring classes in the several counties. The quantity of garden vegetables which are consumed varies much at the different seasons of the year, and cannot be satisfactorily estimated.

—	Bread Stuffs, Bread, Flour, Oatmeal, Rice, &c.	Sugar and Treacle.	Butter, Dripping, Suet.	Bacon, Meat.	Milk.	Cheese.	Tea.
	lbs.	oz.	oz.	oz.	fluid oz.	oz.	oz.
Lincolnshire -	12½	7	3½	21	45	9	100
Notts -	13½	8	3½	24	54	10	100
Cambridgeshire -	14½	7½	6	17	9	1½	100
Yorkshire -	12½	10½	7	26	75		100

The high position which Yorkshire occupies in this list, except in reference to cheese, is very striking, and particularly in the so-called luxuries, sugar, fats, meats, and milk. Cambridgeshire is remarkable for the large consumption of necessary food (bread-stuffs), and also cheese, and for the small quantity of meats and milk which the peasantry obtain; whilst Lincolnshire is at the foot of the scale in bread-stuffs, sugars, and fats, and occupies a low position in meats and milk.

As a general expression it may be stated that the food obtained

Weekly
quantities
per adult.

by the labouring classes in my district consists of from $1\frac{3}{4}$ to 2 lbs. of bread-stuffs daily; $\frac{1}{2}$ lb. of sugar or treacle weekly; $\frac{1}{4}$ to $\frac{1}{2}$ lb. of butter or other fats weekly; 1 lb. to $1\frac{3}{4}$ lb. of meats weekly; $\frac{1}{2}$ pint to 4 pints of milk weekly; 1 oz. of cheese weekly; and $\frac{1}{2}$ oz. of tea weekly.

The relative dietaries in these counties will, however, be the more readily appreciated by showing the value of the total food, at the market price at those places, in 1865, and also the nutritive elements contained in it *per adult* weekly.

Cambridgeshire - - -	2 11½	41·117	1598
Yorkshire - - -	3 0	40·174	1524

This shows that the inequality of the food obtained in its real influence over nutrition is much less than the mere quantities of the several foods indicated, and that the deficiency of some particular food in a county is compensated by an abundance of another food.

It will be interesting to compare them with the total average returns from all England.

The same
for all
England.

—	Value.	Carbon.	Nitrogen.
	<i>s. d.</i>	grains.	grains.
England - - - -	2 11½	40·673	1·594

Thus it appears that the different parts of this district compare favourably with those of the country generally, and that whilst Lincolnshire is below the average in one element, it is above it in the other.

The economy with which the foods are selected and purchased in the different counties is worthy of attention. It may be ascertained by comparing the nutriment obtained for 1s. in the total dietary at the different prices in each county.

Economy
in selecting
food.

AMOUNT OF NUTRIMENT OBTAINED FOR 1s.

—	Carbon.	Nitrogen.
	grains.	grains.
Lincolnshire - - -	12·396	520
Notts - - -	13·254	492
Cambridge - - -	13·866	540
Yorkshire - - -	12·398	528
All England - - -	12·398	614

The relative position of Yorkshire is thus again changed, and an identity is established between the two extremes, viz., Yorkshire and Lincolnshire.

CONSTRUCTION OF DIETARIES.

PART II.
THE
PROPER
DIETARIES.Principles
of construction
of
dietaries.*Principles.*

On proceeding to construct dietaries for use in workhouses, it will be convenient to recapitulate, in the briefest possible manner, the principles which must guide us.

1. The foods to be selected shall be those in ordinary use, and shall constitute such a mixed dietary of animal and vegetable products as is commonly met with in the dietaries of the working classes, and as has been found needful to maintain health.
2. The aim shall be to obtain the largest amount of nutriment at the least cost, having due regard to the digestibility of the foods and the tastes of the people to be fed.
3. Bread prepared from seconds flour being now the cheapest kind of food should be employed as largely as possible, whilst meat and other expensive foods should be strictly limited to the necessities of the inmates.
4. Potatoes and other garden vegetables being expensive foods when purchased, should constitute an essential part of the dietary only to the extent to which they are necessary to health, but as they are cheap foods when grown on the premises by workhouse labour, and their nutritive value can be compared with that of bread, their use should then be extended, and that of bread proportionately restricted.
5. The food to be supplied to infants under nine months of age should be milk alone, and throughout childhood and youth the quantity of food should be abundant so as to maintain growth.
6. Able-bodied adults should be fed upon a sufficient quantity of bread and the coarser kinds of food.
7. The aged and infirm should have food easy of digestion, and also certain luxuries which are indeed now regarded almost universally as necessaries by labourers' families at their own homes.
8. Suckling women should have abundant food.
9. The sick should be dieted under the direction of the medical officer, but certain general diets should be prepared.
10. Vagrants should not have more food given to them than will suffice to maintain them during their nightly sojourn.
11. In the summer season a portion of cabbage, carrots, parsnips, and other green vegetables should be given with half the prescribed quantity of potato once or twice a week if possible, and rhubarb, apple, gooseberries, and similar foods should be made into pies or puddings in lieu of suet-puddings, or given as a saucé with suet puddings, so far as the supply from the workhouse garden will allow. 1 lb. of potatoes is equal in nutriment to about 2 lbs. of green vegetables.

12. The meat should be given when fresh to the utmost possible extent; and at least one roast meat dinner should be given weekly. Bacon may occasionally be substituted for meat.
13. As no class of the community takes the same rotation of foods week by week and month by month, it is advisable that the rotation in workhouses should be changed at intervals, say of a month, so that the same day shall not always be associated with the same kind of food, except that at all times there should be roast meat or baked meat-pie on Sundays. Peasoup should be substituted by other kinds of soup in summer. Potatoes should be roasted or baked sometimes in the winter.

PART II.
THE
PROPER
DIETARIES.
—
Principles
of construction
of dietaries.

PREPARATION OF FOODS.

Gruel, Milk Gruel, and Milk Porridge.

Formulae
of foods.

Gruel.

For a pint (Carbon 366 grains. Nitrogen 13 grains):—
Oatmeal $1\frac{1}{2}$ oz. Suet $\frac{1}{8}$ oz. Treacle $\frac{1}{2}$ oz. Salt. Allspice by way of change.

Gruel.

1. The roughly ground oatmeal is to be preferred, and it must be well cooked.
2. The finely chopped suet should be added early and the treacle late in the cooking.
3. Add the milk after the oatmeal has been well cooked.

Milk Gruel.

To make 1 pint (Carbon 442 grains. Nitrogen 27 grains):—
Oatmeal $1\frac{1}{2}$ oz. Suet $\frac{1}{8}$ oz. Skimmed milk $\frac{1}{2}$ pint. Water $\frac{1}{2}$ pint. Salt. Allspice by way of change.

Milk Gruel.

Milk Porridge.

To make 1 pint (Carbon 587 grains. Nitrogen 42 grains):—
Oatmeal $1\frac{1}{2}$ oz. Milk $\frac{3}{4}$ pint. Water $\frac{1}{4}$ pint. Suet $\frac{1}{8}$ oz.

Milk Porridge.

Sweet Gruel.

For 100 pints (Carbon per pint 514 grains. Nitrogen 14 grains):—

Sweet gruel.

Oatmeal 3 lbs. Barley $8\frac{1}{2}$ lbs. Rice $3\frac{1}{2}$ lbs. Sago 2 lbs.
Treacle 3 lbs. Salt 1 oz. Pimento pepper $\frac{1}{8}$ oz.

Suet Pudding.

For 1 lb. (Carbon 1590 grains. Nitrogen 66 grains):—

Suet pudding.

Flour 7 oz. Suet $1\frac{1}{4}$ oz. Skimmed milk 2 oz. Water.
Salt.

1. The consistence should be moderately stiff, neither too thick to be dry, nor too thin to be weak in nutriment.
2. The suet should be of beef if possible, and cut into moderately small pieces, and distributed evenly throughout the pudding.
3. Serve it with treacle and vinegar dip, or sometimes with browned, well seasoned meat liquor or gravy.
4. Sometimes add currants instead of the milk.

Rice Pudding.

To make 1 pint (Carbon 1287 grains. Nitrogen 37 grains):—

Rice $3\frac{1}{2}$ oz. Suet $\frac{1}{2}$ oz. Sugar $\frac{1}{2}$ oz. Skimmed milk $\frac{1}{2}$ pint.

Salt. Allspice.

To make 100 pints (Carbon per pint 1,000 grains. Nitrogen 30 grains):—

Rice 9 lbs. New milk 40 pints. Sugar $3\frac{1}{2}$ lbs. Dripping $3\frac{1}{2}$ lbs. Cinnamon or allspice. Salt.

1. As the inferior kinds of rice do not swell and thicken the food so much as the better kinds, it is better to mix them with a portion of broken Carolina or other of the superior kinds of rice.
2. The rice should be well creed, and sufficient time and fluid must be allowed. Common rice should be creed beforehand.
3. The consistence should be thick but soft.
4. Mix the sugar and the spice in the milk and water so that they may be uniformly distributed throughout the pudding.
5. The suet will rise to the surface of the pudding, and therefore in the distribution mix the pudding well, so as to give a portion of the fat to each person.
6. Distribute it by measure.

Rice Milk.

Rice milk. For 100 pints (Carbon per pint 450 grains. Nitrogen 15 grains):—

Rice $9\frac{1}{2}$ lbs. New milk 19 pints. Sugar $2\frac{1}{2}$ lbs. Flour $\frac{3}{4}$ lb. Spice. Salt.

For 100 pints (Carbon 878 grains. Nitrogen 30 grains):—

Rice $12\frac{1}{2}$ lbs. New milk 50 pints. Butter $3\frac{1}{2}$ lbs. Sugar $4\frac{1}{2}$ lbs. Nutmeg $\frac{1}{2}$ oz.

1. The rice must be creed before it is added to the milk.
2. Flavour the food agreeably with salt and allspice.
3. When skimmed milk is used instead of new milk, add $\frac{1}{4}$ oz. of suet to each pint and dissolve.

Soup.

Soup. For 1 pint (Carbon 1,048 grains. Nitrogen 83 grains):—

Meat 3 oz. Bones 1 oz. Meat liquor. Split peas, 2 oz. Oatmeal $\frac{1}{2}$ oz. Potatoes 2 oz. Carrots, onions, or leeks 1 oz. Pepper. Salt. Mint, thyme, or rosemary.

For 1 pint (Carbon 1,039 grains. Nitrogen 44 grains):—

Meat 2 oz. Bone $2\frac{1}{2}$ oz. Meat liquor. Pearl barley 2 oz. Rice 1 oz. Oatmeal $\frac{1}{2}$ oz. Carrots 1 oz. Pepper. Salt. Dried herbs.

For 1 pint (Carbon 1,090 grains. Nitrogen 60 grains):—

Meat (leg of beef) 2 oz. Bones 3 oz. Barley 1 oz. Split peas 1 oz. Onions 1 oz. Carrots 2 oz. Oatmeal 1 oz. Burnt raw sugar ($\frac{1}{2}$ lb. in 100 pints). Pepper. Salt. Dried herbs.

For 100 pints (Per pint—Carbon 873 grains. Nitrogen 61 grains):—

Beef 5 lbs. Bones 10 lbs. Split peas $13\frac{1}{2}$ lbs. Pearl barley, 10 lbs. Carrots $3\frac{1}{2}$ lbs. Turnips $3\frac{1}{2}$ lbs. Onions $3\frac{1}{2}$ lbs. Salt $1\frac{1}{2}$ lbs. Pepper $1\frac{1}{2}$ oz.

For 100 pints. Per pint (Carbon 935 grains. Nitrogen 68 grains):—

Beef 14 lbs. Bones $3\frac{1}{2}$ lbs. Peas $16\frac{1}{2}$ lbs. Scotch Barley $12\frac{1}{2}$ lbs. Carrots 4 lbs. Onions 3 lbs. Salt $1\frac{1}{2}$ lb. Pepper $1\frac{1}{2}$ oz.

For 100 pints. Per pint (Carbon 947 grains. Nitrogen 58 grains):—

Beef $21\frac{1}{2}$ lbs. Peas $5\frac{1}{2}$ lbs. Oatmeal (coarse) $2\frac{1}{2}$ lbs. Pearl barley $6\frac{1}{2}$ lbs. Carrots $1\frac{1}{2}$ lbs. Onions and leeks $1\frac{1}{2}$ lb. Celery 1 stick. Parsley $\frac{1}{2}$ lb. Thyme. Salt $1\frac{1}{2}$ lb. Burnt brown sugar $\frac{1}{2}$ lb. Pepper $1\frac{1}{2}$ oz.

For 100 pints (Per pint—Carbon 786 grains. Nitrogen 57 grains):—

Beef $3\frac{1}{2}$ lbs. Bones 1 lb. Ham 4 lbs. Pig's cheek (salted) $3\frac{1}{2}$ lbs. Peas 15 lbs. Pea meal $1\frac{1}{2}$ lb. Turnips (Swedes) 5 lbs. Onions $3\frac{1}{2}$ lbs. Dried herbs.

For 60 pints (Each pint—Carbon 949 grains. Nitrogen 521 grains):—

Ox-head meat 13 lbs. Bones 10 lbs. Split peas 3 lbs. Rice 3 lbs. Barley 2 lbs. Salt $\frac{1}{2}$ lb. Pepper 1 oz. Dried herbs.

In the preparation of soup the following directions should be observed:—

1. Saw the bones into small pieces, and boil them in a digester, or in a boiler for 12 hours. If they are broken, take care that all the small splinters are picked out.
2. Cut the meat into portions about 1 inch square, and simmer it in the meat liquor of the previous day until it is tender and nearly cooked. The temperature should not exceed 180° .
3. Soak the peas, barley, and rice for some hours in water.
4. Crush the carrots or cut them into small pieces.
5. Boil the vegetables (peas, &c.) gently in meat and bone liquor until nearly cooked, and then add the meat and the remaining meat liquor and boil until ready for use.
6. At the last add the pepper, salt, and dried herbs, and stir well.
7. Take care not to cook any part of the ingredients so thoroughly that they shall not be perceptible in the soup.
8. Take pains to make it of an agreeable flavour by the salt and herbs, and vary the flavour by different kinds of dried herbs from time to time.
9. In serving it be careful to keep the mess well stirred, so as to allow of the meat being fairly distributed to each person.
10. Split peas should always be used, but if whole peas, they should be ground roughly before being used, or the shells should be sieved out and not eaten.

PART II.
THE
PROPER
DIETARIES.

Formule of
foods.
Soup.

PART II.
THE
PROPER
DIETARIES.
—
Formulae of
foods.
Broth.

Broth.

For 1 pint (Carbon 472 grains. Nitrogen 18 grains):—

Meat liquor 1 pint. Barley 2 oz. Leeks 2 oz. Parsley 2 oz.
Oatmeal $\frac{1}{2}$ oz. Salt. Pepper.

For 100 pints (Each pint—Carbon 936 grains. Nitrogen 45 grains):—

Beef $18\frac{3}{4}$ lbs. Bones $6\frac{1}{4}$ lbs. Barley $12\frac{1}{2}$ lbs. Carrots 3 lbs.
Turnips 3 lbs. Onions 10 lbs. Pepper. Salt. Dried herbs.

Potato Pie.

Potato pie. To make $3\frac{3}{4}$ lbs. (per $1\frac{1}{4}$ lbs. Carbon 1,227 grains. Nitrogen 80 grains):—

For crust. Flour 12 oz. Lard or dripping $1\frac{1}{2}$ oz. Water $4\frac{1}{4}$ oz.

Meat (beef and mutton, or beef and bacon mixed) 9 oz. Potatoes when peeled 30 oz. Onions $1\frac{1}{2}$ oz. Pepper.

1. In order to keep the nutritive value of this food nearly uniform, let the consistence be stiff, and no more fluid be added to it during the cooking than is necessary to cook the ingredients properly.
2. When it is served, and after it has been weighed, add to each quantity a little *hot* meat liquor properly seasoned.
3. Take care that the crust is always made of an uniform thickness and dried in the baking to an uniform degree.
4. Cook both the crust and the inside well.
5. Cook the meat a little, and season it before it is put into the pie, and cook it with a very gentle heat and slowly.
6. If possible cook the meat in meat liquor, and make the pie with properly seasoned meat liquor and not with water.
7. Do not cut the potato into portions so small, that the whole will be mashed down.
8. Take pains to season and flavour it well and to distribute the seasoning equally over every part of the pie.
9. Use shallow dishes, so that the share of each person shall include a portion of the crust, and all the contents of the pie underneath it.
10. Ascertain how many rations a dish will hold, and in dividing the pie it will thus be unnecessary to delay time by weighing each portion.
11. The crust should be made with dripping when possible—either that from the roast meat, or a little skimmed off the meat liquor before vegetables have been added.

Hash or Irish Stew.

Hash or
Irish stew.

For 1 pint (Carbon 1,113 grains. Nitrogen 49 grains):—

Meat (mutton or beef) 3 oz. Potatoes 12 oz. Onions $1\frac{1}{4}$ oz.
Pepper. Salt. Meat liquor.

For 100 pints, per pint (Carbon 911 grains. Nitrogen 33 grains):—

Beef $13\frac{1}{4}$ lbs. Onions 5 lbs. Carrots 5 lbs. Potatoes 117 lbs.
Pepper $1\frac{3}{8}$ oz. Salt $1\frac{1}{8}$ lb.

- 1 As it is possible to reduce the nutritive value of this food by adding water to it, it is understood that it shall be so thick that a spoon would stand upright in it.
 2. The meat should be gently stewed and made tender, and well seasoned, before the vegetables are added to it.
 3. Use mutton when possible, but take care that it is not too fat.
 4. If possible both the meat and the vegetables should be cooked in meat liquor.
 5. Take care that all the potato is cooked equally, but not so thoroughly that it shall be entirely mashed.
 6. Season and salt the food sufficiently and make the flavour agreeable.
 7. Measure it in a pint vessel which is wider at the top than at the bottom, and take care that the meat is evenly distributed.
-

PART II.
THE
PROPER
DIETARIES.

PROPOSED DIETARIES.

INFANTS under 1 year of age.

Proposed
dietaries.
Infants.

The mother's milk alone, if sufficient and good, should be given to infants under 9 months of age, and when insufficient, the defect should be supplied by sweetened new milk and water, in the proportion of three parts of milk to one of water, and given of a temperature as warm as that of the body.

When weaned, or entirely brought up by hand, three pints of the sweetened milk and water should be given in portions every two or three hours during the day, and once or twice during the night. The temperature should not be much higher or lower than that of the body—say 100°.

	Carbon.		Nitrogen.
45 oz. new milk	- 1,228 grs.	-	98 grs.
1 oz. sugar	- 175 "	-	—
	<u>1,403</u> "		<u>98</u> "

When new milk is quite unattainable skimmed milk should be used, and $\frac{3}{4}$ oz. of suet be well dissolved in each quart of milk.

After 9 months of age bread and flour may be added to the milk. Bread is to be preferred, and about 4 ounces per day allowed.

	Carbon.		Nitrogen.
Milk and sugar as above	1,403 grs.	-	98 grs.
4 oz. of bread	- 498 "	-	22 "
	<u>1,901</u> "		<u>120</u> "

Suckling
women.

SUCKLING WOMEN after the 3d day.

Breakfast.— $1\frac{1}{2}$ pint milk porridge, 6 oz. of bread, daily.

Supper.—The same.

Dinner.—Same as for aged and infirm, but with 1 oz. of bread additional.

The medical officer should order tea, &c. for supper, in lieu of the above, at his discretion.

	Carbon.		Nitrogen.

* When on the ground of age not being sufficiently advanced it is not deemed proper to give tea for supper, the supper will consist of the same food as is proposed for the breakfast.

† If the Guardians in town districts or elsewhere should think fit to increase this to 4 oz., the quantity of meat to be given on the other days must not be lessened in consequence.

3 oz. Butter per week is invariably given to the Sick and infirm when on No. 2. Diet, which is the diet generally for the sick in the infirmary.

2 oz. (or more) of Wine is allowed to cases which require it. 1 pint of Beer per diem where much suffering and great debility exist. And in extreme cases with prostration (moriens), Brandy and Water almost ad libitum is invariably supplied.

3 oz. Butter per week is invariably given to the Sick and Infirm when on No. 2 Diet, which is the diet generally for the sick in the Infirmary.

VAGRANCY.

REPORT OF EDWARD GULSON, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

SIR,

Teignmouth, 16th Nov. 1865.

WITH reference to the communication which I received from Mr. Thornely, dated October 25th last, in which he expresses your desire to receive a statement from me relative to the reception of Vagrants at the several Union workhouses in my district, I beg herewith to forward for your information a return showing,—

1. The total number of Vagrants admitted at each workhouse in my district during the first six months of the present year, viz., from January 1st to June 30th, 1865.
2. The greatest number of Vagrants admitted at each workhouse on any one night during the above period.
3. The number of cubic feet of space for each Vagrant in the sleeping ward on the night when the maximum number was accommodated.
4. The unions in my district in which the accommodation for Vagrants is,—
 1. Sufficient,
 2. Insufficient,
 - and 3. None.
5. The work which is required from each Vagrant.
6. The quantity and kind of food allowed at each workhouse at *each meal*, viz., at supper on admission, and at breakfast on leaving.
7. The unions in which the police constables are employed as assistant relieving officers for Vagrants.

From this return it will be seen, that in 53 unions in my district the existing provision for Vagrants is sufficient.

In 2 unions it is insufficient.*

In 3 there are no separate wards specially for the accommodation of Vagrants; the receiving wards being used for the purpose when necessary.

The return also shows that in all the unions in my district, except Redruth, a task of work is required (or nominally re-

* NOTE.—See correspondence in the office as to the insufficiency of accommodation at St. Austell, and the way in which the Vagrants are there accommodated.

quired) from each able-bodied Vagrant. This work consists chiefly of pumping water, breaking stones, or picking oakum. I greatly doubt, however, whether this requirement of work is regularly enforced by all masters of workhouses. I think, in some instances, they are too glad to get rid of Vagrants without the trouble of strictly requiring the task of work which ought to be rigidly exacted. The food given consists of 6, or 7, or 8 ounces of bread, and, in most unions, $1\frac{1}{2}$ pint of gruel on admission at night, and a similar quantity of the same kind of food in the morning before the Vagrants leave.

In 14 unions in my district police constables are employed as assistant relieving officers for the purpose of relieving Vagrants; and at Bath, the borough police take charge of, and provide in all respects for all Vagrants who apply for relief, without sending them to the workhouse.

I have from time to time endeavoured to induce the boards of guardians in my district to appoint the police constables as assistant relieving officers of Vagrants; but there appears to be a feeling, in many cases, against the police, which has prevented their employment by the guardians in this capacity.

As regards the state of Vagrancy in my district, the return shows the extent to which it prevails. My inquiries lead me to believe that the number of Vagrants has rather increased of late in the West of England, especially in those unions in which large towns are comprised.

I am, &c.

EDWARD GULSON.

The President,
&c. &c.

VAGRANCY.

REPORT OF W. H. T. HAWLEY, POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

SIR, West Green House, December 2, 1865.

ON the 25th October last I had the honour of receiving from you a communication on the subject of Vagrancy, in which you requested me to furnish you with a statement showing the means possessed by each union in the district under my charge, of regulating the relief administered to the class of paupers denominated "Tramps or Vagrants," through the means of properly constructed Vagrant wards, and generally to report on the present state of Vagrancy in the district.

The heads of inquiry to which you especially directed my attention were the following; viz.—

1. Number of unions having sufficient Vagrant wards.
2. The number in which the wards are insufficient.
3. The number in which there are no wards.
4. The number in which a task of work is required in return for the relief afforded.
5. The kind of work exacted in each case.
6. Nature and quantity of the food given.
7. The number in which police constables are employed as assistant relieving officers of Vagrants.
8. Steps taken by me to establish a uniformity of system in dealing with Vagrants.
9. Report on the present state of Vagrancy in the district.

Upon all the above points I have made due inquiry, the results of which I am now enabled to lay before you in the following statement:—

The district comprises 54 unions, formed under the 4th and 5th Will. IV. cap. 76, six incorporations under Gilbert's Act, and three incorporations under local Acts; and a synopsis of the general management in each is set forth in the annexed tabular form, which will be found useful as a reference for details.

No. 1. *Number of Unions having sufficient Vagrant wards.*

The following 43 unions are provided with Vagrant wards at the workhouses, which are generally sufficient, but in those cases

where the union is marked with an asterisk, the wards, though in other respects sufficient, do not offer accommodation adequate to the demands which may be made upon their space by the influx of an extraordinary number of Vagrants, which may at any time be caused by stress of weather or other unforeseen circumstances, and I am of opinion that they require extension.

Alresford.	Hartley Wintney.	Shaftesbury.
Alton.	Havant.	South Stoneham.
Andover.	Hursley.	Steyning.
Basingstoke.	Kingsclere.	Sturminster.
*Blandford.	*Lyminster.	Takeham.
*Bradford.	Mere.	Warminster.
Calne.	Midhurst.	Westbourne.
*Catherington.	New Forest.	*Westbury.
Chippenham.	Petersfield.	Westhampnett.
*Christchurch.	Petworth.	Whitchurch.
Cricklade.	Pewsey.	Wilton.
Devizes.	Poole.	Wimborne.
Droxford.	Portsea Island.	Winchester.
Farnham.	*Ringwood.	
Fareham.	Romsey.	

In the under-mentioned unions Vagrant wards have been provided at the police stations, situate within the limits of the unions:—

Amesbury.
Marlborough.
Tisbury.

The ward at the Amesbury police station is insufficient as to size, and being undivided admits of no separation of the sexes. The accommodation in the wards at Marlborough and Tisbury is sufficient. Certain advantages are no doubt derived from having Vagrant wards at police stations, as the strict supervision of the police officers, their knowledge of many of the bad characters who are under their charge, and an immediate appeal to the magistrates when necessary, tends to prevent imposition and preserve order; but on the other hand, trouble, inconvenience, and complication of the accounts result from the arrangements necessary for the supply of their food; and though the Vagrant as to moral qualities stands generally very low on the social scale, still when destitute he has a legal claim to substantial relief, administered in a fair and reasonable manner, and it is questionable whether the fact of locking him up in a cell at the police station does not brand him with the mark of a felon rather than a pauper. Preliminary examinations of Vagrants by police officers are attended with the best results, but when their claims to relief are once substantiated, that relief should be given at the workhouse under the immediate control and supervision of the proper workhouse officers.

Nos. 2 and 3. *Unions having insufficient or no Vagrant wards.*

The unions in which there are no Vagrant wards are—

Alderbury.	Swindon.
Fordingbridge.	Stockbridge.
Melksham.	Isle of Wight.
Malmesbury.	

In the Alderbury union the guardians have not considered Vagrant wards necessary, as Vagrants are generally relieved in the city of Salisbury; but cases of sick Vagrants occurring in any of the parishes of the Alderbury union are sent by the relieving officers to the workhouse. At the workhouse of the Melksham union there are sufficient Vagrant wards, but the guardians have discontinued their use for some years, preferring the appointment of two police officers, and the refusal of all relief to the able-bodied at the workhouse. In the Swindon union Vagrant wards were provided some years since, but their use was abandoned when the assistance of the police was called in, and they were then converted into receiving wards, the old receiving wards being given up for infectious wards. The guardians nevertheless permit able-bodied Vagrants from the High-worth district (which is too remote for the interference of the police) to be brought into the receiving wards, by which irregular practice much inconvenience and danger is caused to the paupers belonging to the union, and the restoration of the Vagrant wards is consequently much required. At the Stockbridge workhouse there is only one ward for male Vagrants, and a female ward ought to be provided.

Incorporations under Gilbert's and Local Acts.

Of the six incorporations under Gilbert's Act, one only, namely Alverstokey, has sufficient wards; the remainder, viz.,

Arundel,	Sutton,
Headley,	and
East Preston,	Farnborough,

have no vagrant wards. Of the three places under local Acts, Chichester and Southampton are provided with sufficient Vagrant wards; but the ward attached to the Salisbury workhouse is inadequate for the purpose for which it is intended, and will not admit of the Vagrants being set to work.

Nos. 4 and 5. *Workhouses in which a task of work is required in return for the relief afforded, and the kind of work exacted in each case.*

In eight of the workhouses stone-breaking is the work on which the Vagrants are employed; viz.—

Alresford.	Hursley.	Westbury.
Andover.	Mere.	Wilton.
Cricklade.	Warminster.	

When the work is set by task the Vagrants are expected to break about a bushel of stones, otherwise they are detained three hours and allowed to break stones *ad libitum*. Oakum picking is provided in twenty-one of the workhouses; viz.—

Alton.	Farnham.	Steving.
Basingstoke.	Fareham.	Thakeham.
Blandford.	Lymington.	Wareham.
Catherington.	New Forest.	Westhampnett.
Chichester.	Petworth.	Whitchurch.
Chippenham.	Poole.	Wimborne.
Droxford.	Southampton.	Midhurst.

Where the Vagrants work by task, from one to three pounds of oakum is the quantity required to be picked; and where the condition of *time* instead of measure is imposed, they work from one to four hours. Pumping water is resorted to as a means of employment in the Kingsclere, Marlborough, Portsea Island, and South Stoneham unions; digging on the workhouse land in the Devizes and Winchester unions; and corn is ground in a mill worked by cranks in the Shaftesbury union; the time occupied being about the same as in those unions where a different kind of employment is provided.

No. 6. *Nature and quantity of the food given as relief to this class in each union.*

The articles generally used in the dietaries of the Vagrant wards are bread, cheese, gruel, and milk and water, and in two or three instances tea and coffee are given, but the quantities allowed vary so much in the different unions as to render it impracticable to classify them as dietaries under any particular heads, and I am consequently obliged to refer you to the tabular form for the details. When bread *alone* is given, the quantity ranges between six and 16 ounces; 6 oz. is given in four unions, 7 oz. in one, 8 oz. in five, 12 oz. in two, 13 oz. in one, and 16 oz. in ten. Gruel and cheese are also given in addition to bread in several of the unions. In two of the unions 2 pints of gruel are given, in one 1½ pints, in three 1 pint, in eight ½ pint, and in four no quantity is fixed. In four unions 2 oz. of cheese is the allowance, in five 1 oz., in one ½ oz., and in one no quantity is fixed. In one union butter is given, and milk and water in another, and in the Lymington union the Vagrants are allowed the same quantity of food for breakfast and supper as the able-bodied paupers in the workhouse. In the Hartley Wintney and Petersfield unions no food is allowed, and the Vagrants are allowed to occupy the Vagrant wards for the night merely as a means of shelter.

In some of the unions the reception of food for breakfast is made conditional on the consent of the pauper to work before he receives it, and if he declines it he may leave the workhouse at once. Experience has shown that where the Vagrants have this option they seldom remain to work in the morning, the three

hours during which they would be detained for that purpose being more valuable to them in their trade of begging than the food which they would otherwise receive. This plan I consider objectionable, as the Vagrant thus obtains his supper and bed gratuitously, but if an obligation were imposed upon him to the effect that if he accepted his supper and a bed he should remain to work in the morning and be allowed his breakfast, scarcely any would be found to accept relief upon such terms. The plan of refusing relief altogether to able-bodied Vagrants has been very partially adopted in this district, as the guardians are unwilling themselves to risk the responsibility they might incur by withholding assistance in any really destitute and urgent case, or to give the power to the relieving officers of acting on their own discretion in such cases.

The returns do not offer the means of testing the operation of work on the one hand and the dietaries on the other in the repression or encouragement of Vagrancy. Its extent as to numbers, in attempting to compare one workhouse with another, cannot be measured by any fixed standard, such as the proportion of pauperism to population in a union, where the data are fixed and positive; its stream is arbitrary and incessant, though fluctuating, and as it generally takes its course through the leading thoroughfares, the large towns which it encounters in its passage are usually the places where the greatest number of Vagrants is to be found, a fact which is clearly indicated in the tabular form; the congestion of Vagrancy in certain places and its contraction in others is therefore traceable to local causes rather than to the influences of work and diet, though I feel confident that their operation has produced repellent as well as attractive effects, if they could fairly be traced; and the number of Vagrants generally throughout the district might be greatly reduced if a sound and uniform system of work and diet were established.

Nos. 7 and 8. *Unions in which police constables are employed as relieving officers of Vagrants.*

Police constables have been appointed as relieving officers of Vagrants, with salaries, in the following 13 unions; viz.—

Bradford	-	-	-	1	constable, at 10l. per annum.
Chichester	-	-	-	1	6 "
Devizes	-	-	-	1	10 "
Farnham	-	-	-	1	15 "
Swindon	-	-	-	1	10 "
Malmesbury	-	-	-	1	8 "
Marlborough	-	-	-	1	10 "
Melksham	-	-	-	2	10 each.
Pewsey	-	-	-	1	10 "
Portsea Island	-	-	-	2	10 each.
Tisbury	-	-	-	1	8 "
Warminster	-	-	-	1	10 "
Wilton	-	-	-	1	5 "

In the following 17 unions similar officers have been appointed without salaries; viz--

Alton.	Fareham.	Romsey.
Alverstokey.	Fordingbridge.	Southampton.
Andover.	Havant.	Wareham.
Basingstoke.	Hursley.	Whitchurch.
Christchurch.	New Forest.	Wimborne.
Droxford.	Ringwood.	

Two police constables have been appointed in each of the unions of Andover and Ringwood, and one in all the other unions.

The appointment of police officers to act as relieving officers in the administration of relief to Vagrants has been attended with very beneficial results, and in 20 unions a confirmation of this fact is offered in the marked decrease in the number of Vagrants on a comparison made between the two quarters ended respectively the 30th of September 1864 and 1865, of which the Portsea Island, Melksham, and Chichester unions present the most striking examples; on the other hand an increase has taken place in nine of the unions which have appointed police officers, but the total decrease in the 29 unions exceeds the increase by 915.

Decrease of the number of Vagrants in 20 unions	-	1,149
Increase in nine unions	- - - - -	234
		<u>915</u>

The efficacy of the police system is, however, more conclusively shown from a comparison made between the unions where those officers have been appointed and those in which no such appointments have been made, by taking the same quarters as those previously selected and comparing the increase and decrease in the number of Vagrants under both systems.

Increase in the number of Vagrants in 14 unions	
where no police constables have been appointed	518
Decrease in 12 unions	- - - - - 256
Nil in 8 unions	- - - - - 0
	<u>Increase - 262</u>

It therefore appears that whilst there has been a decrease of 915 in the 29 unions under the superintendence of the police, there is an increase of 262 in the 34 remaining unions under no such superintendence.

Uniformity of system in dealing with Vagrants.

In my various conferences with the boards of guardians I have endeavoured to impress upon them the necessity of resorting to some general plan of operation throughout the district for the repression of Vagrancy, representing to those whose benevolent

feelings inclined them to support lenient measures, that their Vagrant wards would be filled with the paupers of that class who had rejected the relief offered them in neighbouring unions where more stringent regulations were in operation, and that sympathy with them only tended to encourage mendicancy and imposture, and to waste the money of hard-working ratepayers on worthless objects who would not work themselves, but generally to little purpose; and though I have succeeded in some instances in inducing the guardians to adopt the plan recommended in Mr. Buller's minute, of refusing all relief to able-bodied Vagrants, still a large majority of the boards feel a disinclination to incur the responsibility, either by themselves or their officers, of declining to relieve those whose plea is destitution, and they prefer the present imperfect test of the Vagrant ward to the absolute denial of all relief.

Uniformity in the system of dealing with the Vagrants appears to be absolutely required to check the evil of mendicancy, but it will never be established until the Poor Law Board shall interfere to enforce it by stringent regulations and the aid of effective Vagrant wards; and the measure I would recommend to be introduced should provide for the appointment of one or more police officers in all the unions, who should in the first instance receive applications for relief from the mendicants and give them orders to the workhouse. I would also recommend that no relief should be given to any able-bodied Vagrant except in the Vagrant ward; that he should not have the option of remaining in the house the next morning to work, or *not*, as it might suit him, but that, having received his supper over night, he should be compelled to remain at least three hours to work before he receives his breakfast and is allowed to depart. The positive condition of work will, I feel convinced, do more for the repression of Vagrancy than any other coercive measure; and if the dietary be limited to bread only, and sleeping places be provided on the model of guardroom beds, with straw and blankets, very few inducements will remain to attract the sturdy beggar.

Present state of Vagrancy in the district.

This district, like most others, is considerably overrun with Vagrants at the present time, but certainly not more so than at similar periods of the year at other times; and the character of those who apply for relief is as usual that of the professional beggar, and there is nothing to indicate that pressure on trade or other circumstances is driving needy artisans out of employment to resort to mendicancy for support. There never in fact was a time when so many sources of employment were open to artisans of all sorts in this district as at the present moment, and the Government works, building, and agriculture are absorbing all the labour they can obtain. So far as the Vagrants are concerned there appears to be no difficulty in the administration of relief to that class at the present time which will not be easily met and disposed

of by the union authorities with the present means at their command, for the district is in quite as healthy a state now as regards mendicancy as it was at the same period last year, and at the end of September last was even *more so*, as is proved by the following calculation and comparison of the numbers relieved during the two quarters ended respectively September 1864 and September 1865 :—

Number of Vagrants relieved in the quarter ended September 1864	-	-	-	-	9,342
Number relieved in the September quarter ended 1865	-	-	-	-	8,809
					<hr/>
Decrease in 1865	-	-	-	-	5

In conclusion, I have to remark that I do not remember a single instance occurring in this district in which a complaint has been preferred by a Vagrant against the union authorities for having suffered from the want of food or shelter when he has made application for relief.

I have the honour to remain,

Sir,

Your very obedient servant,

W. H. T. HAWLEY,
Inspector.

To the Right Hon. C. P. VILLIERS, M.P.,
President of the Poor Law Board, &c.

TABLE.

VAGRANCY.

REPORT OF R. WEALE, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

To the Right Hon. C. P. VILLIERS, M.P., &c., the President
of the Poor Law Board.

The Elms, Biggleswade,
Dec. 8th, 1865.

SIR,

IN reply to the letter of the 25th of October last, addressed to me by Mr. Thornley at your request, directing my attention to the resolution relative to Vagrancy passed by the Committee on Poor Relief, and requesting information from me on several questions submitted by that document, I beg to refer you to the annexed tables, of which the following is a summary :—

Total number of workhouses having sufficient Vagrant wards - - - -	40
Total number of workhouses with insufficient wards	16
Total number of workhouses without wards -	8
Total number of workhouses in which Vagrants are relieved - - - -	55
Total number of workhouses in which Vagrants are not relieved - - - -	9
Total number of workhouses in which work is done	39
Total number of workhouses in which work is not done - - - -	25
Total number of unions in which police are employed	35
Total number of unions in which police are not employed - - - -	29

NOTE.—I have returned as insufficient all workhouses where the wards afford less than 200 cubic feet for each inmate on the most crowded night. In several of these instances the wards are sufficient, excepting at periods of great pressure ; such as the haymaking season in Middlesex and Hertfordshire, or during the arrival and departure of Irishmen for harvest work.

The total number of Vagrants relieved :—

—	Total number relieved in the first 6 months of 1864.	Total number relieved in the first 6 months of 1865.	Increase in 1865.	Decrease in 1865.
Beds - - - -	3,267	3,580	313	—
Cambs - - - -	63	48	—	15
Herts - - - -	14,936	13,011	—	1,925
Hunts - - - -	1,198	1,521	323	—
Leicester - - -	2,340	2,206	—	134
Middlesex - - -	3,273	3,004	—	269
Northampton - -	4,347	4,546	199	—
Rutland - - - -	461	416	—	45

Worcester - - -	217	117	—	100
	41,378	40,142	1,252	2,488
Total decrease - - -			1,236	

During the past year I have submitted to most of the boards of guardians where provision had not been made for the relief and employment of Vagrants to adopt the recommendations of the House of Commons, and urged the necessity of providing a task of work to be performed in return for the relief afforded, and in several instances I have been successful. Where the applicants are not numerous the guardians are unwilling to incur any expense in providing employment for this class; nor do I think, without some legislative enactment rendering it compulsory for them to do so, they will be prevailed upon to do it.

For my own opinion on the subject of relief to Vagrants or way-farers allow me to refer you to a letter I addressed to you on the 25th of January 1864, a copy of which I append.

I have, &c.

ROB. WEALE,
Poor Law Inspector.

(Copy.)

SIR,

Hampton Wick, January 25, 1864.

IN reply to the letter dated the 20th of January, addressed to me by Mr. Owen at your request, I beg to state that, as therein directed, I have given my attention to that clause of the enclosed minute which says, that—

“ In several parts of the country arrangements have been made with the police to undertake the duties of assistant relieving officers of Vagrants.”

Most of the unions in my district, comprised within the counties of Bedford, Leicester, Northampton, and several unions in the counties of Hertford and Warwick, have appointed the superintendents of police resident in the towns wherein the workhouses

are situated to be assistant relieving officers of Vagrants. In some unions of considerable extent other police officers, resident in the larger towns of the union or on great lines of traffic, have been appointed to discharge the same duties.

I have no hesitation in saying that this practice has a most beneficial effect in diminishing Vagrancy in a very marked degree.

In a large proportion of unions food as well as shelter is afforded to the Vagrants; and in these cases a task of work is demanded of them before they are permitted to leave the workhouse. It very frequently happens that the Vagrant will accept the shelter, but refuse the food, in order that he may not be detained to work. Indeed the class, as a whole (though I have found some exceptions), are so vile and troublesome that the masters of workhouses are glad to get them off the premises as speedily as possible.

In other of my unions shelter only and not food is in a general way provided for Vagrants; but in all these cases the master of the workhouse exercises a discretionary power, so that the aged, the sick, and the children are never dismissed without proper sustenance.

In almost all the unions under my charge the only relief given by the assistant relieving officer of Vagrants is an order of admission to the union workhouse.

In a very few cases—I can only call to mind two—a ticket is given upon a lodging-house keeper by the police officer. The ticket is paid for, and any additional relief that may be required supplied by the relieving officer, and in cases of sickness the Vagrant is at once removed from the lodging-house to the workhouse.

I do not recollect any instance in which a police officer acting as assistant relieving officer is called upon to keep any money account.

The only really large town in my district is Birmingham. In this parish the relieving officers give to the Vagrants tickets of admission to the workhouse. And a task is always exacted from them before dismissal.

Although this class of persons is here, as everywhere, troublesome, I have heard of no difficulty in dealing with them which cannot be met by care and attention on the part of the parish officers.

The only three unions of mine entirely within the metropolitan police district are those of Edmonton, Hendon, and Barnet. The latter union recently applied to Sir R. Mayne for permission to employ a police officer as assistant relieving officer of Vagrants. This request was, much to the regret of the guardians, refused.

My own opinion is, that if, in spite of the trouble connected with it, a task of work were invariably exacted from the Vagrants in return for relief given, the worthless vagabond would be kept away, while the deserving and destitute wayfarer would obtain the relief to which the law entitled him. I may remark in passing, that during the severe winter of 1860-61 the diminution in the

VAGRANCY.

REPORT OF SIR J. WALSHAM, BART., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

SIR,

Cheltenham, January 19, 1866.

I AM sorry that the increasing pressure of ordinary and special business, together with the hindrance of repeated attacks of personal illness, has prevented my giving an earlier reply to Mr. Thornely's letter of the 25th October, on the subject of Vagrancy.

I now annex, in a tabular form, the statistical information, as regards my district, which you appear to require.

I have 73 unions under my superintendence; viz., all the unions of Essex, Norfolk, and Suffolk—56 in number—with 4 Cambridgeshire and 13 Kent unions in addition.

Of these 73 unions, two (viz., those of Wayland and Thingoe), are without any vagrant wards; but the Thingoe workhouse being, curiously enough, situated within the Bury St. Edmund's incorporation, has no occasion for such wards; the wayfaring poor having been always relieved at the Bury workhouse, where the wards in question are very good. In the Wayland union, vagrants (who do not average six in a month), are placed in the receiving wards, and bad cases in the infectious ward.

The vagrants who apply in the Mutford and Lothingland incorporation (where the position of the workhouse renders it unavailable for wayfarers applying in Lowestoft and Gorleston), are dealt with exclusively by the police; and, after being searched and a description taken of them, they have orders on lodging-houses, and from two to four pennyworth of bread given them.*

There are also in my district 4 unions (viz., those of Linton, Isle of Sheppey, Docking, and Forehoe), where there is only one regular vagrant ward; and 2 unions (viz., those of Blofield and Henstead), where the two rooms used as vagrant wards are so very small that when more than one man or two women are relieved together, the others have to be placed in the probationary or infectious wards. It will be seen, however, by referring to the statistical table annexed, that the vagrants relieved in all these 6 unions are few in number; the female vagrants, including

* NOTE.—The number of vagrants relieved at lodging-houses in Lowestoft and Gorleston during the half-year ended 30th June 1864, was 226.

children, not averaging three a month; consequently, the practical inconvenience of using the receiving wards for women and children, though I have recorded the accommodation in question as insufficient, is scarcely appreciable. I have also recorded the West Ham vagrant wards as insufficient on account chiefly of the number of vagrants constantly occupying them. They are, moreover, dark and dismal places.

In the remaining 64 unions of my district the vagrant wards may be considered more or less adequate for their purpose, in respect of size; though the accommodation is unequal in quality. The vagrant wards of a few workhouses have regular beds, and are on a par with the ordinary run of probationary wards; but the large majority are furnished with guard-room bedsteads, plenty of straw (*said* to be frequently changed), and an *alleged* sufficiency of rugs. I use the expressions "*said*" and "*alleged*" because it is simply impossible for an Inspector of 73 workhouses to write positively on the point; but in my inspections of such wards, whether occupied or unoccupied, I have seen no reason to doubt the truth of the statement. It is needless to add that if the generality of vagrant wards are places which leave an unfavourable and dissatisfied impression on a visitor, pleasant rooms with bed furniture to correspond, would be altogether out of accordance with the personal condition of nine-tenths of the people *on tramp*, who lodge nightly at some workhouse or another. Vagrants, stating themselves to be ill, are seen by the medical officer, and if seriously ill, are treated like the regular poor, and passed into the hospitals or sick wards of the workhouse.

In 7 unions of my district (*viz.*, Billericay, Dunmow, Canterbury, Downham, East and West Flegg, King's Lynn, and Freebridge Lynn), no work is required from vagrants. At Canterbury and Lynn the existing arrangement of the vagrant wards is such as to render it difficult (the guardians *allege*, impracticable) to carry out any task of work effectually. In other words, some little expense for sheds would be requisite, of the advantages of which the guardians are sceptical; and, indeed, the same may be said of each union where a task of work is not exacted; but the number, and especially the cost of vagrants is comparatively small in 4 of those unions.* Picking oakum is the principal mode of employment for vagrants in my district; but stone-breaking, a much better task, is resorted to in six workhouses; pumping water in six other workhouses; grinding corn in two workhouses; and carrying shingle or barrowing soil in two other workhouses.

The food given is generally from six to eight ounces of bread at supper, and the same at breakfast, in the Cambridgeshire and Kent unions; and nearly the same quantities of bread in the Essex, Norfolk, and Suffolk unions, with one to one and a half ounces of cheese for supper, and one to one and a half pints of gruel for breakfast. The additional food does not, however, appear to create any special attraction to the workhouses in which it is

* NOTE.—Dunmow, Downham, East and West Flegg, and Freebridge Lynn.

supplied. Vagrants are not nearly so numerous in Essex (excluding West Ham and Romford), Norfolk, and Suffolk, where the dietary for them is comparatively liberal, as in Cambridgeshire and Kent, where it is less liberal.

Irrespective of the Thingoe union, in which, as already explained, vagrants are not relieved at all, police constables have been appointed assistant relieving officers for Vagrants in 45 of my unions; viz., in the 4 Cambridgeshire unions; in 12 of the 16 Essex unions; in 4 of the 13 Kent unions; in 12 of the 22 Norfolk unions; and in 12 of the 16 Suffolk unions; thus leaving 27 unions in which the guardians have either objected or omitted to employ the agency of the constabulary.

It is to be observed, however, that in Essex (where under the very effective arrangements established some 18 or 19 years ago by Admiral M'Hardy, vagrancy was at one time nearly extinguished, and is still little more than a shadow of what it was prior to 1848),—in Essex, of the 4 unions in which the police do not act as assistant relieving officers, the Metropolitan police have the principal charge of the West Ham union, and a considerable share of the charge of the Romford union; whilst the gravitation of vagrancy to Colchester almost frees the adjoining rural union of Lexden and Winstree from the duty of relieving it. In the Tendring union, the greatest portion of the wayfaring poor has to be relieved in lodging-houses at Harwich, which is 10 miles, or at Manningtree, which is 5 miles distant from the workhouse. Hence, the non-employment as yet of the police; but on a recent visit to that union, I took occasion to urge on the guardians the adoption of the nearly universal practice of the other Essex unions. The figures in the table only represent the number of Vagrants relieved at the Tendring workhouse, and do not account for the heavy numbers sent by the relieving officers to lodging-houses.

In the Kent unions, a rural constabulary is of comparatively recent date, and the conviction of its utility in dealing with vagrants has not yet made much apparant progress.

In those unions of Norfolk and Suffolk in which the services of the police have not been made available, the number of vagrants applying for relief has been too small to render the necessity of those services very apparent to the guardians. But I ought to add that in one union (that of Blything), of which the Lord Lieutenant of Suffolk has been Chairman since its formation, the employment of the police as assistant relieving officers was resorted to for a time, and abandoned as being less effective than the action of the relieving officers. I dissent from this conclusion; and believe the fact to be that the employment of the police was somewhat too hastily pronounced to tend to the increase of vagrancy in the Blything union, though it had notoriously had the opposite effect wherever else it had been tried. Practically and locally the matter is unimportant, for vagrants barely average six per month in this large union.

A comparison of the vagrancy statistics summarised in the annexed table will show, I think, that as much uniformity of system has been attained in my district in dealing with vagrants as the boards of guardians of different counties could be expected to adopt under suggestions. Greater uniformity, if deemed desirable, can only be accomplished by compulsory orders as to diet, work, and the employment of the police.

With reference to the employment of the police, I have a strong impression that the management of the relief of the class known as Vagrants or Tramps should be exclusively committed to the police, and be entirely disconnected from the ordinary administration of the relief of the poor. I am quite aware of the many obstacles to the transfer of the relief of vagrants from the guardians and their officers to the Rural constabularies or to the Metropolitan and Urban police, and I see little hope of those obstacles being for the present overcome. I also admit the apparent objectionableness of subjecting the wayfaring artizan or labourer in search of work to the action of the police. But even as it is, he must take his chance with the habitual tramp, and such comfort as a vagrant ward can at best supply would be more secure to him, (especially in the larger towns where the inmates are numerous), under the supervision of the police than of the porter of the workhouse and his assistants; and I cannot but believe that sooner or later it will be found necessary to commit the relief of the tramping and travelling poor wholly to the care of the police—vagrant lodges in suitable localities, as well as the cost of the relief afforded, being provided out of the county rates. In the meanwhile, I am decidedly of opinion—(1) that police inspectors or constables ought to be appointed assistant relieving officers for vagrants on the Essex plan, in every union where a constabulary force exists; (2) that a test of work should be systematically enforced; and (3) that a dietary for vagrants, supplementary to the regular dietary of each workhouse, should be issued by the Board.

I have, &c.

JOHN WALSHAM.

To the Right Honourable
Charles Pelham Villiers,
&c. &c. &c.

TABLE showing the State of Vagrancy in Sir John Walsham's District for the half-year ended 30th June 1865.

J. W.

VAGRANCY.

REPORT OF JOHN T. GRAVES, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

SIR, Cheltenham,
25th December 1865.

IN answer to Mr. Thornely's circular letter of the 25th October 1865, on the subject of Vagrancy, I now send you such information as I possess respecting certain particulars as to which he informs me that you are desirous of being furnished with a statement from me.

The statement (B.) annexed refers to the 68 unions in my district, and is arranged in a tabular form. I have added a numerical summary (A.), as to the heads of inquiry concerning which I believe that I can supply a fair approximation.

I am not yet able to transmit such a report on the present state of Vagrancy in my district as would deserve attention by containing the statistics of the subject in accurate detail. I attach little importance to statements in reference to the increase or diminution of Vagrancy, when they are not founded upon existing numerical records. Upon analyzing such statistics of Vagrancy as I possess in the forms (A.) transmitted to me weekly, I have found many of them so imperfect that, in several instances, I am obliged to await the result of further inquiry.

23rd January 1866.

Enclosed is a table (C.) showing the number of vagrant cases relieved in certain unions in the half year ended respectively September 29, 1864 and 1865. From this it appears that there has been a slight comparative increase of Vagrancy in the district in the latter half year, but the alteration is not such as to mark any change in the general condition of the poor. So far as I can learn, the expense of the relief of Vagrants has increased in a ratio slightly exceeding the increase in the number of cases, but I have not sufficient data to warrant a positive assertion on this head. The table indicates by the letters W and P those unions which have vagrant wards and those where the police have part in the administration of relief; but such a statistical examination as I have been able to give does not show any clear connexion between the increase or diminution of Vagrancy and the local mode in which the relief of tramps is administered.

There is still in the district, as will be apparent from the table (B.), a remarkable variety in the treatment of Vagrants; but the recent tendency has been towards a diminution of the differences in different unions. It has been my object to favour the tendency to uniformity by recommending either orally at board meetings of the guardians or by written entries in the

visitors' book the erection of Vagrant wards, the allowance of food, the regular imposition of a task of work, and the introduction of assistance by the police in unions where such measures appeared to be feasible and had not been previously adopted. Within the last few years several unions have tried these means, after having been urged to do so by the Poor Law Board, in consequence partly of my reports. I could, if necessary, refer to some such cases, as well as to others where my advice has failed. But I have kept no special record of my endeavours in this direction, and am not willing to take credit for results which may have been chiefly due to other influences.

The opposition to the measures I have adverted to has been successful in many instances, and rests on reasons partly of general principle and partly of local expediency.

There are few subjects on which greater difference of opinion prevails among thoughtful men than the best mode of treating the houseless and wayfaring poor, and guardians are naturally desirous to exempt their constituents from expenses which can be fairly avoided. Where there are workhouses without tramp wards the objection put forward to the erection of such wards is sometimes the want of a convenient site for sleeping places and working yard apart from the ordinary inmates, and sometimes the enhanced danger of fever and itch. The introduction of such diseases into workhouses has been occasionally traced to communication with tramps. Where there are Vagrant wards, but where no resolution prescribing a task of work has been passed in conformity with 5 & 6 Vict. c. 57. s. 5, I sometimes hear that it is not easy to provide and efficiently to superintend suitable work without an inconvenient increase in officers. Where there is a sufficient staff of subordinate officers to constitute such physical strength as might enforce a task upon discontented and able-bodied men, the trouble and danger of repression and punishment are not inconsiderable. Further, where the distances from the neighbouring unions are great it is deemed harsh so to detain a wayfarer and so to exhaust his strength as to disable him from arriving in good time at a further stage, and thus to endanger his return. Hence, even where a resolution has been passed, it is often left unapplied to wayfarers who are willing to quit the workhouse early without demanding breakfast, for it is found that tramps are more easily got rid of where there is a task suspended over them *in terrorem*, and enforced only upon uncomplaisant claimants.

There is much discordancy in the opinions which I have received from clerks to guardians respecting the utility of employing the police as assistants in the relief of Vagrants. Such employment in my opinion is generally beneficial, because it tends to assimilate the kind and expense of relief in different unions. It does not discourage applications so much, and police officers cannot discriminate between applicants to such an extent as was at first anticipated. To make a distinction between destitute tramps on the ground of presumed better or worse desert

cannot long be satisfactorily attempted, at least in rural unions. By degrees the tramp who cannot be proved to have the means of support, and who is willing to accept the unluxurious relief on the conditions offered gets a ticket for lodging, or for lodging and food, from a policeman perhaps more readily than from an ordinary relieving officer, who may feel constrained to consult the inclinations of guardians of the sterner sort. For this reason the guardians in a few cases, after trying the police, have reverted to the ancient machinery of relief. Where a superintendent or other officer of police has been appointed assistant relieving officer, the practice, I believe, has usually been that he leaves at the police station signed tickets for relief, where applications may be made in his absence to the policeman on duty. The assistant relieving officer is not always a paid officer of the guardians, and his power to give medical and other extraordinary relief in case of necessity has not always been fully defined and understood. If police intervention under the direction of the guardians were made general, I think that further regulation for the sake of adjusting power and responsibility would be desirable.

The difference in relief given in different unions is even greater than would appear by the statement I have made. The quality of the food, where any is given, the severity of the task, where any is exacted, and the kind of sleeping accommodation in Vagrant wards vary to an extent which my table does not show. If bed clothes are provided, they are often found in a dirty state and infested with vermin after the departure of the occupants; and I am often told that the preservation of cleanliness in Vagrant wards is impossible. The least objectionable mode of bedding tramps in ordinary use seems to be inclined boards with a sufficiency of straw, and a supply of rugs in severe weather.

Among the tramping community are many wretched beings who could not, if they would, take any effective step to escape from their condition. Outcasts from society by their crimes or vices, or unpleasant ways, or unbearable temper, they would seek in vain for employment. Who would willingly employ a filthy jail-bird or a ragged deserter? What respectable labourer would willingly work with such a vagabond? Some tramps have been from birth in the lowest grade, and have never been able to surmount the obstacles arising from early vicious association, or ignorance, or inferior bodily or mental organization. They exhibit an excessive misery and squalor which inspire disgust rather than compassion. There are men who sympathize strongly with the "deserving poor," whose habits and feelings they understand. There are men who are disposed to give from the poor rates to able-bodied labourers whose families they know, and whose struggles they witness, an amount of eleemosynary aid which is inconsistent with more enlightened benevolence. But very rarely indeed are any such liberal and comfortable food and lodging provided in tramp wards as would make a tramp's relief an object of desire to the lowest of the stationary poor. Undue sympathy with the houseless scamp is not at this time and in this country a

common failing, at least according to my experience. I have heard (not without protest) magistrates at boards of guardians direct relieving officers to give no relief to able-bodied tramps, to take the risk of their perishing, if sent away; and I have heard of several instances where tramps so repelled have committed depredations (as taking food from a shop, breaking a window, tearing clothes, and even setting fire to a rick) for the sake of vengeance on a hostile community or to obtain the shelter of a prison. This repellent system has generally been so far successful as to divert destitute wanderers from the unions where it is known to be in use; but I much doubt whether it seriously diminishes the general amount of Vagrancy, or affects the temptations to a strolling life which are operative on the minds of persons who have the option of maintaining themselves by steady industry. The average relief to tramps could scarcely be made more scanty and deterrent than it now ordinarily is without such harshness as would lead to scandal. The risk which is now often incurred without leading to painful exposure would probably, if extended over a much larger surface, have so many unfortunate results as to occasion a revulsion of public feeling.

Under this system there is an excuse, if not a necessity, for mendicancy. *Il faut vivre* is the feeling of the most abject Vagrant. If not driven by desperation to fraud or violence, he must beg to sustain life. From what else is there any hope for that man trudging along the highway with limping gait, followed by that worn and disreputable looking woman, the temporary companion of his tramp? With his shabby, scanty, and unclean garments, not like a workman's, his downcast look and unhealthy complexion, he is lucky, if, driven from the workhouse and the relieving officer's door, he can extract on his way a crust of bread or a potato from the grudging and misgiving pity of the cottager, or a few pence from the passing carriage. Now it appears to me better that this excuse for begging should everywhere be done away, and that the most unamiable tramp should have the means of obtaining a modicum of assistance from public sources at a stage of destitution somewhat short of extreme urgency.

The want of uniformity in the treatment of tramps will continue as long as it is profitable to neglect the duty of relieving the destitute, and possible to throw the weight upon others. The expenses of suitable relief are not very onerous, but they are unwillingly incurred because they are bestowed on objects who are considered to have no especial claim on the pockets of the local ratepayers. I have come, after much hesitation, to the conclusion that the expense of relieving the wayfaring poor who apply for relief in a union, where they are not settled and have no home, should be diffused over an area far wider than the union.

I have, &c.

(Signed) JOHN T. GRAVES,

To the Right Hon. C. P. Villiers, M.P., Poor Law Inspector.
President of the Poor Law Board.

(A.)

SUMMARY OF UNIONS.

Where there are Vagrant Wards.	Where there are no Vagrant Wards.	Where a Task of Work is required.	Where there is no Task.	Where Food is given to Vagrants.	Where Food is not given.	Where the Police assist in the Relief of Vagrants.	Where the Police do not assist in their Relief.
(1.)	(2.)	(3.)	(4.)	(5.)	(6.)	(7.)	(8.)
46	22	39	29	59	9	47	21

(1.) This number includes the unions where the wards are separate from the union workhouse.

(3.) This includes those unions where a task of work is occasionally performed, though the guardians may not have passed a resolution under 5 & 6 Vict. c. 57. s. 5. In many cases a task of work is not enforced, if the Vagrant is willing to depart without breakfast.

(5.) In this number are included some unions where food is but seldom given, and where it is only given in cases of illness or urgent necessity, as well as those where it is usually or regularly given.

Where the "nature and quantity" of the food are not expressly mentioned in return (B.), the food (when any is given) may be assumed in ordinary cases to be bread only, and the quantity to be the weight allowed to the other pauper inmates by the dietary of the union. It is usually given in the evening to those only who arrive before the hour of closing the workhouse, and in the morning to such only of the able-bodied male Vagrants as are willing, if required, to do work in return for food.

(7.) The police officers who only inspect or search Vagrants, or give them tickets to take to the ordinary relieving officer, as well as those who have been appointed assistant relieving officers by the guardians, are set down as "assisting" in the relief of Vagrants.

In almost all cases where there are Vagrant wards, I have been positively informed by the masters of workhouses that they have been found "sufficient," and I do not remember any case where complaint has been made to me that they are insufficient for ordinary purposes. As the tramp wards are usually empty in those hours of the day when the inspector ordinarily visits a workhouse, the sufficiency or insufficiency, except in extreme cases, does not come under his personal cognizance. I have not sufficient data to answer the question satisfactorily. Different persons attach different limits to the vague term "sufficient." Definite statistical information, therefore, is desirable, and I do not yet possess the required information as to the dimensions, &c., of the wards, the number of Vagrants accommodated therein each night, and the number of Vagrants applying for relief from day to day. In most cases, probably, the *average* number of Vagrants who obtain orders for admission would not overcrowd the Vagrant wards, but the variation in the number of applicants from time to time is often very considerable, and I believe that many Vagrant wards in my district are occasionally overcrowded. When, in the annexed table (B.) there is no note as to the sufficiency or insufficiency of the Vagrant wards, I intend to signify that I have no reason to set them down as insufficient, though I hesitate to assert positively that they are sufficient. In some cases the size and general arrangements of the Vagrant wards leave no doubt in my mind that they are sufficient; in a very few cases they are so small that I believe them to be insufficient, and in others marked with a query, I have positive doubts of their sufficiency.

Cheltenham, 25th December 1865.

VAGRANCY.

REPORT OF ANDREW DOYLE, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

SIR,

Chester, 30th December 1865.

IN reply to your request communicated to me by Mr. Thornely, I beg to submit to you the annexed tabular statement, which contains detailed answers to your questions from the several unions in my district.

In 45 workhouses out of 58, the vagrant wards are reported as being "sufficient." In four they are reported as being defective, and in nine not sufficient.

There are 15 workhouses in which no task of work is prescribed for vagrants.

In the other workhouses work in return for relief is exacted, with more or less strictness. Stone breaking, oakum picking, and pumping are the chief employments.

The dietary for vagrants varies a good deal in the several workhouses. In some few no food is given.

In 30 unions police officers are employed as assistant relieving officers. The effect is reported as being generally satisfactory.

These are the general results exhibited by the returns from the several unions in this district.

Looking to the average number relieved in the workhouses it cannot be said, so far as regards numbers merely, that vagrancy is a very serious evil in this district. In other respects, however, it is, indeed, an evil far more serious than I think is usually supposed. As a general rule, in this district, the "casual ward" of a workhouse, so far from being the temporary refuge of deserving poor, is a place of rendezvous for thieves and prostitutes and other vagabonds of the lowest class, gangs of whom "work" allotted districts, and make their circuits with as much regularity as the Judges.

The chief constable of the city of Chester, who has devoted a good deal of attention to the system of casual relief, and who,

during the year ended 29th September last, relieved 5,000 casual poor, writing on the 2nd ultimo, says,—

"The public are totally unaware what class of persons apply for this kind of relief. Estimated roughly, I am decidedly of opinion that 75 per cent. of them *never* work, but spend their time in tramping from union to union. In fact, I have, at this moment, the names, or rather the nick-names, of between 30 and 40 men and women who are known as the 'Long Gang,' and who 'work' Cheshire and North Wales in pairs, visiting Liverpool when they get possession of anything that they cannot dispose of safely elsewhere. (You must understand that the most of those are thieves, robbing clothes-lines, stables, &c.)

"While I have been writing this, one of the 'Long Gang,' 'Connaught Tom,' has been brought in by a police officer, charged with stealing a web of cloth. He informed me that he is 'tired of the road,' and wants to be lagged (transported). He came here to-night to meet 'The Cure' another of the gang. He had ascertained from 'a writing on the wall' at the Nantwich vagrant ward (a common mode of communication with these people) that 'The Cure' had been there on the previous night, and intended to apply for a ticket to spend the Sunday here. I venture to say that out of the 5,000 relieved, not 5 per cent. were genuine cases of distress. The number is made up of professional tramps, who never work, but beg and steal, staying in the vagrant wards at night, or, in summer time, in the fields. Large numbers of discharged soldiers, 10 years men, present themselves, hulking fellows who never worked, and have almost invariably left the army in disgrace, the 'tail' being cut off their official discharge.

"The perfect system of communication among tramps is surprising. I have tested it, and find that about two days are sufficient to promulgate a new regulation, &c., among the fraternity. My first test was causing every male to be searched, and burning pipes and tobacco found upon them. Every professional tramp carries a favourite pipe, and, as a rule, has half an ounce of tobacco per day. After two or three nights not one of the applicants had either pipe or tobacco, having hidden those luxuries before entering the police office. The second test was searching for money, and with a like result."

To the same effect, is the evidence which I have received from almost every union in the district. I shall give this evidence somewhat in detail, as I think the question of the treatment of vagrancy should very much depend upon the general character and conduct of those persons who, under the present system, frequent the casual wards of union workhouses. In addition to the letters of the masters of workhouses and the police constables who act as assistant relieving officers, I shall give, as tending still further to illustrate their character, copies of notices written by the tramps themselves upon the walls or doors of the vagrant wards of nearly all the workhouses in the district.

The master of the Atcham workhouse says,—

"The class of persons we receive here as vagrants are, generally speaking, men who hardly ever do any sort of work, but who go about the country from workhouse to workhouse, beg, intimidate, or steal, as opportunity offers. As an illustration, I will mention a case of two strong men, well known both to the police and myself; these men had between two and three pounds of food each when searched on their admission. I remarked to them that theirs seemed to be a profitable occupation; their reply was, 'we are the men to make it so, for if we cannot get it by fair means we will have it by foul; if we cannot beg we steal.' They are, in fact, I believe, so vicious and low that they frustrate the humane intention of the law, because destitute respectable artisans and labourers who may be in search of employment, and who are, therefore, fairly entitled to a night's lodging, supper, and breakfast, would, I think, put up with any inconvenience rather than apply for that assistance which the Poor Law entitles them to. I will cite a case, by way of illustra-

tion :—I, one evening, admitted eight of the disreputable class, and one who called himself a moulder, and who had the appearance of a respectable mechanic. In the morning, when I gave them the various articles I had taken from them the previous evening, I handed to one a set of moulder's tools ; the moulder immediately recognized them ; ' these,' said he, ' belong to my mate ; ' they were taken out of his pockets last night in the Whitchurch tramp ward.' The remark at once called forth a shower of threats and abuse from the whole of the others, and had it not been that a policeman was close at hand, the man would most probably have received very severe treatment from them."

The master of the Bangor and Beaumaris workhouse, in a letter dated 6th December 1865, states,—

" About a fourth of the vagrants are what could be termed rogues and vagabonds, and would not care what they would do whenever they could get the opportunity. From June 1863 to December 1864 ten vagrants were convicted for tearing their clothes."

The master of the Great Boughton workhouse writes,—

" 24th November 1865.—With respect to the character of the vagrants, I am of opinion at least 18 out of every 20 are either thieves, or have fully given themselves up to a life of idleness and vagrancy. We have some every week who admit they have been in gaol. I frequently hear them about 9 o'clock at night singing obscene songs, cursing and swearing, or relating some begging adventure. They are sometimes so noisy I am obliged to threaten sending for the police. Several have been very abusive in the morning ; some of them have threatened to strike me when letting them out. One man recently threatened if he caught me out of the workhouse premises he would rip up my bowels, because I kept him to do his task of work."

" 7th November 1864.—George Stanley, aged 29, tore his own clothing to shreds ; he was taken before the magistrates and gave his name Thomas White. He was recognized by one of the city police as passing in a third name, and also being one of a company suspected of being thieves. He was sent to prison for one month hard labour."

" 8th June 1865.—Henry Davies, aged 30, and William Duffin, aged 21, had hid a sum of money near the front entrance of the workhouse before applying for lodgings, which was found by the policeman and me after we had admitted them ; we left it there and watched the place next morning ; they came for it after their discharge ; we apprehended them and took them before a magistrate, who sent them to prison 21 days each, the money found upon them to pay the expenses."

From the Bridgnorth Union the master writes,—

" Four vagrants admitted into the Bridgnorth workhouse were committed for breaking 72 small squares of glass, one iron window frame, cut up three bed ticks and all the coverings of the three beds, which were nearly new, and broke the lock off the door of the tramp room. The magistrates sent them to gaol for three weeks, and they were much disappointed in not having three months imprisonment. They are men that do not want work, but get their living by tramping from one union to another."

The master of the workhouse of the Burton-upon-Trent writes,—

" 27th November 1865.—My opinion of the character of the vagrants is, that about two-thirds of them are regular beggars, very coarse in their manner and language, many apparently uneducated, very badly clothed, and appear to have done no work for a long time."

From the Carnarvon Union the master writes,—

" 28th November 1865.—The majority of the vagrants relieved are those who will not work, but prefer begging and tramping about the country and applying for tickets to go to the workhouses for nights' lodgings. I know of three or four who come to this workhouse regularly every two or three months. As

to cases of insubordination, I have only to report those cases of tearing their own clothes, of which eight cases occurred during the last 12 months; they were all taken before the magistrates and convicted; two were sent to gaol for one month each, three for 21 days, and three for seven days."

From the Cheadle Union the master writes,—

"28th November 1865.—They [the vagrants] are most of them young men, and a class of idle men that never seek after work, but tramp about from one place to another."

The master of the Chester Incorporation, writing 5th December 1865, says that he fully concurs in the opinion of the superintendent of police, and states,—

"We do not often have cases of insubordination; occasionally a man will tear up his clothes, sometimes with the object of getting committed for a month or six weeks, and only on his refusing to take the cast-off clothing offered to him do I call in the aid of the police. The last case I had we had to use force to get the clothes on, and while in the police cells he tore them up till there was scarcely a piece as large as my hand, and when I saw him in the cell he was quite naked. He was on the following week committed for three months."

The master of the Church Stretton workhouse is of opinion,—

"That vagrants should be altogether in charge of the police, and not one, except cases of sickness, should be allowed to enter the union workhouse."

The master of the Cleobury Mortimer Union workhouse, writing 30th November 1865, says,—

"The greater part of them [vagrants] I find, from experience, too idle to work and get an honest living. They prefer travelling about from town to town; begging and stealing chiefly occupy their time, making regular circuits of the country. I have had the same parties five or six times in the course of a year, giving a different name almost every time, and have frequently had occasion to take them before a magistrate, either for disorderly conduct, refusing to work, or destroying their own clothing in hopes to get better."

The following letter is from the master of the workhouse of the Congleton Union,—

"Sir,

17th December 1865.

"DURING the several years I have filled the office of master of a workhouse I have found it a most difficult task to manage vagrants. The present system of relieving them, in my opinion, is very defective. I think it plain, if they are to be relieved in workhouses at all, there should be one uniform system adopted in every union, simply because, if in one place they are under proper supervision, and in another no test whatever is applied, so certainly will vagrancy increase. In this workhouse the increase of vagrancy for the two years prior to last May was immense. The house is situated two miles from any police station, as many workhouses are; we search each person on presenting the order, and after being admitted into the ward we are subject to the foulest language, and when we let them out in the morning we meet with the same reception. The plan is, that we adopt, they have no food till they have broken two hundred weight of stones which many refuse to do, and will not leave the premises without having food. I and the porter have frequently had stones thrown at our heads, and been struck at with the most deadly weapons. If we send for the police, as I have said before, they are too far off, so they escape before they arrive. There is scarcely a week passes but we are in danger of our lives from their violence. They make the vagrant wards the receptacle of all kinds of filth, dirt, and contagious diseases. I think it high time that some vigorous steps should be taken to check the evil of relieving vagrants.

"Pardon me, Sir, for stating my views in order to suppress vagrancy. All persons applying for temporary relief should be placed under the entire super-

vision of the police. It is notorious that the profession of mendicancy has a great abhorrence to confront a police officer. In order to accomplish this, it would require a stoneyard, vagrant wards, bath room, and a wayfarer's ward. The wayfarer then (I mean a man who is seeking employment and would work if he could obtain it) would have a chance of having a comfortable night's shelter without mixing with the vagrants. In every union that I am acquainted with, where the police give orders for vagrants' admission to the houses there is a considerable decrease. In our own union the police have given orders since the 1st of last May; during that time vagrancy has decreased nearly 50 per cent."

From Corwen the master writes,—

"*24th November 1865.*—As regards my opinion of their [vagrants] character, I firmly believe most part of them are idle, and scamping from one place to another, and then come back again, so that it is not once or twice the same persons are relieved."

The master of the Dolgelly workhouse writes,—

"*24th November 1865.*—The police and myself are of opinion that there is not one out of every dozen appearing like working men. They come across the country with the intention of doing mischief; they are nearly all able-bodied, and it is those sort of men that fill the county gaol here at present."

The master of the Ellesmere workhouse, in a letter dated 2nd December 1865, states,—

"As to their [vagrants] characters, I am clearly of opinion that a very great majority of the males are thorough idle scamps, and the females generally appear to be disreputable characters, both sexes giving the most absurd names and routes. For instance, on the 13th of May last, three young fellows gave the names of George Fordham, Jemmy Grimshaw, and Luke Snowdon, three of the most noted jockeys of the day, and whom they afterwards acknowledged as having seen riding at Chester races during the week. Two young vagrants, who slept here on the 27th of August last, are now awaiting their trial in Shrewsbury gaol for setting fire to a hay stack, close to this town, on the next day. One of them, Thomas Smith, aged 19, proved to be the same person whom I got committed to gaol for a month's hard labour, only on the 2nd of May last, for tearing up his clothes."

In a letter dated 22nd December 1865, the master of the Festiniog workhouse states,—

"My opinion of their character is that they are idle, will not work when plenty of work is to be had. I know great many of them that make a life of it by going from one workhouse to another. I have had several committed from here to gaol for tearing up their clothes."

"*27th November 1865.*—We have had," says the master of the workhouse of the Hawarden Union, "the windows broken both in front of the house and in the vagrant wards."

The master of the workhouse of the Leek Union writes,—

"I beg to state my opinion that about two-thirds of the number of males are idle youths and young men who pretend to be in search of employment, but who really do not want to obtain work. I find that many of them have been regularly admitted inmates of workhouses, and disliking the discipline and employment they meet with there, they leave and take to tramping about the country, living by begging in the daytime, and trusting to getting shelter for the night in the tramp wards of workhouses. These seldom have any food at our workhouse, for they prefer going away again without food in order to avoid the two hours work required of them if they demand and have supper and breakfast. A few of them will demand food on a Saturday evening and Sunday morning, knowing that they cannot be set to work on the Sabbath."

The master of the workhouse of the Llanfyllin Union writes,—

"28th November 1865.—The vagrants are generally strong and healthy, able for any work, but of an unsettled disposition; much rather beg their bread; and it often happens that those very class are sent to our county prisons for house-breaking and thieving.

"Although food is allowed, many would much rather go without food than perform the task of work allotted."

From the Ludlow Union the master writes,—

"25th November 1865.—I feel confident that 80 per cent. of the vagrants relieved here are the most idle vagabonds this country can produce (with the exception of a few families that stay here in the hop-picking season)—men that have never done a day's work, and boast they do not intend to do one unless it be within the walls of a gaol."

In a letter dated 25th November 1865, the master of the workhouse of the Macclesfield Union says,—

"I beg to state that the opinion of the police officers as to the general character of the vagrants who apply to them for relief is, that they are persons of loose, improvident, and immoral habits, and many of them pickpockets and thieves, and I quite agree with the police in opinion generally, and am convinced that poor honest people going about simply in search of work are the exception."

The master of the workhouse of the Madely Union writes,—

"25th November 1865.—I beg to say that the police of this town are of opinion that the greater part of the vagrants who come before them are men who never want work, and make a trade of tramping the country, begging and stealing. They frequently see them in different public houses before they come to have their tickets signed. Often one of them waits a little distance away while the others go the police, then they (or he) comes back, takes care of what the other has while he goes. The police searched and signed the ticket for one a few days ago, and the next morning the same tramp changed a sovereign at a shop in the town. Some of them behave very badly; some few seem thankful for the bed and what little food is given them. Many of them spend a great part of the night in singing and dancing, and telling each other their adventures and the whereabouts of other acquaintances. They all go by slang names, and are known to each other by them."

From the Nantwich Union the master writes,—

"11th December 1865.—The vagrants relieved are of the ordinary class of wayfarers, professional beggars, and persons strolling about the country without any definite object in view."

The master of the workhouse of the Newcastle-under-Lyme Union says,—

"24th November 1865.—I generally find them to be the very worst of characters, being very abusive in their language and most insolent to those who have to attend them after admission."

From the master of the workhouse of the Newport (Salop) Union I received this letter,—

"28th November 1865.—The average age of the vagrants admitted into this house is about 30 years, and there are about as many youths under 20 as there are men above 40. Very few old men indeed, and still fewer old women; in fact we have but few women at all, and what we have are young ones, going about with the men as their wives, but no one who sees them can doubt that five out of six are prostitutes of the lowest class. The police are not employed by the guardians further than I have stated, but they often come up here with

their gazette, in which there are numbers of cases of different kinds of robbery advertised and attributed to tramps, and sometimes the supposed thieves are described, and also deserters from the army, and it has happened that the police have taken tramps from here from those descriptions. * * *

"My own opinion of tramps who come here for casual relief (founded upon experience) is that they are the most worthless and reckless class that I have any knowledge of, and that they are composed of thieves of every sort, deserters from the army, bad characters discharged from the army as such, runaway apprentices, and idle vagabonds of every kind who will not work, and prefer the vagabond life of a vagrant to any other. Of course there are exceptions to this. We sometimes do get poor men who are out of employ, and who would work if they had any to do, but if I put this class at one in ten of the tramps relieved here I am certain that I overrate their numbers. And now I will give you a few cases that will, I think, illustrate my opinion of them. I have already sent you copies of some of their writings on the doors, &c. of their wards here, which will give some idea of their recklessness, their being followers of vagrancy as a calling, and that some of them, at least, have been educated. That man who signs himself "Bow Street," writes a very good hand. The cases that I have had before the magistrates have chiefly been for tearing up their own clothes, and consequently have had to be clothed from the workhouse stores, and to prevent this I have for the last 12 months or more taken their outer clothes from them before going to bed, and stand by them while they dress in the morning, so that I have not had a case before the justices since October 1864. In 1862, 9th June, I took two men before them for refusing to work, and they were committed to gaol for 14 days. In January 1864 the same two men were admitted again into this house, and when taken to the pump in the morning they deliberately threw two blocks of wood through a window, smashing three squares of glass. They were sent to gaol again for 21 days, and I think it very likely they would think no more of the 21 than they did of the 14 days.

"19th September 1863.—I had two men who tore up their own clothes; we had to take them to the magistrate's residence, about two miles, and all the way they kept using the most blasphemous and obscene language imaginable, and declared that if they were convicted they would pull off the clothes that I had given them and go naked, and I believe they would have done so if they had not been handcuffed and well watched and guarded by the police. They were sent to gaol for 14 days.

"21st October 1863.—Four youths, ages about 17 and 18, tore up their clothes all but their neckerchiefs, and these they kept wearing round their necks. The police took them off, and found 1s. 9d. in copper monies concealed there; and when asked why they tore up their clothes, or why apply to the workhouse for lodgings when they had this money, they said they wished to go to gaol for a short term. They went for 21 days.

"22nd September 1864.—Two men tore up their clothes and were exceedingly abusive, using horrible language. One of them was branded on one side with letter D, and on the other side B C. He had been discharged from the army for deserting and bad character. The other also turned out to be a deserter—discovered to be so from an advertisement and description given of him in the 'Police Gazette'—and when accused of it, confessed it. The first was sent to gaol for 21 days, and the other 14, and then would be given up for deserting. I suppose.

"One night, the beginning of last winter, several tramps were admitted into this house. I knew most of them as regular vagrants, two of them especially. The next morning but one a police officer came here to inquire after two men who had set fire to, and burnt down entirely, a large stackyard about four miles from here, and from his description I at once knew them to be these two tramps. They were taken at Market Drayton, where they were in custody for tearing up their clothes. When charged with the arson they coolly confessed it, and gave as a reason that the farmer refused to give them alms when they went to his house to beg. At the commencement of this year four well-dressed youths came here for a night's lodging. They were sent by the police, who suspected there was something wrong about them, and upon inquiry being made it was

found that these lads had left a companion at a public house in the town with a quantity of workmen's tools, such as used by carpenters, turners, &c., and they turned out to be runaway apprentices from Smethwick, near Birmingham, and had taken the tools from the shops of their employers. The order I enclose, you will see, says, admit six casuals. I did admit them, and knew them all as vagrants who had been here many times, and one of them very lately. I told them if they would persist in coming here so often and so regularly I should be compelled to prosecute them as vagrants. Most of them were civil, but two were not, and the one who had been so recently said he could get no work that would *suit* him; he had been cadging for the last eight years and he found that that *did suit* him, and he did not intend to leave it off yet. And last night again I had four well-known tramps, one of them a youth of 18 years. I asked him how long he had been a vagrant. He said about three years, and that he at first commenced by running away from his apprenticeship, and that he had never done any regular work since he did run away."

The master of the Newtown and Llanidloes Union workhouse writes,—

"7th December 1865.—I have had six convicted for damaging the property of the guardians, and four for destroying their own clothes."

From the Northwich Union the master writes,—

"They are frequently committed to prison for destroying the bedding and their own clothing. This morning one has been sent to prison for 21 days for tearing up a bed cover to wrap his feet in."

The master of the workhouse of the Oswestry Incorporation writes,—

"7th December 1865.—As to the general character of vagrants coming under my notice, about half the number appear to be sunk to the lowest possible state of filth and degradation; they are seeking no employment and no final place of destination; they are impudent, and prefer 'no food' to work; they are generally however careful not to commit themselves until they are off the workhouse premises, when they threaten violence. Of the other half some few of them are decent labourers who are making their way to railroads and other public works; the remainder are men who work for a few days, and then spend all in dissipation. Of these last it requires but little foresight to discover that they are *slowly* but *certainly* drifting into confirmed vagrancy. After well considering the matter, I have arrived at the conclusion that three-fourths of the men who visit our wards are of idle and dissolute habits."

In a letter dated 27th November 1865, the master of the Runcorn workhouse says,—

"I personally come in contact with them, and have tried kindness and persuasion they have only abused. They are invariably an idle, scamping set; would sooner in many cases starve than work. They have on many, very many occasions gone out without their breakfast before they would work for it when they had the opportunities to do so.

"March 1862.—John Low, aged about 30, was taken before a magistrate for refusing to pick his oakum. While in the court he threw an open clasp knife at me (stiletto fashion); I only saved myself by ducking behind the witness box; he then rushed out, seized the knife again, and was rushing at me, when he was secured by the police.

"November 1862.—Luke Sollinger (an able-bodied man) committed for breaking windows and door of vagrant ward.

"Soon after the above case 12 vagrants were committed to Knutsford for trial for setting the vagrant ward on fire. When asked their reasons by the magistrate, their excuse was 'because they had no fire.' When asked by the chairman of the Quarter Sessions what they had to say, they very coolly questioned the amount of damage committed. Several committed for tearing up their clothes. I had to send five miles one night for a police officer to quell a disturbance amongst themselves; two of the worst were sent to gaol for this.

"September 1864.—Thomas Hughes committed for wilful damage.

"The county police officer has come on several occasions between 9 and 10 at night to see if there was any that he "wanted." One he took got three years penal servitude; two others at different times for theft, and one deserter. There are several cases of abusive language and threats which are too numerous to mention."

In the Ruthin workhouse the master states,—

"There have been several cases of tearing their own clothes, three of whom I gave in charge of the police, and they were convicted."

The master of the workhouse of the Seisdon Union, writing on the 25th of November, 1865,—

"There are some able-bodied that seem to be going about the country for the sake of an idle life, and others seem very destitute. Four during the last year have destroyed their clothing, and were insolent when asked the reason for doing so."

The master of the Shiffnal workhouse writes,—

"I beg to state that nearly all the tramps relieved in the wards of this house are able-bodied males between the ages of 19 and 45; very few above that last stated. They are generally covered with filthy rags, without shirt, stocking, or shoes. Many have the itch, and a great proportion upon being searched on admission have concealed about them provisions sufficient for some days. The same person frequently obtains orders for admission under different names, and not unfrequently, from want of memory or other cause, gives on his admission a name different to that given to the relieving officer not an hour before. They sometimes obtain orders from the relieving officer between 6 and 7 o'clock, get same countersigned by the police constable, and then stop at public houses in the town till between 11 and 12, when they come to the workhouse and disturb the inmates by violently shouting and kicking at the outer doors. The early part of the night in the ward is spent in giving each other an account of the previous day's route, frands, and success, inquiring after companions, and repeating obscene and disgusting tales and songs. That some have received a liberal education or are possessed of great natural gifts is evident from some good drawings sketched with pencil upon the walls of the ward, or verses nicely written, but on the most obscene subjects.

"Occasionally destitute wayfarers are admitted, who when they have been in the ward a short time will make complaints respecting the conversation of the other inmates, and beg to be allowed to leave, stating that they would prefer walking all night, or sleeping under ricks or hedges than be shut up with such characters. On many of these occasions I have had beds made for them in wards set apart for other purposes, or if those places have been occupied I have given them from my own funds money to procure a night's lodging elsewhere, and I have many times given money for that purpose to parties on presenting their orders without putting them in the ward, having, from their answers, cleanly appearance, and orderly behaviour, felt satisfied that they were not vagrants and feeling that it would be a hardship to place such in a room occupied by filthy, idle, dissipated characters, who seem to take a fiendish delight in urging their younger or more timid companions to greater wickedness.

"Between the months of May 1862 and March 1863 six destroyed their own clothes (or rags) in the ward, alleging as a reason for so doing that they were so filthy and lousy they could not live in them; these were afterwards dressed in garments made from old bags; four were taken before a magistrate and committed to prison; two were allowed to depart, owing to a difficulty of finding a justice resident in the district to get them convicted; 23 others were convicted of refusing to perform the appointed task of work on the morning after admission. This number would have been trebled had all been given in custody for committing this offence. I endeavoured to select the leaders and those who persuaded their companions not to comply with the regulations; and three broke the windows of the ward.

D

"The petty sessions here are only held monthly, and in most of the above 30 cases I had to walk with the county constable nearly six miles to the residence of a magistrate. Upon several occasions after they were convicted they would laugh and say, 'Well, governor, if you have got us quoded we have 'caused you some trouble in doing it.'

"During the time occupied in stone-breaking they are insolent, and their conversation is of the worst kind. I have frequently at night and morning to call in the police constable, and during his stay their language is changed, but resumed upon his leaving; they generally complain that by being detained they are prevented from seeking work that day. I have several times told parties on being discharged where they could obtain employment, and the answer generally given is, 'You may go to hell and the work with you, we can do 'better without it; ' this is said when outside the doors.

"Parties who have been in the tramp ward are frequently taken into custody by the police within an hour after their discharge on charges of vagrancy.

"*February 1863.*—William Woodward and Thomas Kent after leaving the tramp ward set fire to a stack of hay in a field adjoining the workhouse garden, and went direct to the police station and stated what they had done.

"*August 1864.*—Two tramps set fire to the rick yard of Mr. Edwin Edwards, Brockton Grange, Sheriffhales, in this union, and were taken into custody in Market Drayton tramp ward the day after.

"*August 1865.*—Two tramps after leaving this tramp ward set fire to a large barley rick the property of Mr. Boulton of Lea farm, Albrighton, in this union.

"Two-thirds of them," says the master of the Stafford workhouse, "are a lazy, indolent, and vicious set of persons, hardened in every kind of vice and infamy, insomuch that when work is offered to them they refuse the offer and curse you for your pains. Their chief characteristic seems to be to lounge about the streets by day begging, and then spend what they can get in tobacco and beer, and finally resort to the different unions at night."

The master of the Stoke-upon-Trent workhouse writes,—

"My opinion as to the character of vagrants relieved in this workhouse is, that as a rule, they are a depraved lot of idle men, and, in the majority of instances, a class who tramp from place to place, leading an idle vagabond life. I form my opinion from the very unsatisfactory answers to the questions I put to them, from their appearance, and from the fact of their possessing such a general knowledge of other workhouses, which in most cases could only be acquired by having been inmates. I have made myself acquainted with these particulars from their conversation which I have heard, the tramp ward being near my room. Another reason in support of the above assertion is, that they are a filthy class of people, and make as much dirt and give as much trouble as they can, exercising an amount of precaution just sufficient to keep them out of the clutches of the law, as also from the bad language they make use of to each other when in bed in recounting their adventures to each other; also frequently they forget the name they gave at the police office, which goes to prove that they are in the habit of travelling under false names; also from the fact of their having torn their clothes so that they might be furnished with new ones; but in such cases I have fitted them with the worst clothes that I could find from among our old clothes; also from the great amount of slang expressions used in their talk, and their apparent acquaintanceship with the gaol, having heard them often talk of the prison; and they are also frequently dissatisfied with what they receive to eat, stating that at so and so they get so much; and I believe that a many of them are practical beggars, for I have several times seen them, after they have left our place in the morning, begging from door to door, and they have often brought a wallet full of provisions into the house with them. With regard to the female tramps, I have every reason to believe that as a general rule they are prostitutes of the lowest class."

The master of the workhouse of the Walsall Union writes,—

"The great majority of vagrants relieved here are professional tramps who hate work, and will not do it if there be any possible way of escaping it. I

may mention an occurrence which took place at this workhouse. *Eleven* strong able-bodied young men, aged from 19 to 26 years, were admitted for the night upon the condition that in return for food and lodging supplied to them they should each pick 1 lb. of oakum before leaving in the morning, but when the appointed task was given to them they one and all persistently refused to perform it; remonstrance was useless, and they were at once handed over to the police, and sentenced by the justices to three weeks imprisonment with hard labour.

"The following illustrations came under my own observation, and may be taken as fair specimens of the majority of the men.

"A short time ago a strong healthy young man, aged 24 years, applied to me for a night's lodging, stating that he came from Dudley that day (a distance of eight miles). On being asked why he did not work for his living, he said, '*I don't like work, or those who put me to it,*' and laughingly added, '*I never mean to work if I can help it.*' Whereupon I told him that this house was never intended for such a scoundrel, and turned him out.

"Another one, aged 40, a strong man, when I questioned him, and made him turn his pockets out, said I was very particular, and that he had never before been subjected to such treatment, and he would rather leave than submit to it. His general appearance, and the contents of his pockets, clearly indicated that he was an old hand.

"On Monday last the porter called my attention to two applicants, young men about 22 years of age. I proceeded to question one of them, and made him empty his pockets; he turned out sufficient good meat (cooked and uncooked) for four or five men's dinners, together with plenty of *good* bread and sundries. As the porter told me he had been here before I ordered him to be turned out. When the door was opened for his departure his companion ran away without stopping to be questioned or anything else. As they were going away one of them said my porter was like his brother at Derby workhouse. [Porter's brother is porter at Derby.] I have many times listened at the tramp ward doors to overhear their conversation. At odd times I heard as follows:—'*How did you get in, Bill?*' '*Oh, I told the b——y gaffer that I walked from Stone to-day; he said he didn't believe me, but he let me in.*' I heard another say, himself and so and so stole a loaf out of a baker's shop at Abergavenny, and how they knocked the '*Bobby*' down and got away. I heard another say that he would tell them a '*stunning*' workhouse for a good supper and breakfast. '*Much Wenlock (Madeley), lads, that's the place.*' Another says, '*I'll tell you a house always good for twopence.*' '*Do you know that big white house on the right-hand side as you go into Lichfield?*' '*Yes.*' '*Well, then, I have had it there many a time, and I know it's always good for it.*' Another said Dudley workhouse was the worst place for skilley that he ever was at, &c., &c.

"I consider the generality of tramps," says the master of the Wem workhouse, "to be idle vagabonds, travelling from town to town to see what is to be seen, and begging their food at the houses as they go along; in fact, too idle to work. When the present tramp wards were building there came two young men. We gave them a night's lodging. In the morning they told me that they were quite destitute, and would be glad to get some work. One had neither coat nor shirt; the other neither shoes, stockings, nor shirt. I was very sorry for them, and I spoke to the contractor, and he agreed to find them work, but they said they could not work as they were so short of clothing. I gave them some of my old clothes; they went to work; one remained about nine days, till the pay-day night, and then disappeared; the other about six weeks, when he said the work was too hard, and he must try to find an easier job. Another time there came a young woman; she was put into the vagrant ward. A short time after came a young man; he inquired if a young woman had been put up; the porter said, '*Yes;*' he said, '*Where is she?*' the porter replied, '*Up stairs;*' he said, '*I am going to sleep with her;*' the porter said, '*I am sure you are not;*' he said, '*I shall,*' and was impertinent, and I was fetched. I spoke to him, and told him I could not allow anything of the kind. He was very abusive, and said he would have his 3d., as he gave her 3d. before she came in to sleep with her. I sent for the policeman, but he left before the policeman came. Almost all tramps are filthy, dirty, and covered with

vermin. They get so dirty that they cannot wear their clothing any longer, so go into the tramp wards, and in the course of the night tear up their clothing; this has occurred many times here. The other evening (and this has happened several times) there came a vagrant; he was shown into the vagrant wards; he said, 'Is this the place I am going to sleep;' the porter said, 'Yes;' he said, 'Then go to hell, and sleep there yourself,' and so left.

"Also, there was brought here by a gentleman, a vagrant who said he was blind; he was put into the vagrant ward. Supper was taken to him; in the morning, breakfast; he left the workhouse alone, not requiring any assistance; after he left we found the supper thrown under the bed, and the breakfast left. We are often told by vagrants that they will not eat our food, as they can get better along the road; and they often bring as much food as would be sufficient to last two or three days, and leave a good deal strewed about the floor of the wards. And often in giving their names make use of some vulgar expression, and say, that is my name. One man, sometime ago, did so. I went to him and said, 'This is not your name;' he said, 'How do you know?' I said, 'I am sure that cannot be any person's name;' he said, 'It is mine;' I said, 'it cannot be;' he said, 'You are a liar, and I will give you a smack in the mouth.'

"A great many of the tramps that come here swear most fearfully; only tell them of something that they may have done wrong, and then you get your eyes and limbs cursed fearfully. I have stood at the door after locking up tramps, and have many times heard them telling where they have called at that day, and saying, you must take care when you go, there (describing the house) is a large dog; also, at another place, you will get plenty to eat and to bring away; but don't go to such a place, you will get nothing; so that, generally, the places are marked out, which is good and which is bad; also, saying they are going to such places, to the races, and stating what arrangements they have made with others to meet at certain places. A woman came here about three weeks since, so drunk that she could scarcely walk, and three children; she swore most dreadfully."

The master of West Bromwich workhouse has sent me the following copy of a police report,—

"All Saint's Church, West Bromwich, was broken into by two men, Michael Stanton and James Doody, who stole therefrom the altar service and other things; the same night they had obtained a ticket for the tramp wards in the West Bromwich workhouse; when caught, they were again applying for tickets to the same tramp wards. Michael Stanton has served two years in prison for breaking into the stable of this workhouse and stealing the brasses from the weighing machine.

"Two girls committed a robbery in Dudley market, who made their way direct from there, and obtained tickets into our tramp ward. They were traced by the Dudley police, and taken into custody a few minutes after their admission."

In a letter from the master of the workhouse of the Wolstanton and Burslem Union, he states,—

"It is now made a trade of by the idle, the worthless, and the abandoned of both sexes. I have heard them say repeatedly that whilst they could get two meals per day they would not work. I have often taken the examination of a couple of young persons separately who professed to be man and wife, * * * and have found their statements a tissue of untruths. I have then told them of the inaccuracies, when they have often frankly admitted that they were not married.

"As a rule, I find the vagrants not of the *honest* artisan or labouring class, but a sort of people who seem to trade wholly upon the too easy system of relief, and the begging and plundering of the benevolent. * * *

"The water-closet has been twice partially destroyed, and has not been observed until after they were gone away. Their habits, whilst here, are filthy."

The master of the Wolverhampton workhouse is of opinion—

“That a large proportion of the males are young men from 17 to 23 or 24 years of age, who are quite able to get their own living at trades or labour which they well know, but are too lazy to work. * * *

“The tearing up of their own clothes is very much on the increase.”

The master of Wrexham workhouse, in a letter dated 24th November 1865, writes,—

“For low cunning, outward immoral conduct, obscene language, and, in many cases, barefaced lying and stealing, I don't think for a moment that vagrants, in general, are to be surpassed by the most depraved outcasts of the metropolis.

“For the last 10 years spent in workhouses in England, I have noticed 40 persons, male and female, able-bodied, who have wholly and entirely spent their time in prison and the workhouses where I have lived, some of whom have been in prison no less than 45 times; these are principally men who will tramp the country for a time, and then go to the union, and if not there, commit some breach of the law and be sent to prison.

“The above opinion has been further impressed upon my mind since I came to Wrexham, for I have noticed men, to whom I could swear as to their identity, come to the workhouse as vagrants no less than seven or eight times a month, though often under false names. When I have spoken to them about their conduct, the general replies I got are, ‘The law compels you to relieve us, and you dare not refuse; we know the law as well as you;’ or again, ‘I never did work, nor I never will, when I can get kept for nothing.’

“The following refractory cases have come under my own personal notice, and have been convicted by the magistrates within the last 12 months:—

“Two vagrants, ages 19 and 27, breaking a lock and assaulting the porter.

“Three vagrants, ages 20, 27, and 35; attempting to obtain an entrance into the female vagrant ward to another man's wife.

“Twelve vagrants tearing up their clothing.

“Eight vagrants tearing up part of clothing.

“Two were also sent to prison for breaking and burning part of the boards in the ward.

“Ten days ago two were apprehended, when applying for tickets, for a robbery, and the articles found upon them. A third, who was an accomplice, obtained a ticket for the union, but after getting his supper he went off, thereby escaping the hands of the police.”

The clerk of the Birkenhead Union writes,—

“I have communicated with our relieving officer, Mr. McNerney, on the subject of your inquiry respecting vagrancy,—his experience extends over a period of 16 years,—and have received from him a report, a copy of which I beg to enclose.

“We have, on various occasions, discussed the subject of vagrancy, as also the test usually applied with reference to them, and are of opinion that the test used in the generality of Poor Law Unions does not sufficiently meet the requirements of the case; that the test, as now applied, is not sufficiently stringent in its application, the result of which is, that instead of vagrancy being checked it is now fostered, the greatest portion of this class of paupers being professional tramps, who have no idea of procuring a livelihood by honest industry, but travel from town to town, without any definite object in view, begging their way as they go along, knowing, when other means fail, they can have recourse to the vagrant sheds of the union where they happen to alight, and the officers having charge of these establishments are only too glad to take them in, give them what they require, and thankful to see them depart quietly in the morning without applying any test.

“The vagrant wards of the union workhouses throughout the country are not only made the receptacle of the very lowest class of the community, including thieves, rogues, and vagabonds, but serve as a channel to contaminate

many honest deserving persons, whose misfortune obliges them to travel from home in search of employment, and who are compelled to make use of the wards for want of means."

The relieving officer of the Birkenhead Union writes,—

"The general character of the persons who apply for relief as vagrants is of the lowest description, indeed the exceptions are so few, and to any one fully acquainted with the class so easily discovered, that there is but little fear of confounding the one with the other. They are young and old unmarried persons of both sexes, who gain their living by any means but honest industry; in fact, they may be classed as follows:—

"Thieves on the look-out, low prostitutes, beggars of both sexes and all ages, hawkers of petty articles, such as watches, caps, laces, bead ornaments, steel pens, writing paper (or anything which will serve as a pretence to approach a house, to find what can be obtained by fair or foul means), and begging letter writers, smashers, ballad singers, travelling tinkers, china menders, umbrella repairers, either of which description of business can be much more profitably carried on if the person be aged, lame, or can gracefully assume to be so, or be successful in just keeping alive a delicate child, because greater sympathy will be thereby excited.

"The great majority are young men and women from 16 to 27 years of age, unmarried, but travelling together as man and wife. It does not require long acquaintance to form this connexion, and it is as soon broken up, their only home being a prison, a vagrant shed, or a night lodging house; in this way they travel from town to town the kingdom over, staging it from workhouse to workhouse, calculating as certainly on the provisions which the law has made for them, as if they had the means at their own disposal.

"They are, generally, stout able-bodied persons, fit to earn a livelihood for themselves, but seem to have acquired a most uncontrollable propensity for wandering without an object that they can define. Naked, as regards clothing, filthy in their person, and suffering rather than labour.

"They are reckless as to their future, and without regard for the opinions of others. The prison has no terrors for them, and relief is demanded as something they have a right to command.

"An officer is in considerable danger who ventures to question the propriety of their conduct, indeed this is seldom done, as I feel satisfied from visits to numerous workhouses. The class seems to be treated as hopeless, and every one seems inclined to make the best they can of them for the night they have them, congratulating themselves if they can get quietly quit of them, instead of devising a stringent test to correct the evil."

The police authorities, in the reports which I have received from them, concur generally in the opinions expressed by the workhouse officers.

The assistant relieving officer of the Great Boughton Union (a police constable of the Cheshire constabulary) says,—

"In my opinion the majority are persons who have given themselves up to a life of vagrancy, or are out of work from either drink or idleness."

The Constable who acts as assistant relieving officer in the Congleton Union writes,—

"*Constabulary Station, Sandbach, 27th November 1865.*—Seventy per cent. who apply to me for relief are able-bodied, from 16 to 35 or 40 years of age, and are of a class I may call confirmed vagrants; and on searching them I generally find about 1½d. in money, a good supply of bread, cheese, and other eatables, tobacco, one or two knives, constructed so as they could easily be used for housebreaking, a memorandum book, which contains a list of the principal towns, unions, &c. which they travel through, and the names of friends, low lodging-house keepers, whose houses they frequent; and on one vagrant who I searched a few weeks since, I found entered in his book the names of all the principal workhouses from Wakefield, via Sheffield, Derby, Rugby, to London,

returning via Peterboro', Northampton, Stone Arclid, Knutsford, Warrington, Bolton, and York. A many of them spend the money they obtain during the day (to less than will pay their lodgings) before they apply for relief, so that I can have no ground for refusing them a ticket for the night."

Mr. Green, another assistant relieving officer in the Congleton Union, writes,—

"Nearly half the vagrants who have applied to me for relief are professional tramps of the worst class, and are chiefly from 15 to 45 years of age, and on searching them I find them well supplied with knives, pipes, tobacco, and victuals, but I never find more than 1½d. in money on any of them; they always take care to spend it in tobacco or drink before they make an application to me."

The police officer at Corwen states,—

"According to my opinion about two-thirds of them are idle and disorderly persons wandering abroad; their age is at an average of 18 to 35. Some of them appear to me to be very destitute, hardly any clothes to cover their nakedness, and full of vermin. Several of the applicants have been taken here upon different charges, as house-breaking, larcenies, malicious damages, and also for having money in their possession when applying for tickets."

The superintendent of police who acts as assistant relieving officer in the Ludlow Union writes,—

"Respecting the general character of the vagrants who apply to me for tickets of admission to the Union House, I must say that 90 per cent. consist of that class of tramps who go wandering from town to town under the pretence of looking for work, but praying at the same time *'that they may never find any.'* Their route is invariably from Liverpool to Cardiff or Swansea and back. Generally when going three together they send one of the number for a "ticket" to ascertain what kind of lodging they may expect to find at the union, the remainder of them stand about the streets; if their companion does not return they then call for a ticket and follow him. If he returns and reports unfavourably of the tramp ward, and finds some work for him to do in the morning, the 'ticket' is torn up, and they 'tramp' on to the next village or town."

The clerk to the chief constable of Denbighshire writes,—

"I believe that with a few exceptions they are professional tramps. Many of them who have obtained tickets of admission to the union have subsequently been apprehended and convicted of larceny, felony, &c., and I can confidently state that most of the crimes committed in this county have been done by vagrants."

Serjeant Joseph Sanders of the Staffordshire constabulary writes,—

"I beg to state that my opinion is that at least two-thirds of the persons sent by me to the tramp ward are persons who scarcely ever work, in fact they are confirmed vagabonds who subsist by begging and petty theft, and they tramp from town to town, sleeping in the different unions."

"My opinion is strengthened by their own statements. Many of them boastingly say 'Tis a many years since I worked, and it'll be more before I commence;' and many I have told where they could get employ, but upon inquiry I have found they have scarcely ever been to seek it, and, as a rule, if ever they began to work it would only be for a day or so, when they would decamp, taking every portable article they could lay their hands upon. They are frequently loaded with scraps of food, and numbers of them have to my knowledge obtained tickets at intervals during the past six and a half years. The remaining third are the men and boys seeking employ or going home, and women (with children) in search of their husbands."

Mr. Ellis Crisp, inspector of police, who is also assistant relieving officer in the Utoxeter Union, says,—

"I am of opinion that the majority of vagrants, although invariably say they are in search of work, are too idle to work, and give the preference to a vagrant life. I believe if it was made an offence against the law for vagrants to make repeated applications for relief at the same workhouse it would have a salutary effect."

D. C. C., Knight of the same force, writes,—

"The average age of vagrants admitted to the West Bromwich workhouse from 30th September 1864 to 29th September 1865, by tickets issued by the police as relieving officer for tramps, is 34 years.

"Tickets are not given to all who apply for them, but are refused to those who on being searched are found to have cash sufficient in their possession to pay for lodgings; neither are tickets given to those who are known to be professional tramps, or who apply while in a state of intoxication.

"Vagrants who know themselves to be 'wanted' do not apply to the police for tickets, but push on to those places where the police are not relieving officers for tramps. The character of professional tramps is very bad indeed, they beg all day, drink, steal, tell fortunes, and if possible obtain tickets for vagrant ward at night."

If confirmation were wanted of the truth of the representations contained in the preceding letters, as to the character and habits of the vagrant class, it is furnished by themselves in the notices which they usually leave behind them upon the walls and doors of the vagrant wards. These professional "tramps" or "cadgers" "work" particular districts, generally in couples, not unfrequently in small bands of three or four. For the information and guidance of their associates their visits are generally recorded, their destination indicated, and appointments made with their "pals." Here are some of the notices which I have had copied from the vagrant wards of different workhouses:—

"*Private notice.*—Saucy Harry and his moll will be at Chester to eat their Christmas dinner, when they hope Saucer and the fraternity will meet them at the union.—14th November 1865."

"*Notice to our pals.*—Bristol Jack and Burslem was here on the 15th of April, bound for Montgomeryshire for the summer season."

"*Notice to Long Cockney, or Cambridge, or any of the fraternity.*—Harry the Mark was here from Carmarthen, and if anybody of the Yorkshire tramps wishes to find him he is to be found in South Wales for the next three months.—17th August 1865."

"Spanish Jim, the b—— fool who robbed two poor b—— tramps in Clatterbridge union, was here on the—find it out."

"Taffy, the Sanctus, was here on the 28th of November 1865."

"Yankey Ben, with Hungerford Tom and Stockport Ginger. The oakum was tried to be burned here on 28th October by Messers John Whittington, Joseph Walker, Thos. Pickering, Jas. Hawthornwaite."

"The Flying Dutchman off to Brum for a summer cruise at the back doors or any other door."

"Cockney Harry and Lambeth bound for Brum for jolly rags."

"Beware of the Cheshire tramps, Spanish Jem, Kildare Jem, Dublin Dick, Navy Jack, Dick Graven, the shrewd Cheshire tramps."

"Wild Scoty the celebrated king of the cadgers, is in Newgate in London, going to be hanged by the neck till he is dead; this is a great fact.—Written by his mate."

"Never be ashamed of cadging. I was worth five hundred pounds once, and now I am glad to cadge for a penny or a piece of bread.—Lanky Tom."

"The Governor of Chester Castle orders all subalterns to meet at Stour-bridge."

"If ragtailed Soph stays here (Shiffnal) come on to Stafford."

"Wrexham is head-quarters now."

"Belfast Jack bound for head-quarters, Chester."

"The York Spinner, Dick Blazeaway, Lancashire Crab, Dublin Smasher, and Bob Curly called for one night on their road for the tip at Birmingham."

"Bow street, Long Macclesfield, Welsh Ned, Sailor Jack, the Islington Kid, Wakefield Charley, and an Irish cabinet maker were located here 10th September 1865."

Indications are frequently given as to the character of the relief afforded in different unions. The "bare-boards" of some vagrant wards are carefully distinguished from the "good padding" of others, and warnings are given, that in such and such unions the "tear-ups" will not get new suits. The bad character of the Congleton workhouse (near Sandbach) is thus recorded :—

"Oh Sandbach, thou art no catch,
For like heavy bread, a damned bad batch,
A nice new suit for all tear-ups,
And stones to crack for refractory pups."

The workhouse of the Seisdon Union (at Trysull) appears to be in rather better odour with the "fraternity,"

"Dry bread in the morning, ditto at night,
Keep up your pecker and make it all right.
Certainly the meals are paltry and mean,
But the beds are nice and clean ;
Men, don't tear these beds, sheets, or rugs,
For there are neither lice, fleas, or bugs
At this little clean union at Trysull.
But still at this place there is a drawback,
And now I will put you on the right track,
For I would as soon lodge here as in Piccadilly
If along with the bread they gave a drop of skilly,
At this little clean union at Trysull.
So I tell you again, treat this place with respect,
And instead of abusing, pray do it protect,
For to lodge here one night is certainly a treat,
At this little clean union at Trysull.—*Bow Street.*"

"Shaver here, bound for Salop to see the Rev. Henry Burton, a most benevolent minister of the Church of England, and may the devil fetch him soon."

[Mr. Burton, who is very correctly described, is also a magistrate well known amongst that class by his frequent convictions of them.]

"Dick Turpin off to Shrewsbury Races."

"Little Dick will be at York 6th July."

"If Dusty Jack calls, tell him to be at the Lord Mayor's Show."

"John Penny, the Hampshire man."

"Samuel Price, 18th July 1865."

"George Day and William Jackson, 7th November 1865, bound for Portmadoc."

(From a report in a local newspaper in the following week, it appears that "George Day" and "William Jackson," upon arriving at their destination, were captured and sent to gaol for robbery.)

- "Yankey Ben, 28th July 1865."
 "The Chester Navvy was here."
 "Bow Street, 1st May, going to Bangor to stay over Sunday—if they will only let me."
 "Beware of Ludlow—bare boards, no *chuck*."
 "Dear Foot, Spanish Jim, and his Nipper."
 "John Mathew Thompson."
 "Hamlet, Prince of Denmark, on a Sunday, 24th September 1865."
 "Thomas Noon was here on the 18th September 1865, bound for Cardiff."
 "Cocking Henry, from Yarmouth, was here the 29th of August, bound to Cheshire."
 "James Hughes *Rithin*, bound to *Holewell*."
 "Londonderry Ginger was here on the 7th October 1865, bound to Cardiff for the winter."
 "Brighton Joseph are bound for Chester."
 "Henry King Hilman was here 7th September 1865, bound for South Wales."
 "York Ned was here on the 23rd May 1865."
 "Southampton Jack, July 1865, bound for Carnarvonshire."
 "Belfast Dick was here on the 20th of July, bound for the South of Wales."
 "Happy Jack was here on the 3rd of July, bound for the Island of Hope."
 "Madman was here on the 3rd of June 1865, bound for Bangor."
 "Joe Withers, Soldier Tom, and the Corporal was here on the 29th March 1865, bound for the Lord knows where."
 "Poor hould Salford prig Frank, was here on the 20th June 1865, bound for the hill of good country, Wales, so no more at present from your poor Frank. Amen."
 "Spanish Jim and Bloody Sod."
 "Union and liberty, confusion to all fools."
 "Broomey George, 8th October 1865."
 "Belfast Jack, 8th of September 1865."
 "Yorkshire Curley was here on 7th October 1865."
 "Corporal and Duffy was here 30th November, bound for New found out, signed by Deerfoot, this 30th day of November 1865."
 "John Jones the blue dire, last night he gave us a good fire."
 "Dublin Dick was here on the 1st of October 1865."
 "Doctor Lank was here on the 12th October 1865."
 "Tom, the dirty —, he had better go back and pay for ——— it's at King Charlie."
 "Westminster Cockney, Dublin Dick, and Preston Lank was here on the 11th October, and is bound for Wales. Dublin Dick bound for Liverpool."
 "Browney will not have none of Prince Charles this winter, he is bound for Westmoreland and Cumberland, all padding cans in that country, no dirty rugs and board."
 "Cambridge will never come here again."
 "Boys look here, there therse Long Lank working at Warrington for two or three rags of clothes and taking the bread out of anothers mouth."
 "I dont know where to go to put over the time untill Christmass, but there is too dry service in Yorkshire to please me; I shall take my likeness to Bristol for the next 2 months.—*Westminster Cockney*."
 "Flowery Tommy was here on the 31st October 1865."
 "Pontefract Charley was here on the 25th 1865."
 "Spanish Jim on the road."
 "Yorkey Jim and Worcester Joe, 25th May 1865."
 "Harry the Mark was here on the 31st August 1865, bound for Hereford."
 "Joe Shining bound for Tarporley."
 "Oldham Lank was here on the 31st October 1865."
 "Yorkey Jim was here on the 11th October 1865, bound for Wales."
 "Yorkey Ned was here on the 2nd June 1865."
 "Dudley Fred and the Green one was here on 23rd October bound for port."
 "Nottingham Dad and Roderick was here 15th October bound for the city of Worcester."

"Salop Jack, Glo'ster Charlie and Emma, Lank Bill was here 16th October, bound for North Wales."

"Derby for 21st August."

"Belfast Jack was here 12th of September, bound to London. No more of Cheshire."

"Harry Heenan was here hafter beeing off of the rope twelve months. 13th September 1865."

"Cockney Henry Lambeth."

"Londonderry Ginger bound for Derby."

"The Yorshire Rodneys coming down into Cheshire to spoil the splendid county, after filling there b——y big guts with good cheese and bacon.—*Buttermilk.*"

"Bow Street and two other raggamuffins slept here on the night of 12th April, and was quite shocked at the clownish impudence of the old pauper at the lodge. The thundering old thief denied us a drink of water. So help me Bob."

"What noble institutions these Poor Law Unions are, and how they succour distress, open arms, yes, over the left, plenty of pump but little grub, and a nice warm breakfast in the morning. Don't you wish you may get it.—*Bow Street.*"

"Bishop's Castle Union Workhouse is a good place to be down in, but a damned bad lot of paupers about it."

"Bound for Wales on the 6th August 1863. My friend the monkey is coming very hard lately on some jolly rags. Swell mob.—*Polley Coffey, Esq.*"

"Before you close your eyes to sleep, boys, pray for fine weather,
For human hearts need sun as well as corn and oats;
For this rain of late, and at present too, is to bad altogether,
Considering the state of our old shoes and the thinness of our coats.
In this place there is a stove, but it is very seldom lighted,
In fact to make you comfortable they don't intend to try,
And the clerk of the weather office must surely be short-sighted,
Or he would see the benefit of sunny days as well as you or I.—
Bow Street, 16th August 1865."

"William May, bound for Stone, 16th May 1865."

"John King was here on the 2nd inst. bound for London, so passed to Chester and all the good houses in Chester to good neede. King, the Chester nipper, is gone to London, and Miss Beef's at A. Winter's to spend the winter in Chester (good to all)."—*E. Yeson.*

"Cocking was here on the Saturday night bound for Derby. Thomas of Yorkshire."

"Mickleham Mick, the wandering jockey,
Laid his nob on these boards the other night,
He is not now half so cockey
As when with Ben Anson's dumplings he did fight.—*Bow Street.*"

"Stafford, land of wax and capstones,
Heel balls, wax, and leather,
Where the broth is made of bones,
Where the cobblers face all weather,
Where the stove is seldom lighted,
Where the rugs are daily boxed,
Where the tramps are daily righted,
And out of their grub are foxed.—*Bow Street.*"

"A Dutchman came one night to lodge,
A beggar down to every dodge,
And if to tell the truth I must,
My eyes could'nt he excoavate a crust.—*Bow Street.*"

"Spanish Jim, 26th July 1865."

"Daniel Davies, clogger, from Swansea, South Wales, 26th July 1865."

"This bloody hole is lousey."

"Welsh Jack, 11th October 1865."

"Wolverhampton Nipper bound for London, 24th October 1865."

"Henry Anderson on the 10th of October, bound for Manchester, 1865."

"Saturday, 17th June, Bow Street, bound for Derbyshire, Amen—Wolverhampton Nipper and Belfast Jack was here 14th September 1868, bound for London."

"A little power, a little sway,
A sunbeam on a winter's day
Is all the rich and mighty have,
Between the cradle and the grave.—*Yankey Ben.*"

"Liverpool Jim. The Red Rover was here the 22nd of August, bound for London. Positively the last appearance of this celebrated charactor."

"Deerfoot, the celebrated runner, was here the 13th of September. No more Staffordshire for him."

"Hungerford Tom, bound for Derby; Yankey Ben, bound for Derby."

"The Dutchman was here on the 21st of September, ragged and lousey, padding the hoof, and getting the mange quite fast.—*The Dutchman.*"

"I should dearly like to marry if I could find
Any gay old donner suited to my mind.—*Jack Sheppard from York.*"

"Worcester Joe, Wiggin Tom, longing for a flowing tin of skilley, so that we may warm our belly."

"Long Macclesfield and Cockney was here on 16th of August 1865, bound for Brum."

"Cockney Harry, of Lambeth, bound for Brum, for jolly rags."

"This is a rum place for a fellow to come to for a night's lodging; you will never catch me here again.—*Old Bob Bridley, Oh!*"

"My unfortunate friends, pray look around,
And tell me for what is this place renowned;
The room is large, but the windows are small,
But that don't much matter at all at all.
A pint of skilly for your supper to drink;
But of sleep you cannot get a wink.
You may lay on the boards or the chilly floor,
About as warm as a North American shore.
The old bed is full of fleas all alive:
I killed in number about five times five.
They are not poor, but all thorough-bred,
And before morning you will wish they were all dead;
And by this and by that it plainly is clear,
This is the worst relief in all Staffordshire.—*Bow Street.*"

"It's an ill dog that don't deserve a crust
Is a maxim true and just,
So we must be dogs of the very worst breed,
When we don't receive what we greatly need;
For it's very unkind, nay, further cruel,
To give here merely a drop of thin gruel.
But let them keep it, we can do without it,
And I mean to let half the town know about it.—*Bow Street.*"

This "Bow Street," by the way, appears to be the laureate of cadgers. After a visit, I presume, to the neighbouring gaol of Stafford, he thus, upon the walls of the tramp ward of the Newport Union, records his impressions of—

" A PRISON.

" No sun, no moon,
 No morn, no noon,
 No sky, no earthly blue,
 No distant looking view,
 No road, no street,
 No t'other side the way,
 No dawn, no dusk,
 No proper time of day,
 No end to any row,
 No top to any steeple,
 No indication where to go,
 No sight of familiar people,
 No cheerfulness, no healthy ease,
 No butterflies,
 Nor yet no bees.—*Bow Street.*"

- " Liverpool Bill was here 4th October, bound for Derby."
- " Wolverhampton Nipper, bound for Derbyshire, 27th October."
- " Robin Hood, bound for Derby."
- " Lincoln Tom, here 16th November, and Babb, from Bursur."
- " Deerfoot was here 4th November, bound for Derby."
- " Dick Carr was here 22nd August, for Derby."
- " Coventry Bill was here, bound for London."

The general character and habits of the vagrants who frequent the casual wards of workhouses are, I believe, quite accurately represented in the preceding statements. "Vagrancy" in fact appears to have reverted pretty much to the state in which it was when the late Mr. Buller issued the circular of August 1848. The experience of 18 years fully confirms the view taken in that paper of the nature of the evil and of the means of suppressing it. Public charity is now as it was then, "extended to all who choose to ask for it." The casual wards are monopolised by "the habitual tramp or vagrant who simulates destitution," while "the most fitting objects of public charity are subjected to the discomforts that were intended to repel the worthless." Although "among all the unfortunate there are none whose destitution is more unquestionable and whose hard lot presents stronger claims to sympathy than the widow and orphan deprived at a distance from home of their natural supporter, and the honest artisan or labourer who is seeking the employment of which accidental circumstances have suddenly deprived him, yet, under the present system, such persons as these either share the discomfort, the filth, the turbulence, and the demoralizing fellowship of the thief, the mendicant, and the prostitute, who crowd the vagrant wards of the workhouses, or are compelled to brave the inclemency of the weather and the pains of hunger by reason of their unquerable aversion to such companionship." As it was then, so it is now. But the wise and humane suggestions of Mr. Buller struck at the root of the evil. Speaking of this district, I can confidently say that, through their adoption the vagrant wards of workhouses became what they were designed to be, places of temporary refuge for the deserving poor while professional

vagrancy, as a form of pauperism, was absolutely suppressed. In 20 unions in the district the total number of "casuals" relieved in the year 1848 (before Mr. Buller's minute came into operation) was 33,493. In the year 1849, immediately after its adoption, that number was reduced to 11,812. In reporting that very striking result to the Poor Law Board I was able to say,—

"I omitted no opportunity of inquiring whether it had been attained by the infliction of hardship upon the deserving poor. I am able to say that although I have made such inquiry, not only from the officers of the unions, but from all others from whom I should be likely to receive any information upon the subject, I have never yet heard of one authenticated case of hardship. On the contrary, I have myself seen many examples of the benefit derived by deserving poor from the adoption of measures which enable the officers to discriminate between them and the impostors with whom it is their misfortune to be so often confounded."—(*Report of Poor Law Board, Appendix, 1849, p. 117.*)

Mr. Pigott, who was at that time one of the most experienced inspectors of the Poor Law Board, in his report in 1849 observes,—

"Two opposite courses with reference to vagrants were pursued in 1847 and in 1849. In the former of these years every casual applicant for admission to a workhouse was admitted as a matter of course, receiving at least two meals in the workhouse; whereas in the latter it became a general practice to admit none but those who were suffering under sickness or evident destitution, or women with young children. The result of these different courses seems to confirm the truth of an opinion generally entertained by those who have to deal with this class of paupers, that, independently of the great aggregates of professional rogues and vagabonds of which London and other large towns are the homes and centres, there existed in each rural district a certain number of idle and dissolute persons, many of them brought up in workhouses, who systematically passed the summer months in wandering from union to union within a limited circuit, begging and committing petty depredations and finding each night certain food and shelter in the adjacent workhouses. So long as masters of workhouses believed that they were bound to admit all applicants, a great encouragement was afforded to idle persons to lead a vagabond life rather than to apply themselves to regular labour, and many young boys have no doubt been thus encouraged to run away from their masters or families.

"It does not appear that any injury has been inflicted upon the poor by the more stringent administration of this species of relief. On the contrary, *bona fide* wayfarers, poor persons going from one place to another for a legitimate object, if destitute, are now better treated than before was possible, when, from the numbers demanding admission after nightfall, no discrimination could be made, and thus persons of good character had often to pass the night in crowded wards with the most filthy and worthless of the community."

Instead of the system of indiscriminate relief which prevailed before 1848, and to which we have unhappily returned, there was substituted in accordance with the suggestions of Mr. Buller—

1. The refusal of relief to all young, able-bodied men, who, in the opinion of the relieving officers or the masters of workhouses, were not actually destitute.
2. The exacting of a task of work suitable to the capacity of the casual poor who were relieved.

3. The employment of police officers as assistant relieving officers.
4. Requiring the production of passes or certificates (except under exceptional circumstances) from all those who applied for relief as casual poor.

Of these remedies by far the most effectual was the systematic refusal of relief to professional tramps, young able-bodied men in good health. That class was very properly considered as not being fit subjects for Poor Law administration at all. The strict application of the rules laid down by Mr. Buller did not, however, very long survive his death; and even before you assumed your present office a different principle had come to prevail, and Poor Law officials considered themselves, as they do now, precluded from refusing relief to any applicant who alleges that he is destitute, and in whose possession there cannot be found sufficient money to pay for his lodging. This is now the recognized principle of Poor Law administration in dealing with what are termed the "casual poor." Nothing can be worse than the effect of it. It operates virtually as a refusal of relief to the really necessitous, and as a direct encouragement to professional vagrants. It has been thought that the exacting of a task of work and the employment of police constables as assistant relieving officers would effectually prevent applications for relief from all except the really destitute. Such, however, is not found to be the effect even in unions in which both tests are in operation together. Nor would it be possible under the present system to maintain a uniform system of relief with efficient tests in the vagrant wards of all workhouses. In about one-half of the unions in this district the average number of tramps relieved nightly (including women and children) does not exceed three. The cost of relieving them is not more than $1\frac{1}{2}d.$ or $2d.$ per head per night. The guardians and the officers find it much cheaper and much more convenient to give them the scanty relief with which they are satisfied, and let them go their way, than to provide stones or oakum, and to pay a task-master, without whose aid the labour test is merely make-believe. Even in those unions in which the labour test is rigidly enforced, in Wolverhampton, West Bromwich, and Walsall, for example, the number of vagrants is not below the average of the district. This no doubt would be in some degree accounted for by the character of these places, but it at least shows how inoperative is such an application of a labour test as a check upon this class. In smaller unions this test is merely nominal, and when urged to make it more efficient, guardians, who look simply to the cost, reply that "it is not worth while." Looking to the difficulty and expense of enforcing a labour test upon vagrants in the workhouses of small rural unions remote from police stations, and in which the master is the only male officer, this apathy of boards of guardians is not unnatural. I have known

several cases in small unions in which attempts have been made to enforce a labour test upon vagrants, and with only the result that they broke the hammers instead of the stones, and destroyed the oakum that was given them to pick.

Another difficulty in dealing with tramps upon a uniform system in workhouses, is found in the very inconvenient position of many of these establishments. There are several unions in this district so constituted that the workhouse is necessarily at a considerable distance from the chief town. In such unions a large proportion of the tramps are relieved by orders upon lodging houses. Thus in the Congleton Union, all tramps who apply in the Congleton district after a certain hour at night get a night's lodging, but no means are provided for setting them to work. During the year ending 29th September 1865, the number of tramps relieved in this way in that division of the Congleton Union was no less than 2,271.

Although a labour test is a perfectly efficient means of checking imposture, if you have to deal only with ordinary wayfarers, yet, from one cause or other, it breaks down when applied to professional tramps. It is true that for a brief period after it is introduced into a union, and while it is still novel, it appears to be successful, but it is soon found that all such means of repression are unavailing against this class. I cannot better illustrate this than by reproducing a letter which was addressed to me by one of the most efficient and intelligent officers in my district, Mr. Kemp, formerly master of the workhouse of the Wrexham Union.

"For a length of time we were in the practice of giving the tramps their supper and lodgings without any return being asked in the shape of work; but the breakfast in the morning was withheld until some little was done in the way of acknowledgment. At some times they had the option of going away without any breakfast, if they preferred that to working. The number of vagrants continuing to increase, the Board of Guardians passed a resolution, embodying a labour test, by which the tramps were to have their breakfast at the usual hour (at the same time as the other inmates of the house), and be detained for three hours and a half thereafter to work at the mill or break stones. When this alteration became known *on the road*, it for a short time operated in reducing the number, but not until gang after gang had been sent to gaol for refusing to work. The magistrates, in their places at the Board, complained of the expense to the county of those wholesale committals; and as this resistance to the labour test on the part of the tramps appeared more to arise from the fact of their being turned out on the road in the middle of the day, and with a comparatively empty stomach, having had their breakfast four hours previous, than to the mere labour test itself, it was ordered that they be put to work immediately after rising, and have their breakfast three hours and a half after, so that they thus left the house about 10 o'clock a.m., having just had a tolerable meal, and were in a comfortable plight for the day. The consequence of the above alteration was, as you will readily conceive, an almost immediate increase in the number of tramps. In about three weeks the number rose from about 70 to 120 per week. On this becoming apparent the matter was again reported to the Board, who instantly placed the order on its original footing, viz., that they (the tramps) be set to work three hours and a half *after breakfast*. This was, as before, resisted; but on the parties finding that the Bench and the Board were both determined to carry it out, they submitted, and for months we had no trouble on account of their refusing to work.

As these parties appeared, as it were, to have taken our terms, and their numbers began again to increase, the Board again took the whole question into full consideration, and after due deliberation it was determined to refuse all relief to the *systematic* vagrant; at the same time, the officers were instructed to use their best discretion to prevent any *casual poor person from suffering*, and hence, acting on this order in the spirit of good faith, while we (I mean the paid officers) have refused relief to any of the vagrant fraternity (for a fraternity they are, and are easily distinguished as such), we have given relief as usual to the other poor travellers who appeared to be on a *bond fide* errand.

"I then, Sir, as a matter of opinion, hold, that the last course above referred to is the best, and decidedly think that vagrants, as a class, deserve but little pity, and ought rather to be under the cognizance of the police than the poor-law officer. They are, for the most part, if not criminals, at least, on the verge of crime. The greater portion of them have never done a week's work consecutively in their lives, and, if they can help it, never intend to do one. From many who have been taken ill on their journey, and had, for a time, to remain in the house, I have ascertained that they have, since shortly after the passing of the new Poor Law, passed their time circling from union to union, and either begged or stole to eke out an existence. On one I found a written list of all the workhouses for several counties round, and had those marked off for more frequent visitation which he deemed the best. I have personally examined many who began a life of vagrancy at about 12 years of age, and from the facilities afforded by workhouse relief, have continued ever since in the same pursuit, outcast from society, knowing no home, counting all men their enemies, and thus educating themselves for the most flagrant crimes, and are ready, on a day's notice, without remorse, to concentrate themselves for mischief in any part of the country.

"About three months ago, two, who had passed the night at this union, were committed for setting fire to a stack of hay, and another for the same offence last week. One who has often visited here was lately committed for an attempt at highway robbery, and another is now lying in Ruthin gaol under a sentence of transportation for theft.

"In giving these parties relief then, in the way we have done, I really think we were aiding them in their criminal career, as it afforded them a comfortable leisure to mature their plans and go, without the care of providing for themselves, in quest of adventures. By the refusal of relief they are only put a little more to their shifts, and must either betake themselves to honest pursuits, or show themselves in their true colours and, consequently be absorbed through the law."

The first step towards efficient administration of the law in relieving casual poor, is to refuse relief altogether to young able-bodied men who are in good health, unless furnished with a pass or certificate in accordance with the suggestion of Mr. Buller. If only assured of the countenance and support of the Poor Law Board, both guardians and officers would, I believe, most willingly return to that plan. Nor need there be any apprehension that it would entail hardship upon the deserving poor. The duty of discriminating between them and professional vagrants may be very safely entrusted to masters of workhouses and relieving officers.

But if this suggestion be rejected, and it be held, as it is at present, that every tramp who demands relief is entitled to it, unless money sufficient to pay for his lodging can be found upon him, then the care of them ought to be transferred altogether to the police. "I am fully satisfied," writes the clerk of the Lichfield union to me, "from 27 years' experience as " clerk, and five years as a magistrate, that until the super-

E

' vision of vagrancy is placed solely in the hands of the police, " it can never be suppressed or even mitigated." I do not think that much practical difficulty would be experienced in giving effect to this view.

Let there be attached to every police station or lock-up a male and female vagrant ward, properly fitted and provided with means for setting vagrants to work. Union officers, as I have said, have no difficulty in distinguishing between professional tramps and casual poor. Let the former be relieved by the police in the police wards, and the latter by the union officers in improved casual wards of the workhouses.

To this plan an objection, already anticipated, has been made, which has, no doubt, a good deal of force. It is urged that it will be impossible to distinguish between the undeserving claimant of relief and the really destitute poor, and that it would be an intolerable hardship upon the latter to make it a condition of relief that they should be placed, as it were, under the *surveillance* of the police. So undoubtedly it would be, and if such a result were likely to follow, the objection would be conclusive; for bad as the present system is, it would certainly be better to adhere to it than to turn the deserving poor from the workhouse to the police station. But it is to be observed, in the first place, that under the present system, the deserving poor can hardly be said to be relieved at all. They rarely apply as "casuals," preferring to do the best they can in low lodging houses, or under any shelter they can find, rather than enter the vagrant wards. Now, if only in justice to that class, some attempt ought to be made to discriminate between them and professional vagrants. Whether a classification which would secure to the deserving poor more liberal treatment than guardians could be induced or indeed ought to be asked to provide for tramps, should be made by separate wards in the workhouse, or by sending tramps to police wards, the classification ought at all events to be made. I believe, as I have said, that it can only be made by placing the tramps or cadgers, if they must be relieved, wholly under the care of the police. And I repeat that there is not the least reason to apprehend that the union officers would be unable to discriminate between the two classes, or that the deserving wayfarer in search of work would run any risk of being confounded with the "Yankey Bens," and "Bow Streets," and the rest, who constitute fully 75 per cent. of those who are now relieved as "casuals." An officer of ordinary intelligence, and with a little experience, can always distinguish between them. I have put the question to officers over and over again, and am invariably assured that they can easily tell the difference. But in the Minute to which I refer, the President suggested the adoption of a system by which the "deserving class" of poor might be furnished with "such " evidence of their character and circumstances as might afford

“ a fair presumption of the truth of their plea of destitution
 “ A wayfarer of this class might, at the place where the cause of
 “ destitution occurs, be enabled by those who are cognizant of
 “ it, to obtain a certificate from some proper authority, setting
 “ forth his name, the cause of destitution, and the object and
 “ destination of his journey. On his presenting this certificate
 “ at any workhouse the master, on finding that it was satisfac-
 “ tory, that the applicant was on the road to his destination,
 “ and that he was without money or other means, might at once
 “ admit him, and supply him with the usual accommodation of
 “ the inmates. In this way the honest but destitute wayfarer,
 “ possessed of such credentials, would obtain the advantage of
 “ being admitted into the workhouse without reference to the
 “ relieving officer, and also of receiving better accommodation
 “ than that at present afforded to him in the vagrant ward.”

No better suggestion, so far as I am aware, has ever been offered, or indeed can be offered as a security against imposture. Until some such change from the present system is adopted I do not think that any effectual check can be put upon vagrancy, or that reasonable facility for obtaining relief can be given to the deserving casual poor.

I have the honour to be,

Sir,

Your obedient Servant,

To

ANDREW DOYLE,

The Right Hon. C. P. Villiers, Poor Law Inspector.
 President of the Poor Law Board.

VAGRANCY. - - - -

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate?	The average Number each night of Vagrants relieved during the Year ended Michaelmas 1895.	The average Age of the Vagrants relieved.	The largest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1895.	The smallest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1895.	Has the Number of Applications from Vagrants for Relief ever exceeded the Accommodation afforded in the Wards? If so, what steps were taken for their Relief?	Whom do the Guardians employ to relieve the Vagrants?

ALTRINGHAM	Yes - -	50	7	Years. Ages not recorded.	20	1	No - - -	They are admitted by the master of the night asylum.
St. ASAPH	Yes - -	10	Rather under 3.	About 30	10	1	No - - -	Police and relieving officers.
ATCHAM -	Yes - -	24	11	33	5	-	No - - -	Relieving officers and assistant overseers.
BALA - -	Yes - -	About 12	Nearly 1	About 30	9	-	Yes, when the house was being whitewashed. Lodgings were provided for them.	The police officer.
BANGOR AND BRAUMARIS.	Yes - -	13	13	From 17 to 20.	11	-	No - - -	The police officer.
BIRKENHEAD	Yes - -	34	8	31	23	2	No - - -	Relieving officer and master.
Gr. BOUGHTON.	The medical officer has reported them insufficient. (a)	10	3	30	11	-	A few nights vagrants were refused for want of room.	Police officer.
BRIDGNORTH	Yes - -	18	3	Between 30 and 40.	10	-	No - - -	Workhouse master.

(a) The guardians have recently agreed to provide better accommodation for vagrants.

- VAGRANCY.

Are Tickets for Admission to the Vagrant Wards given to all Applicants? If not, state what Cases are refused, and why?	Is a Task of Work exacted in each Case in return for the Relief afforded? If so, state the kind of Work.	Are there any other Means adopted to test the Destitution of Vagrants in each Case?	State the Nature and Quantity of Food given to the Vagrants.	Have you [the Master of the Workhouse] found it necessary to take any Vagrants before the Magistrates? [See Ans. marked *]. If so, was there any difficulty in getting them convicted? [See Ans. marked †].	If Police Officers are employed as Assistant Relieving Officers for the Relief of Vagrants, what is the Effect of that Arrangement?
(10.)	(11.)	(12.)	(13.)	(14.)	(15.)
Yes - - -	None - - -	They are searched by the police.	About $\frac{1}{2}$ lb. of bread	Yes.* Not	The sergeant of police issues tickets of admission. The effect is good; the number has been reduced.
Lodgings provided out of the house after workhouse hours of admission—0 p.m.	Generally pumping	A strict search -	Bread and water and any spare gruel to those who work willingly.	Yes; frequently.* No.†	The arrangement works satisfactorily.
Yes - - -	Yes; picking oakum, wheeling or digging in the garden, wheeling clay, cleaning the privy, and stone-breaking.	They are required to have their tickets countersigned by the police constable.	The same as to able-bodied paupers in the house.	Yes.* Not	The officer who examines the vagrants and countersigns their tickets considers them, with very few exceptions, persons of very bad character.
Yes; except those upon whom money is found.	No; but the able-bodied vagrants get no food; they have generally plenty of food with them.	They are searched by the police.	1½ pt. of porridge with $\frac{1}{2}$ oz. of treacle, or 8 oz. of bread and 3 oz. of cheese for supper; and 7 oz. of bread with 1½ pt. gruel, and $\frac{1}{2}$ oz. of treacle for breakfast.	Once or twice when having torn their clothes or broken the windows.	Applications greatly increased, as they do not now try to get other lodgings.
Yes; except those upon whom money is found.	Three hours at the pump or to pick 1 lb. of oakum.	No - - -	5 oz. of bread, boiling water, pepper, salt, and dripping. When there is spare porridge it is given instead of the water, &c.	Yes.* Not	It prevents many from applying, especially those who are "wanted" elsewhere.
Yes; except those upon whom money is found.	Yes; stone-breaking.	No - - -	Supper, 2 pts. thick gruel and milk; breakfast, 2 pts. thick porridge and $\frac{1}{2}$ pt. of milk.	No - - -	No police officers employed.
Yes; except when money is found upon them.	½ lb. of oakum to pick.	None - - -	1½ pt. of gruel with 5 oz. of bread. If bread is found upon them no bread is given. Some have had as much as 3 lbs. of bread with them.	Yes; several.* No.†	A large reduction in the number of vagrants.
All applicants admitted.	No - - -	No - - -	Males, 6 oz. of bread in the morning; females, 8 oz. of bread night and morning.	Yes.* Not	Police officers not employed.

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate?	The average Number each night of Vagrants relieved during the Year ended Michaelmas 1866.	The average Age of the Vagrants relieved.	The largest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1865.	The smallest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1865.	Has the Number of Applications from Vagrants for Relief ever exceeded the Accommodation afforded in the Wards? If so, what steps were taken for their Relief?	Whom do the Guardians employ to relieve the Vagrants?
(1.)	(2.)	(3.)	(4.)	(5.)	(6.)	(7.)	(8.)	(9.)
BURTON-UPON-TRENT.	Women's ward sufficient; men's ward not sufficient. (a)	20	7	Years. 33	21	-	Yes, in the men's ward only. On a few occasions some have sat up in the ward.	The workhouse officers.
CARNARVON.	Yes - -	10	1 $\frac{1}{2}$	From 25 to 30.	7	1	No - - -	Police officer -
CHEADLE.	Yes - -	18	4	From 20 to 30.	17	-	No - - -	The relieving officer.
CHESTER.	Yes - -	22	14	From 20 to 35.	35	1	Not lately. Formerly, when it was so, the police paid for a bed and gave them bread.	The police officer.
CHURCH STRETTON.	Yes - -	12	2	From 18 to 30.	11	-	No - - -	The assistant overseer.
CLEOBURY MORTIMER.	Yes - -	20	2 $\frac{1}{2}$	From 18 to 40.	13	1	No	The relieving officer.
CLUN.	Yes; except the night before a fair.	10	3 $\frac{1}{2}$	29	15	1	Yes, they were put in the receiving ward.	The police officers.

(a) The subject of accommodation for vagrants has been for some time, and is now, under the consideration of the guardians.

Are Tickets for Admission to the Vagrant Wards given to all Applicants? If not, state what Cases are refused, and why?	Is a Task of Work exacted in each Case in return for the Relief afforded? If so, state the kind of Work.	Are there any other Means adopted to test the Destitution of Vagrants in each Case?	State the Nature and Quantity of Food given to the Vagrants.	Have you [the Master of the Workhouse] found it necessary to take any Vagrants before the Magistrates? [See Ans. marked *]. If so, was there any difficulty in getting them convicted? [See Ans. marked †].	If Police Officers are employed as Assistant Relieving Officers for the Relief of Vagrants, what is the Effect of that Arrangement?
(10.)	(11.)	(12.)	(13.)	(14.)	(15.)
Vagrants are admitted without a ticket, and none are refused who are found to be destitute.	Those who stay for breakfast and able to work are put to field work for two hours.	Searching their Persons.	½ lb. of bread and 1 pt. of porridge.	Yes, for tearing their clothes, having house-breaking implements in their possession, assaulting the master and porter, &c.* No.†	Police officers not employed.
Yes - - -	Pumping water for two hours.	No - - -	The usual house diet.	Yes.* Not -	There was a considerable decrease in the number of vagrants for some time after the police officer was appointed, but the vagrants are now on the increase.
Yes; except those upon whom money is found.	Able-bodied men break 1 bushel of stones and the women pick 3 oz. of oakum and clean the rooms in which they sleep.	They are searched by the porter.	4 oz. of bread and 1½ pt. of oatmeal porridge night and morning.	Yes.* Not -	Police officers not employed.
No. In cases where the applicant has means of procuring a lodging; and when, as is frequently the case, the applicant is here too often.	No - - -	None - - -	½ lb. of bread night and morning; women and children have gruel in addition.	Not often.* Not	Very good. It acts as a check to imposition to a certain extent, as they are searched at the police office, and prevents abuse and annoyance should it be necessary to refuse relief to the applicant.
None refused -	When they accept food they have to work for four hours breaking or wheeling stones. For the last six years none required food after knowing the conditions.	None - - -	6 oz. of bread (See reply to col. 11.)	No. When I find anything like insubordination, I immediately apply to the police station, which is close to the workhouse, and the presence of an officer very soon puts all quiet.	The guardians have recently authorized the police to issue tickets to such vagrants as apply to them; but they nearly all go to the assistant overseer.
Yes - - -	Stone breaking for the males: females, none.	No - - -	6 oz. of bread and 1 pt. of gruel night and morning.	Yes.* Not -	—
Yes -	One hour pumping for males; one hour picking oakum for females.	They are searched by the police.	6 oz. of bread or 1 lb. of potatoes at night; and if they work, 6 oz. of bread for males, and 5 oz. for females in the morning.	Yes.* Not -	It may cause a guilty person not to apply for ticket.

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate?	The average Number each night of Vagrants relieved during the Year ended Michaelmas 1885.	The average Age of the Vagrants relieved. (10.)	(11.)	(12.)	(13.)	(14.)	(15.)
Yes - - -	2cwt. of stones per man.	No - - -	3½ pts. of gruel and ½ lb. of bread.	Yes.* Not -	A reduction of 45 per cent. since May 1863 to the present time.
Those upon whom money is found are refused.	No - - -	None - - -	1½ pt. of thick porridge at night; 1½ pt. milk porridge and no bread, unless in urgent cases, in the morning.	Yes.* Not -	A reduction in the number of vagrants.
If money is found upon them they are refused.	Breaking stones for not less than two hours if food is given, and for not less than one hour if lodging only is given for men; and picking wool for the same period for women.	No - - -	Supper, 1½ pt. porridge; breakfast, 7 oz. of bread and 1½ pt. of broth.	Yes; often.* Not -	Good.
Able-bodied men are generally refused.	Stone breaking and pumping water by males according to their ability, and bed-making and scouring by females.	No - - -	8 oz. of bread for men and 7 oz. for women, with broth or gruel, night and morning.	Yes.* Not -	Police officers have just been appointed to relieve vagrants.
If money is found upon them they are refused.	Digging, &c. -	No - - -	1½ pt. of porridge at night; 4 oz. of bread and 1½ pt. of gruel in the morning.	No - - -	Good.
All, until wards are full.	No - - -	No - - -	7 oz. of bread -	Yes.* No.†	—
No; having money in their possession when searched by the police.	Breaking three barrow loads of stones, or picking oakum, if weather unfavourable.	All searched by the police.	6 oz. of bread and 1½ pts. of broth or porridge night and morning.	Yes.* Not	Several during the year applied at the workhouse for lodgings, but when informed they were to obtain tickets from the police, they objected to go and left without further request.
Vagrants are admitted without tickets.	When they accept food they are required to work two hours for each meal, pumping water, breaking gravel, and pounding old mortar and red sandstone for use in the garden.	They are searched and required to take a tepid bath, and to give up for the night all articles found in their possession.	Men, 7 oz. of bread and 2 pts. of milk porridge; women, 6 oz. of bread and 1½ pts. of milk porridge.	Yes.* Not -	The police are not employed.

(10.)	(11.)	(12.)	(13.)	(14.)	(15.)
Yes - - -	Males: pumping water for from one to two hours according to their number and strength. Females: clean out the vagrant wards.	Suspicious characters are searched.	Adults and children above 9 years 1 lb. of bread after their work is done in the morning. Women suckling 5 oz. of bread and ½ oz. of butter for supper, and 5 oz. of bread and 1½ pt. of gruel for breakfast.	Yes.* No.†	—
No. Able-bodied men applying before noon.	None - - -	No - - -	None - - -	Yes.* No†	They are not.
No. Refused when sufficient money to pay for lodgings is found in their possession.	Picking 2 lb. oakum	They are searched by the police.	6½ oz. of bread and 1½ pt. of gruel for men, and 6 oz. of bread and 1½ pt. gruel for women.	Yes.* No†	It prevents impostors from applying, and the number of vagrants has been very materially reduced.
No. Those having money are refused. Those who apply after 8.40 p.m. are also refused, but they are locked up in the police cells, which, however, seldom occurs.	When the men accept food they are required to break one barrowfull of stones, or to pump for two hours. They invariably leave without food.	No - - -	Males, 7 oz. of bread and 1½ pt. of gruel for supper, and the same for breakfast when they work. Females, 6 oz. of bread and 1½ pt. of gruel.	Yes.* No†	The vagrants are searched at the police station, by which means sometimes stolen property is discovered, and many of the worst characters evade the town altogether.
The relieving officer exercises a discretion.	Breaking 3 cwt. of stones.	None - - -	5 oz. of bread and 1½ pt. of broth or porridge.	Yes.* No†	The police are not employed.
Yes - - -	Breaking stones -	The vagrants are searched.	The same as the inmates.	No.	—
Yes. Some are relieved in lodgings at Runcorn, five miles from the workhouse.	Males pick 1½ lb. of oakum; females 1 lb. of oakum.	No - - -	7 oz. of bread and 1½ pt. of milk porridge in the morning.	Yes.* No†	The workhouse being five miles from Runcorn a police officer is employed there, who is a great check to imposition, having sent several of the applicants to gaol for theft.
Yes - - -	Stone breaking and field work.	No - - -	8 oz. of bread night and morning.	Yes.* No†	Beneficial as regards reducing the number of vagrants.
Yes - - -	The question is now before the guardians.	They are all searched.	6 oz. of bread night and morning.	Yes.* No.†	—

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate? Yes - - -	Men are required to break 1 bushel of pebble stones before leaving.	None - - -	4 oz. of bread and 1 pt. of gruel or soup night and morning.	Yes.* Not when a magistrate was at home. In many cases I have had to travel five or six miles from home for the purpose.†	—
To all that apply, except men that are "wanted" by the police for some offence.	Breaking stones for men, and picking oakum for women.	No - - -	Bread and broth or bread and milk.	Not since I have been appointed.	—
Persons applying under the influence of drink, which has occurred upon several occasions, and persons having sufficient money to pay for lodgings, are refused.	Able-bodied vagrants are required to work three hours for breakfast, generally in digging in the field and cleaning the vagrant wards.	They are searched by the police.	4 oz. of bread and 1½ pint of milk porridge.	Yes.* No †	The police officer, in his duties, may see some of the vagrants lounging and idling about during the day, and can examine them better than an union officer could do.
Yes - - -	The able-bodied pick 1 lb. of oakum, or pump water, break stones, remove rubbish, &c.	They are questioned; and in that way two acknowledged that they had sufficient money to pay for lodgings, and were therefore refused relief.	8 oz. of bread and 1 qt. of milk porridge for men, and 6 oz. of bread and 1½ pt. of milk porridge for women.	Yes.* No †	The master does not think that it has much effect upon the regular wayfarer, as he is disposed to think that the police do not take the trouble to investigate the cases, as it is an imposed duty without remuneration.
They are all admitted without tickets.	Oakum picking -	No - - -	4 oz. of bread and 1½ pt. of milk gruel.	Yes.* No.†	—
All applicants are admitted without tickets.	No - - -	No - - -	Able-bodied have nothing but lodgings. Children and old people have 1½ pt. of gruel.	Yes.* No †	No police employed. Vagrants ten years ago consisted of old men and women; but now they consist of men from 16 to 25 years of age.
Refused when the applicants have food, money, or goods for which they could realize sufficient to pay for lodgings; when the applicant is drunk; and in some cases when they have been frequently relieved before.	No - - -	They are closely questioned, and occasionally searched.	6 oz. of oatmeal made into porridge for each meal.	Yes.* No †	It is supposed to have a discouraging effect, and the master believes it proves so in many instances.

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate?	The average Number each night of Vagrants relieved during the Year ended Michaelmas 1885.	The average Age of the Vagrants relieved.	The largest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1885.	The smallest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1885.	Has the Number of Applications for Relief ever exceeded the Accommodation afforded in the Wards? If so, what steps were taken for their Relief?	Whom do the Guardians employ to relieve the Vagrants?
(1.)	(2.)	(3.)	(4.)	(5.)	(6.)	(7.)	(8.)	(9.)
WALSALL	The master does not consider them sufficient.	12, allowing 300 cubic feet to each vagrant.	5	Years. About 30	17	-	Yes, many times, if 300 cubic feet be allowed for each individual.	Workhouse master.
WELLINGTON	Yes - -	16	3	About 34	10	-	No - - -	The relieving officer.
WEM	Yes - -	20	5	About 25	13	1	Yes; but new vagrant wards have been built.	Workhouse porter.
WEST BROMWICH.	Yes - -	26	9	34	28	-	Yes, twice. They were accommodated in the receiving ward.	The superintendent of police.
WHITCHURCH	Not large enough at all times.	15	5	23	16	-	Yes, before the police were appointed as assistant relieving officers.	The police officer.
WIRRAL	No - -	16	44	45	22	1	Yes. They are allowed to remain in the receiving ward.	The relieving officer, the police officer, and the workhouse master.
WOLSTANTON and BURSLEM.	They are found to be so.	From 28 to 32.	4111	33	14	-	No - - -	The relieving officer.

Are Tickets for Admission to the Vagrant Wards given to all Applicants? If not, state what Cases are refused, and why?	Is a Task of Work exacted in each Case in return for the Relief afforded? If so, state the kind of Work.	Are there any other Means adopted to test the Destitution of Vagrants in each Case?	State the Nature and Quantity of Food given to the Vagrants.	Have you [the Master of the Workhouse] found it necessary to take any Vagrants before the Magistrates? [See Ans. marked *]. If so, was there any difficulty in getting them convicted? [See Ans. marked †].	If Police Officers are employed as Assistant Relieving Officers for the Relief of Vagrants, what is the Effect of that Arrangement?
(10.)	(11.)	(12.)	(13.)	(14.)	(15.)
Admitted without tickets.	Men, picking 1 lb. of oakum or breaking 5 cwt. of stones; women, picking ½ lb. of oakum. Some prefer going without food than do the work.	-	6 oz. of bread and 1 pt. of gruel. As a rule they do not get supper, and very seldom ask for it.	Yes.* No.†	The police are not now employed.
Yes - - -	Breaking 4 cwt. of stones.	No - - -	6 oz. of bread and 1 oz. of cheese for supper if required, and 8 oz. of bread and 1 qt. of oatmeal porridge for breakfast; 5 oz. of bread and 1 pt. of oatmeal porridge for women for breakfast.	Yes.* No.†	—
They are admitted without tickets. Some time ago the tramps broke up the platform on which they sleep. Soon after they broke the water closet. The guardians now decline to relieve idle young men.	Stone breaking	No - - -	8 oz. of bread and 1½ pt. of oatmeal porridge for men, and 6 oz. of bread and 1½ pt. of oatmeal porridge for women.	Yes.* No.†	—
- - -	Males break 5 cwt. of stones, or pick 3 lb. of oakum; females pick 2 lb. of oakum.	No - - -	5 oz. of bread for supper, and 5 oz. of bread and 1½ pt. of gruel or pea soup for breakfast.	Yes.* No.†	The best that can possibly be.
No. Some that were relieved a few nights previous, and are regular tramps.	Pump water, clean the yards, take in coals, &c.	They are searched.	6 oz. of bread and 1 qt. of oatmeal gruel for breakfast if they work; if not, they have nothing.	Frequently.* No.†	Not so many vagrants as there were before they were employed; there was before double the number.
Yes - - -	Stone breaking	No - - -	1½ pt. of thick oatmeal porridge, with ½ pt. of milk or treacle; or 6 oz. of bread and ½ pt. of milk.	Frequently.* No.†	No good.
As a rule they are so given.	They are now required to pump in return for food; but the work is so light, that since food has been given the number of vagrants has considerably increased.	No, except a search.	1½ pt. of oatmeal and flour gruel and 7 oz. of bread night and morning to not able-bodied men, women, and youths. The same quantity in the morning only to able-bodied.	Yes.* No.†	Nil.

UNIONS.	Are the Vagrant Wards in the Workhouse sufficient?	What Number of Vagrants will the Vagrant Wards accommodate?	The average Number each night of Vagrants relieved during the Year ended Michaelmas 1885.	The average Age of the Vagrants relieved.	The latest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1885.	The smallest Number of Vagrants relieved upon any one night during the Year ended Michaelmas 1885.	Has the Number of Applications for Relief ever exceeded the Accommodation afforded in the Wards? If so, what steps were taken for their Relief?	Whom is the Guardian empowered to relieve the Vagrants?
(1.)	(2.)	(3.)	(4.)	(5.)	(6.)	(7.)	(8.)	(9.)
WOLVERHAMPTON.	Yes - -	23	94	Years. 81	29	- 1	Occasionally in the race and fair week, and on two or three nights during the last 14 years. The receiving wards adjoining the tramp wards have been given up for the use of tramps.	The superintendent of out-door labour, who is also tramp master.
WRECKHAM -	The female ward is; the male ward is not at times.	From 15 to 20.	11	35	33	- -	The number of males has frequently exceeded the accommodation, and then they have been put into the female ward; but if any female vagrants were in, they have been crowded into the proper ward, there being no other place to accommodate them.	The police officer.

Are Tickets for Admission to the Vagrant Wards given to all Applicants? If not, state what Cases are refused, and why?	Is a Task of Work exacted in each Case in return for the Relief afforded? If so, state the kind of Work.	Are there any other Means adopted to test the Destitution of Vagrants in each Case?	State the Nature and Quantity of Food given to the Vagrants.	Have you [the Master of the Workhouse] found it necessary to take any Vagrants before the Magistrates? [See Ana. marked *]. If so, was there any difficulty in getting them convicted? [See Ana. marked †].	If Police Officers are employed as Assistant Relieving Officers for the Relief of Vagrants, what is the Effect of that Arrangement?
(10.)	(11.)	(12.)	(13.)	(14.)	(15.)
If that apply are admitted.	Breaking 3 cwt. of ragstone.	No - -	8 oz. of bread night and morning.	Yes.* No.†	—
es, except to those who present themselves drunk, and persons from the immediate neighbourhood, if they are known to be <i>not</i> destitute.	They were formerly required to break a quantity of stones, which, as it incurred a loss, was discontinued. They now work at the pump for two hours; but this is objectionable, as several of the inmates who follow them at the pump have had it, &c.	No - -	1 qt. of oatmeal porridge at night, and 7 oz. of bread with the above quantity of porridge in the morning.	Frequently.* No.† <i>Offences.</i> Breaking locks and windows, assaulting the porter, tearing their clothes, attempting to get to the female vagrants, splitting the benches and burning them, &c.	The superintendent of police states that the number has greatly decreased.

VAGRANCY.

REPORT OF N. EDWARD HURST, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

To the Right Hon. C. P. VILLIERS, M.P., President of the
Poor Law Board.

Richmond, Yorkshire,

20th November 1865.

SIR,

IN reference to Mr. Thornely's letter of the 25th ultimo, directing my attention to the resolution relative to Vagrancy passed by the Select Committee on Poor Relief, and requesting me to furnish certain particulars therein mentioned, as to the several unions under my superintendence, I have the honour to inform you I have been in communication with the clerks of the unions in my district in regard to the points upon which information is desired, and the tabular statement annexed, marked (A.) exhibits the result of my inquiries; from which it will be observed that of the 45 unions in my district, there are—

1. Thirty-one unions in which the Vagrant wards are considered to be sufficient, viz.:—

- | | |
|---------------------------|--------------------|
| 1. Alnwick. | 17. Kendal. |
| 2. Alston with Garrigill. | 18. Lanchester. |
| 3. Bedale. | 19. Leyburn. |
| 4. Belford. | 20. Newcastle. |
| 5. Berwick-upon-Tweed. | 21. Penrith. |
| 6. Carlisle. | 22. Reeth. |
| 7. Chester-le-Street. | 23. Richmond. |
| 8. Darlington. | 24. Rothbury. |
| 9. Durham. | 25. Sedburgh. |
| 10. Easington. | 26. Sedgefield. |
| 11. East Ward. | 27. South Shields. |
| 12. Glendale. | 28. Teesdale. |
| 13. Haltwhistle. | 29. Tynemouth. |
| 14. Hartlepool. | 30. Weardale. |
| 15. Hexham. | 31. Whitehaven. |
| 16. Houghton-le-Spring. | |

2. Five unions in which such wards are insufficient, viz. :—

- | | |
|---------------|----------------|
| 1. Brampton. | 4. Stockton. |
| 2. Gateshead. | 5. Sunderland. |
| 3. Morpeth. | |

3. Nine unions in which there are no Vagrant wards, viz. :—

- | | |
|--|---------------------------------------|
| 1. Auckland. | 6. Longtown (stable used at present). |
| 2. Bellingham. | 7. Ulverstone. |
| 3. Bootle (receiving wards used at present). | 8. West Ward. |
| 4. Castle Ward. | 9. Wigton. |
| 5. Cockermouth. | |

4. Twenty-five unions in which a task of work, generally stone-breaking, is exacted in return for the relief afforded, viz. :—

- | | |
|---------------------------|--------------------|
| 1. Alston with Garrigill. | 14. Kendal. |
| 2. Berwick-upon-Tweed. | 15. Lanchester. |
| 3. Bootle. | 16. Reeth. |
| 4. Chester-le-Street. | 17. Richmond. |
| 5. Durham. | 18. Rothbury. |
| 6. Easington. | 19. Sedgefield. |
| 7. East Ward. | 20. South Shields. |
| 8. Gateshead. | 21. Sunderland. |
| 9. Glendale. | 22. Teesdale. |
| 10. Haltwhistle. | 23. Tynemouth. |
| 11. Hartlepool. | 24. Weardale. |
| 12. Hexham. | 25. Whitehaven. |
| 13. Houghton-le-Spring. | |

5. Twenty-seven unions in which the police act as assistant relieving officers, or in giving tickets for a night's lodging to Vagrants, viz. :—

- | | |
|---------------------------|--------------------|
| 1. Alston with Garrigill. | 15. Haltwhistle. |
| 2. Auckland. | 16. Hexham. |
| 3. Bedale. | 17. Kendal. |
| 4. Belford. | 18. Leyburn. |
| 5. Bellingham. | 19. Perith. |
| 6. Bootle. | 20. Richmond. |
| 7. Brampton. | 21. Rothbury. |
| 8. Carlisle. | 22. South Shields. |
| 9. Castle Ward. | 23. Stockton. |
| 10. Chester-le-Street. | 24. Teesdale. |
| 11. Cockermouth. | 25. Tynemouth. |
| 12. Darlington. | 26. Whitehaven. |
| 13. Durham. | 27. Wigton. |
| 14. East Ward. | |

6. Thirty-five unions in which food, generally less than the allowance to the ordinary inmates, is given to this class in addition to a night's lodging, viz. :—

- | | |
|---|-------------------------|
| 1. Alnwick. | 18. Hartlepool. |
| 2. Alston with Garrigill. | 19. Hexham. |
| 3. Auckland. | 20. Houghton-le-Spring. |
| 4. Bedale. | 21. Kendal. |
| 5. Belford. | 22. Lanchester. |
| 6. Bellingham. | 23. Leyburn. |
| 7. Berwick. | 24. Morpeth. |
| 8. Bootle. | 25. Newcastle-on-Tyne. |
| 9. Carlisle (food given to
the sick and to women
only). | 26. Reeth. |
| 10. Chester-le-Street. | 27. Richmond. |
| 11. Darlington. | 28. Rothbury. |
| 12. Durham. | 29. Sedgefield. |
| 13. Easington. | 30. South Shields. |
| 14. East Ward. | 31. Sunderland. |
| 15. Gateshead. | 32. Teesdale. |
| 16. Glendale. | 33. Tynemouth. |
| 17. Haltwhistle. | 34. Weardale. |
| | 35. Whitehaven. |

7. And nine unions in which a night's lodging only is granted, viz. :—

- | | |
|--|----------------|
| 1. Brampton. | 6. Stockton. |
| 2. Castle Ward. | 7. Ulverstone. |
| 3. Cockermouth. | 8. West Ward. |
| 4. Longtown. | 9. Wigton. |
| 5. Penrith (on Sundays
only a breakfast of
porridge and milk is
allowed). | |

In regard to the question mentioned in his letter by Mr. Thornely, "whether I have been enabled from time to time to take any steps to establish a uniform system of dealing with Vagrants, and what obstacles have prevented that object being carried out;" I am not aware of any uniform system of dealing with Vagrants beyond what I have stated; but, in accordance with Mr. Buller's minute of 4th August 1848, I have frequently urged upon boards of guardians the adoption of its leading principles, i.e. the exercise of a "sound and vigilant discrimination in respect of the objects of relief," and where practicable the employment of the police to act as assistant relieving officers, with suitable wards for the reception of Vagrants, and the requirement of a task of work from the able-bodied.

The unwillingness of boards of guardians to incur expense I believe constitutes the principal obstacle to the erection of Vagrant

wards and a uniform system of management in reference to Vagrancy.

In regard to the last clause of Mr. Thornely's letter, requesting a report on the present state of Vagrancy, I find that in some unions Vagrancy is on the increase, as in—

Brampton,	Glendale,	Stockton,
Cockermouth,	Kendal,	Tynemouth,
East Ward,	Lancaster,	Ulverston,
Gateshead,	Morpeth,	Wigton;

and slightly so in—

Bellingham,	Durham,	Hartlepool,
Bootle,	Haltwhistle,	Sunderland;

whilst in others there has been either a diminution in the numbers, as in—

Carlisle,	Darlington,	Richmond,
Castle Ward,	Leyburn,	Teesdale;
Chester-le-Street,	Longtown,	

or the average has been about the same. In some cases the numbers fluctuate considerably.

In the Brampton union, "Vagrancy is increasing very much; they cost the union about 10s. per week for lodgings alone at 3d. a head each night."

In the Cockermouth union "there is no check upon Vagrancy, unless the fact of the applicants having to apply to the police officer for tickets can be considered one, and if they had a proper task of work to perform and were made to cleanse themselves thoroughly in return for the food and lodging afforded them, and proper Vagrant wards established, the cost of relief to Vagrants would materially decrease and a considerable saving be effected."

In the East Ward union, Vagrancy is increasing, "notwithstanding" the clerk adds, "that every effort is made by the guardians and relieving officers to repress it." The numbers relieved during the last four years ended at Michaelmas, are—

—		Workhouse.		Lodging-houses.		Totals.
1862	-	843	-	799	-	1,641
1863	-	808	-	1,675	-	2,573
1864	-	905	-	1,746	-	2,651
1865	-	1,165	-	1,535	-	2,697

In the Kendal union the number has steadily increased; and the clerk adds, "the greatest number appear in the year when the distress in Lancashire was the greatest; the number has ever since continued large. Probably this may be accounted for by

"the fact that many of the operatives during the cotton famine got into a rambling habit, which they have not yet abandoned. The guardians of this union have for some time past been in the habit of circulating notices similar to the one which I send herewith,* which have had a good effect in preventing the indiscriminate relief of Vagrants by private individuals, and to this fact may be attributed in some measure the increase of the number of applicants for relief to the proper authorities. I am not aware of any instance since my connexion with the union in which relief to Vagrants has been refused in consequence of insufficient accommodation."

In the Lanchester union, "Vagrancy has much increased of late years. Most of the applicants are young able-bodied men; there are not many females; most of the females allege they are in search of their husbands. The present system of relieving Vagrants ought to be by some means remedied, as the greater portion of the applicants are able-bodied, and they make a practice of travelling from one workhouse to another without any intention of seeking employment; they are sure of a night's lodging and breakfast next morning, and where they have a chance they beg the remainder. If by any means work could be offered them on their application, and should they refuse next morning, then they might be punished. I should also recommend that each able-bodied man on his admission for the night be washed and cleaned, as invariably they appear as dirty as possible to obtain charity."

In the Tynemouth union the numbers were—

In 1863	-	-	-	2,060
„ 1864	-	-	-	1,674
„ 1865	-	-	-	2,205

but there does not appear to be any data on which to found a reason for the fluctuation.

And in the Ulverstone union, Vagrancy has increased greatly since 1860, which the clerk states is "attributable to the great increase of the population in consequence of mining operations and the establishment of iron and other works." The numbers of Vagrants since 1860 are given as follows:—

In 1860	-	-	-	112
„ 1861	-	-	-	133
„ 1862	-	-	-	779
„ 1863	-	-	-	1,869
„ 1864	-	-	-	2,310
„ 1865	-	-	-	3,161

Among the unions which have shown a decrease in Vagrancy may be mentioned Teesdale, in which I understand the number

* See printed handbill annexed, marked (B.)

of Vagrants is fully a third less weekly since the appointment of the police to act as assistant relieving officers of this class, and in the Castle Ward, Chester-le-Street, and Richmond unions from a similar cause the number of Vagrants has diminished.

I am not aware that there has been any material change in the mode of dealing with Vagrants in the different unions in my district since my report to you of the 26th January 1864. I then stated that Vagrancy was very unevenly scattered, partly no doubt arising from the fact that the police act as relieving officers in some unions and not in others, and partly in consequence of the different modes of affording relief. It is admitted where Vagrants are most indulged there they congregate, and that they diverge from the main road for the sake of the comforts and independence of a lodging-house, and to avoid a policeman, Vagrant ward, and a task of work. Where the police have been appointed assistant relieving officers for Vagrants, the practice of searching the applicants for relief affords them an excellent opportunity of becoming acquainted with all tramps and Vagrants, and on whom suspicion may fall as to the perpetration of any crime or outrage in the neighbourhood. Their appointment in every union throughout the country appears to me indispensable to secure not only better management but uniformity of system, and which uniformity of system should include the employment of the police as assistant relieving officers, with instructions to search each Vagrant prior to giving an order to the Vagrant ward, or where not available a licensed lodging-house. That on their admission to the Vagrant ward, these parties should be washed and cleansed in accordance with article 95 of the General Consolidated Order, and in the morning required to perform a task of work, pursuant to 5 & 6 Vict. c. 57, sec. 5, in return for a night's lodging alone, and without reference to food, as by the present practice, where no food is given the task of work is generally evaded. These precautions cannot fail to detect the difference between real and simulated destitution. The board, I believe, have already full power to give effect to them, except as to the co-operation of the chief constables, which on their part should be imperative. By these means not only would uniformity of management be secured, but I am satisfied their general adoption would be followed by a diminution of Vagrancy throughout the country.

I have the honour to be, Sir,

Your obedient servant,

N. EDWARD HURST.

(A.)

TABULAR STATEMENT showing the Arrangements existing in the several UNIONS in MR. HURST'S DISTRICT for the RELIEF of VAGRANTS.

Unions.	Whether there are Vagrant Wards attached to the W. H.	Whether such Wards are sufficient.	Whether a Task of Work is required in return for the Relief afforded; and the kind of Work exacted.	Nature and Quantity of the Food given as Relief to Vagrants.	Whether Police Constables are employed as Assistant Relieving Officers of Vagrants.
CUMBERLAND.					
Alston with Gar-rigill.	Yes.	Yes	Each able bodied male vagrant to break one-eighth of a yard of stones.	1 pint of milk porridge and 1 gill of milk for breakfast.	Yes, each Vagrant is required to produce a ticket from the inspector of police at Alston.
Bootle - - -	The receiving wards are used as such.	..	Stone breaking for the able-bodied males.	Supper and breakfast same as supplied to the able-bodied paupers in the work-house.	Yes.
Brampton - -	Yes	No	No - - -	Nil - - -	The police are employed to search Vagrants and see them to their lodgings.
Carlisle	Yes	Yes	No - - -	Only the sick or wearied are allowed food on admission; women and children if they require it. All women are allowed some food on leaving in the morning.	All Vagrants first apply to the police for their ticket of admission to the workhouse. Those who apply after 10 o'clock at night receive an order for a bed at some licensed lodging-house.
Cockermouth -	No.	No	No - - -	Nil - - -	Yes, at Cockermouth, Maryport, Workington, and Keswick.
Longtown - -	The stable is used as such.	Yes	No - - -	Nil - - -	No.
Penrith - - -	Yes	Yes	No - - -	Food is given on Sundays only, and then a breakfast of porridge and milk.	Yes.
Whitehaven -	Yes	Yes	Each able-bodied male is required to break a bushel of stones.	1 pint of oatmeal porridge and 1 pint of milk, or $\frac{1}{2}$ lb. bread and 1 pint of milk for supper; and 1 pint of porridge and 1 pint of milk for breakfast.	Yes.
Wigton - - -	No	..	No - - -	Nil - - -	Yes, to distribute tickets for lodgings.
DURHAM.					
Auckland - -	No	..	No - - -	1 pint oatmeal gruel -	The police give an order on a lodging-house keeper, who finds the Vagrant a bed and a pint of gruel.
Chester-le-Street.	Yes	Yes	Males to break stones for two hours; females to clean out their wards.	1 $\frac{1}{2}$ pint boiled milk and oatmeal, and 4 oz. bread for supper; and 1 pint oatmeal porridge and $\frac{1}{2}$ pint milk for breakfast.	Yes.

Unions.	Whether there are Vagrant Wards attached to the W. H.	Whether such Wards are sufficient.	Whether a Task of Work is required in return for the Relief afforded; and the kind of Work exacted.	Nature and Quantity of the Food given as Relief to Vagrants.	Whether Police Constables are employed as Assistant Relieving Officers of Vagrants.
DURHAM—cont.					
Darlington -	Yes	Yes	No - - -	Oatmeal porridge and treacle.	Yes.
Durham -	Yes	Yes	Stone-breaking -	5 oz. bread and 1 pint gruel for supper; and 1 pint porridge and treacle for breakfast.	Yes, tickets are given by the police.
Easington -	Yes	Yes	Yes, to tease one pound oakum.	1½ pint oatmeal gruel and 4 oz. bread.	No.
Gateshead -	Yes	Yes, at present.	Males to break stones for two hours; females to clean the wards.	1½ pint of porridge and 1 gill of milk for breakfast.	No.
Hartlepool -	Yes	Yes	Males to break 1½ cwt. of stones; females to tease 1½ lb. of oakum.	Food of the same quality and quantity as supplied to able-bodied in the house.	No. Tickets of admission can be got at the police station, but they are also admitted without a ticket.
Houghton-le-Spring.	Yes	Yes	Males to work 1½ hour at the pump; females to clean the vagrant wards, or tease oakum 1½ hour.	5 oz. bread at night, and in the morning.	No.
Lanchester -	Yes	Yes	Usually stone-breaking, but at present there is no employment.	8 oz. bread and 1 pint milk for supper; 1 pint of hasty pudding and 1 gill of skimmed milk for breakfast.	No.
Sedgefield -	Yes	Yes	Stone-breaking, digging in the garden, or pumping water.	½ lb. bread and 1 pint oatmeal porridge.	No.
South Shields -	Yes	Yes	Males to break 2 cwt. stones; females to tease 2 lbs. of oakum.	7 oz. bread at night, and a basin of porridge and milk in the morning.	Yes.
Stockton -	Yes	No	No - - -	None - - -	Yes.
Sunderland -	Yes	Scarcely so for males.	Able-bodied males to pump water for 1 hour, to break a cubic foot of stones, to dig 18 superficial yards of ground, or to pick 1 lb. of oakum.	7 oz. bread for supper; ditto for breakfast.	No.
Teesdale -	Yes	Yes	To tease ½ lb. of oakum.	8 gills of soup for supper, 6 oz. of bread for breakfast.	Yes.
Weardale -	Yes	Usually found sufficient.	To break 16 stones weight of limestone.	No separate dietary for Vagrants, but the allowance is limited.	No.
NORTHUMBERLAND.					
Alnwick -	Yes	Yes	Stone-breaking -	6 oz. of oatmeal and 1 oz. of treacle	No.
Belford -	Yes	Yes	Stone-breaking for three hours.	1 pint of porridge or brose, made of 4 oz. oatmeal and 1½ oz. treacle.	Yes.
Bellingham -	No	..	No - - -	Bread 1d., tea 1d., bed 3d.	Yes.
Berwick on Tweed	Yes	Yes	Males break stones, females beat sand.	Porridge and milk for supper and breakfast, being the same as the ordinary house dietary.	No.
Castle Ward	No	..	No - - -	Nil - - -	Yes, at Stamford-ham.
Glendale	Yes	Yes	Yes, if they come in time at night to allow of it; but generally they are too late. Stone-breaking is the work required.	4 oz. oatmeal made into porridge with milk or treacle.	No.

Unions.	Whether there are Vagrant Wards attached to the W. H.	Whether such Wards are sufficient.	Whether a Task of Work is required in return for the Relief afforded; and the kind of Work exacted.	Nature and Quantity of the Food given as Relief to Vagrants.	Whether Police Constables are employed as Assistant Relieving Officers of Vagrants.
NORTHUMBERLAND—cont.					
Haltwhistle	Yes	Yes	Able-bodied to do spade work in the garden.	Evening: 6 oz. bread to men and women; 4 oz. to children 5 to 9 years old; and 3 oz. to children 2 to 5. Morning: 1 pint porridge and 1 oz. treacle to men; $\frac{1}{2}$ pint porridge and $\frac{1}{2}$ oz. treacle to women and children 5 to 9 years old; and $\frac{1}{2}$ pint of porridge and $\frac{1}{2}$ oz. treacle to children 2 to 5.	Yes.
Hexham	Yes	Yes, generally.	Stone-breaking	Pottage and milk or beer for supper and breakfast.	Yes.
Morpeth	Yes	No	Stone-breaking, but no specific task of work is required.	1 pint porridge with treacle for breakfast and supper.	No.
Newcastle-on-Tyne.	There are Vagrant wards separate from the W. H.	Yes	No	Evening: 7 oz. bread and 1 pint of tea for men; 8 oz. bread and 1 pint of tea for women. Morning: $\frac{3}{4}$ oz. oatmeal made into porridge for men; 6 oz. bread and 1 pint of tea for women.	No; but a regular paid superintendent is engaged.
Rothbury	Yes	Yes	Water carrying and garden work.	$\frac{1}{2}$ lb. oatmeal for breakfast.	Yes.
Tynemouth	Yes	Yes	Males to break 4 cwt. of stones; females to pick 1 lb. of oakum.	4 oz. bread and 1 pint broth for supper, and 1 pint porridge with dripping for breakfast.	Yes.
WESTMORELAND.					
East Ward	Yes	Generally so.	Adult males to break $\frac{1}{2}$ of a cubic yard of stones; adult females to wash and clean the vagrant wards.	$\frac{1}{2}$ pint of pea soup and 8 oz. bread, or 1 pint porridge and $\frac{1}{2}$ pint of milk.	Yes, at Appleby, Kirkby Stephen, Brough, and Orton stations.
Kendal	Yes	Yes	Stone-breaking for two hours.	4 oz. of oat-bread for supper, 1 pint water-porridge and 1 pint milk for breakfast.	Yes.
West Ward	No	..	No	Nil	Up to June last the police supplied Vagrants with tickets for a night's lodging at a lodging house at Shap, which has since been closed.

Ulverstone	No	..	No	Nil	Police officers examine Vagrants for the relieving officers.

(B.)

NOTICE TO THE CHARITABLE.

The Guardians of the Poor of the Kendal Union respectfully request that promiscuous relief be not given to

TRAMPS AND VAGRANTS.

They beg to inform the public that all proper applicants will be admitted into the Vagrant wards, annexed to the workhouses at Kendal and Milnthorpe. Bread will be supplied at night to all who arrive in destitution, and breakfast given to all the following morning.

The police constables have been appointed assistant relieving officers for the relief of Vagrants for the following stations, viz. :—

Kendal.	Barbon.
Milnthorpe.	Bowness.
Kirkby Lonsdale.	Ambleside.
Burton.	Staveley.

The police are empowered to give orders to the wards for a night's lodgings, and will attend to any destitute strangers who apply to them.

Board Room, Kendal,
July 4th, 1863.

By Order,
C. GARDNER THOMSON,
Clerk of the Guardians.

VAGRANCY.

REPORT OF R. B. CANE, ESQ., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

To the Right Hon. C. P. VILLIERS, M.P., &c., the President
of the Poor Law Board.

DEAR SIR,

Elting, 27th Nov. 1865.

I HAVE to acknowledge the receipt of Mr. Thornely's letter of the 25th ult., conveying your request to be furnished with a Report from me on the subject of the relief of Vagrants in my district.

The Reports which I have made from time to time during the last year, after visiting each union in my district, will have shown that my attention has been specially directed to the means that existed for affording relief to Vagrants and casual poor persons, and to the arrangements made at each workhouse for providing shelter, food, warmth, beds or sleeping accommodation, as well as employment for this class of destitute poor.

Having thus described in detail what prevails in each union, I will now, in accordance with your request, take a more general view of this subject, and refer to its state in the district at large.

It may, however, be well to premise that although the Poor Law Commissioners laid down very exact and even minute regulations for the management of the permanent inhabitants of a workhouse, they issued no regulations providing for the treatment of Vagrants when admitted to Vagrant wards. The regulations prescribe the classification, the hours of rising and rest, the time for religious services, the periods for labour, the dress, the food, the education, and the punishment when necessary of these permanent inmates, and provide also in many ways for their constant supervision and care. But "Vagrants" and others of that class, are expressly exempted from these regulations, and it is scarcely an exaggeration to say that the guardians have been left to treat the "casual poor" admitted to the Vagrant wards in any manner that seemed most expedient in the judgment of each separate Local Board.

It is true that many circulars and letters assuming the form of instructions have been issued since 1834 from the office of the Poor Law Commissioners and of the present Board. They, however, in fact contained suggestions and advice merely, sometimes in one form and sometimes in another; advocating at times a

system of "certificates," the interference of the police, and the removal of the relief of the poor to this extent from the hands of the union officers entirely. At times those letters have recommended the most careful issue of orders for admission to the wards; they even suggested the absolute and unvarying refusal of such orders unless upon the clearest evidence of urgent want, whilst at other times those letters have stimulated the officers to grant such orders with all the readiness and promptitude with which they could be supplied. Nevertheless no general regulations for the care and management of this class of poor, when once they have been received into a workhouse, have been issued in a form which renders them legally binding on the guardians or upon their officers. In these respects Vagrants have been left, and are, legally speaking, still left to be dealt with in any manner that may be determined upon, either according to the expedients devised and the opinions held by the guardians, or solely by their subordinate servants, into whose hands the discharge of this duty has often been suffered exclusively to fall.

It is not surprising, therefore, that when I entered upon my present duties, I found that no system, nor even any approach to a system, had been acted upon for giving relief to, and for managing this class of poor.

In 25 out of the 68 unions in my district relief was administered to Vagrants wholly or in part by the police; and constables were appointed to be assistant relieving officers for this purpose.

In almost all these unions orders were given for admission either to the Vagrant wards of the workhouse, or to some other building specially provided by the guardians, and the persons producing such orders were received by the officers of the guardians in charge of those wards or places, and relieved there temporarily at the cost of the union.

In some of the unions, where applications were made so late in the day as to render it undesirable or nearly impracticable to send Vagrants to the workhouse, they were kept and relieved at the police station.

In some parts of unions situated at considerable distances from the union workhouses Vagrants were relieved by the issue of orders for admission to lodging houses or other places unsuitable for this class of poor.

When lodging or food was provided by the police, or at a lodging house unconnected with any establishment for the relief of the poor, the cost was (with one exception) defrayed at stated periods by the relieving officers, who produced the necessary vouchers to the guardians, and took credit in their accounts for what they had paid.

In the remaining 43 unions Vagrants were relieved by the masters of the workhouses, by relieving officers, and, in urgent cases, by a churchwarden or an overseer.

In some few of these unions, however, relief was for the most part nearly, and in one it was (and is) actually and absolutely

withheld by the union officers, acting under the guardians' order, unless under circumstances of extremity or of most serious illness.

In some unions "all comers" were received without hesitation or demur; they remained for the night, and left the next morning when they chose.

In some unions an ample supply of food was given at night as well as in the morning; in one or two it was as a rule entirely refused; in some no food was given at night unless in cases of sickness, or of urgent necessity and exhaustion; in others it was given to women and children and aged persons, but withheld from able-bodied men. In some no bedding was provided, and in summer no covering was allowed. In a few the beds were of so superior a kind that they were unsuitable to the general habits of the persons using them. In many unions (and still in some) there were no means for affording a moderate degree of warmth, even in the most inclement weather; there were no means for drying clothes in wet weather, or for washing the persons of those who sought refuge in these wards should it so happen at any time that washing was desired. Not a few of these wards were unprovided with such ordinary requisites as decency and cleanliness imperatively required. Some workhouses were (and some are still) unprovided with Vagrant wards at all. Vagrants were (and are still) received into outhouses and stables, where they occupied the stalls which on board days were used by the guardians' horses.

Work, even for the strongest men, had generally been abandoned. In some few places, however, the "task" that had been established was still kept up, and in some it was so severe that it could not possibly be performed within the four hours during which it is lawful to detain a Vagrant to labour. In others the labour imposed or attempted to be imposed was of a kind that could be performed only by a small portion of those relieved; it was moreover necessarily interrupted by the weather, and often, owing to the imperfect construction of the premises, the Vagrants could decamp and thus easily evade a task of work altogether. In many unions it had been left to the Vagrants themselves to decide whether they would work or not,—whether they would perform a task and take a breakfast, or whether they would leave without food and without labour in the morning.

Such was generally the condition in which I found this branch of "relief" in the 68 unions in the seven counties into which my district extends.

It need hardly be said that such a state of things operated in many instances harshly and even cruelly upon the really destitute wanderer, that in others it encouraged vagrancy and mendicancy, whilst as between union and union its effect was most unequal and unfair.

In the unions where the more rigorous treatment had been adopted, a person in the extremity of want, if he were regarded as "casual poor," might have been, and doubtless occasionally was,

wholly refused the assistance which he urgently needed, or if he gained admission within the workhouse walls the relief he obtained was of the most scant and inadequate kind.

In other unions, where no discretion was exercised, where all attempts to discriminate between simulated and real want had been abandoned, where in short (to repeat the terms that were used to me) the Vagrants "had completely beaten the officers," mendicants and tramps of all description had lodging and even food provided for them if they applied for it, and no restrictions or conditions were imposed in return. The Vagrant wards served the purpose of the lowest and the most common of lodging houses, and beggars and idlers swarmed into and out of those wards without let, or hindrance, or control.

Where such a state of things existed, (for they certainly did exist, and I have given no fanciful account of what prevailed,) the union in which Vagrants were rigorously treated was avoided by those who seemed to be spending their lives in passing in their desultory and wandering manner from one workhouse to another, and the numbers, and of course the cost for the most part fell upon the unions where the least vigilance was shown, and the most lenient treatment bestowed.

I have not thought it expedient to interfere with the existing means through which Vagrants can obtain admission to a workhouse or a Vagrant ward, except in those few instances in which extreme difficulty in procuring orders of admission prevailed, or where no discrimination of any kind had been exercised; Vagrants still gain access to these places through the ordinary channels as well as through the police, in the places hereafter mentioned, and these sources of relief now exist in nearly the same proportions as before.

It is of course highly important that due facilities should exist for gaining prompt access to the place where relief is to be obtained; but it is no less important to prescribe and regulate what that relief is to be, and on what conditions it is to be granted.

The question how Vagrants and others of that class should be managed when they had actually been admitted to the workhouse seemed more urgently in the first place to call for revision in my district, and to that question therefore I have more particularly given my attention.

I have made some efforts to remove the anomalies described, to assimilate the practice of the various local authorities, to bring the administration of relief more nearly towards uniformity, and to establish some approach to system in relieving this class of poor.

All boards of guardians have readily listened to the suggestions which I have made, and have generally given me their assistance in effecting the object desired. It has only been when an expenditure of some magnitude was involved, and fears were entertained that the numbers of applicants for temporary relief would

be largely increased by better treatment, that I have encountered serious difficulty in endeavouring to attain the object in view.

Food is now always given. It is of a kind, and is supplied at such hours as not greatly to vary in the majority of unions in one workhouse from another, although the quantities have by no means yet been reduced to one uniform scale. Wards and sleeping places, although of a bare and humble character, are now for the most part sufficient in size. The beds and coverings, regard being had to the peculiar habits and general condition of Vagrants, though scant, are of proper and suitable material. Requisite conveniences have been provided, and there are now not so many Vagrant wards which cannot be warmed in cold, or where clothes cannot be dried in wet weather. In several unions new or other Vagrant wards have been established; although, owing mainly to the expense, there are yet some workhouses in which no proper wards have been erected, and where casual poor are still lodged in sheds and outhouses and stables.

Such modifications and ameliorations in the treatment of Vagrants, that have been made in some unions, would probably have been followed by the consequences feared, and the improved, though still moderate accommodation afforded in some places, would perhaps have led to a large increase of the numbers admitted to the wards, had not some counteracting measures been at the same time adopted.

The "*check*" imposed was *work*.

Nothing appears to be more distasteful to the habitual mendicant and Vagrant than labour. In those unions in which it had been left to the decision of the Vagrants themselves, whether they would perform a task and take a breakfast, or whether they preferred to leave without food and without labour in the morning, it rarely happened that food was accepted, and sooner than labour, or be detained to labour, "*sturdy*" Vagrants would almost invariably reject the food that was offered to them.

Moreover, I was assured by those masters in a few unions where work was uniformly imposed, that more Vagrants presented themselves for admission on Saturday nights, because no work was performed on Sunday morning.

For these, and for other reasons, it appears that a task of work suitable to the age, the strength, and the sex of those relieved ought to be exacted, that such work should as far as possible be uniform in its kind and duration, and that no one should be excused from it if bodily able to perform it. In selecting that task it was most desirable to choose such as would least interfere with any trade, or with the ordinary kind of employment performed by labourers and artisans for hire, and such as might be undertaken without a money loss to the union. It was further desirable that the work would allow of the Vagrants being kept wholly separate from the ordinary inmates of the workhouse, such as could be performed without interruption by a change of weather, with the least amount of supervision by the officers, and such as

would not call for any material alteration in the construction of the wards. It was important that the work could be performed by both sexes, and by a large proportion of those relieved, and essential that it should be neither unwholesome nor offensive to those engaged in it. Above all it was requisite that the work, when required in moderate quantity, would tend effectually to check the idle and habitual mendicant and Vagrant, whilst it would not deter those who were really in want, and who were willing to perform some task in return for the relief afforded to them.

The picking of "junk" (old rope) into "oakum" is the work which most nearly answers these conditions; and it is this kind of work for Vagrants therefore that has been most extensively introduced to and established in my district.

Wherever labour had heretofore been resorted to in any of my unions, the task was revised; where it had been abandoned, it was revived; where it had not been resorted to, it was, with few exceptions, adopted.

Fifty-eight new orders prescribing work were made within a few months in as many unions; the total number of unions in the district being 68.

Work has been prescribed in 64 unions out of that total number of 68. Oakum-picking is the task exclusively adopted in a majority of them, and it is also used extensively in combination with other labour in the remainder of the other of those 64 unions.

The order imposing the task of work is made on the following terms:—

TASK OF WORK.

	“	Union.
“ Ordered: By the Guardians of the		Union, at a
“ meeting of the Board, held this		day of
“ One thousand eight hundred and sixty-		”
“ That the Master of the workhouse of the		Union
“ do set every adult person not suffering under any temporary or		
“ permanent infirmity of body, being an occasional poor person		
“ who shall be relieved in the said workhouse, in return for the		
“ food and lodging to such person, to perform the following task		
“ of work, that is to say:—		

“ *Males*—

“ *Females*—

“ Provided that no such person shall be detained against his
 “ or her will for the performance of such task of work for any
 “ time exceeding four hours from the hour of breakfast on the
 “ morning next after admission.”

" And provided also, that such amount of work shall not be required from any person to whose age, strength, and capacity it shall appear not to be suited."

" Signed

" Clerk to the Guardians."

" We, the Poor Law Board, consent to, and approve of the above order of the Board of Guardians of the Union."

" Dated, &c.

" Signed

" President."

I have always advised that every Vagrant on seeking admission should be informed of the conditions on which relief would be afforded to him.

A copy of the order prescribing work should be always suspended at the workhouse gates, or in the wards, and in addition the following Notice should be appended to it.

" NOTICE."

"Any such person as above who shall, while in such workhouse, *refuse or neglect* to perform such task of work suited to the age, strength, and capacity of such person, will be deemed an *idle and disorderly* person, and be liable to be *imprisoned* in the House of Correction, with hard labour, for one calendar month."

The order and the notice should be made known to the applicants.

No exception can then reasonably be taken to the terms on which relief is offered by any one in want; no one can then be surprised when required to work in the morning, and the applicant has the option of refusing the relief if the terms on which he can obtain it are not agreeable to him. The policy of this is shown by the fact that many applicants, when they find that they will have to work in the morning, decline to enter the wards, thereby clearly showing that they are not urgently in need of assistance, and are in a position to take care of themselves.

Some Vagrants, however, occasionally accept the conditions, but subsequently refuse to comply with them; in the morning they refuse to perform the work assigned to them. The numbers that do so are not large, and I have not advised that in every instance the person refusing should be taken before a magistrate. It is only in extreme cases of outrageous conduct that it is expedient to resort to such a course. The *detention* in the ward for the four hours allowed by the law is generally a sufficient protection in such cases, especially when it is known that the main object of the Vagrant in refusing to work, as well as in tearing up his clothes, not unfrequently is to get sent to a prison, especially for such a term as would ensure his obtaining the fullest diet which prisoners are allowed.

Having effected thus much, having prescribed the "task," one of the remaining, and not the least, of the difficulties that beset this question at every turn, is to ensure that the work shall be steadily and perseveringly exacted from all who can perform it.

It will be seen that the *master* is the officer responsible for carrying out of the order. Practically, and as a rule, the master merely keeps up a general supervision, and the actual execution of the order devolves upon one of the subordinate officers (generally the porter), acting under the master's directions.

The early hour at which the work begins; and the comparatively short time which it lasts, render it very difficult for the guardians to see that it is properly attended to. An Inspector who, as a rule, can only visit each union once in six months, is almost powerless in the matter. The duty is most onerous and irksome; it is at times almost revolting, and the temptations to shirk it are great in proportion. It is perfectly easy to admit any Vagrant who applies, to supply him with the ordinary allowance of food, to permit him to remain during the night, and to go away in the morning, but immediately any attempt is made to subject him to discipline, to "search," and to set him to work, then all the perseverance and self-control that an officer possesses are tested to the utmost. It will be apparent, therefore, how much must be confided to the officers, and how much that protection from imposition which depends upon work, depends also upon the trustworthiness and degree of attention which the officers, always under strong temptation to evade this duty, will really pay to it.

The conviction that his position is thoroughly understood, that his energy and activity will be apparent by their results, and that his perseverance under such discouraging circumstances will be recognized and appreciated by the guardians and the Inspector of the district, act as stimulants to a master, and afford him some satisfaction in fulfilling the trust confided to him. I readily recognize and bear testimony to the zeal and constancy with which a very large proportion of the masters and other officers in my district have acted in unison and have discharged these very disagreeable duties in the several workhouses under their charge. The services they have thus rendered, and the length of time which the changes introduced have been in operation in many of the unions, now enable a comparison to be made, and some deductions may be drawn from the results apparent therefrom.

It is satisfactory to find that the apprehensions that the number of Vagrants relieved would considerably increase have not been realized. There has been no increase in the total number of Vagrants relieved in the entire district. Taking the entire district throughout, and comparing the numbers relieved during the half-year ended at Michaelmas 1864, *before* these changes were introduced, with the numbers relieved during the half-year ended at Michaelmas 1865, *after* those changes were made, it will be seen on referring to Table A. annexed to this Report that the number of Vagrants relieved has very considerably diminished.

During the half-year ended at Michaelmas 1864, *before* any modifications in the mode of relieving Vagrants were made, 55,571 Vagrants were admitted to the Vagrant wards.

During the half-year ended at Michaelmas 1865, *after* the modifications referred to had been established, 49,304 Vagrants were admitted to the wards.

During the last six months, therefore, 6,267 less Vagrants have accepted relief on the terms on which it has been offered to them in this district.

The bare statement of these numbers will not clearly show the operation of the changes made, and in order to place the matter more clearly in view, it is necessary to examine the returns in detail, and observe the results, when some unions are contrasted with others.

The total number of Vagrants relieved in the four unions, in which *no work* is exacted has *increased* in three of those unions, whilst the diminution in the fourth, as will be seen on referring to the following table, is inconsiderable :—

UNION OR PARISH.	Numbers relieved.	
	Half Year ended Michaelmas 1864.	Half Year ended Michaelmas 1865.
Battle - - -	1,269	1,481
Brighton - - -	1,997	2,508
Lewes - - -	1,483	1,494
Reading - - -	1,758	1,788
TOTALS -	6,502	7,216

In the following unions the task of work during the six months has either been occasionally interrupted, imperfectly carried out, or relaxed, or partially abandoned.

UNIONS.	Numbers relieved.	
	Half Year ended Michaelmas 1864.	Half Year ended Michaelmas 1865.
Cookham - - -	1,939	1,963
Hailsham - - -	821	827
Henley - - -	364	853
Oxford - - -	1,141	1,052
Cuckfield - - -	571	602
Ticehurst - - -	471	498
Windsor - - -	1,278	1,191
TOTALS -	6,085	6,486

It will be observed that the numbers relieved have increased in six of these unions, whilst the numbers have diminished, though moderately, in one of them only.

The effect of the general introduction and establishment of a task of work for Vagrants will appear in another point of view if a further comparison be made of the numbers of Vagrants relieved

in some of the few unions in which work in some form or another has always, or has occasionally, hitherto been enforced.

UNIONS.	Numbers relieved.	
	Half Year ended Michaelmas 1864.	Half Year ended Michaelmas 1865.
Abingdon - - -	486	535
Bradfield - - -	62	70

Newport Pagnell - - -	1,199	1,357
Winslow - - -	125	143
Brentford - - -	3,451	3,301
Staines - - -	1,267	1,451
Godstone - - -	795	992
Faringdon - - -	323	307
West Pirle - - -	906	833
TOTALS - - -	9,164	9,636

In seven out of the eleven unions compared in the foregoing table, there has been an increase in the numbers of Vagrants relieved, whilst in the four others there has been a small decrease only.

The increase of the number of Vagrants relieved in such unions has been thus explained. Formerly these unions were avoided by many Vagrants, who knew that if they obtained relief in them they would have to perform a task of work in return for what they received. Vagrants, therefore, avoided these unions, and shaped their route so as to visit the next nearest unions, in which no labour was imposed. Now, however, that work is, with hardly an exception, universally required in this district, Vagrants have no special motive for avoiding one union more than another. The union in which work was always required has ceased to enjoy the comparative immunity which it had secured; the equality has been restored, and the number of Vagrants has either not diminished to any important degree, or has actually increased. Such, at any rate, is the explanation offered to me by workhouse masters of experience and intelligence, and I do not reject the solution given by them.

A further comparison of the numbers of Vagrants relieved in the two half years remains to be made. It is one which is best calculated of all to show how far the actual exaction of labour keeps in check applications for relief from those who do not really require it.

From this last comparison it will be proper to exclude the four unions in which no work is performed. It will also be right to exclude the unions in which work has always been performed, and those in which it has been either so very recently established that no appreciable results could be reasonably looked for. It will further be fair to exclude from the comparison those unions where the work has been interrupted, the exaction of it relaxed, or partially abandoned.

The following table contains the list of unions after such exclusions as those above indicated have been made, showing the numbers of Vagrants relieved in each during the half years ending Michaelmas 1864 and Michaelmas 1865 :—

In making the comparison contained in the foregoing tables, I by no means wish to exclude from view the possibility that the numbers of Vagrants may to some extent have increased or diminished in some unions or counties, either from local or general causes unconnected with the mode in which they are relieved in workhouses. Indeed, I have purposely excluded from comparison two unions in which there is good reason to suspect that the reduced number of Vagrants is partly or wholly unconnected with a task of work. But on looking at these tables, and taking into consideration all the circumstances, no one I think can fail to come to the conclusion that the very considerable diminution in the numbers of Vagrants relieved may be mainly ascribed to the exaction of labour, and to the nearer approach to uniformity in the treatment they receive.

The reduction of numbers would not afford any gratification if it had arisen from increased difficulty in obtaining relief, from harsh or improper discipline, or were it caused by over rigorous treatment in the Vagrant wards. But when this reduction has taken place whilst at the same time no further obstacles, at least, have been raised to the admission of Vagrants to these wards, and whilst their treatment has in various respects been ameliorated and improved, the diminished numbers cannot but be a source of much satisfaction to all those who give their attention to this subject.

My Report would be more imperfect than it is if I were to conclude without further reference to the employment of police officers as assistant relieving officers for the purpose of affording relief to Vagrants.

The services of police officers are at the present time engaged for that purpose, and Vagrants, casual poor persons, and others of the class, are either wholly or in part relieved by means of the police in the under-mentioned unions in my district.

It will thus be seen that Vagrants and casual poor persons receive relief through the police in 25 out of the 68 unions in the district committed to my charge.

The results of thus employing police officers, as shown by the opinions expressed by the Guardians in reply to special inquiries which I made *last year*, were by no means of an uniform character.

In the Amersham, Buckingham, and Newport Pagnell Unions in Buckinghamshire; in the Elham, Malling, Tenterden, and Tonbridge Unions in Kent; in the Bicester, Chipping Norton, and Woodstock Unions in Oxfordshire; in the Chertsey and Guildford Unions in Surrey; and in the Ticehurst and Uckfield Unions in Sussex,—the results appeared to be regarded in some with much, and in other instances with entire, satisfaction by the Guardians, as in their opinion the intervention of the police had either directly greatly diminished, or had more or less tended to diminish vagrancy.

In some of the other unions but little and in others no satisfaction was expressed, and but little or no real advantage had attended upon the intervention of the police.

(1864.) In the Hungerford Union (Berkshire) it was difficult "to say that the intervention of the police had at all diminished "vagrancy." "The number of Vagrants relieved in that union "seemed to have steadily and largely increased for several years "past."

(1865.) The task of work has been modified, and the increase, it will be seen, of Vagrants has been checked in this union during the last half year.

(1864.) In the Newbury Union (Berkshire) "the agency of "the police was thought to have had a good effect in suppressing "vagrancy, and had doubtless kept Vagrants by trade out of the "town of Newbury; but great complaints had then (1864) been "made of the number of beggars in the vicinity of the town, and "numerous commitments had been made by the justices at the "instance of the county police."

(1865.) 'In the Newbury Union there has been a slight decrease in the numbers of Vagrants relieved during the last half year.

(1864.) In the Wallingford Union (Berkshire), where the Vagrants had been relieved by the police for the last two years, "the guardians did not consider that the number of applicants "had been at all diminished."

(1865.) Work has been established, and during the last half year there has been a marked decrease in the number of Vagrants relieved in this union.

(1864.) In the Sevenoaks Union (Kent), where, however, the police had only acted for a few months, "no perceptibly different "effect seemed to have been produced."

(1865.) The task of work has been modified, the system of relief revised, and there has been a marked decrease in the

number of Vagrants relieved in this union during the last half year.

(1864.) In the Chailey Union (Sussex), "the agency of the police had not apparently had the effect of suppressing or diminishing vagrancy, as the numbers relieved since those officers were employed had materially increased."

(1865.) The task of work has been revised, and this increase has been checked. There has been a small decrease in the number of Vagrants relieved in this union during the last half year.

In the Newport Pagnell Union, where the power of giving orders for relief is almost exclusively exercised by the police, a considerable increase has taken place in the number of Vagrants relieved during the last half year.

The foregoing statements apply to the unions in which the police act as relieving officers for the Vagrants at the present time. In some of the other unions in this district the police were formerly employed for the purpose, but their services were, for various reasons, discontinued.

In the Wycombe Union (Bucks), "the police were intrusted with the power of relieving Vagrants for six months in 1862, but no consequent diminution took place in the number of Vagrants relieved. The system was not, however, abandoned on that account, but because it interfered with the efficient performance of the ordinary duties of the police when thus employed."

(1865.) Work has been established at the union workhouse, and there has been a large decrease in the numbers of Vagrants relieved in this union during the last half year.

In the Faringdon Union (Berkshire), "the plan of giving relief to Vagrants by the police was tried and abandoned. The arrangement did not work satisfactorily, as, owing to the frequent absence of the superintendent on other duty, the relief was in a great degree administered by his wife."

(1865.) There has been a decrease in the number of Vagrants relieved in this union during the last half year.

In the Dorking Union (Surrey), "the guardians employed the superintendent of police to relieve Vagrants, in the hope that the increase of vagrancy might be checked, but they did not find that any marked result ensued, and the plan was therefore abandoned."

(1865.) Work for Vagrants has been established at the workhouse, and there has been a very large decrease in the number of Vagrants relieved in this union during the last half year.

In the Banbury Union (Oxfordshire), "the services of the police were employed by the guardians about two years ago. The guardians were, however, obliged to relinquish those services, as it was found that more Vagrants were relieved by the police than had been previously relieved by their own officers. The disagreeable nature of the duty, and the absence of any

“ additional payments to the police for their services, are thought to have contributed in some degree to this result.”

(1865.) The system of giving relief in the Banbury Union has been revised, and there has been a considerable decrease in the number of Vagrants relieved during the last half year.

The guardians of the Horsham Union, in Sussex, “ have declined to employ the police to relieve Vagrants, being of opinion that the number of applicants would not be diminished thereby.”

(1865.) In the Horsham Union the system has been revised, work has been resumed, and there has been a decrease in the numbers of Vagrants relieved during the last half year.

In the Cookham Union, the employment of a police officer as an assistant relieving officer for Vagrants has lately ceased. I believe, however, that it ceased owing to the disinclination of the police officer employed any longer to discharge duties which he found to be most irksome and disagreeable, and which he could not carry out satisfactorily in other respects.

At Henley, the police have only been employed for about a month, and at West Ashford for a short time, and therefore no experience of the change has been gained, and no comparison of its effects can yet be made in these unions.

Police constables also continue to give relief to Vagrants in various other ways, and through other means than such as exist at union workhouses.

In various unions, owing to the distance at which the workhouses are situated from some of the larger towns and other places frequented by Vagrants, the police still give relief, either at common lodging houses, at some building hired by the parish, or in disused gaols or “lock-ups,” appropriated to the purpose. Some of these places I have visited. None that I have seen are in a satisfactory state; some are utterly unsuitable, do not admit of the separation of sexes, and are otherwise unfit for the reception of any one in need of shelter even for one night. No proper discipline nor uniformity of treatment is established in these places. They are beyond the supervision of the guardians, are subject to no regulations, and those who manage them do not incur the obligation and responsibilities of union officers.

And yet these places are daily gaining in importance. Owing to the greater care with which relief is administered in workhouses, the places where such vigilance is not exercised present increased attractions to Vagrants, who show a marked preference for them. Vagrants now purposely delay applying for relief until they know it is too late to send them to a workhouse, and when, as they know also, owing to that circumstance admission to these places to which they give the preference cannot be refused.

No effective system can, I think, be established until such places as I have described are brought under direct control, nor unless relief is given in them in the same form, and on the same conditions, as it is given in the wards of the union workhouses.

When, Sir, I had the honour of laying before you some observations upon this question in February 1864, I submitted to you the following conclusions:—

“ The successful treatment of vagrancy as connected with the relief of the poor, depends not upon the intervention of the police, but upon the judicious firmness with which relief to that class is refused, upon the system under which when given it is administered, and especially upon the extent to which officers are upheld and encouraged in the careful discharge of a most onerous and irksome duty. If an officer of even moderate discretion and firmness should have such a system of relief to afford, if he should be duly countenanced and supported by the local authorities and the Poor Law Board, if the same principles and practice were to be established and permanently adhered to in all unions alike, then I should hope that not only would the numbers relieved and the burdens of relieving be greatly diminished, but that vagrancy would indeed meet with an effective check, a check, however, which cannot be fully and lastingly effective unless at the same time the vagrancy laws be steadily put in force.”

The longer experience and the fuller information I have obtained convince me even more strongly of the necessity for uniformity of action and uniformity of treatment in relieving Vagrants and casual poor. How and by what authority an order for relief in Vagrant wards is issued or obtained is a matter of less importance than the kind of relief that is given, and the conditions on which it is afforded. I believe that Vagrant wards may be so constructed and managed that relief may be so carefully but sufficiently given on the one hand, and so fairly counterbalanced by work and proper discipline on the other, as to constitute those wards self-acting tests of destitution, as well as efficient means for its relief. Those who would be willing to accept relief therein on the terms on which it would be extended to them, might, with but few exceptions, be safely deemed to require it; whilst it might with equal safety be held that those who rejected it on the terms on which they could obtain it, were not suffering from urgent want, and were not in need of the food, the bed, the rest, and the warmth and shelter held out to them.

The Houseless Poor Acts of the last and previous sessions, which are now only metropolitan in their effect, might be adapted to the country at large.

The building, maintaining, and keeping in repair of Vagrant wards might be made a “county charge,” subject to conditions somewhat similar to those which the Acts referred to contain.

Proper wards would then, I anticipate, be more readily provided, and when provided they might be certified and placed under such regulations and control as were deemed expedient by the Poor Law Board.

The fourth section of the Houseless Poor Act of last session might then also be made operative in all parishes and unions.

Mendicants might then fairly be looked upon either as imposters or persons in want; in the one case dealt with as Vagrants under the existing Vagrant Laws; in the other conducted by the police to the nearest certified place at which their wants could be relieved.

But without some such legal assistance as this, without the support of some binding and imperative regulations from the Poor Law Board, without the aid of their authority and the more ready acquiescence which their formal sanction would ensure on the part of the guardians and their officers, I feel that I could not secure a much nearer approach to uniformity of system, or keep alive and sustain even the present degree of unity of action in my district in administering relief to casual poor.

I have, &c.

R. BASIL CANE,
Poor Law Inspector.

Note.—The above Statements relate to the diet of adults and able-bodied Vagrants only.

Children and aged and infirm people have generally a modified diet, suitable to their particular cases.

Sick persons are dieted according to the directions of the Medical Officer.

If Vagrants remain more than one day they are admitted into the workhouse, and are supplied with the diet provided for the ordinary inmates.

**C.—A LIST of UNIONS showing the STATE of ACCOMMODATION for
VAGRANTS, and of the VAGRANT WARDS in each WORKHOUSE.**

Unions.	State of Vagrant Wards.	Unions.	State of Vagrant Wards.
<i>Berks.</i>		<i>Middlesex.</i>	
Abingdon -	Moderately sufficient, but defective in means for warmth and convenience.	Malling -	Very defective in all respects.
Bradfield -	Moderately sufficient, but defective in the means for affording warmth.	Romney Marsh	Moderately sufficient, and are being improved.
Cookham -	Not sufficient for the present large number, and defective in various ways.	Sevenoaks -	Sufficient.
Easthampstead -	Sufficient.	Tenterden -	Sufficient generally, but defective in means for warmth and convenience.
Faringdon -	Sufficient.	Tonbridge -	Sufficient.
Hungerford -	Sufficient.		
Newbury -	Sufficient.		
Reading -	Not effectively constructed. New wards will be provided.		
Wallingford -	Moderately sufficient.		
Wantage -	Moderately sufficient, but defective in the means for warmth.		
Windsor -	Sufficient, but defective in the means for warmth.		
Wokingham -	Moderately sufficient.		
<i>Bucks.</i>			
Amersham -	Moderately sufficient, but defective in the means for warmth.		
Aylesbury -	Moderately sufficient.		
Buckingham -	Sufficient.		
Eton -	Sufficient.		
Newport Pagnell	Insufficient, and defective in proper accommodation.		
Winslow -	Sufficient.		
Wycombe -	Sufficient.		
<i>Kent.</i>			
Ashford, East -	Sufficient, though defective in means for warmth. New wards have been built.		
Ashford, West -	Sufficient. New wards have been built.		
Bromley -	Moderately sufficient.		
Cranbrook -	Moderately sufficient, but defective in means for warmth.		
Dover -	Sufficient, but defective in means for warmth.		
Elham -	No wards. Vagrants admitted to stables. The accommodation here, at Folkestone, and at Hythe is wholly insufficient.		
Hollingbourn -	Moderately sufficient, but defective in means for warmth.		
Maidstone -	No wards. Vagrants admitted to stables and outhouses. Wards are to be provided here.		
		<i>Oxford.</i>	
		Banbury -	Sufficient.
		Bicester -	Sufficient.
		Chipping Norton	Sufficient.
		Headington -	Barely sufficient, and defective otherwise.
		Henley -	Sufficient.
		Oxford Incorporation	Sufficient.
		Thame -	Sufficient generally.
		Witney -	Sufficient generally. The means for warming them are being provided.
		Woodstock -	Sufficient.
		<i>Surrey.</i>	
		Ash Incorporation	No wards.
		Chertsey -	Sufficient for women, insufficient for men, and otherwise defective.
		Dorking -	Proper wards are to be provided.
		Epsom -	No wards.
		Godstone -	Sufficient. The wards have lately been improved.
		Guildford -	Sufficient for the very small number relieved, but somewhat defective.
		Hambleton	Sufficient.
		Kingston -	Inconveniently situated, and barely sufficient for the large number relieved.
		Reigate -	Moderately sufficient.
		<i>Sussex.</i>	
		Battle -	No wards at the workhouse. A house engaged in the town of Battle.

C.—List of Unions, showing the State of Accommodation, &c.—*cont.*

Unions.	State of Vagrant Wards.	Unions.	State of Vagrant Wards.
Brighton Parish	Insufficient. A new house is being built.	Newhaven	Sufficient, but defective as regards warmth, and imperfectly constructed.
Chailey -	Sufficient.	Rye -	Sufficient, but somewhat defective in construction.
Cuckfield -	Moderately sufficient, but out of repair.	Ticehurst -	Sufficiently proper wards in the room of "stable" accommodation has been provided.
Eastbourne -	Sufficient.	Uckfield -	Ordinarily sufficient, but still defective, although some improvements have been effected.
East Grinstead -	Sufficient.	West Firle	Ordinarily sufficient.
Hailsham -	Barely sufficient, but out of repair, and otherwise defective.		
Hastings -	Sufficient.		
Horsham -	Barely sufficient.		
Lewes -	No wards. Vagrants lodged in some old premises hired by the guardians.		

Note.—This table (C.) relates to the state of the Vagrant wards at my last visit previous to the date of this Report.

D.—TABLE showing the NATURE of the WORK required at each WORKHOUSE.

Unions.	Nature of Work.	Unions.	Nature of Work.

VAGRANCY.

REPORT OF U. CORBETT, JUN., ESQ.; POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

To the Right Hon. C. P. VILLIERS, M.P., President of the
Poor Law Board.

DEAR SIR,

Duffield House, Derby,
8th January 1866.

I THINK that the most complete and at the same time most convenient form in which I can supply the information asked for in Mr. Thornely's letter of the 25th of October last, is to furnish you with the enclosed statements, in which I have endeavoured to show the present arrangements for the relief of Vagrants and the state of Vagrancy in each union in my district, under the following heads:—

1. The numbers of male and female Vagrants respectively which the Vagrant wards are calculated to accommodate, the nature of the accommodation, and the average number nightly relieved in them during the 12 months ended at Michaelmas last.

2. Whether this average exhibits an increase or decrease on preceding years, and, where such increase or decrease admits of reasonable explanation, the cause to which it is attributed.

3. Whether a task of work is required in return for the relief afforded, and if so, the kind and amount of the work exacted.

4. Whether food is given to all persons admitted, and if so, the nature and quantity of the food given.

5. Whether the police are or are not employed as assistant relieving officers of Vagrants.

6. Whether the present Vagrant wards have been at any time found insufficient, and, if so, the arrangements which have been made or are contemplated for supplying the deficiency.

By arranging the above information as nearly as possible in the same order in each instance, and upon a separate sheet for each union, I have hoped to make these statements convenient for reference, and I at the same time enclose a tabulated summary or index of their contents, which will, I trust, enable you to see at a

glance the general outline of the arrangements which exist in each union of my district in respect of the several points adverted to in Mr. Thornely's letter.

These arrangements exhibit, I regret to say, no approach to uniformity, and are in many respects of a very unsatisfactory character.

Out of 52 unions comprised in the district you will find but 18 in which a prescribed task of work is uniformly exacted in return for relief, and only seven in which the police can be said to be effectively employed as assistant relieving officers for Vagrants.

Happily the best arrangements are to be found in the more important centres of industry within the district, such as Manchester, Liverpool, Leeds, and Bradford, in all of which the provision made for this class is generally ample, while at Leeds it is of a very superior character; and although in the parish of Liverpool and the townships of Leeds and Manchester the guardians do not avail themselves of the services of the police, the arrangements (which were in force before I came into the district) for the superintendence and useful employment of the able-bodied Vagrants—food being supplied both night and morning—are, I think, deserving of attention, and of imitation in other large parishes or unions. In Bradford (and likewise in the Wakefield and Bakewell unions), the police have, on my recommendation, been recently employed as assistant relieving officers, and with good effect, and the guardians of Halifax union would willingly have adopted a similar course, but the watch committee of the corporation declined to allow the borough police to be thus employed. In six of the 18 unions in which a fixed task of work is now enforced the guardians have, in introducing it, acted on my suggestion; but although I have, as opportunities offered from time to time, recommended boards of guardians both to employ the police as assistant relieving officers for Vagrants, and to set all able-bodied Vagrants to work, you must be aware that from the time I took charge of this district in September 1863, until within the last few months, the guardians of the cotton manufacturing unions have had their time too fully occupied with the administration of relief to their settled poor, and the additional duties and anxieties which the recent distress has in so many places entailed upon them, for it to have been a propitious moment to ask them to take in hand the reorganization of their previous system of dealing with the casual poor.

You will find that in 35 of my 52 unions the Vagrant wards are generally sufficient; in 7 they are insufficient; and in 10 there are not any. These last are the unions of Belper, Burnley, Garstang, Haslingden, Prestwich, Todmorden, and West Derby, the townships (under boards of guardians) of Toxteth Park and Saddleworth, and the Gilbert incorporation of Caton. In these, either no arrangements have been made for the relief of Vagrants, or the system of giving them tickets for a night's lodging at a common lodging-house has been long in force, which I need scarcely say acts as a direct encouragement to and premium on vagabondage.

The Vagrant wards of the doubtless, received all of the applied for shelter and relief and Toxteth Park guardians, wards of the Manchester guardians in the Prestwich and the West Derby guardians have me to provide adequate accommodation workhouse, which will be open and endeavour to arrange for the relief, while the guardians of Burmley unions have all under connexion with which proper. At Toxteth Park you will see "any provision for this class. Belper the question of erect consideration.

Although the details of Mr Thornely's letter are to be for I cannot dismiss the subject of my district without expressing of management in the relief (by the Select Committee on the importance), can alone be attained country generally by the transfer Vagrant relief from the guardians only can we hope to see any continually growing evil of professional.

That such a proposal would that there might be at first carrying out the working details do not think there are any obstacles overcome, and if a well-matured Parliament, I believe it would opinion to the change.

I do not hesitate to say that harshly on the honest and re thinning the ranks of the regular former that shelter and relief practically delinquent.

That the and the which not clearly hardly the w

* See request. 1st of "as so

"rally rendered himself amenable to the law by criminal acts," he dreads being confronted with the police," and the effect of appointing the police in some unions to act as assistant relieving officers for Vagrants has been, in almost every instance which has come under my observation, to deter the impostor and professional tramp, while the really necessitous wayfarer, who has once made up his mind to apply for that shelter, which, from the companionship it forces on him, he is so reluctant to endure, has no more hesitation in seeking his order for admission at the police office than he would have at the house of the relieving officer or the door of the workhouse. I particularly questioned the master of the Bradford (Yorkshire) workhouse on this point last week, and his answers entirely confirmed the opinion I had previously formed. In that union you will see the employment of the police as assistant relieving officers for Vagrants dates only from the 25th March last, and consequently the majority of the applicants, unaware of the new regulation, have in the first instance resorted to the workhouse lodge to seek admission. These have, except when unwell or obviously incapacitated from walking so far, been referred to the police station to obtain an order for admission; and although in numerous instances where the applicants were well known as habitual tramps, the result has been that they have not returned, the master assures me that in no instance has he found any reluctance on the part of those who have appeared real objects of compassion to proceed (when able) to the police office to obtain the requisite order.

Although the reduction in the numbers relieved at the Vagrant wards of this workhouse during the six months subsequent to the employment of the police, is not so great as I should from previous experience have anticipated, yet in the Wakefield union, where the police were first employed in the same capacity on the 18th May last, you will find that the number of Vagrants fell from 2,195 admitted in the 18 weeks ended on that day, to 824 in the 18 following weeks which terminated on the 13th October last.

Again, in the Tonbridge union in Kent, which was one of the unions under my inspection for the 18 months prior to Michaelmas 1863, and where the number of Vagrants relieved at the workhouse had risen from 1,522 in the year ended Lady-day 1861 to 2,744 in the year ended Lady-day 1862, the introduction of the police as assistant relieving officers for Vagrants early in 1863 resulted in a reduction of 412 in the number admitted in the quarter ended at Midsummer 1863, as compared with the corresponding quarter of 1862, and this reduction continued to proceed at the same rate during the time I continued in charge of that district.

The advantages, however, of placing this duty in the hands of the police have been so conclusively shown in the reports furnished annually to the Home Office by Her Majesty's Inspectors of Constabulary for England and Wales, and especially in those of Major General Cartwright, the inspector for the Midland district, that I

need not enlarge upon the instances which have fallen under my own observation.

That there are, however, difficulties in the working of this system is shown by the extract from the report of General Cartwright, which is quoted at page 40 of the "Report from the Select Committee on Poor Relief," and there is a further difficulty arising from jealousy of the police on the part of boards of guardians and their officers, which does, I know, exist in many unions, and which would militate very much against the general employment of the force as "assistant relieving officers" only. Such a feeling has already detracted from their usefulness in some instances, and led (as at Barnsley, in this district) to their services being dispensed with; and, supposing their employment by the guardians to be made compulsory, there would be a still greater risk of inharmonious action, and the police would I fear in too many instances meet with discouragement or at least cold support from their employers.

All these difficulties would disappear were the administration of Vagrant relief entirely transferred to the police authorities throughout the kingdom, and Vagrant wards established in connexion with such of the principal police stations as may be deemed necessary.

The necessity for having recourse to common lodging-houses would then cease, shelter and relief would be promptly available on the spot where application must be made, and much hardship thus spared to the really broken-down and destitute wayfarer;—while such, I believe, would be the reluctance of the professional tramp to passing the night under the immediate surveillance of the police, that "the profession of Vagrancy would" (in General Cartwright's words) "be so crippled that it would be all but annihilated." The new wards would in that case be occupied almost solely by those who really stood in need of them, and the existing Vagrant wards of our workhouses at once be set at liberty for the reception of those applicants, who, being sick or unfit to travel, it would be the duty of the police inspector to have conveyed to the workhouse of the union within which they might be found.

No doubt the cost of erecting Vagrant wards at certain police stations, and the possibly requisite increase of the police force, would be a heavy addition in the first instance to the county or borough rate, but bearing in mind that nothing can tend more to reduce police expenses than the efficient relief of the really destitute, and the discouragement of professional Vagrancy, I do not think the investment would be found so bad a one as it may at first appear, while the benefit to society, and especially to the Vagrant classes themselves, would, if my anticipations are only partially realized, be indisputable.

I confess I have much more faith in the deterring influence of the police on the idle and dissolute but sturdy vagabonds who now infest the country, and are the general occupants of our workhouse Vagrant wards, than I have in the nominal imposition of a task of work; for useful as this undoubtedly is where it can be

strictly enforced under due superintendence, as at Leeds, Liverpool, Manchester, and in other large workhouses, it becomes valueless as a test when no such control and supervision can be exercised, as is the case in the majority of country workhouses. Few of these have any enclosed yards or sheds attached to their Vagrant wards in which such persons can be set to work with any probability of their remaining to complete the task required. In scarcely one will you find any officer to overlook the male Vagrants when at work except the master or the porter; in several there is no paid porter, and even if there be, he cannot always be on the spot, and the practical result is (of which evidence, which might have been multiplied, will be found in the returns enclosed herewith), that the moment the officer's back is turned they make their escape, and frequently do so much damage to the tools supplied to them that the guardians have in disgust abandoned the attempt to exact the task prescribed.

Unless, therefore, the board are prepared to ask for powers to compel guardians to provide enclosed yards or workshops in connexion with sufficient Vagrant wards at *every* workhouse, and to require a paid superintendent of Vagrants at each, I believe the imposition of an uniform labour test will be found to exercise no general influence throughout the country at large, however well it may found to work in the metropolis and other large towns.

Nothing, it is true, can work much better than the system does at Leeds (even without the intervention of the police), but there the supervision by a Vagrant master and mistress is excellent, the work,—grinding corn by men and washing clothes and cleaning the wards by women—strictly exacted, and not only is each person required to go through a warm bath, which to the professional tramp is no less distasteful than work, but his clothes are taken from him for the night, which he dislikes if possible still more, when he is furnished with the unwonted and unappreciated luxury of bed linen. In spite therefore of a good bed to sleep on, and a sufficiency of plain food, fewer of the true vagabond class frequent the wards of this workhouse than could have been expected in a manufacturing town of such magnitude, and during the recent distress in the cotton district a proportionately greater number of *bonâ fide* wayfarers in search of work sought and obtained the shelter of these wards; but even here many old and well-known hands, I am assured, continually present themselves. At Manchester, notwithstanding the good discipline and very inferior accommodation to that offered at Leeds, the proportion of habitual Vagrants is far greater. I there found, on looking over the books kept by the superintendent of the Vagrant department (a slip containing the heads of which will be found in the Manchester statement), that in one week (ended the 24th of June last) out of 338 tramps admitted, exclusive of the Manchester cases, 60 had been admitted *more than* 15 times each since these wards were opened in 1850. One name occurs 17 times between the 14th of March and 23rd of November in last year, and the last occasion appears to have been the 164th time he had been admitted

since 1850; another 10 times between the 14th of May and 6th of October, the last-named date being the 218th night of his reception within the same period. Other names I found within a few pages entered for the 150th, the 164th, 171st, and 208th times, and these instances might be multiplied almost ad infinitum; and I here purposely exclude the "Manchester" cases, which, like those belonging to "Liverpool," are entered separately at each place, and form a class by themselves, being not strictly "Vagrants," but persons who have been residing in those towns and who, being without shelter through having been turned out of lodgings, or from some other cause, are repeatedly admitted for the night. In Liverpool the Vagrant superintendent told me that he was sure he was speaking within the mark when he said that he recognized one in every three of the whole numbers admitted, exclusive of those belonging to Liverpool, as old hands who were periodically in the habit of coming there.

But it is in the country unions, where the Vagrants are of the worst type, that the aid of the police is most loudly called for, and though I believe nothing would be so effective as leaving the Vagrant classes to be dealt with wholly by the police, I would, if this suggestion be rejected, gladly see their employment as assistant relieving officers for Vagrants rendered general throughout the country, in which case one ought always to be stationed near to the workhouse or wherever the Vagrant wards may be established, and except in cases of sudden and urgent necessity, admission should be obtainable only through their medium, and the accommodation provided in each union should be such as to leave no excuse open for having recourse to relief by ticket on the common lodging-house.

I have, &c.

U. CORBETT, JUN.,
Poor Law Inspector.

SUPPLEMENTAL REPORT OF U. CORBETT, JUN., Esq.

MY DEAR SIR,

Duffield House, March 16, 1866.

I RETURN you the corrected proof of the report upon the state of vagrancy in my district, which I addressed to the President of the Poor Law Board on the 8th of January last, and I take this opportunity of submitting to the President, through you, some further details from Liverpool and Manchester, which, as illustrative of the practice pursued and the results observed in relieving "casuals" in those places, it may perhaps be desirable to attach to my report by way of appendix.

The letter from the superintendent of the vagrant wards at Liverpool describes the course of practice on the admission of vagrants, and the arrangements for their supervision during the

night, &c., of the correctness of which I can speak from my own previous personal observation, and the table marked A. accompanying that letter was prepared by him at my request with a view of giving some idea of the proportion of this class who are in the habit of *frequently* availing themselves of the shelter of these wards.

The enclosures in the letter from Mr. Harrop, the clerk to the Manchester guardians, are as follows:—

1. A table marked B. which has been prepared, although in a different form, with the same object as the preceding one.
2. The return marked C., which is a copy of the form in which a memorandum is kept each night of the applicants refused admission to the Manchester vagrant wards, with the cause of such refusal, and which is made up each week and submitted to the guardians for their information.
3. A copy of the rules and regulations issued for the guidance of the superintendent of the same wards, marked D.
4. A memorandum, marked E., made by Dalton, the superintendent, of some particulars which he mentioned to me one night when I was inspecting these wards early in January last, and which I asked him to commit to writing, if upon reflection he felt satisfied of their accuracy. Thinking that he might have overstated the per-centage of habitual tramps and bad characters, I requested him to be especially careful not to do so, and to refresh his memory before committing himself to any definite statement, and I mentioned this afterwards to Mr. Harrop, from whose note it will be seen that Dalton is at least corroborated by the only other officer who has had anything like equal means of forming a correct opinion.

I might multiply evidence in the shape of letters from masters of workhouses and others in confirmation of the view I have taken in my report of the large proportion of disreputable characters who frequent the vagrant wards of workhouses generally throughout the kingdom, but I think it is unnecessary to do so after the exhaustive manner in which this part of the subject has been treated by Mr. Doyle, whose very able report I have had the pleasure of reading since sending in my own, and I therefore only desire to add that nothing can more effectively portray the character and conduct of the great majority of this class throughout the country unions in my district than the extracts from letters and other evidence from the writings of the vagrants themselves with which Mr. Doyle's report abounds.

I am, &c.

To H. Owen, Esq.,
&c. &c.

Poor Law Board, Whitehall.

U. CORBETT, Jun.,
Poor Law Inspector.

SUMMARY of the annexed STATE-

Union.	Vagrant Wards, and if sufficient.	Accommodation in Vagrant Wards for		No Vagrant Wards, and how otherwise relieved.	Average Number of Vagrants relieved per Night for the Year ended at Michaelmas 1883.	No. of Work or Tea optional only.
		Males.	Females.			
Ashbourne - -	Generally sufficient -	10	10	..	4 to 5	Task of work optional.
Ashton-under-Lyne -	Sufficient - -	15	12	..	6	..
Bakewell - - -	Sufficient for all applicants at Bakewell, but not for the whole area of this union.	6	4	The police are empowered to give tickets for lodgings at certain points of this union.	2 to 3 at the workhouse.	Optional
Barnsley - - -	Generally sufficient -	14	14	..	7 to 8	..
Barton-upon-Irwell -	Sufficient - - -	10	10	..	6	..
Belper - - -	None - - -	By the relieving officers and assistant overseers with tickets for lodgings and occasionally for food also.	..	None
Blackburn - - -	Sufficient - - -	30	30	..	11	..
Bolton - - -	Sufficient, but not conveniently situate.	17	17	..	18	None
Bradford (York)* -	Generally so, but not always sufficient for males.	14	14	..	11	..
Burnley - - -	None - - -	By a ticket for a night's lodging at a common lodging-house.	19	None
Bury - - -	Sufficient, but not conveniently situate.	10	12	..	6	None
Caton, G. I. - -	None - - -	No arrangements for relief to this class.	..	None
Chapel-en-le-Frith -	Generally, but not always sufficient for males.	8	8	..	5	Optional

* Since the above was in type, it has been resolved by the Bradford guardians to increase the accommodation at the vagrant wards at night, and to direct the medical officer of the workhouse.

ASHBOURNE.

1. The male and female Vagrant wards are each capable of accommodating 10 Vagrants. The bedding consists of a rug or blanket for covering. The average number of Vagrants relieved during the 12 months ended at Michaelmas 1865, very little exceeded 4 per night.

2. The number of Vagrants has slightly decreased during the last 12 months as compared with the year ended Michaelmas 1864.

3. The able-bodied male Vagrants have to perform a task of work for their breakfast, viz., either stone-breaking or pumping for two hours, but they have the option of leaving without working and without food.

4. The breakfast given in return for such work and to women and children is $3\frac{1}{2}$ ounces of bread and $\frac{1}{2}$ pint of porridge. No supper is given to healthy Vagrants, except women and children.

5. The police do not act as assistant relieving officers.

6. When the Vagrant wards are full, which has occasionally but rarely been the case, any additional applicants are put into a spare room in the infirmary, which is a building detached from the workhouse.

ASHTON-UNDER-LYNE.

1. The Vagrant wards will accommodate 15 men and 12 women, the sleeping accommodation for whom consists of boarded partitions, each furnished with a rug. The wards are heated with hot-water pipes. Average number of Vagrants relieved during the last 12 months 6 per night.

2. Vagrancy has been here latterly on the increase, especially since June last, when the guardians first commenced giving breakfast to able-bodied Vagrants.

3. A task of work is now uniformly exacted from the able-bodied applicants, and is as follows:—Two hours pumping by males, and $\frac{1}{2}$ lb. of oakum ropes to be picked by females. This system has only been adopted since the 22nd of June in the present year.

4. No food is given at night except in cases of illness and to young children. For breakfast, 2 lbs. of oatmeal porridge and $\frac{1}{2}$ of a pint of milk in return for the above task of work.

5. No Vagrant is admitted, except in case of illness, without first procuring a ticket from the police office.

6. The Vagrant wards in this union have (it is stated) always proved sufficient.

BAKEWELL.

1. The ward for male Vagrants will accommodate 6, and the ward for females 4. The males have a wooden platform to sleep on, and each has a rug. The females have a straw mattress on an iron bedstead, with blankets and counterpanes. The average number relieved at the workhouse during the 12 months ended at Michaelmas last has been rather less than 3 per night.

2. The number of Vagrants applying for relief within this union was on the increase until Lady-day 1865, probably arising from destitute applicants from manufacturing towns in search of work or begging, but from Lady-day to Michaelmas 1865, the number has decreased.

3. Male Vagrants have the option of leaving without breakfast, or doing a task of work with breakfast, and they are said invariably to leave without breakfast. The reason assigned for not making the task of work (which would be stone-breaking) imperative, is that there is no separate yard for them to be set to work in; but see my report on this workhouse after a visit on the 29th of December last.

4. Women have bread, and children bread and milk for breakfast, and at night each able-bodied male Vagrant has 4 ounces of bread unless unwell, when he has in addition $\frac{1}{2}$ of a pint of milk or bread and tea. All the females have then 4 ounces of bread and $\frac{1}{2}$ pint of milk or bread and tea.

5. Police constables are now employed in this union in the relief of Vagrants, and the clerk reports, "upon the whole with good effect."

6. The applicants at the workhouse not having exceeded the accommodation, no other provision has been considered necessary at Bakewell; but the area of this union is so large that it has been found requisite to empower the police constables since the end of 1863 to give tickets for one night's lodging to each Vagrant, who upon search is found destitute within the union, at points remote from the workhouse. The desirability of providing additional Vagrant wards at Stoney Middleton and Cromford to remedy this evil has been under discussion, but hitherto without results.

BARNESLEY.

1. Each ward is capable of accommodating 14 Vagrants. Sleeping accommodation, a raised wooden platform, with loose straw and rugs. The average number of Vagrants relieved per night during the 12 months ended at Michaelmas 1865 was from 7 to 8.

2. Vagrancy has been latterly on the decrease here, which the clerk attributes to the master giving *in open weather* a steady refusal to admit such *able-bodied* tramps as have been accustomed *habitually* to resort to these wards.

3. A fixed task is uniformly exacted, able-bodied men being required to break stones or pump until 11 o'clock a.m., and women to clean their own wards in return for their food and lodgings.

4. The food supplied to men is 7 ounces of bread and 1½ pint of milk porridge for supper, and the same for breakfast; and to women the same quantity of milk porridge with 6 ounces of bread at each meal.

5. The services of the police constables as assistant relieving officers of Vagrants were discontinued about a year ago, the guardians not being satisfied with the result of their employment, and conceiving that orders of admission to the Vagrant wards at the workhouse were given without due discrimination.

6. In the event of the Vagrant wards being full, which very rarely occurs, notice to the relieving officers of such being the case is given, who procure lodgings for any further applicants at the common lodging-houses in the town.

BARTON-UPON-IRWELL.

1. The male Vagrant ward will accommodate 10 persons. The female Vagrant ward the same number. The sleeping accommodation consists of a wooden platform divided into compartments by upright ledges. Average number of Vagrants relieved per night during the 12 months ended at Michaelmas 1865 was 6.

2. Vagrancy stationary.

3. Vagrants have hitherto had the option of leaving without work and without food, or of performing a task of work in return for breakfast.

4. The task of work required of able-bodied men, when exacted, is to break stones for two hours; women and children are not required to work. The food consists of oatmeal porridge and milk.

5. The police are not employed in this union.

6. The present Vagrant wards have been, it is stated, always found sufficient.

BELPER.

No Vagrant wards in this union. Vagrants are relieved by the relieving officer at Wirksworth, the assistant overseer of Belper, and the overseers of the poor at Alfreton and Ripley, which are respectively distant from Belper, eight and five miles. In almost every case an order is given for a night's lodging only.

Police constables are not employed, the guardians having by a large majority refused to appoint them as relieving officers for Vagrants.

The number of Vagrants thus relieved in the 12 months expiring at Michaelmas 1865 was 3,440; ditto, 1864, 2,237; ditto, 1863, 3,578; ditto, 1862, 3,925.

At the last meeting of the guardians of this union, I succeeded in inducing them to take into consideration the propriety of erecting Vagrant wards, and special notice has been sent to every guardian that a resolution to carry this into effect will be brought forward at their next meeting on the 6th of January instant. The further consideration of this question was on that day adjourned for another month.

BLACKBURN.

1. The Vagrant wards at this workhouse will accommodate 30 males, 30 females. The males have only boards to sleep on, but females and children have mattresses and rugs. The average number has been about 11 each night for the last 12 months.

2. Vagrancy appears on the decrease in this union.

3. Able-bodied Vagrants are now compelled to break stones; or work on the land for one hour, but this system has only been in operation about four months.

4. Each Vagrant receives a supper on admission, and a breakfast after the required labour is actually performed. Each meal consists of 1 pint of meal porridge and 1 pint of milk.

5. The police issue all orders for admission into the Vagrant wards. This regulation has been in operation for about four years, through which the bad characters have been considerably reduced.

6. The present wards have been found quite adequate, but Vagrants applying after 10 o'clock p.m. are provided with accommodation for the night in a warm cell at the police station.

BOLTON.

1. The Vagrant wards of this workhouse are capable of accommodating 34 persons, 17 of each sex. The sleeping accommodation consists of a raised boarded platform, with rugs for covering, and the wards are warmed by a stove. The average number admitted per night during the 12 months ended at Michaelmas last appears to have been about 18.

2. The above average is in excess of former years, the average for the year ended 1864 being 16 per night; for 1863, 15 per night; and for 1862, 12 per night.

3. No work is now exacted from any of the Vagrants, the reason assigned by the clerk for this being as follows:—"Many years ago a task of work was required in return for relief; but it was not found by any means to have the effect of diminishing vagrancy, but if anything the contrary. The guardians then adopted the plan at present carried out of providing shelter and giving no food, and the number of applicants was soon found to lessen. I see in 1849, the number of tramps reported at the same time of the year as at present was at the rate of 200 per week; on 6th December 1848, it was 220, and at no time of the year was it less than 150. The numbers appear in May 1849, to have been 180 per week or so. I take this period because it was a time of great distress, like the past has been, but not so bad. Food was then given, and stone and sand broken in return."

4. No food is given to Vagrants in this union, either at night or morning, except in cases of extreme necessity, and then at the discretion of the workhouse master, who says he finds it very rarely requisite to give food.

5. Police constables are not formally appointed or employed as assistant relieving officers for Vagrants here, although they very readily and willingly give occasional assistance.

6. The Vagrant wards at the new workhouse have never, the clerk says, been found inadequate for the number seeking shelter there, but the guardians instruct the relieving officers to avoid sending to the workhouse (on account of its distance, 2½ miles from the town) persons whose appearance may indicate fatigue and bodily inability to get there, especially in the case of women and children, and to deal with such cases "by giving relief if necessary, and lodgings in the town." Recently it has been proposed to establish a trampward in the town of Bolton, to meet the difficulty arising from the position of the workhouse at Farnworth, but the proposal was negatived at the meeting of the guardians on the 6th of December, and the further consideration of the question postponed until after the election of the next board of guardians.

BRADFORD (YORKSHIRE).

1. The Vagrant wards at the workhouse of this union are calculated to accommodate 28 adults, viz., 14 of each sex. The men sleep on a raised boarded platform, with one rug each. Women and children on a similar plat-

form, upon which are made up for them beds consisting of a straw mattress and two rugs each. There is a guarded fire-place in each ward. During the half year ended at Michaelmas last 2,000 persons, viz., 1,432 men and 568 women and children, received accommodation in these wards, being an average per night of about 11 persons, viz., 8 males and 3 women and children.

2. The number relieved in the corresponding period of the previous year was, I am told, 2,147; and I have taken six months instead of 12 in this union on which to base my comparison, because the system of employing the police as assistant relieving officers for Vagrants in this union only came into operation on the 25th of March last.

3. Every person admitted, if in full health, is required to take a bath, and every able-bodied male to break limestone for two hours in the morning if he remains for his breakfast, but not otherwise. The task used to be exacted in all cases, but it being found that the men constantly made their escape, and there being no specially appointed superintendent of labour, the guardians subsequently determined it should be optional; but they have since at my request re-considered this resolution, and it has now been determined to build an enclosed shed where they can be set to work without risk of their escape, when the above task of work will be made imperative on all able-bodied males.

4. The only food hitherto given has been breakfast, which consists of a quart can full of thick oatmeal porridge and milk, weighing 2½ lbs. I have recommended that supper be also given, which will, I have no doubt, be adopted.

5. Since the 25th of last March admission to the Vagrant wards can now only be obtained by an order signed by or on behalf of the chief constable of the borough police, but as the workhouse is a mile distant from the police station in Bradford, the master of the workhouse has a discretionary power to admit persons who through illness, exhaustion, or any other cause he may consider unable to go as far as the police station to obtain an order. Of the 2,000 admitted between Lady-day and Michaelmas last, I find that 1,935 were admitted by orders from the chief constable and 65 by the master on his own authority.

6. Vagrants in this union are not relieved anywhere except at these wards, but they have occasionally been overcrowded, and the guardians have had under discussion more than once the propriety of enlarging them, but no plan has yet been decided on.

N.B.—I extract from a letter of Mr. Darlington, the very able and experienced clerk to the guardians of this union, his observations on the result obtained by the adoption of my recommendation to the guardians to employ the police:—"Previous to the employment of the police the guardians were very particular in giving admission to the Vagrant wards of the proper class of persons, and this may in part account for the fact that the decrease in the number relieved since the police were employed has not been so great as may have been anticipated, the decrease during the six months was 147; nevertheless, I am (and even had there been an increase, I should have still remained) of opinion that the police are the proper persons to grant admission to the Vagrant wards. I am assured that frequent applications are now made for admission without an order, and when the applicants are informed that they must apply at the police office for an order of admission, they walk away declaring that they will not go near the police office, and we never see them more."

BURNLEY.

Relief to Vagrants is administered in this union in common lodging-houses upon orders given by the relieving officers. As a rule no food is given, but at times there are exceptions, when bread and butter and tea or coffee is given, to the value of about 3d. for each person. The average number of Vagrants nightly relieved during the last 12 months appears to have been 19, and such average as compared with the previous 12 months is said to show a nightly decrease of about 14.

The police are only employed at late hours of the night in giving orders to the lodging-houses after the relieving officers have gone from their offices.

BURY.

1. The Vagrant wards at this workhouse are calculated to accommodate 10 men and 12 women and children. Both the male and female wards are warmed by steam, and supplied with wooden bench bedsteads, with straw for beds and bed ticks for covering. The number relieved during the year ended 31st October last was 2,042 males, 193 females, and 99 children, or an average of rather more than 6 nightly.

2. The numbers for the preceding year were 1,918 males, 156 females, and 73 children, so that the increase has not been quite 10 per cent.

3. No task of work is imposed, but I have requested the guardians to consider the propriety of determining on a suitable one, and giving food in all cases, but they have not as yet come to any decision.

4. Food is not now given as a general rule, but bread and butter, or bread and milk is given to the children.

5. The police are only employed, I understand, to this extent,—that in Bury they are authorized to send Vagrants to the workhouse (which is nearly two miles out of the town) until 9 or half-past 9 p.m., according to their age and capacity, the workhouse gates being kept open till 10 at night, after which hour they give tickets for lodgings in the town.

6. The wards at the workhouse have not, I understand, under these circumstances been at any time found insufficient.

CATON, G. I.

No Vagrant wards, and no arrangements made for the relief of this class.

The clerk to the Lancaster union informs me that Vagrants applying at the Lancaster Vagrant wards not unfrequently say that they have come on from townships in the Caton incorporation, where they have been told to apply at the Lancaster workhouse.

CHAPEL-EN-LE-FRITH.

1. The male and female Vagrant wards are capable of accommodating 8 males and 8 females. The sleeping accommodation consists of 4 wooden beds, with large woollen rug covers. Average number of Vagrants per night, 5.

2. The number of Vagrants has increased during the last 12 months as compared with preceding years.

3. The able-bodied Vagrants have the option of leaving without work and without food, or performing a task of work in return for their breakfast, but nearly all prefer leaving without food. The task of work, when exacted, is breaking 2 hundredweight of limestone to go through a 2-inch riddle.

4. Six ounces of bread given in the morning for breakfast to able-bodied men who work. Women suckling babes and also young children have food given them without work both night and morning, if asked for, or if they seem to require it.

5. The police constables have been employed as assistant relieving officers for Vagrants since the year 1858, but no further than by leaving with them tickets of admission to the Vagrant wards at the workhouse to be given to all applicants.

6. When there are more male Vagrants than the beds will accommodate, a fire is made for them in the day Vagrant ward, round which they sit and sleep on the floor, any spare rugs from the female Vagrant ward, which is rarely full, being furnished to them.

CHESTERFIELD.

1. The male and female Vagrant wards will accommodate 15 persons each; the sleeping accommodation consists of wooden boxes or beds filled with clean straw, and raised high enough to be free from the damp of the stone floor. From Michaelmas to Lady-day a good fire is kept burning in each ward all

night, and each tramp is supplied with a rug for covering. The average number relieved per night during the year ended Michaelmas last has been 6.

2. The number of Vagrants applying for relief has been latterly on the increase as compared with preceding years, attributable in some degree to the frequent strikes in the coal and iron trades.

3. No work is required from Vagrants in return for the relief afforded them. The only reason assigned for not requiring it being that the guardians are short of the necessary accommodation, and desire to get rid of the Vagrants with as little trouble as possible. The trial of washing Vagrants previous to admitting them into the Vagrant wards has been resorted to, but this did not at once realize the expectations of the guardians, and was soon abandoned.

4. Each Vagrant is allowed 4 ounces of bread for supper and 4 ounces of bread for breakfast, with cold water.

5. The superintendent of police has been employed for many years as the assistant relieving officer for Vagrants, and it is thought many Vagrants are deterred from applying in consequence.

6. The Vagrant wards have never yet been found insufficient. If they were, the guardians could easily enlarge them.

N.B.—The clerk to the guardians of this union states it to be his own private opinion that if Vagrancy is to be diminished, the exaction of a task of work must be rendered imperative; and he also "inclines to placing the relief to Vagrants altogether into the hands of the police."

CHORLEY.

1. Each of the Vagrant wards (male and female), which are at the Chorley workhouse, there being none at the other small workhouse of this union, will accommodate 15 persons. The sleeping accommodation is a wooden platform extending along the whole length of each ward. Average number, 5 per night during the last 12 months.

2. The number has been latterly nearly stationary, but on the increase since the commencement of the cotton distress, which is nearly coincident with the time when the police ceased to act as assistant relieving officers for Vagrants in this union. (See observation 5).

3. There is no fixed task of work, but male adults have the option of working for their breakfasts or leaving without food, the work required being merely to sweep the yard, &c., or break stones for an hour.

4. No food is given at night except to women and children in special cases, such as sickness or exhaustion, &c. The breakfast (when given) consists of 1 pint of oatmeal porridge and 3 ounces of bread.

5. The police are no longer employed as assistant relieving officers for Vagrants, and ceased to be so some four years ago (before I had charge of this district), when owing, I am informed, to their taking Vagrants up to the workhouse at all hours of the night, the guardians resolved not to give admission to Vagrants who did not apply for an order before 8 o'clock p.m., of which resolution a public notice was placarded in Chorley, and a copy is constantly kept hung up in the waiting room at the union offices. This resolution is said to have been the means of causing the Vagrants to apply in due time, but it has not diminished their number. The police have not since interfered with the relief of Vagrants.

6. As the Vagrant wards up to the present time have been found sufficient for the number of applicants, the guardians have made no further provision for their accommodation.

CHORLTON.

1. There are Vagrant wards to this union, both at the union offices in the town of Manchester, and at the workhouse, which is about four miles distant, in the township of Withington. Those at the offices will accommodate 35 males and 15 females, and those at the workhouse 15 of each sex. The wards are well lighted and warmed by hot-water pipes, and fitted with raised and partitioned wooden platforms by way of bedsteads, which are furnished with rugs, and a raised ledge runs the whole length of each platform for the head to rest on. The numbers relieved at the office wards during the 12 months

ended at Michaelmas last were, on an average, 21 per night, of whom rather more than 17 per night were men, and not quite 4 per night women. At the workhouse wards, in the whole of the same period, there were but 661 men and 213 women relieved.

2. The above figures show a slight decrease in the numbers relieved at the workhouse and a considerable increase on those relieved at the office wards over those in the 12 months ending at Michaelmas 1864, but during the last quarter the latter returns show a slight decrease.

3. A fixed task of work, viz., to pick $\frac{1}{4}$ lb. of oakum, for two hours in a morning, has been exacted at the offices, and all applicants have been required to go through a warm bath since June last, which has, as above noted, had some slight effect already in diminishing the numbers.

4. Four ounces of bread at night and 8 ounces in the morning given to each Vagrant.

5. The police are not employed.

6. The number of applicants has, I am assured, never exceeded the accommodation since the present Vagrant wards were provided.

CLITHEROE.

1. The Vagrant wards at one of the workhouses in this union (that at Holden) are capable of accommodating 4 males and 4 females. The sleeping accommodation consists of beds and bedding the same as for the inmates. The average number of Vagrants relieved here for the last 12 months has not exceeded 1 per night; the total number relieved here during the last 12 months having been but 331. At the other workhouses of the union (that at Bighton Bailey) there are no Vagrant wards, and I am assured not two applicants in a year, but both these workhouses lie at a consideration distance from the town of Clitheroe, or from any main thoroughfare; and in Clitheroe and other parts of the union remote from Holden workhouse, tickets are given for a night's lodging and food when the cases appear to require it.

2. Vagrancy is on the increase, but at "Chipping" and in the Yorkshire portion of the union, where the police have been employed about five years, the effect has been to diminish Vagrancy, notwithstanding the want of proper Vagrant wards in those places.

3. No task of work required.

4. Each Vagrant admitted at the Holden workhouse is allowed before leaving in the morning: males, 5 ounces of bread and 2 pints of milk porridge; females, 4 ounces of bread and $1\frac{1}{2}$ pint of same porridge. No food is given at night except in cases of sickness or of real necessity.

5. Police officers are employed as above mentioned in the Yorkshire part of the union and at Chipping, but at Clitheroe they are only partially employed in the absence of the relieving officers, to whom application for relief is made in the first instance.

6. In this union there ought, undoubtedly, to be Vagrant wards in or near the town of Clitheroe.

DERBY.

1. The present Vagrant wards are capable of accommodating 30 men and 6 women. In two wards, which are calculated to accommodate 14 men, straw only with a rug for each is provided in the way of bedding. The remainder of the men, and the female Vagrants, have beds and bedding in other wards. It is usual to put the worst characters on the straw. The average number of Vagrants per night relieved during the year ending Michaelmas 1865, was 19.

2. The number of Vagrants appears to have been gradually on the increase until this year, during which the numbers have been somewhat less than in the year preceding.

3. A fixed task of work is exacted as far as practicable from the able-bodied men, viz., to break half a quarter of a yard of boulders after rising in the morning.

4. The food allowed is 8 ounces of bread and a quart of porridge, half of which they receive for supper, and the remaining half when they have completed their work in the morning. All who are admitted to the Vagrant wards receive breakfast and supper.

5. A police constable is and has been employed as assistant relieving officer for about two and a half years, but it does not appear to have had any material effect in diminishing Vagrancy.

6. All Vagrants in this union have hitherto been accommodated at the Vagrant wards at the workhouse without having recourse to lodging-houses, but the accommodation has not been sufficient to allow of the task of work required from each Vagrant being strictly exacted, and plans for alterations of this workhouse, embracing the Vagrant wards, in which this defect will be remedied, have already received the sanction of the Poor Law Board.

DEWSBURY.

1. The Vagrant wards of the workhouse are capable of accommodating 14 males and 14 females. The wards are fitted up with raised wooden frames or platforms partly round the wards, and the males have each a rug, and the females rugs and straw beds to sleep on. Average number of Vagrants relieved per night during the last 12 months, 7. Formerly the male Vagrants had straw beds same as the females, but they set fire to them, and burned them, and they have not been supplied since.

2. The number of Vagrants applying for relief has been on the decrease since the able-bodied were required to perform a fixed task of work, which was approved by the Poor Law Board, and came into operation on the 17th of July 1863.

3. The task of work exacted from each able-bodied male Vagrant is to break 5 cwt. of dross or scoria, in such a manner that when broken it will pass through a 2-inch riddle.

4. The quantity of food given to each Vagrant is 5 ounces of bread and a pint of milk night and morning.

5. Police constables are not employed in this union as assistant relieving officers for Vagrants.

6. The Vagrant wards have hitherto been found sufficient for all applicants.

THE FYLDE.

1. The Vagrant wards of the workhouse are capable of accommodating 10 males and 10 females. A large wooden bed or settle is fixed the length of each ward, upon which a quantity of straw is placed, and each occupant is furnished with a rug. The average number of Vagrants relieved at the workhouse for the past 12 months has been about 2 per night.

2. As compared with the three preceding years, the total number of Vagrants relieved within the union has decreased about 6 per cent.

3. No work is exacted for the relief afforded.

4. Supper as a rule is almost uniformly given, and breakfast also in exceptional cases. The food given is porridge and bread, but no specific quantity is fixed.

5. The police constables at Blackpool and Fleetwood afford relief to the Vagrants at those places, the cost of which is repaid by the relieving officers. This plan has been in operation some time, and found to work satisfactorily.

6. The wards at the workhouse have not been found insufficient, and consequently no other provision has been made by the guardians except at Blackpool and Fleetwood, as before mentioned.

GARSTANG.

No Vagrant wards.

One of the county police has, since June 1862, acted in the Garstang district as assistant relieving officer for Vagrants. He attends for the purpose at the town hall, Garstang, from 6 to 8 o'clock, p.m. every night, and gives tickets for a night's lodging at a common lodging-house to such as are destitute, but before giving a ticket, each applicant is searched, and occasionally considerable sums have been found upon some of them. The police officer at present employed, lately found upon one man two half-crowns and a sixpence concealed in an apple. He was committed by the magistrates, and the 5s. 6d. found on him was applied to defray expenses. In the other relief district the overseers relieve Vagrants by ticket for lodgings in the villages of Great Eccleston and Pilling.

Food and nourishment are only given to the sick.

The number of Vagrants relieved during the 12 months ended at Michaelmas last, was 4,098; at ditto, 1864, 4,422; ditto, 1863, 4,828; and ditto, 1862, 5,005; thus showing a regular decrease since the appointment of the police constable as assistant relieving officer at Garstang, which decrease would have doubtless been greater had other constables been appointed to act instead of the overseers in the outlying district of St. Michael's, and to a still greater extent were Vagrant wards erected and a task of work required in return for relief. The police officer keeps a record of the names, ages, description, and other particulars of each applicant and their families.

GLOSSOP.

1. The Vagrant wards at the workhouse are capable of accommodating 10 males and 10 females; they sleep on wooden bench bedsteads, and are furnished with a rug each. The average number relieved during the last year only fractionally exceeded 2 per night.

2. On the increase during the last six months, the cause assigned for which is the cotton mills having recommenced work and the operatives passing from one place to another in search of employment.

3. No task of work is exacted and no food is given at any time, except to women or children, or casual sick, and then only in cases of necessity.

4. Police constables are not employed.

5. The Vagrant wards have always been found sufficient, but if the applicants exceed the accommodation, the guardians would send them to a lodging-house, and pay for their beds.

HALIFAX.

1. The male and female Vagrant wards of this workhouse will each hold 16 persons. The females have wooden box bedsteads with straw. A fire is kept burning through the night. The males have a guard-room bedstead without either straw or rugs, and the ward is heated by hot water. The average number relieved per night during the 12 months ended at Michaelmas was 22.

2. The number of Vagrants applying for relief has been on the increase when compared with 1864, but on the decrease as compared with 1863 and 1862. Vagrants are said to find Halifax "a very good begging place."

3. No fixed task of work is exacted, but if male Vagrants remain for breakfast they are expected to break dross for three hours, but there is not the requisite accommodation for enforcing the performance of it, and the men having the option given them almost invariably elect to go away without breakfast. The women and children are not required to work.

4. Breakfast is given to all women and children, and consists of 5 ounces of bread and 1 pint of coffee. No food is given at night.

5. Police constables are not employed as assistant relieving officers. The guardians endeavoured, on my recommendation, to make arrangements with that object, but the watch committee of the corporation declined to allow their officers to be thus employed.

6. The master of the workhouse tells me that in the event of a really destitute wayfarer or decent woman, with or without children, applying for shelter for the night, he has frequently on his own responsibility made up a bed or beds for them in the receiving wards, when not otherwise occupied, sooner than allow them to be exposed to the turbulence and depraving influences of the professional Vagrant, who are the general occupants of the ward allotted to this class, but he has never had occasion to do this on the ground of their being overcrowded, the accommodation having been generally found sufficient.

HASLINGDEN.

No Vagrant wards.

Prior to June 1864, the relief of Vagrants was left entirely in the hands of the several relieving officers. In June 1864, in consequence of the great increase in the numbers of Vagrants, it was determined to place their relief, in the Haslingden and Newchurch districts, in the hands of the police. The

method of relief adopted by the police is the same as that which was previously adopted by the relieving officers. The person applies to the police constables in the Haslingden and Newchurch districts, or to the relieving officer in the other districts, and if he considers the applicant unable to pay for a night's lodging he gives him a ticket on a lodging-house keeper.

Except in cases of great destitution no food is given.

The number of Vagrants relieved during the year ended at Michaelmas last, 4,501. As compared with the year ended Michaelmas 1864 there is a decrease of 1,743, but there is still an increase upon the numbers relieved prior to the commencement of the cotton famine.

HAYFIELD.

1. The Vagrant wards will accommodate 8 males and 8 females. The Vagrants sleep on boards in the shape of beds, with a supply of rugs to put under and over them. The rooms are well heated by stoves. The average number relieved per night for the last 12 months was 5.

2. Vagrancy has increased latterly, which is considered partially attributable to two lines of railway being in course of construction near the workhouse.

3. No work is exacted from the able-bodied male Vagrants. It is the practice to allow them to leave without work and without food.

4. To women and children food is occasionally given, and if the women are able-bodied they assist in cleaning the Vagrant wards in return for the food supplied them. Some years ago it was customary to give the Vagrants food and to exact work from them in return, but after receiving their food they invariably refused to do the work allotted them, and there being no male officer to assist the master at this small workhouse, the practice was abandoned.

5. The police constables have not been appointed here to assist in the relief of Vagrants.

6. The Vagrant wards at the workhouse have always been found sufficient for all applicants.

HUDDERSFIELD.

No Vagrant wards at any of the workhouses of this union except the one recently erected at Deanhouse, the locality of which is so remote from any main road or thoroughfare, that there are found to be no applications.

A Vagrant office has been established in the centre of Huddersfield for about 20 years, which accommodates 12 men and 38 women and children. The average number lodged per week is over 200, and as between one year and another varies very little.

No food is given except in cases of necessity, nor any task of work exacted.

The accommodation afforded at the Vagrant office has hitherto been considered by the guardians sufficient to prevent the necessity of making other provision, although on one or two occasions of extreme pressure there has been considerable difficulty and inconvenience.

At Marsden, about seven miles from Huddersfield on the Manchester road, there is a lodging-house for travellers, for which tickets are given in the district by the police and overseers, and a similar course is pursued in the other outlying district of Holmfirth; but as a rule no food is given at either of those stations. The numbers thus relieved at Marsden are considerable, but at Holmfirth the number is not large.

Vagrant wards will be provided at the new workhouse at Huddersfield, for which plans have been obtained and sanctioned.

At the present Vagrant office in Huddersfield there are no baths, and the arrangements in other respects are defective, but better order has been maintained there since the appointment of a borough police officer as master of this office about three years ago, though from the want of baths and a fixed task of work there has been no perceptible diminution in the number of applicants.

KEIGHLEY.

1. The Vagrant wards of this workhouse are capable of accommodating 17 males and 17 females. The male Vagrants sleep on a large wooden platform,

and the females have a similar platform in their ward, though occasionally they have been provided with iron bedsteads and rush mattresses. One large rug is allowed to each Vagrant, and in cold weather *two*, and they are allowed fires. The average number of Vagrants relieved per night during the last 12 months was 10.

2. Vagrancy on the decrease as compared with the preceding three years, but it still shows an increase as compared with the years immediately prior to the distress in Lancashire.

3. No task of work is now exacted from able-bodied Vagrants in return for the relief afforded, it having been found that the greater part would leave without food rather than work for it, while the few who accepted work and food are said to have done more damage in destroying tools than the value of their labour amounted to. The real reason that it was not found to answer, no doubt, being that there was no means of exercising due supervision over them, and consequently the task was not made imperative.

4. No food is now given to able-bodied male Vagrants. Women and children receive in the morning a pint of oatmeal porridge and half a pint of milk each. No food is given at night.

5. Police constables are not employed.

6. The Vagrant wards have not yet been found insufficient.

LANCASTER.

1. The Vagrant wards will accommodate 20 males and 6 females. Iron bedsteads and chaff beds are provided, with suitable covering. The average number of Vagrants per night relieved during the 12 months ended at Michaelmas last was from 10 to 11 males, and from 1 to 2 females.

2. The Vagrants have increased 22 per cent. during the last year as compared with the average of the three years preceding, which is attributable in some measure to a new line of railway and other large works which are being executed in this neighbourhood; but see concluding part of observation 3.

3. Work is uniformly exacted from able-bodied Vagrants in return for the relief afforded, and the guardians are empowered by an order of the Poor Law Board to require the performance of four hours' work; but except in cases of idleness or other misconduct, or of repeated application for relief, only two hours' work is exacted. In very short winter days Vagrants are not kept quite so long as two hours after breakfast. The work is usually picking oakum, cleaning the Vagrant wards, &c.; but occasionally work on the land is performed. The order requiring four hours' work has been in operation since 20th June 1849. The guardians had previously obtained orders empowering them to require shorter periods of work, but they found it necessary, in order to check the very large number of Vagrants, to apply for the present order. The number of Vagrants is at present only about one-third of what it was before work was required, although at that time no food was given except in special cases. There was a very rapid decrease from the time that work was enforced.

4. Each Vagrant has a quart of oatmeal porridge in the morning, and children and feeble Vagrants have porridge and bread at night.

5. The police are not employed as assistant relieving officers for Vagrants, but the Lancaster police officers are empowered to provide at a lodging-house lodging for Vagrants found in Lancaster after 9.30 p.m., but few are thus relieved. This arrangement has been practised for many years.

6. Mr. Grant, the clerk to the guardians of this union, writes to me as follows:—

“The guardians have not found it necessary to make any further provision for the accommodation of Vagrants. The wards are under the charge of the porter, subject to the supervision of the master. The Vagrants, with very few exceptions, are cleansed in a tepid bath before going to bed. As a general rule they do not object to this. We find it next to impossible to require a given *quantity* of work, their respective capacities being so diverse.”

LEEDS.

1. The Vagrant wards at the Leeds workhouse are superior in all their arrangements to any in my district. Accommodation is provided in these wards for 64 adults—32 of each class. All have beds, of which there are 16 for men and 16 for women and children. These are large double beds, and consist each of a good straw mattress and bolster, with a pair of sheets and a woollen rug. Every Vagrant in health is required to go through a warm bath. Their clothes are then *taken from them for the night*, and old night linen from the workhouse stores is supplied to them to sleep in. The number relieved here during the 12 months ended at Michaelmas last has averaged nearly 15 per night, of whom about one-third have been women and children.

2. The number is said to have increased during the height of the distress in Lancashire, and I find the number received into these wards during the last 12 months is just 505 below the number in the 12 months ended Michaelmas 1864. Before the new workhouse was built the number of Vagrants relieved was seldom less, I am informed, than 40 per night.

3. A task of work is exacted from all who are able. Every able-bodied male is required to grind 30 lbs. of wheat, and the females to wash clothes or clean the Vagrant wards as directed by the Vagrant mistress.

4. The food given is the same for all, viz., 6 ounces of bread and half a pint of milk and water to each, night and morning.

5. The police are not employed, but a Vagrant master and mistress being appointed, who have the sole charge of this department, under the superintendence, of course, of the master of the workhouse, there is no difficulty in maintaining strict discipline.

6. The wards have never been crowded, nor, the clerk tells me, have they ever been inconvenienced by this class since the present system has been in force, while the cost expended is, he says, repaid by the work exacted from the men.

LEIGH.

1. The Vagrant wards at this workhouse will accommodate 18 male and 18 females. The average number of Vagrants relieved during the year ended at Michaelmas last is less than 2 per night. The sleeping accommodation consists of rugs placed upon benches, and quilts are allowed for covering.

2. Vagrancy has been on the decrease in the Leigh union during the last 12 months.

3. A fixed task of work, viz., oakum-picking for a period of three hours, is required uniformly in return for the relief afforded.

4. The food allowed to each person admitted is 1 pint of oatmeal porridge and half a pint of buttermilk for supper, and 1 pint of new milk porridge and 4 ounces of bread for breakfast.

5. The police are not employed in any way in the relief of Vagrants.

6. The accommodation for Vagrants at the workhouse has not been found insufficient.

LIVERPOOL.

1. The Vagrant wards at the Liverpool workhouse are calculated to accommodate 90 men and 60 women, though at present there are sleeping berths in them for 48 men and 30 women only. The reason of this is that each ward was originally fitted with large iron frames, each intended for two tiers of berths fitted with double canvas stretchers, but the compartments of the upper tier in each remain open, and have never been fitted up as sleeping berths, it having been considered, and I think justly so, in many respects objectionable that they should be so used, especially in the case of women and children. Stout canvas coverlets are provided, and in the male ward there are two large fire-places, one at each end of the ward, protected by fixed boards, and one in the smaller ward allotted to the females. These wards are both lighted by gas, and good fires are kept up, round which I am informed numbers of the Vagrant class pass the night on the floor by choice, frequently leaving empty many of the berths allotted to them.

2. The average numbers nightly availing themselves of these wards during the last seven years have been returned to me as follows: 1859, 40 per night; 1860, 43; 1861, 63; 1862, 81; 1863, 88; 1864, 100; first nine months of 1865, 104; this showing a material and progressive increase; but I find that during the last three months of the present year the average has again dropped to 93½ per night. Mr. Hagger, the clerk to the select vestry, is unable to assign any especial cause for this continued increase, beyond the fact that he believes the accommodation provided is better than they can obtain at the cheap lodging-houses in Liverpool at the cost of 2d. per night. The table at the foot of this statement shows the various localities to which the Vagrants relieved during the last quarter belong.

3. A task of work is exacted from all able-bodied Vagrants, the men to grind corn night and morning, not exceeding 30 lbs. weight on each occasion, and the women not exceeding 20 lbs. each. Women with children are however excused, and practically the test, as regards women, is rarely resorted to, as very few able-bodied women without children have recourse to these wards.

4. The food given is the same for all; each Vagrant on admission receiving 6 ounces of bread and 1 pint of milk gruel, and the same before they are discharged in the morning.

5. The police are not officially employed by the select vestry, but as a matter of fact they refer destitute persons to the Vagrant wards, and not unfrequently bring them to the doors. No applicants are obliged to bring an order of admission with them, but are admitted at once, unless they have slept more than three nights in one month in these wards, in which case they are referred back to the relieving officer for further inquiry, and he can then give an order for their admission.

6. The clerk to the select vestry informs me that on one occasion only were applicants to these wards refused shelter for want of room, and then "some thousands of persons having tramped from the factory districts to Liverpool to witness an execution, hundreds applied at the workhouse for a night's lodging, and could not be accommodated." He adds "should it happen that the present wards are found insufficient for several nights successively, the select vestry will certainly take steps to make the necessary provision."

N.B.—I beg to refer to the annexed lithographed copy of the "Regulations for the guidance of the Superintendent of the Vagrant Department" at this workhouse for the President's further information.

**PARISH OF LIVERPOOL.—REGULATIONS for Guidance of the Superintendent
of the Vagrant Department of the Workhouse.**

The department to be open for the admission of Vagrants at 5 o'clock p.m. daily, and to continue open until 10 o'clock on the following morning.

All destitute poor persons presenting orders for admission from any of the relieving officers, together with all others applying, who shall appear to the superintendent to be destitute tramps or Vagrants, to be admitted.

The superintendent shall record in a book the names of all persons admitted, and shall prepare weekly abstracts of same.

He shall also record the names of all applicants whom in the exercise of his discretion he shall refuse to admit, with his reasons for every such refusal, and he shall hold himself prepared to account for his conduct in every such case.

He shall call the special attention of the superintendent relieving officer to all cases that have been admitted into the Vagrant wards for three nights in any month.

Vagrants upon admission to be searched and placed in a bath. The temperature of the bath to be fixed daily by the medical officer on duty.

Vagrants capable of doing so, to be required to grind corn, not exceeding 30 lbs. each on the evening of admission, and 30 lbs. before discharge on the following morning; but the officer in charge to have the power of diminishing the quantity according to his discretion in special cases.

Any Vagrant pleading inability to work by reason of illness or any other cause to be excused, unless the medical officer shall certify that such Vagrant is capable of working and performing the task imposed.

Oakum-picking or other lighter work to be provided for those who are not fit for the heavier work of corn-grinding.

Each Vagrant on admission to receive 6 ounces of bread and 1 pint of milk gruel, and before discharge a like allowance.

Vagrants to be discharged on completing morning's task of work, or not later than 10 o'clock a.m. daily.

In all cases of difficulty, the superintendent to apply for instruction and direction to the governor of the workhouse.

MANCHESTER.

1. The accommodation of the Vagrant wards of this township is for 60 males and 50 females. Both sexes have the same provision made for them by night, viz., two boarded platforms running half the length of each ward on both sides, with a raised ledge for their heads to rest on, and a rug for each person. The wards are heated with hot-water pipes and lighted with gas. The average number nightly received therein during the year ended at Michaelmas 1865 was males 29, females 14, and children 8; total 51.

2. The average numbers admitted nightly since 1848, the year in which Vagrant wards were first provided, are as follows:—

Year ending September 1849	- 64	Year ending September 1858	- 32
" " 1850	- 49	" " 1859	- 15
" " 1851	- 58	" " 1860	- 14
" " 1852	- 35	" " 1861	- 33
" " 1853	- 23	" " 1862	- 38
" " 1854	- 20	" " 1863	- 40
" " 1855	- 22	" " 1864	- 46
" " 1856	- 19	" " 1865	- 51
" " 1857	- 26		

Mr. Harrop, the clerk to the guardians, says upon this:—"The increase during the years 1861, 1862, and 1863 doubtless arose from the distress in the district. The continued increase in 1864 and 1865 may be attributed to some measure to the same cause, but still more to a change in the regulations for the admission of Vagrants. Formerly no Vagrant was admitted more frequently than once a month. This restriction was relaxed about two years since, in consequence of which many persons, especially females

"with children, avail themselves of the Vagrant wards more frequently than 'formerly.' The numbers relieved here during the last 13 weeks of 1865 averaged, I find, but 41 per night. A table at the foot of this statement (similar to that for Liverpool) shows generally the localities to which they belonged.

3. The males are required to grind two hoppers (about 45 lbs.) of corn in a hand-mill, or to do any other kind of work suitable to male inmates, and which the superintendent may consider them equal to, for a space of time not exceeding $3\frac{1}{2}$ hours. The females are required to wash the floors of the Vagrant wards and the rugs used therein, or to do any other work which the superintendent may consider necessary, and which they may be capable of performing, for a space of time not exceeding $3\frac{1}{2}$ hours. One half of the task work is performed in the evening and the other half in the morning.

The medical officer of the workhouse visits the Vagrant wards every evening for the purpose of attending to any of the Vagrants who may be sick, or who complain that they are unable to perform the prescribed task of work. If sick or unfit to travel they are taken into the workhouse, which is close at hand.

4. Each Vagrant is allowed 8 ounces of bread for supper and a like quantity for breakfast.

5. The police are not employed by the Manchester guardians in any way in providing for the relief of Vagrants.

6. The present Vagrant wards have not, I am assured, been at any time found insufficient for the number of applicants.

The following observations by Mr. Harrop, on the past and present system of relieving Vagrants in Manchester, will not, I think, be without interest:—

"The attention of the Manchester board of guardians was specially drawn to the subject of Vagrancy at the passing of the Act 7 & 8 Vict. cap. 101. At that time, and for some time after, it was the practice in Manchester to relieve Vagrants by giving them money to enable them to provide a lodging for themselves. This having been found to be a very expensive and objectionable mode of dealing with them, the guardians made arrangements to open a ward for their reception in a building which they then occupied, and in 1850 they erected the present building, known as the 'House of Industry,' for the employment of out-door poor, a portion of which was set apart as a Vagrant ward, and is still used for that purpose.

"Some of the advantages of this change of system will be seen from the fact that the cost of relief to Vagrants speedily fell from an average of 10*l.* or 12*l.* weekly to about 2*l.*

"The Vagrant wards are placed under the charge of a superintendent and an assistant, subject to a general supervision by the master and matron of the House of Industry. The particulars of the case of each Vagrant are recorded by the superintendent in a book * provided for that purpose. The Vagrants are then searched, and if found in possession of sufficient money to provide for themselves for the night, they are sent out. After being searched, each Vagrant who is ascertained to be a fit case for admission is required to undress and wash himself in a bath and is afterwards set to work. Any Vagrant refusing to work or to comply with the other conditions of admission is immediately turned out of the wards; unless he pleads sickness, on which the medical officer is called upon to examine him, and he is then dealt with according to the directions of that officer. If found unfit for travel, the Vagrant is admitted into the workhouse.

"It may prove an interesting fact that the proportion of English and Irish Vagrants has altered very much within the last 12 or 14 years. During the period 1851-2-3 there were about 15 Irish Vagrants to every 10 English. The proportion is now about 3 or 4 to 10.

"It is proper to add that there is a night asylum in Manchester, supported by voluntary contributions, at which destitute persons can obtain a night's lodging, but that is only open during the winter. The Manchester guardians

* The particulars entered in this book will be seen by the accompanying slip, containing the headings of its several columns, which I annex to this statement.

subscribed 40*l.* per annum to this institution before the introduction of the New Poor Law."

NORTH BIERLEY.

1. The Vagrant wards are capable of accommodating 24 male and female Vagrants. They sleep upon boards, and are supplied with straw and rugs. The numbers relieved are so small in this union that a daily average cannot be given, the number for the whole year ended at Michaelmas last being only 72 in the Vagrant wards at the workhouse, viz., 41 men, 17 women, and 14 children.

2. The number of Vagrants applying for relief "within the union" has greatly decreased within the last two years, but the decrease has entirely arisen in the number applying for admission to the workhouse, where they are searched, and their clothes taken from them for the night and returned in the morning.

For the year ended Michaelmas 1863, the number of Vagrants relieved was, at the workhouse -	286
By the relieving officers of the two other relief districts, by tickets for lodgings -	111
Total	397

For the year ended Michaelmas 1864, at the workhouse -	127
By tickets from the relieving officers of the other two districts -	93
Total	220

For the year ended Michaelmas 1865, at the workhouse -	72
By tickets from relieving officers in the district -	122
Total	194

3. No fixed task of work is exacted, the reason assigned being the small number of able-bodied men who apply at the workhouse.

4. No food is given to able-bodied men, but to infirm men, women, and children breakfast is allowed.

5. Police constables are not in any way employed in this union in the administration of Vagrant relief.

6. The Vagrant wards are clearly sufficient to accommodate all applicants within this union, but it should be borne in mind the town of Bradford lies between the workhouse and some of the largest townships of the union.

OLDHAM.

1. The Vagrant wards here are capable of accommodating 18 males and 9 females. The nature of the accommodation consists of iron bedsteads, with rugs for a covering. The average number of Vagrants lodged per night during the last 12 months has been 14.

2. The number of Vagrants seeking relief during the past 12 months has been slightly on the increase, for which no particular reason is assigned.

3. There is, however, no fixed task of work for Vagrants in this union.
 4. No food is given to male Vagrants, although to women and children oatmeal porridge and milk is given in a morning, but no supper on admission, except in some special case of emergency.
 - *5. Police constables are not employed here as assistant relieving officers for Vagrants.
 6. The present Vagrant wards have hitherto been always found sufficient.
- N.B.—The clerk to the guardians in this union (Mr. Kay Clegg), who is a gentleman of considerable experience, says, "It is the experience of the guardians and myself that as a rule Vagrants travel about in numbers, and that one is made into a kind of banker for the rest, who does not apply for admission to the tramp wards, but who finds funds for food where no food is given by the parish authorities."

ORMSKIRK.

1. The Vagrant wards will accommodate 12 males and 12 females. The sleeping accommodation consists of wooden benches, and a covering or wrapper for each Vagrant. The number relieved during 12 months ended at Michaelmas last gives a nightly average of nearly 8.
2. Vagrancy has been generally on the increase in this union, but comparing the last year with 1863 the number has decreased. The large number in 1863 is attributed to the general distress in the cotton manufacturing districts.
3. No task of work is required, nor is any food given.
4. For the last 10 years the police constables have had a key of the Vagrant wards at the workhouse for the purpose of lodging Vagrants therein during the night time; but the police constables have no other powers as assistant relieving officers.
5. In addition to the Vagrant wards at the workhouse lodgings are provided by the overseers of Northmeols (an outlying township of the union) at Churchtown, which is about nine miles distant from the workhouse, but the numbers relieved here did not average much more than 1 per night in the last 12 months.

PENISTONE.

1. The wards for male Vagrants will accommodate 18; the ward for females will accommodate 6. The sleeping accommodation comprises an inclined wood bedstead extending the length of the wards. The males have no bed, only a rug. The females have a bed made of coarse canvas, which contains chaff or straw, and a rug. The nightly average of tramps for the 12 months ended Michaelmas last was 10.
2. The number of Vagrants receiving relief has been decidedly on the increase during the last 12 months as compared with preceding years, but the guardians, "after mature consideration, cannot attribute any reasons for such increase."
3. No fixed task of work is exacted from the Vagrants in return for the relief afforded.
4. The Vagrants receive no supper, but a breakfast consisting of 4 ounces of bread and half a pint of porridge.
5. Police constables are not nor have they ever been in this union employed in the relief of Vagrants.
6. The present Vagrant wards have not hitherto been found insufficient.

PRESCOT.

1. The Vagrant wards at this workhouse will accommodate 15 males and 12 females, who lie on wooden bedsteads (three of which of large size are provided for each ward), without any covering but their own clothes. A good fire is said to be always kept in each ward during the winter and in cold weather, and formerly straw was supplied in summer, but a fire having been occasioned by some of the male Vagrants igniting it with matches, which they had contrived to conceal, the use of it was discontinued. The number of Vagrants relieved nightly during the 12 months ended at Michaelmas averaged nearly 20.

2. This exhibits an increase on the average of the preceding years, for which the clerk to the guardians says he is unable to assign any particular cause. (But see remarks numbered 3, 4, and 5.)

3. No task of work is imposed in this union.

4. Food is now given night and morning to all, viz., $\frac{1}{2}$ ounces of bread and half a pint of buttermilk to each at night, and 4 ounces of bread in the morning. Until this year 6 ounces of bread was given *at night only*.

5. The police are not employed, though it is said that "they were many years ago without any apparent advantage."

6. During the last year the male Vagrant ward has occasionally been found insufficient, and the guardians purpose enlarging it early in the ensuing year.

PRESTON.

1. In this union there are wards for Vagrants at the Preston and Ribchester workhouses. In those at the Preston workhouse the master states he can furnish sleeping accommodation for 25 males and 20 females, which consists of clean straw and rugs for males, and straw beds with rugs for females. In those at Ribchester, which are professedly intended to accommodate 18 males and 6 females, and which have been recently repaired and newly roofed, beds and bedding are provided for both sexes; but in the male ward there are but six, and in the female ward two such beds. The average number admitted to the Vagrant wards at these workhouses during the 12 months ended at Michaelmas 1865 has been a fraction over 9 per night at Preston, and 5 per night at Ribchester.

2. This average exhibits a considerable decrease at both places (especially at Preston) over the numbers of this class relieved during the three preceding years, which is attributed greatly to the improved state of trade in the district, and partly to the reluctance of the worst class of Vagrants to apply to the police at Preston for an order of admission, which for the last 18 months they have been there compelled to do.

3. There is no labour test for Vagrants at the Preston workhouse, where indeed there is no accommodation for setting male Vagrants to work; and at Ribchester, although the men are set to work to break stones or dig on the land, and the women to clean the Vagrant wards if they remain for breakfast, it is optional with them to leave without breakfast, so that it does not operate as a test.

4. At Preston no food is given, as a rule, to able-bodied male Vagrants, but if they ask for it and are found to be destitute, they receive 5 ounces of bread each, and women and children receive respectively 5 and 4 ounces of bread each, night and morning. At Ribchester 1 quart of milk porridge is supplied to each Vagrant, both male and female, for supper, and the same for breakfast, if they elect to work for it. On Sunday night they have 1 quart of broth each with 4 ounces of bread.

5. The principle of employing the police in the relief of Vagrants has been acted on to some extent in this union for rather more than 18 months, and with decidedly favourable results. At Preston the head constable is appointed assistant relieving officer for Vagrants, and in his absence the police officers in charge give orders to Vagrants for admission to the wards at the workhouse, but no other person is authorized to do so. At Ribchester workhouse also the master has the assistance of a county police officer at night, and the effect of this has been found most beneficial at both places.

6. In addition to the Vagrant wards at Preston and Ribchester workhouses, which are reported to be amply sufficient for all applicants at those places, it has been found necessary to provide Vagrants applying in the Longton district with lodgings at a house in Longton, which is termed the "district lodging-house," and which is distant from Preston six miles, and from Ribchester 14 miles, on the direct road from Liverpool to Preston and the north. From 2 to 3 Vagrants each night has, I find, been the average number admitted during the last six months to this house by orders, which either the relieving officer of the district or an officer of the county police are authorized to give.

PRESTWICH.

No Vagrant wards, nor any arrangements made for the relief of Vagrants in this union. The clerk to the guardians says they have no applications, which, I presume, arises from the immediate vicinity of the Prestwich union offices to the House of Industry, where are the Vagrant wards belonging to the Manchester guardians. The present small and inadequate workhouse of this suburban union is at a distance of three or four miles from the town of Manchester, and not upon any main thoroughfare; but the guardians are about to build a new workhouse, for which a convenient site has been obtained, and plans will shortly be prepared.

ROCHDALE.

1. There are Vagrant wards at one only of the four workhouses in this union, viz., at the Wardleworth workhouse in the town of Rochdale. The wards here are intended to accommodate 9 males and 6 females, for the former of whom the sleeping accommodation consists of boards and blankets, and for the latter, beds and bedding. The number relieved during the 12 months ended at Michaelmas last averaged more than 13 nightly, of whom the proportion of men to women united was as 3 to 1, the total number for the 12 months being 3,618 men, 678 women, and 558 children. Many of these, however, received tickets for lodging-houses, as in point of fact the Vagrant wards at the workhouse were not available during a great part of the year prior to Midsummer 1865, owing to the necessity of converting them into temporary fever wards before the new workhouse then building at Marland in this union was completed.

2. The numbers above given show an increase on those relieved in the preceding 12 months, which may possibly be attributable to the necessity which then existed for giving tickets for lodging-houses to a greater extent than usual.

3. Each able-bodied male Vagrant relieved at the Vagrant wards is now required to pound sandstone for one hour and a half in return for relief afforded. No specific quantity is required, and those relieved in lodging-houses are not required to work at all.

4. Food is given for supper only, and not to any who apply for admission after 9 o'clock at night, nor those sent to lodgings, except in case of actual necessity. It consists of 1 pint each of milk and porridge, or the same quantity of "lobscouse," (a potato hash).

5. The police are not employed here in the relief of Vagrants.

6. I do not consider the Vagrant wards at the workhouse to be at any time adequate to the requirements of this union.

SADDLEWORTH.

There are no Vagrant wards at the workhouse, but Vagrants are relieved by tickets for a night's lodging at Delph (about two miles from the workhouse), on application to Mr. Platt, who resides there, and has for some years acted as assistant relieving officer for Vagrants in the township. The number relieved during the last 12 months, which exhibits a slight decrease on the year last preceding, is fractionally in excess of 4 per night.

No task of work is exacted, and no food is given.

The police are not employed.

SALFORD.

1. The Vagrant wards are capable of accommodating 24 males and 12 females, for whom 24 beds in the male and 12 beds in the female ward are provided. They are ordinary wooden camp beds, with thick rugs for a covering. One or two rugs are allowed, according to the weather. The average number of Vagrants per night relieved during the 12 months ended at Michaelmas last was 16 males, 4 females, and 2 children.

2. The number relieved during the past three years have been—

1863	-	-	-	-	7,239
1864	-	-	-	-	6,957
1865	-	-	-	-	8,009

3. There is no fixed task of work exacted from each able-bodied Vagrant in return for relief. The female Vagrants are employed in cleaning the Vagrant wards and flags before leaving. All are supplied with food, whether they work or not.

4. The food is given in the evening, viz., about 2 pints of oatmeal porridge and milk, or the same quantity of pea soup, potato hash, or rice milk, such as is prepared for the inmates, in the event of any being left at dinner. The food is always served warm.

5. Police constables are not employed as assistant relieving officers.

6. The present Vagrant wards not having proved insufficient, no further provision has been deemed necessary.

SETTLE.

1 and 2. The Vagrant wards at this workhouse will accommodate respectively 6 males and 4 females, for each of whom beds are provided, which consist of a straw mattress and a rug. The average number relieved at the workhouse is said not to have been quite 4 per night, but I find that there were 2,648 Vagrants who applied for relief during the 12 months ended at Michaelmas last, and 2,410 during the preceding 12 months ended Michaelmas 1864.

3. A task of work is now uniformly exacted from each able-bodied male Vagrant, viz., 2 hours stone-breaking from 29th September to 25th March, and 3 hours ditto from 25th March to 29th September. The quantity of stone is not specified. This task of work was only submitted to the Poor Law Board for approval after the meeting of the guardians on the 23th November last.

4. Two pints of oatmeal porridge are given to each Vagrant night and morning.

5. The police are not employed in this union.

6. Vagrant wards ought to be erected in another part of this wide union; the best station for which would probably be at Bentham.

SHARDLOW.

1. The Vagrant wards will accommodate for 7 males and 7 females. The males sleep on a wooden bedstead, with rugs for covering; the females have straw mattresses, with rugs and blankets. The average number of Vagrants relieved during 12 months ended at Michaelmas last has been a little under 3 per night.

2. Vagrancy appears on the increase here.

N.B.—The workhouse is directly on one of the great highways between the north and the south.

3. Vagrants have the option of leaving without food and without work, but the task they have to perform, if they receive food, is to break 3 cwt. of granite.

4. The food given is .6 ounces of bread and 1½ pint of oatmeal porridge for supper, and the same for breakfast.

5. The police have not been employed in this union.

6. The Vagrant wards have hitherto been found sufficient.

SKIPTON.

1. The Vagrant wards at the workhouse are capable of accommodating 6 males and 4 females. The sleeping accommodation consists of three beds, capable of containing two persons each, in the men's ward, and two similar beds in the female ward. The average number of Vagrants relieved in the workhouse during the year ended Michaelmas last has been less than 3½ per night, but it will be seen that a much larger proportion have been relieved out of the workhouse.

2. The number of Vagrants relieved during the past 12 months has been less than in the three preceding years, though more than in the year 1861.

Out of the house,	1861	-	1,116	In the workhouse, 1861	-	1,016			
"	"	1862	-	5,984	"	1862	-	787	
"	"	1863	-	5,295	"	"	1863	-	2,081
"	"	1864	-	4,727	"	"	1864	-	1,480
"	"	1865	-	3,812	"	"	1865	-	1,283

The increase and decrease in these numbers correspond very nearly with the state of the cotton trade in this district during the last five years.

3. A fixed task of breaking stones for four hours is exacted from each able-bodied male Vagrant who is admitted to the Vagrant wards at the workhouse, but an option is frequently given them of having either a ticket for a lodging-house (where no food is given), or for the workhouse where food is given and a task is enforced. The female Vagrants perform *no task work*.

4. All the Vagrants admitted to the workhouse receive for food three-fourths of a quart of soup and 4 ounces of bread, or three-fourths of a quart of milk and oatmeal porridge, both at supper and breakfast.

5. No police constables are employed.

6. If the Vagrant wards at the workhouse are full then tickets for a night's lodging are given upon some lodging-house in the town, and the Vagrants (as might be expected) prefer not to go into the workhouse, where they know a task will be enforced, even when the wards are not full.

STOCKPORT.

1. The Vagrant wards at this workhouse are capable of accommodating about 20 males and 20 females. The sleeping accommodation consists of four wooden platforms in each ward, with an elevated ledge for the head, and thick green rugs for a covering. Each platform will hold about five persons. The average number of Vagrants relieved per night during the 12 months ended at Michaelmas last was 14 males, 2 females, and 1 child; total 17.

2. The number of Vagrants relieved in the Stockport union workhouse has been greatly on the increase during the last 12 months as compared with preceding years, as the following table will show:—

Number of Vagrants relieved, year ended Michaelmas	1859	-	1,688
"	"	"	1860 - 1,507
"	"	"	1861 - 2,995
"	"	"	1862 - 3,969
"	"	"	1863 - 3,454
"	"	"	1864 - 4,767
"	"	"	1865 - 6,019

3 and 4. No work is exacted nor any food given, for which the clerk (Mr. Coppock) assigns the following reason:—"Formerly a task of work of 3½ hours' stone-breaking was exacted in return for food night and morning, but it had no effect in lessening the number of Vagrants. Many refused to work, and were sent to the house of correction, until the justices complained of their accommodation being interfered with by this class of cases, the majority of them coming from the Stockport union. They also broke the hammer shafts purposely, so that one man could not mend them fast enough to keep them employed. Women and children from the neighbouring towns came here to beg, and then applied to the tramp ward at night, because they could get food and lodging. The discontinuance of the food was the most efficient check."

5. Police constables are not employed in this union as assistant relieving officers for Vagrants.

6. The guardians have not made any further provision for Vagrants, as the wards have not been found insufficient for the numbers already relieved. The greatest number ever relieved was on the night of the 26th of October 1864, when 40 Vagrants were accommodated.

TODMORDEN.

No Vagrant wards in this union. The Vagrants are relieved by the relieving officer of No. 1 district, who gives a ticket which entitles the applicant to a bed for one night at a lodging-house. In a few cases of urgent destitution food has been given, but the whole amount expended in this way during the past 12 months is said not to have amounted to 2s. 6d.

At Hebden Bridge the Vagrants are relieved by the inspector of police, who simply gives a ticket for a night's lodging at a lodging-house.

The average number of Vagrants relieved nightly during the year ended at Michaelmas last at Todmorden was 8; at Hebden Bridge, 3; preceding year at Todmorden, 13; at Hebden Bridge, 4.

TOXTETH PARK.

No Vagrant wards, and no special provision for Vagrants made by the guardians of this township. The reason always assigned to me by the guardians of this large and populous township for not having provided wards for the reception of Vagrants, has been that the workhouse (which is a large and commodious one of comparatively recent erection, but completed before I had charge of the district) is so far from the heart of Liverpool, that there are rarely any applicants for relief there of this class, and that if any really destitute wayfarers should apply, the master of the workhouse would probably have no difficulty in making temporary provision for them in the workhouse or receiving wards.

In January and February of the year 1865 the Board were, in consequence of a report made by me on the workhouse of this township, in correspondence with the guardians on the subject, and I find that on the 17th of February 1865 I recommended the Board to suggest to the guardians the expediency of making adequate provision for Vagrants, either at the workhouse or elsewhere in the township, as I again did upon a proposal made by the guardians to purchase a site for building a board room and offices for the accommodation of themselves and the officers of the township. The guardians have, however, hitherto resisted all attempts to induce them to make such provision voluntarily, and the annexed extract from the minutes of their proceedings on the 21st of December instant, when the clerk at my request again brought the subject under their consideration, shows that they still retain their previous objections to take any steps to provide for this class.

(Extract.) "The clerk having brought under the notice of the guardians the necessity for making provision for the relief of Vagrants, with the view of furnishing the Poor Law inspector with the opinion of the board on the subject, it was resolved that this board are not inclined to make any provision for the relief of Vagrants until compelled to do so."*

WAKEFIELD.

1. The Vagrant wards will accommodate 18 males and 18 females. The Vagrants sleep on inclined boards, with straw laid, on and rugs for covering. Nearly 20 Vagrants per night have been relieved on the average for the year ended at Michaelmas 1865, but the average for the last six months is much less.

2. A considerable decrease on the numbers relieved during the years 1863 and 1864, but an increase on 1862.

3. A task of work has been uniformly exacted since the 3rd of August 1864, which is to pick oakum for a space of time not exceeding 4 hours in return for their food and lodging, but the quantity of oakum to be picked is not specified. (See note by the clerk to the guardians at the foot of this sheet.)

4. No supper is allowed to Vagrants, but they are allowed for breakfast $7\frac{1}{2}$ ounces of bread and $1\frac{1}{2}$ pint of milk porridge for each male, and 6 ounces of bread and $1\frac{1}{2}$ pint of milk porridge for females.

5. Police constables have been on my suggestion recently employed as assistant relieving officers, and no Vagrant is, I now understand, admitted without first obtaining a ticket from the police office. This plan has been only in operation from the 30th of last May, but I find on reference to my weekly returns from this union that the numbers began to drop immediately, and in the 18 weeks which elapsed between then and the close of the Michaelmas half-year the total number relieved was but 824, while in the corresponding 18 weeks of 1864 the number relieved was 2,135.

6. The guardians have made no provision for the relief of Vagrants when the Vagrant wards are full, beyond authorizing the relieving officer for Wakefield, who resides near the workhouse, to give them tickets for admission to the lodging-houses in the town.

N.B.—I append the observations of Mr. Stewart, the clerk to the guardians, upon the operation of the task exacted. "My own impression is that oakum picking is not a proper test, and that it requires a stricter test to reduce the number of Vagrants. The Vagrants are kept for

* See however note at page 128.

"the four hours' labour, but no particular weight of oakum is required from each Vagrant. The consequence is, very little real picking is done."

WARRINGTON.

1. There are two Vagrant wards at this workhouse, one for males, capable of accommodating 36 Vagrants, and the other for females, which will accommodate 10 persons. The sleeping accommodation of each consists of raised boards, with a rug for each Vagrant. The average number of Vagrants per night relieved during the year ended Michaelmas 1865 is 22.

2. The number of Vagrants applying for relief has considerably decreased as compared with the previous year; the decrease has been 2,834, which is attributed to the improvement in the cotton trade.

3. There is no prescribed task of work, but male Vagrants are required to work four hours in summer and three hours in winter. No able-bodied Vagrant is allowed the option of leaving without work, which is, according to their capacity, either to pump water, break stones, or pick oakum for four or three hours, according to the season.

4. All Vagrants receive 6 ounces of bread at night and the same quantity in the morning.

5. No police constables are employed as assistant relieving officers.

6. The Vagrant wards have never yet been found insufficient.

WEST DERBY.

No Vagrant wards and no special provision for Vagrants at present made by the guardians in this union.

A new workhouse is being built out of the town of Liverpool, which will be ready for occupation in the course of the ensuing year; and I annex the following copy of an extract from the minutes of the guardians after I recently brought the subject of making due provision for this class under their notice, at the same time recommending the employment of the police as assistant relieving officers for Vagrants.

(Extract.)—"The guardians having discussed the subject of the provision requested for the relief of Vagrants, it was resolved that the Poor Law inspector be informed that it is not practicable to procure accommodation for the reception of Vagrants in the present workhouse, but that it is the intention of the guardians to provide such accommodation at the new workhouse, and to obtain the co-operation of the police in carrying into effect the requisite machinery."

WIGAN.

1. The Vagrant wards at this workhouse will accommodate 15 males and 18 females. They sleep on a wooden platform, with woollen quilts. Average per night, 8.

2. A slight increase in the number of Vagrants relieved during the last 12 months on preceding years, which the clerk attributes to the increased demand for labour at the factories and collieries in this district; but on the whole Vagrancy has diminished in this union since the imposition of a task of work about three years ago.

3. A task of work is exacted from each male Vagrant in return for the relief afforded, which is in fine weather picking $\frac{3}{4}$ lb. of oakum.

4. Each Vagrant receives three half pints of meal porridge night and morning.

5. The police are not employed in the relief of Vagrants here.

6. The wards up to the present time have been sufficiently large to accommodate all applicants.

LETTER from the SUPERINTENDENT of VAGRANT WARDS at LIVERPOOL
to MR. CORBETT.

Liverpool Night Asylum, Liverpool Workhouse,
February 3, 1866.

SIR,

In accordance with your instructions I beg to forward you the accompanying return, together with the following memoranda.

Applicants for admission are received from 5 p.m. until 3 or 4 o'clock a.m.; each case is examined as regards name, age, settlement, &c., and the antecedents ascertained as far as is practicable. Whatever property the person may have is taken charge of until the following morning, when it is returned to the owner. Should (as is frequently the case) a sufficient sum of money be found with any one to cover the expenses for the night, he or she is sent away to procure lodgings. The person when admitted is directed to have a bath, and unless there is some special reason to the contrary, all must go through this process. After the bath has been taken the able-bodied are required to perform the amount of work assigned to them, under the constant superintendence of persons appointed for that purpose. Work being completed they retire to their bed rooms, where, in the male department, a man is stationed to show each to his bed, and who remains as watchman during the night, in order that everything may be properly conducted; and in the female department, which is under the immediate superintendence of my wife, the arrangements are similarly carried out; I may add that at frequent intervals during the night I am in the habit of visiting the working department and sleeping rooms, so that there is little or no opportunity for mischievous practices. In carrying out these arrangements my wife has a female inmate of the house to give her general assistance, while I have a person employed in the office, another to assist in searching, a man at the baths, one over the mills, one to attend to the yard, waterclosets, and beds in the men's sleeping room, and one to act as night watchman.

In old and infirm cases, where the parties have no friend or residence or means of support, they are handed over to the relieving officer to be disposed of by him, either by sending them into the workhouse or otherwise as he thinks fit.

Children under 15, who apply for admission themselves or are brought by police officers, I never lose sight of until they are sent into the house or restored to their friends.

It frequently happens that respectable female servants out of place are reduced to the last extremity before applying here, these I take special notice of, and in many instances either my wife or myself has succeeded in introducing them to respectable employment; and at the present moment there are some six or eight persons thus placed out in service in Liverpool and its vicinity who are giving marked satisfaction to their employers.

In the cases of drunken parents presenting themselves, my practice is to send the children into the workhouse, and give the parents in charge to the police, with the view of having them brought before the magistrates.

As there are three medical officers residing in the establishment, one of them always visits us evening and morning, to mark the temperature of the baths and to see and prescribe for any that may be ill. Should any case require immediate medical attention, the doctor is at once sent for, and should he deem it necessary the person is transferred to the hospital.

Of the total number of admissions in any year, I do not think upon further consideration that more than 25 or 27 per cent. come under the classification of "regular tramps;" and with regard to persons who have been in prison, I am of opinion that not more than two or three per cent. seek relief at this asylum.

For your further information, I beg to add that a fire police officer, in charge of the workhouse, is in constant attendance from 9 o'clock p.m. until 5.30 a.m. of the following day, whose assistance I can call upon when necessary.

MAURICE POWER,
Superintendent.

To Uvedale Corbett, Esq.,
Poor Law Inspector,
Duffield House, Derby.

A.—RETURN of the NUMBER of PERSONS relieved in the NIGHT ASYLUM of the LIVERPOOL WORKHOUSE during the Month of December 1863, and the corresponding period of 1864 and 1865.

LETTER from the CLERK to the GUARDIANS, MANCHESTER, to
MR. CORBETT.

Poor Law Offices, Manchester,
January 15, 1866.

DEAR SIR,

I BEG to forward to you the enclosed papers relating to vagrancy in the township of Manchester, which I hope you will find to be in accordance with your wish.

Referring to the report of the superintendent of the vagrant wards as to the character of the persons who avail themselves of those wards, I beg to say that I have conferred on this subject with the master of the Bridge Street Workhouse, who having been for several years master of the House of Industry has had many opportunities of forming an opinion as to the vagrants relieved therein, and that he thinks the superintendent has if anything under stated the number who are of disreputable character.

Uvedale Corbett, Esq.,
Poor Law Inspector,
Duffield House, Derby.

I am, &c.
JNO. HARROP,
Clerk.

TOWNSHIP OF MANCHESTER.

D.—RULES AND REGULATIONS.

1. The tramp master shall be hereafter styled the superintendent of the vagrant wards.

2. Any person not professing to be settled in the township nor having any place of abode therein, making application at the vagrant wards for lodgings for the night, provided that such person shall not have been admitted for the period of one month next preceding, shall be admitted by the superintendent. Provided also that any female with children who may appear to be destitute and to require shelter making application for admission, or any person brought by the police and represented as a proper case for admission for the night, shall be admitted by the superintendent, and all persons so admitted shall be required to conform to the rules and regulations in existence for the government of the said vagrant wards.

3. The vagrant wards shall be opened at seven o'clock in the evening, and all persons admitted for the night shall be duly entered and described in the register by the superintendent, after which they shall be searched, and then required to strip and wash themselves thoroughly in the baths provided for that purpose.

4. The males above fourteen years of age shall then be required to perform a task of work, that is to say, they shall be required either to grind one hopper of corn or to do any other kind of work suitable to male inmates and which the superintendent may consider them equal to for a space of time not exceeding $1\frac{1}{2}$ hours; provided that any such male person so set to work may not complain of being sick and thereby unable to perform the same.

5. The females above sixteen years of age shall be required to wash the floors of the vagrant wards and the rugs used therein, or to do any other work which the superintendent may consider necessary and which they may be capable of performing, for a space of time not exceeding $1\frac{1}{2}$ hours; provided that any such female person so set to work may not complain of being sick and thereby unable to perform the same.

6. The supper shall consist of half a pound of bread for each person, and shall be served out every night as soon as the prescribed regulations have been compiled with.

7. The hour for retiring shall for all persons admitted before half-past seven o'clock be not later than 10 o'clock; and for all persons who are admitted after half-past seven, according to the time of their admission respectively.

8. The wards shall be deemed closed at 10 o'clock at night, but the superintendent shall admit after that hour any person applying who may answer the description indicated in Clause 2.

9. The hour for rising shall be half-past five o'clock in the morning, a quarter of an hour being allowed for washing, after which the males and females shall be required respectively to perform the same amount and kind of work as that prescribed to be done on their admission.

10. The breakfast shall consist of half a pound of bread for each person, to be given out at seven o'clock, immediately after which the wards shall be closed until seven o'clock in the evening.

11. The superintendent shall be empowered to give in charge of the police any person admitted who may refuse to perform the allotted task of work, and he shall be empowered also to refuse admission to any person applying who may on any former occasion have wilfully disobeyed the rules and regulations of the vagrant wards, and all such refusals shall be duly reported by him as special cases.

12. The medical officer of the workhouse shall visit the vagrant wards at nine o'clock every night for the purpose of ascertaining whether there be any person therein sick and requiring medical aid, or unable to work, which he

L

shall certify to accordingly, and he shall also attend at any other time when he may be required to do so by the master of the House of Industry, or in the absence of that officer by the superintendent. And any person whom he may deem it necessary to send to the workhouse for medical treatment shall be forthwith admitted through the medium of a relieving officer's order, to be procured as soon as possible, either before or after such admission.

13. The superintendent will be expected to treat all persons under his charge with good temper and firmness, extending at the same time all leniency and kindness to females, and young children especially. He must make a detailed entry of all special circumstances relative to the admission, conduct, or treatment of any person admitted, in the space opposite their names in the register respectively, and he must make a copy of such entry every morning before he leaves the building, and hand the same into the office of the clerk, who shall submit all such copies to the visiting committee of the House of Industry at their ordinary weekly meetings.

14. The master of the House of Industry shall inspect the male wards every night for the purpose of satisfying himself that the rules and regulations are duly observed, and of giving any advice or assistance to the superintendent which he may consider necessary.

And he shall make a report weekly to the Committee of the House of Industry of all such inspections, adding any observations thereon which he may consider necessary.

The matron shall perform the like duties in respect of the female wards.

15. Card playing and all other games as well as smoking in the vagrant wards are strictly prohibited. Order must be maintained, and all improper language will be punished as directed by the Poor Law Commissioners in their regulations for the government of workhouses generally.

ADDITIONAL RULES laid down since the foregoing were passed.

a. That the vagrant wards be opened on Sundays in future at 6 o'clock p.m. for the admission of vagrants, instead of at 7 o'clock, and that the superintendent be required to attend in future at the hour of six on Sunday evenings.

b. That in all cases of application for lodgings made by females stating their age to be under 16 years, the superintendent consult the master thereon, and that the case of each applicant be specially reported to this committee at the meeting next following.

c. That in the case of the admission of any female who may state her age to be under 16 years; and where such statement may be doubted by the superintendent, the opinion of the medical officer be taken in order that the proper kind of labour may be assigned to such female.

d. That all children under 16 years of age admitted into the vagrant wards be referred by the superintendent to the master, and that the master bring them respectively under the notice of the relieving officer having charge of the district in which the vagrant wards are situate.

e. That children under 16 years of age admitted on Saturday nights into the vagrant wards be referred for admission into the workhouse for the following day, Sunday, should the master deem such a course desirable.

f. That boys above 12 years of age admitted into the vagrant wards be not detained in future.

g. That the regulation which prohibits admission to the tramp ward more frequently than once a month be relaxed, so as to allow the superintendent to admit at shorter intervals destitute persons whom he may think it desirable to admit, especially young women and women with children who are sober when presenting themselves, and willing to conform to the regulations of the ward.

That the superintendent state in his weekly report in cases where he refuses admission to applicants at shorter intervals than a month, the special reason for such refusal.

E.

Vagrant Wards, House of Industry, January 13, 1866.

THE superintendent of the vagrant wards reports from his knowledge of the character of the vagrants who nightly resort to the vagrant wards that about 60 per cent. of them are beggars and thieves of the lowest class.

The police frequently apprehend persons in the vagrant wards for petty thefts, and on one occasion three men were apprehended on a charge of garotting a man at Newton Heath within an hour of the time that they applied for admission, for which they were sentenced to penal servitude.

On another occasion a man was apprehended for setting fire to a stack in Cumberland. Numbers of persons who have been admitted to the vagrant wards have been sentenced to penal servitude for housebreaking and garotte robberies in different parts of Lancashire.

FRANS. B. DALTON,
Superintendent of the Vagrant Wards.

VAGRANCY.

REPORT OF DR. EDWARD SMITH, F.R.S., POOR LAW INSPECTOR, TO THE PRESIDENT OF THE POOR LAW BOARD.

To the Right Hon. C. P. VILLIERS, M.P., President of the Poor Law Board.

DEAR SIR,

IN conformity with your request I have now the honour to present a report to you upon the treatment of Vagrants at the workhouses in my district. As my appointment has been so recent that I have inspected each of the workhouses once only, and as on that occasion I found the mode of treatment of Vagrants very various and the whole scheme very unsatisfactory, I have thought it prudent to address a series of queries to the clerks of the unions, with a view to enable me to present to you the fullest and most correct information upon this subject. The replies thus obtained have been tabulated and are presented in a compendious form in the appendix to this report. The questions proposed are numerous, but they are arranged in three series, and the replies may be abstracted and presented in a simple and perspicuous manner. The first series refers to the Vagrant wards and the food supplied to the Vagrants, the second to the task enforced, and the third to the general management of Vagrants. I have further sought to obtain the opinion of the clerks and the workhouse masters in reference to the effect of the present mode of treating Vagrants, and the changes, if any, which it is desirable to make in it. Vagrancy returns.

I have also in each of the workhouses carefully inspected the Vagrant wards, and have endeavoured to estimate the value of the different modes of treatment, both in their effect upon the Vagrants and in their relation to public policy.

On proceeding to discuss this subject I shall first refer to the details of the system as they exist in my district, and then offer some general observations and suggestions.

DETAILS OF THE SYSTEM.

DETAILS OF THE SYSTEM.

1. Of 71 unions and incorporations under my inspection, 10 do not receive Vagrants at the workhouse when in health. These are Bramley, Brigg, Mansfield, Malton, Pateley Bridge, Thorne, York, Barwick-in-Elmet, Carlton, and Great Preston. In two Number of workhouses receiving Vagrants.

**DETAILS OF
THE SYSTEM.**

others, Tadcaster and Wharfedale, there is not a workhouse at which they could be received. Three of the foregoing, Brigg, Malton, and Thorne, admit Vagrants when sick. In one, Hunslet, Vagrant wards are now in course of preparation. In two, Radford and Skirlaugh, there are Vagrant wards, but applications for admission most rarely occur. Hence it appears that in about 20 per cent. of the workhouses under my inspection, there is no lodging provided for able-bodied Vagrants in those institutions.

Exceptions.

In explanation of this fact it must be stated that several of the workhouses, as, for example, Skirlaugh, are situated in positions far removed from the line of traffic and out of the route of Vagrants when passing from one town to another. In other cases there is a workhouse situated in a town which receives all the Vagrants of the neighbourhood; whilst another workhouse, although situated at no great distance from the same town, is not upon a frequented road and receives no applications for relief. In illustration of this I may cite the instance of Nottingham, where large numbers of Vagrants are received, whilst at Radford and Basford, suburbs of Nottingham, there are scarcely any admissions. Hence, other things being equal, the necessity for providing lodging for Vagrants depends upon the situation of the workhouse.

It must also be added, in explanation of the fact of the non-reception of Vagrants at the York and Malton workhouses, that Vagrant wards are provided in a separate building within the town, whilst the workhouse is situated at a short distance therefrom.

In all cases where provision is made for the reception of Vagrants it extends to both sexes, and with the exception of Basford and Radford the Vagrants are lodged in separate Vagrant wards.

Vagrant wards.

2. The Vagrant wards vary in character greatly, and usually one is appropriated to each sex. They are for the most part placed in detached low buildings, which, if of one story only, are low and open to the roof. In others, as at Spilsby, they are placed in the roof of a building, with the cover of the roof extending down to the floor, and are reached by a long flight of steps. Hence they are usually cold in winter and hot in summer, and when placed upon the ground floor are seldom quite dry. The ventilation is almost universally defective. There is rarely more than one window, except in large workhouses, and that is usually placed in a position ill-adapted for ventilation. It is very commonly small, and if made to open and the bed is placed near to it, the Vagrants close it. In numerous instances there is no open chimney, or if one exists it is a small one at the end of a long narrow room. The position of the door, window, and chimney is often such that the current of air is carried quite away from the bed, and has but very little power to renew the air when it becomes vitiated. The instances in my district are few where the character of the room, the ventilation and temperature give the least approach to comfort. The cubic space allowed is usually sufficient, but at certain periods of the year the number of Vagrants

so greatly increase that the room becomes "crowded and not one-half of the proper cubic space is allowed. Thus it very frequently occurs that the maximum number admitted is three or four times greater than the average number, and the evil is further increased when on such occasions there is a large preponderance of one sex. In only 13 instances has the maximum number to be admitted in the wards been fixed by the Poor Law Board, at least so far as the knowledge of the clerks and masters extends, and hence the master and guardians are left very much to the exercise of their own discretion when an unusual number of applicants appear.

In five workhouses there is neither fireplace nor stove in one or both of the Vagrant wards, and consequently there cannot be fire in any weather. These are Bingham, Eccleshall, North Witchford, Sleaford, and Wortley. In a few workhouses there are waiting rooms for Vagrants in which there is a fireplace or stove, but none in the bed-rooms, and in such the opportunity of drying the clothes of the Vagrants and of obtaining sufficient warmth is defective.

Where there is a stove or fireplace it is usual to light a fire in wet and cold weather, but this varies with the opinion of the master as to the degree of cold, and is not lit until night when the Vagrants have entered. Thus at Boston the fire is lit "when the weather is cold enough to require it;" at Caistor "when the Vagrants are wet or seem starved;" at Ely "until 9 p.m. in severe weather only;" and at Great Ouseburn "in very cold and wet weather." At Driffeld the fire in the men's ward is "never lit, as it will not burn;" at Gainsborough it is "never lit;" and at Newark it is "very seldom" lit. In some a fire is lit at night from Michaelmas to Ladyday and during other fixed periods of the year irrespective of the state of the weather. In some the fire is continued until 9 p.m., and at others until it burns out or until midnight.

Generally speaking, I doubt very much whether the fire is sufficient to enable all the Vagrants to dry their clothes in wet weather, but in those places where the numbers are considerable the room is warm, and when overcrowded the air is close, hot, and oppressive.

3. In 17 workhouses, or in nearly one-third of the whole, there is not a separate petty or watercloset for the use of either one or both sexes, but night-chairs or chamber utensils are placed in the rooms for their use. Considering the very mixed class of persons and the large numbers sometimes admitted this is a serious defect, and is attended with much annoyance to the Vagrants. The workhouses referred to are Bingham, Boston, Bourne (for females), Ely (for females), Gainsborough, Holbeach, Horncastle, Louth, Newark, North Witchford, Patrington (for females), Radford, Skirlaugh, Southwell (for females), Spalding, Spilsby, and Whittlesea. At Pocklington a petty is provided for males, but it is not used because the walls are so low as to allow the Vagrants to escape.

**DETAILS OF
THE SYSTEM.**

Baths.

4. In only 10 workhouses is a bath with hot water provided for both sexes; whilst in another, one is provided for males only. In three there is a cold bath, but it cannot be used in cold weather, or with persons in feeble health. In two only are the applicants always bathed on admission; whilst in two others they are generally bathed, and in five others they are sometimes bathed. In one they are usually bathed during the summer only. Hence in 80 per cent. no provision is made for bathing Vagrants, and in only about 2 per cent. is bathing usually practised.

Bedding.

5. The kind of bed and bedding which is supplied varies very much, but it is usually better for women than for men. In many cases an inclined wooden frame is provided for men, and it is either divided into parts, the width of a man, by very low wooden partitions, or it is undivided. In some places no straw is provided, whilst in others straw is laid loose on the wood, or it is placed in ticks upon which the Vagrants lie. When the straw is loose it is changed as often as the master may deem to be necessary; but when it is in ticks it usually remains there until the tick is filthy, and must be either washed or burnt. In some workhouses the master objects to the use of loose straw lest the Vagrants when smoking should set fire to it, but I have not found any such act occur where it is in use.

When a settle is not provided it is usual to have iron or wooden bedsteads, upon which is placed a mattress filled with straw or chaff, and which by constant use becomes very dirty. When the mattress is thin the Vagrants suffer from the sharp edges of the laths underneath.

The instances are very few where women lie upon a wooden settle, but a bedstead with a mattress or chaff bed is provided for them.

The coverings consist usually of one or more rugs for men, and sometimes blankets and sheets are supplied to women. In a few places I have found the covering miserably deficient—the rugs being exceedingly thin—and in two places at least a kind of sack-ing only is provided. In two, Gainsborough and Stokesley, no covering is given to men. When it is deficient the Vagrants require the use of their own clothes to cover them at night, and if the clothes are wet they are precluded from drying them. Generally speaking, I think the bed covering which is supplied is deficient, and when mattresses are used they are commonly very dirty, sometimes indeed filthy.

Food.

6. In 10 workhouses no food is given to Vagrants, except they are ill or are "sheer exhausted," and this is defended on the grounds that "it would encourage vagrancy," "there would be too many applications," "to prevent the wards being filled with idle vagabonds," "the system appears to have answered well," and "there being no workhouse, it is impossible to provide food." The workhouses referred to are Bridlington, Driffield, Helmsley, Kirby Moorside, Malton, Pocklington, Ripon, Tadcaster, Thirsk, and York, and it is worthy of remark that all are in Yorkshire.

When food is given it consists almost universally of bread, either with or without gruel or porridge. The fluid food when given is always warm or hot, and it is more generally given to women and children than to men. In this respect the master, matron, or attendant varies the rule somewhat according to circumstances, giving any gruel or porridge which may have been left from the supper of the inmates to the more respectable of the Vagrants, or to those who are feeble and out of health, and particularly in wet and cold weather. Hence, when left to their judgment, it will be variously, but in many cases kindly exercised.

DETAILS OF
THE SYSTEM.

Food.

Bread is sometimes given alone at night and with gruel in the morning, or *vice versâ*. It is given alone, as a rule, in 13 workhouses, or in nearly one-fourth of the whole, and in others it is given alone to men, whilst women obtain other food in addition. One meal only is given in 16 workhouses, or in nearly 30 per cent. of the whole, and in some places it is given at night and in others in the morning. In two instances this consists of gruel or porridge only.

The allowance of bread varies from 4 ozs. to 8 ozs., but it is more frequently 6 ozs. or 7 ozs. It is either the same for women as for men, or it is 1 oz. less for women. The quantity of gruel or porridge varies from 1 pint to 2 pints, and sometimes it contains a proportion of milk. Tea or coffee are sometimes given to women, and also to men who are not well.

Where food is not given at night a presumption exists that the Vagrants obtain much food during the day by begging, and when the Vagrants bring food into the workhouse the night's meal is not supplied to them. When food is not given in the morning there is no task of work provided, or the Vagrant prefers to leave without breakfast rather than perform the task. Where food is given in the morning and a task is enforced, it is given before the task is begun, or when it has been half finished, or when it has been completed, or in some cases a part of the food is given before work and a part afterwards. Hence, a Vagrant may be required to perform two hours' and even four hours' labour whilst fasting, and if he should be usually ill-fed or have not had a supper on the preceding night this must be a most severe punishment.

7. A task of work for men exists in 37, or a majority, of the workhouses, but for women in only 15, or about one-fourth. In 29 only is it known that the task has been authorized by the Poor Law Board, and in one or two it has been only authorized in part.

Labour.

The kind of labour enforced for men is breaking stones or cobbles in 23 workhouses, either regularly or in alternation with digging in the garden and picking coir or oakum. In nine workhouses oakum or coir picking is the sole task enforced. In a few, corn is ground in a mill, either with a separate handle, or with a common handle at which many can work. In other workhouses the Vagrant is employed in pumping water into the different tanks, or in pumping sewage out of cesspools, or simply in cleansing the the ward and folding up the bedding.

DETAILS OF
THE SYSTEM.

Labour.

The amount of these several kinds of labour which is required varies very much. At Northallerton 1 cwt. is the quantity of stones which must be broken, whilst at Nottingham and Patrington the quantity is 5 cwt., and part of it must be done at night and the other part in the morning. In others, time is the measure of the work, and this varies from two hours to four hours. The quantity of oakum to be picked is very generally 1 lb. (but $\frac{1}{2}$ lb. only is required at Wisbeach), and this occupies from $1\frac{1}{2}$ hours to 3 hours. The measure of the other kind of work is by time. It is also to be observed that the labour required to break stones or to pick oakum varies very much. Some kinds of stone are much harder than others, and some kinds of rope much more difficult to pick than others, whilst the tools employed, and particularly in picking oakum, vary in the assistance which they afford.

Generally speaking, oakum picking is more easily performed by "an old hand," and by one with strong fingers, than under the contrary conditions. In only 11 workhouses is any other labour enforced for women than that of cleaning the vagrant ward, and in these the task is oakum picking. The labour in cleaning the room must be very small, whilst that in picking oakum may be severe for a woman.

The average duration of this task is from a quarter of an hour for women at Newark, and half an hour for men at Malton, to four hours for men at Grantham, but it is usually longer in the summer than in the winter. The shortest period occupied in performing the same task is about half the longest; that is to say, one hour instead of two hours, one and a half hour instead of three hours, and two hours instead of four hours.

In the opinion of only one master is the task enforced too severe, and he considers that breaking 5 cwt. of stone is too severe on short days and in bad weather—an opinion in which I certainly concur. On this point it must also be noted that stone-breaking is for the most part performed either in the open air or in imperfectly closed sheds, and as the Vagrant is always poorly clad, he is exposed to no little danger of taking cold whilst performing it. It is also very liable to cause injury to the eyes whenever the guardians neglect to provide a proper covering.

In 21 workhouses, or in about two-thirds of those having a task, the task is insisted upon, unless the Vagrant be out of health, or, in consideration of his respectability, the master deems it right to relieve him from it. The only mode, however, by which in most places this is attempted is by withholding food, and if the Vagrant is willing to leave the workhouse without his breakfast he is not detained; but in some he is not allowed to go until four hours have elapsed. The places are few where the Vagrant is taken before a magistrate to be punished for not performing his task, and in some, as at Caistor for example, this course is impracticable on account of the great distance at which the nearest magistrate resides; moreover the police refuse to apprehend Vagrants without a warrant, and they escape before a warrant can be procured.

The proportion of those who refuse to perform the task is in some places very considerable. Thus, at Ely, "most of them;" at Eccleshall, Sheffield, and Southwell, one-fourth; at Boston, one-third; at Hensworth and Northallerton, one-half; and at Ripon, 48 out of 50; but in others it is very small. This does not appear to have any relation to the kind of task and the amount of labour exacted, but it has a relation to the severity of the measures used to enforce it. DETAILS OF
THE SYSTEM.
Labour.

Food is given in certain workhouses even when the Vagrant refuses to work, and as the proportion of those who go without food rather than work is about the same as that of those who refuse to work, it is probable that such persons know that they have the means to obtain food elsewhere.

The guardians of certain unions justify the omission of task work on various grounds; as, for example, "because no food is given lest it should encourage vagrancy;" "giving no food is considered preferable;" "it was found not to answer with so few;" "no satisfactory plan has been devised;" "itch and filth;" "the few women who apply have generally an infant;" and "no means for carrying it out."

8. There is usually some person who has special charge of the Attendant. vagrant wards, and this is either the master, with or without the help of an inmate, or the porter, or an inmate. In 12 workhouses, however, there is no specially appointed person, and in five this duty solely devolves upon an inmate. Hence it is clear that the attention which is devoted to this part of the duties of a workhouse varies much, and when the same officer, as the master or porter, has to perform other important duties, it cannot be very great.

9. The wards are not usually placed at so great a distance from the workhouse as to be very inconvenient to the person who has charge of them, but they can usually be approached only from the outside of the workhouse, and in four or five workhouses inconvenience is felt by the master. Situation of
wards.

10. In only six workhouses is there a bell in the wards communicating with the master's, porter's, or attendant's room, and in one of these (before a bell was placed there) a woman died in the night without the knowledge of any one. Where it exists it is usually in the women's ward only, if the wards for the two sexes are so near to each other that the men can gain the attention of the women. In a few other workhouses the attendant or the master is so lodged that he can hear when a call is made, but in a majority of the workhouses the Vagrants have no means of obtaining aid if severe illness should overtake them. The master at Helmsley adds, in reference to the bell, "if the master is ever to sleep there had better not be one;" but I believe that a bell should exist, and yet the master may not be unnecessarily disturbed. Bell.

11. The wards for the two sexes are very generally quite distinct, but at Doncaster the men pass through the women's yards; at Gainsborough the women pass through the men's ward; at Separation of
sexes.

**DETAILS OF
THE SYSTEM.**

Period of
closing and
opening wards.

Nottingham one sex passes through the day wards appropriated to the other; at York there is a day room common to both sexes, and at Easingwold they can climb the partition walls.

12. The time of closing and opening the Vagrant wards varies in different workhouses. In some there is no fixed time, in others they are never closed night or day, in others, and these are a large majority, they are closed at 8, 9, or 10 p.m., after which no Vagrant can be received. They are opened in the morning at from 6 to 8 o'clock, the hour in some places being earlier in the summer than the winter.

Excess of
applicant.

13. When more Vagrants apply for admission than the wards can properly accommodate or than the Poor Law Board have sanctioned, they are sometimes passed into the wards, as at Goole and Hull, and then the wards become crowded, as at Gainsborough, Goole, Lincoln, Nottingham and Worksop, and as a consequence they are ill ventilated and very uncomfortable. In 16 workhouses the excess of applicants is sent to the overseer or relieving officer; or the porter, master, or police takes them or sends them to a lodging house. In three workhouses they are however dismissed without any relief, and in one or two others that result sometimes follow. These are Kirby Moorside, Nottingham, Thirsk, and Sculcoates.

Relieving
officers.

14. In 16 unions, or nearly 30 per cent. of the whole, relief of some kind is given by the overseers or relieving officers away from the workhouse. These include both those workhouses where there are not any Vagrant wards as well as some of those where they exist. In 21 workhouses, or more than one-third of those relieving Vagrants, police officers are employed as assistant relieving officers in certain parishes of the union, and the relief then afforded is lodging only in most instances, but some are authorized to give a certain quantity (usually 1*d.* worth) of bread, and in one or two places they give coffee also. The sum usually paid for the lodging is 2*d.* or 3*d.* for each person when well, and 6*d.* when ill. No task of work is ever allotted under these circumstances. In several of the unions, as, for example, Easingwold, Ely, Helmsley, Holbeach, Nottingham, and Thorne, the Vagrants first go to the police.

**SUMMARY AND
OBSERVATIONS.**

SUMMARY AND OBSERVATIONS.

Such is a short statement in detail of the mode in which relief is furnished to Vagrants in my district, and I now add a summary of the information which has been given.

1. Vagrants of both sexes are received in five-sixths of the workhouses in my district.

2. In localities quite away from the chief lines of traffic scarcely any Vagrants apply for relief, and provision for them is scarcely requisite, but there are some workhouses in which the omission to provide relief is not I think justified.

3. The Vagrants are almost universally lodged in separate wards, the access to which is from the outside of the workhouse, and they are for the most part placed under the immediate superintendence of some person specially appointed for that purpose.

4. The form, convenience, and sanitary conditions of these wards vary in a remarkable degree, and generally speaking they are not comfortable and do not satisfy me.

5. The cubical space allowed is sufficient for the average number of occupants, but quite insufficient for the large number which at certain seasons of the year and under exceptional circumstances apply for admittance.

6. The bed coverings are often insufficient and the bedding dirty. The best form of bed for men is, probably, a wooden settle laid on an inclined plane and divided into cribs to be filled with clean loose straw. Bedstead and straw or chaff bed must be used for women, and the ticks should be washed immediately they become dirty. It would probably be good economy to cover these beds with coarse linen sheeting, which could be washed.

7. The maximum number of Vagrants to be admitted to each ward should be fixed by the Poor Law Board, and the return to the Board should contain a statement of the number admitted on each night into each ward, and not simply, as at present, the total number of applicants weekly. There is reason to believe that the wards are sometimes greatly overcrowded, and that the bedding accommodation is then quite insufficient to decently lodge human beings.

8. There should always be an open chimney in each room, with a fire lit in the winter time as soon as it becomes dark, and continued until after the wards are closed for the night. Opportunity should be given to the Vagrants to dry their clothes when wet. There should be a bell communicating with the sleeping room of some officer, also separate petties or waterclosets, and baths with hot water attached to the Vagrant ward, and all persons should be bathed on admission. At present there is great want of uniformity in all these particulars.

9. Far too great diversity exists in the arrangements for the supply of food. Food should be given both at night and in the morning to all such persons as have not a sufficient supply of food with them. It should consist of bread or bread and gruel for the men, and bread and gruel for the women, with a discretionary power be given to the master and matron to vary it somewhat with the health, age, and apparent respectability of the Vagrants. A part of the food should be given in the morning before the work is begun, and another part at a later period.

10. I do not think that the reasons adduced for withholding food or for giving food at one meal only are satisfactory.

11. The task of work is at present too varied in its extent, and too great laxity exists in enforcing it. It is very desirable that it should be rendered uniform, and that means should be devised by which it may be enforced in all unions. Stone breaking is not an improper employment for men, but it should be performed under cover, and the quantity should not exceed 2 or 3 cwt. When oakum is picked a wooden mallet should be allowed, or the rope should be separated into strands before it is given out to be picked.

12. It is very desirable I think that a suitable task of work

**SUMMARY AND
OBSERVATIONS.**

should be insisted upon for able-bodied women without young children. Whether under proper supervision they could be employed in cleansing other parts of the workhouse than the Vagrant ward, or in washing some of the linen of the house, is worthy of consideration; both in reference to this task work and to the great deficiency of labour which now exists in all workhouses.

13. Probably an uniform period of labour of three hours' duration would be appropriate. It is generally felt that four hours is too long a period for the detention of the Vagrant, and as a result of this extreme limitation the guardians have gone to the other extreme of being content with one to two hours' labour.

14. A discretionary power should be committed to the master and matron to remit a part or the whole of the period of labour in cases where the Vagrant is *bond fide* seeking employment.

15. Power should be given to the police to take any Vagrant before a magistrate without a warrant who refuses to perform a task authorized by the Poor Law Board, and food should in all cases be given.

16. I do not think that either the guardians or the master regard the care of the Vagrants in the same light as they do that of paupers. It is rather an appendage to the workhouse system than an integral part of it, and it is one which they feel to be irksome. I doubt whether as much attention is given to this part of their duty as its importance to the public and to the Vagrants of good character warrant. I think it desirable that some person should be more specifically charged with the duty than at present, but where the master and matron are the only paid officers in the workhouse, as in many workhouses in my district, it is not possible for them to discharge this and their other duties in a satisfactory manner.

17. In many workhouses situated on frequented roads there is need for further accommodation for this class, to meet the occurrence of periods of great pressure of applicants.

**GENERAL CON-
SIDERATIONS
AND RECOM-
MENDATIONS.**

GENERAL CONSIDERATIONS AND RECOMMENDATIONS.

When endeavouring to determine the course which should be pursued in the treatment of Vagrants, both on grounds of humanity and of public policy, it is essential first of all to estimate correctly their character. None can do this but those who are brought into constant contact with them, and therefore none so well as the workhouse masters and the police; but it must not be forgotten that their judgment in reference to the whole class is apt to be unduly influenced by the character of the major part, and may perhaps be somewhat too severe.

I have sought their opinions from the masters in my district, and the details are placed in the appendix, but the general experience is very discouraging. Some, as the master at Doncaster, believed them to be "totally reprobate;" others, as the master at Driffield, affirms that "three-fourths at least are idle profligates;" or the master at Easingwold, that "one-third appear to be habitual tramps;" the

master at Bingham states that they are "a worthless set of vagabonds that never work, but tramp from one place to another;" the master at Bourne writes that "the greater portion are imposters, not really in want of food, as they beg their food during the day and apply for lodging at the workhouse;" and the master at Great Ouseburn affirms that "they are generally insolent, mischievous, and ill-behaved in the extreme, as is evident from their wanton destruction of the bed clothes and their own clothes, and from the obscene writing and characters found upon the doors and walls of the wards."

GENERAL CON-
SIDERATIONS
AND RECOM-
MENDATIONS.

These may be regarded as the opinions of those who alone can even approximately form a correct judgment in the matter, and so far but little can be said on the score of humanity against any treatment which keeps the Vagrant alive. There is, however, another aspect which is almost equally painful, and one which is fitted to excite sympathy. There is a proportion of Vagrants who are men and women of good character, honestly moving from one part of the country to another in search of employment, and who, in a state of temporary destitution, must submit to the evil of mixing with, nay even of lying side by side with the most depraved and unworthy characters, and of being regarded by officials with the suspicion and even detestation which they entertain towards this class as a whole. This is felt and acknowledged even by those masters who write so sharply against the class. At Bridlington it is said that "sometimes a person in search of work will apply;" at Goole, "half, if not more, are regular tramps, the rest are chiefly in search of employment;" at Howden, "Vagrants applying for relief in this district are generally men engaged in different trades passing from the chief towns of the West Riding to those of the East, and *vice versa*, and are generally well conducted;" at Knaresborough "one-half are working men in search of work;" at Sleaford "some have been in search of work, and appeared to be industrious men;" at Wetherby "20 per cent. are apparently men of good character in search of work; two per cent. are women in search of their husbands;" at Wortley "those applying here are believed to be on the whole needy wayfarers."

Hence it is clear that the class is a mixed one, and that the proportion of good to bad varies with the part of the country. Any plan of treatment which shall not be discriminating must act injuriously either by pressing harshly upon the honest poor, or by promoting vagrancy amongst the bad, as the system adopted is harsh or lenient.

This is, however, really the character of the present system; and 37 masters of unions, or 38 per cent. of all having charge of Vagrants, express their opinion that it has tended to promote vagrancy. That it has done so much good is to be attributed in a great measure to the judicious conduct of the masters who desire to discriminate between the good and the bad, and that it would have done less evil had a proper task been adopted and rigidly enforced with regular tramps is highly probable, both from the

GENERAL CON-
SIDERATIONS
AND RECOM-
MENDATIONS.

reason of the thing and from the experience of some masters, as that at Retford, where such has been the practice.

The next question is, therefore, to ascertain by what method a proper discrimination can be exercised, and a different treatment be awarded to the industrious and to the idle. On this point also I have ascertained the views of the masters of workhouses, and they very generally recommend two things, viz., that the practice shall be uniform throughout the country, and that the experience of the police be engaged in the matter.

Of the former I need not say anything further, but of the latter it may be added that some recommend the removal of the relief of Vagrants altogether from the workhouse to some place which shall be altogether under the control of the police, whilst others suggest that all Vagrants should first apply to the police, and should receive from them an order for lodging only, or for lodging and food, either at a lodging house or at the workhouse, according as they are known or not known to be bad characters, or the urgency of their wants.

The master at Bingham suggests that relief to the able-bodied during the summer should be refused, except in special cases; and that a relieving officer for Vagrants should be everywhere appointed. The master at Doncaster states that "chargeable vagrancy ought not to be allowed by the law." The master at Newark states that "the fact of a police officer being the relieving officer of Vagrants certainly diminishes the number very materially." The master at Nottingham writes, "Before a tramp leaves any place where he has stayed for the night let him prove his ability to travel to the police; or let some uniform sum, say 3d. per day, be given to provide lodgings in every parish by the constable for wandering women. Lodging-house keepers would be benefited as well as the tramp, and the law against Vagrancy more strongly enforced."

Such expressions of opinion having, moreover, more or less the authority of the clerk to the union, who himself made the replies to the returns, are worthy of some consideration, and may aid somewhat in pointing out the proper solution of the problem.

CONCLUSION.

CONCLUSION.

As a conclusion of this report, and after some consideration of the subject, I venture to submit the following observations, viz.:-

1. As a matter of public policy it is desirable to reduce the number of beggars to the lowest limits, and to that end it is needful, on the one hand, that the laws against Vagrancy be firmly enforced, and on the other that the State provide some suitable mode of relief to destitute persons.

2. In administering this relief it is most desirable that discrimination should be exercised in reference to the character of the Vagrant, so that the professional beggar and the idle and dissolute tramp should be distinguished from the man or woman who is

honestly in search of employment or of some lawful end. As the police is the public body to whom beggars, thieves, dissolute and idle persons are the most likely to be known, their aid should be enlisted in the discharge of this duty. CONCLUSION.

3. In all towns where there are police stations Vagrants should first apply there, and such a record should be kept of them, and such a ticket given to them to present to the next police station as may be deemed desirable. They should have power to supply lodging only, or lodging and a certain amount and kind of food to the Vagrants as their knowledge of them and the immediate wants of the Vagrants indicate.

4. In towns it would be much better that the tramps should be lodged and fed in some building situated near to the police station, and kept under the control and inspection of the police, rather than that after attending at the police office they should be required to walk a considerable distance to the workhouse.

5. It is essential that a selection be made of suitable kinds and amount of labour, and that an uniform system be pursued throughout the country. It is also, I think, most important that power should be obtained by which more speedy and severe punishment may be inflicted upon such as tear their clothes and make use of obscene or abusive language.

6. In country places there should be a relieving officer for Vagrants, who might be a constable, or a police officer, or otherwise, to whom Vagrants should apply, and upon whom the power should be conferred to give lodging, or lodging and bread at his discretion. He should live on a frequented road, and several would probably be needful in a union.

7. The guardians might in many places supply the bread and gruel required at the Vagrant station.

8. All sick and destitute Vagrants should be sent to the workhouse.

9. The Vagrant station and the whole system of relief should be under the direction of the Poor Law Board and the inspection of the Inspector of the district.

This plan would remove the charge of Vagrants from the workhouse, would allow the workhouse officials more time for the discharge of their other duties, and would place the Vagrants under a responsible public officer.

I have, &c.

EDWARD SMITH,
Poor Law Inspector.

ADDITIONAL OBSERVATIONS.

BASFORD :

No special provision for the accommodation of Vagrants has been made in the workhouse of this union.

The house is situated near to Nottingham, where the Vagrants usually go. The number (14) relieved during the year is considerably above the average number relieved in the workhouse.

In the plans for workhouse enlargement, the guardians contemplate provision for this class.

Vagrants are relieved at Ilkeston in this union (distant from the workhouse about nine miles by road) by ticket for a bed upon a lodging house keeper, given by the assistant overseer.

BOURN :

When food was not given at this workhouse there was but little dissatisfaction evinced.

Where there is no task work no doubt the officers ought to have a discretionary power in giving food.

Food ought to be cautiously given to the able-bodied tramp; there is no doubt where food is given indiscriminately it has a tendency to encourage vagrancy.

BRAMLEY :

Most decidedly the relief afforded to Vagrants has encouraged vagrancy, as shelter is hereby afforded to a class, a very large proportion of which ought to be either in work or in receipt of relief from their parish.

CAISTON :

Taking the first quarter here particularized, out of 189 vagrants admitted, 132 of them were under 40 years of age. This will be about a fair sample of the kind of Vagrants received into our vagrant wards.

DONCASTER :

As the above questions are addressed to the officers for a reply, and not to the board of guardians, by the Poor Law Board, the answers and opinions expressed are requested to be taken as the private sentiments of the officers and not of the board of guardians, that board having declined in consequence to entertain the questions.

EASINGWOLD :

So far as this union is concerned, I think about the same number of Vagrants would apply if shelter only was given and no food, and I think shelter alone cannot greatly encourage vagrancy.

ECLESALL BIERLOW :

The guardians would willingly afford relief and shelter to working operatives on their way to a fresh market for their labour, but such should bring credentials from former employers, or other respectable persons, in the district from whence they come.

GAINSBOROUGH :

The guardians are at present engaged in making arrangements for improving the vagrant wards at the workhouse, in accordance with the suggestions contained in the report of the inspector made on his visit to the workhouse on the 13th October.

GREAT OUSEBURN :

The district comprised in this union being a very wide one, and several of the townships being distant from the workhouse as far as ten miles and upwards, it is impracticable to relieve all Vagrants in the workhouse.

The principal portion of those who are not so relieved are supplied, on application to a police officer, with a ticket for a night's lodging at a common lodging house, but no other relief is granted by the police, and this is generally all the relief given.

In villages where there is no police officer the Vagrants are relieved with a night's lodging, and sometimes a trifle in kind by the overseers. Where practicable an order of admission is always given for the workhouse.

The system of employing the police to give tickets to Vagrants for nights' lodgings is found to answer well, as it brings them under the notice of the police.

HELMSELEY :

During the last ten years there has been a remarkable change in the class of Vagrants admitted into this workhouse ; formerly they chiefly consisted of men with their wives and families, or dissolute women with children, who visited the different unions in a district about once a month, and were as well known to the country relieving officers as the settled poor. This class has entirely disappeared, and the present Vagrants are principally young, able-bodied men seeking work, but to judge from their language and conduct in the wards they have sunk themselves so low that no master will employ them, and many do not want employment. During the four quarters of last year there has only been six male Vagrants relieved at 60 years of age, and three at 55, showing that nearly the whole are young, able-bodied men, who might find employment if they were inclined to work.

We find the employment of police constables as assistant relieving officers for Vagrants to act as a check against those vagabonds pilfering and stealing whilst travelling in the district, which used formerly to prevail to a great extent. The fact of their having to apply to the police, who take down their names, &c., acts as a clue to their identity in cases of robbery, &c.

HOLBEACH :

This is an entirely agricultural district.

HOLBECK :

If the police had power to relieve Vagrants there would be but few but the honest working man, who is in search of employment, who would find assistance. They have a better opportunity of judging the character of Vagrants than a workhouse master.

HULL :

Vagrants generally are a class who will not work if they can possibly avoid it. They are a sort of incubus sticking to the skirts of the industrious portion of the community ; their language and habits are vicious in the extreme ; there is a charm to their minds in the idea of being able to wander about the country unrestrained, begging their way (if nothing worse) from town to town ; in fact they have reduced it to a profession.

Not unfrequently the class for whom vagrant wards were first instituted, viz., the industrious poor passing from one place to another in search of work, are met with ; frequently such cases are taken into the reception ward to keep them from the contamination of the professional tramp.

One would think that a tramp ward had not much in it to encourage vagrancy, still there is the certainty of shelter and food, with a community of companionship and ideas very grateful to the feelings of the professional tramp.

As I have stated before, their strolling life has the greatest charm, and if they could be made more stringently answerable, especially to the rural police when in transitu, it might check the evil considerably. If a task of work suitable to the individual were prescribed it should be compulsory on the authorities in every workhouse to have it carried out, and on refusal the person taken before a magistrate ; under these circumstances it would be advisable to have a policeman as assistant relieving officer.

MANSFIELD :

Doubtless the relief afforded to Vagrants encourages vagrancy, as it enables them to spend just so much the more of what they beg and pick up on the roads and in the towns and villages on their line of route in drink and debauchery.

For some time the superintendent of police acted as relieving officer to this class, with good effect at the first. The chief constable of the county, however, has declined to allow him any longer to discharge the duties of the office.

I am strongly of opinion that if it could be made worth the while of an active, energetic sub-officer of police in every town to hold the office and discharge its duties very strictly as regards a rigid investigation of each Vagrant's means of living and object in travelling, it would greatly check the evil. A very great proportion of Vagrants have a very wholesome dread of anything in the shape of a police officer.

NORTH WITCHFORD :

The relief, taken in reference to the task of work required for it, can scarcely encourage vagrancy ; there must be greater inducements by what is obtained in the shape of charity by begging.

P

PICKERING:

A few years ago when relief was regularly given, we had frequently in one week, sometimes in one night, as many as we have now in a quarter of a year.

Some years ago, when the number of applicants was nightly very large, varying from, say about ten to forty, the relieving officer was urged by Mr. Hawley, a former inspector, to use every fair means to lessen the cost incurred by relief given to them. The method he chiefly adopted was, in the first instance, to give large numbers of them tickets, and then in about half an hour or an hour afterwards to follow them to the different lodging houses, where he easily discovered they had practised numerous and various impositions on him, and where this was clearly discovered he made them give up their tickets. In some cases he took them to the police station and had them searched. By these and other means the number speedily decreased, so that at present the number of applicants are comparatively few.

PONTEFRAC:

The task of work stated is that intended by the guardians, and on the subject of which they have been corresponding with the Poor Law Board, who, in their last communication sent a form to be filled up, stating the task, &c., when they would approve of it.

The task will operate as a rule immediately on completion of the boundary wall round the site of the workhouse.

Since the formation of the union the number of Vagrants decreases nightly.

RIPON:

Some change is evidently necessary in order to check vagrancy. It is to be feared that the present mode of dealing with Vagrants tends to increase rather than decrease mendicity.

One of the great evils is the want of some uniform system in dealing with this class of persons. In some workhouses, for instance, good food and comfortable shelter is provided, and no test is applied, whilst in other houses each person is bathed when admitted, and a labour test is adopted and strictly carried out; where the latter system is pursued the professed mendicant seldom applies for relief, whilst the treatment in the former encourages vagrancy, hence the necessity of a better regulated system. Again, in a great many unions (as is the case here), no order is given for their admission into the workhouse, which is very objectionable. If such orders were given by the police, and each person was subjected to a strict examination, there is no doubt it would lead to a decrease of vagrancy, and, indeed, if the police authorities had the entire control over them it would prove one of the best means of effectually checking this increasing evil.

SCULCOATES:

Since the encouragement given to vagrancy, during the last ten or twelve years the numbers have increased fifteen to one. In the year ending March 1851, the numbers were 102. Four years afterwards they rose to 205. Two years later to above 400. In 1860 and 1861 the average was 330. While in 1862 they suddenly rose to 1,049. In 1863, to 1,758. In 1864, 1,566; and March 1865, 1,304. So that during the last two years the numbers have been diminishing.

Whether the cotton famine was one cause of the great increase in 1862, I cannot say. Generally they are of all sorts of trades, and only a small proportion factory hands.

SHEFFIELD:

In August 1864, the following resolution was passed by the guardians of this union, viz:

"That in future all Vagrants, both male and female, before being admitted into the vagrant wards, be referred to the town hall, that the chief constable may cause the names, ages, trades, or any other particulars of the parties the board may think necessary to be taken, and that a copy of such particulars be handed to the applicant for delivery to the master of the workhouse, or in his absence, the assistant master, or porter."

A form of pass as approved by the board, and now in use, is annexed.

It was further resolved, that the following be printed at the commencement of every pass-book, viz.:

"No Vagrant must be refused a pass.

"No question must be asked the Vagrants but those on the pass."

The above regulations have been found to work very well, and I think a few

more questions, such as "Where last employed," "By whom," &c., on the form of pass would be an improvement.

SKIRLAUGH :

Skirlaugh union workhouse is not situate in the direct road leading to any large town, therefore Vagrants have not the plea that they are travelling to any place of employment, but it may be termed an out-of-the-way place for Vagrants, and it is believed that is the reason of no admissions.

SPALDING :

The foregoing replies and remarks are the result of a long interview with the master of our union workhouse, who nearly entirely has the control and management of Vagrants in this union, for it is found that there is a great unwillingness on their part to present themselves to the superintendent of police when the wards happen to be full ; and I agree in the master's views and suggestions as above stated ; but I have often been much struck myself, in my capacity of clerk to the magistrates over a very large petty sessional district, at the very small number of Vagrants who, notwithstanding their alleged idle and other bad habits, are brought before the magistrates either for street-begging, pilfering, or other crime or misdemeanor. I am at a loss to understand how they really live so well as they appear to do.

STAMFORD :

N.B.—The answers are nearly all given by the master of the union, and the superintendent of police.

TADCASTER :

We think that since lodging has been provided in the vagrant wards there are not so many applicants as when lodging was provided at common lodging houses.

WHARFEDALE :

Forty-two vagrants were relieved during the year ended 30th September 1865, at a cost of 15s. 3d.

Of the above, thirty-three at a cost of 10s. 3d., were relieved by the assistant overseer of Fewston, that place being about ten miles distant from the residence of the relieving officer, the remainder being relieved by the relieving officer at his residence.

WORKSOP :

In the master's opinion Vagrants ought not to be relieved within the workhouse, but in detached wards built expressly for the purpose, with a bath for use when necessary, and a room where each could be properly searched and their clothes removed for the night, an attendant sleeping near to communicate with the master in cases of emergency ; the wards to be warmed in winter by hot-air or steam pipes. By removing their clothes the present prevailing practice of tearing them up would be prevented. In return for the relief given a suitable task of work should be strictly enforced.

WORTLEY :

I believe the system of task work rigidly carried out with the able-bodied Vagrants, and the use of a bath, to be two essential points to be noticed in dealing with Vagrants.

YORK :

In time of fairs and races we are over-crowded with tramps, and have known both sexes keep their rounds for the past four years.

Another class, discharged soldiers, deserters, returned convicts, thieves, prostitutes diseased, where hard work and little food would be of great service.

And another class, working men of every trade and calling deserving assistance.

BARWICK-IN-ELMET :

There are no Vagrants of either sex received into the workhouse ; the different townships in this incorporation being at a distance from the workhouse, it is considered preferable by the guardians when vagrants apply for lodgings to give them a ticket to go to a lodging house in the immediate neighbourhood rather than send them into the workhouse.

The lodgings are paid for by the guardian of the township where the Vagrants apply, and afterwards charged upon the common fund of the union.

CARLTON :

The Carlton Incorporation is not troubled with Vagrants, being at a very small village and out-of-the-way place. The townships comprising the Carlton Incorporation maintain their poor at their respective townships, and the old and infirm are principally sent to the Carlton poorhouse.
